REPORT OF
THE BOARD OF SELECTMEN

To the citizens of Maynard:

Herewith is presented the annual report of the Board of Selectmen for the year ending December 31, 1964.

The year 1964 has seen Maynard's growth patterns extended in many varied directions. The residential area continues to expand at a rapid pace with industrial and commercial growth taking a marked upswing also. These tremendous fluctuations in growth cast its reflections upon the elected and appointed officials who are required to give more and more of their time and efforts in order to insure the citizens of Maynard that the public good is properly represented. The Board of Selectmen has had the pleasure of working closely with many Boards and Committees during 1964, and at this time we wish to direct our remarks toward some of the more significant developments which directly affect Maynard's growth.

1. The single most significant event during the year 1964 was the completion of the High School construction. The School was opened to students in September which in turn relieved an overcrowded elementary system. The High School Building Committee is to be congratulated for the excellent manner in which they completed a most difficult assignment.
2. The Insurance Committee is probably the least known Committee in Maynard, but it is one of the hardest working groups of people in the Town. The Committee is nearly three years old, and in that short period of time, has completely revamped the entire Town insurance program. The Committee has been compelled to hurdle tremendous obstacles in its enormous task. The present Town insurance program is much more extensive than in the past and the total increase in cost to the citizens is negligible.
3. The Industrial Committee was reorganized in 1964 and with the vigorous new members great strides have been taken forward. The Committee has been operating with no money in its budget, and yet, through the efforts of its active membership a very comprehensive program is being developed.
4. The Board of Public Works is to be congratulated on its efforts to secure a lease from the United States Government for water rights from a well within the "Ammunition Dump" area. The Sanitary Land Fill operation is

also to be commended.

5. The least popular of all town officials are the Inspectors who enforce the Town and State ordinances. It is the responsibility of the various inspectors to protect the public's interest. The Building Inspector, Wiring Inspector, Gas Inspector, and Plumbing Inspector and their deputies are men of the highest caliber and we can all rest assured that they will offer us the best possible protection at all times.

6. The Safety Departments of our Town continue to compile a record of outstanding accomplishments. The Police Department has been operating with an understaffed force, but continues to increase the services it provides the citizens of Maynard. The Fire Department has compiled a record of prompt and efficient service both in Maynard and in the mutual-aid district.

7. The Historical Committee has been a very active group of citizens who have diversified their activities in 1964. Old movies have been shown and tape recorded interviews with prominent citizens have been played to the enjoyment of an increased membership at Committee meetings. The Committee will welcome anyone interested in joining its membership.

8. The Civil Defense Department has continued to operate most efficiently and must be commended for its membership of devoted individuals who donate their services with little or no recognition. We are confident that our CD unit is ready and able to serve whenever they are needed.

We wish to emphasize that the above mentioned developments are only a portion of the accomplishments in 1964 and we wish to direct the readers attention to the reports of the many Departments, Committees, and Boards that have served the Town of Maynard during the year. It is evident from the diversity of these reports that Maynard residents are living under a full and comprehensive system of government.

It is now the pleasure of the Board of Selectmen to outline its actions in 1964 and present recommendations for future consideration.

1. The year 1964 saw a sharp decline in liquor violations. It is with profound pride that the Board of Selectmen recognize the retail liquor establishments for their continuing efforts to conduct their operations in an unrepachable manner.

2. The Board actively participated in both the Middlesex County Selectmen Association and the Massachusetts Selectmen Association. The Middlesex County Selectmen Association held their Spring meeting in Maynard at the Powder Mill Restaurant, and the Maynard Board acted as the host. This was the first such meeting in Maynard for over a decade.

3. The Board was very active during the first quarter of 1964 in matters pertaining to refuse disposal. It is with extreme pride that we report that the property on Waltham Street continues to serve as our dumping area, and that the Public Works Department has operated this Sanitary Land Fill system in a most efficient and orderly manner.

4. Enforcement of Town by-laws played a major role in the activities of the Board during 1964. The Board has continued to enforce winter overnight vehicle parking violations, zoning regulations, and the general by-laws. Many of the building contractors were admonished by failing to comply with the Building Code.

5. The Board became involved in a series of meetings in Maynard, Waltham, and Boston concerning the threatened curtailment of the Boston and Middlesex service. We are happy to report that the service is still an integral part of our community life.

6. The Board approved increased Blue Cross Blue Shield coverage for municipal employees. The additional cost is shared by the Town and the employees.

7. The Board approved tentative plans for the 1965 Northeastern Massachusetts Music Festival which will be held in Maynard for the first time. We urge the entire community to support this function and welcome our many thousands of visitors in order that they will be able to realize the true spirit of our community and leave with a lasting impression of us.

8. The Board presented an article which was approved, requesting the relocation of the World War II Memorial to its present site at Memorial Park.

9. The Board met with a group of concerned citizens in an effort to eliminate tragic drownings in our waterways. The Board was unable to devise a real program in this area. It is hoped that more positive action on our part may be possible in the future to avoid similar tragedies.

10. The Board presented recommendations at the Annual Town Meeting for increased salary scales for elected and appointed officials in certain categories found deficient in comparison to neighboring communities. The Personnel Board conducted surveys for the Selectmen in this endeavor. The recommendations were not approved at the Town Meeting, but the same plan has been resubmitted for 1965 because the salaries paid are merely a stipend for services rendered; it is the contention of the Board of Selectmen that an equitable inducement must be available in order to attract people to serve in municipal government.

11. The cover of the Town Report once again depicts the scene which the Board considered most significant in the growth of Maynard. At this time we should like to extend our most sincere congratulations to high school art student, Robert Brooks, who had his presentation selected for the second consecutive year - a record.

12. The Board presented an article at the Annual Town Meeting which requested permission to remove the Town-owned building on Nason Street located immediately adjacent to Memorial Park. The vote of the Townspeople granted our request and the building has been completely removed. It is the opinion of the Board that this is a major step forward in our struggle to enhance the overall beauty of the community, and in particular, to favorably compete with new shopping centers. It is essential that Maynard maintain a large shopping center for job opportunities, tax base, and convenience of shoppers. The Board has pledged itself to continue activities in this area in an effort to attain a level of development which will afford our community an equal opportunity to both maintain our present business and industry, as well as, influence companies to settle in Maynard.

13. The Board conducted a major drive to enhance the natural beauty of Maynard. The heretofore mentioned Nason Street Building was a starting point. In May the first annual "Maynard Clean Up Week" was instituted. During the summer a junk car removal drive was undertaken which received wide acclaim. The scope of these activities will be enlarged in 1965. The Board is considering appointing an advisor in this area alone.

14. The Board used the funds from the successful sale of junk cars to organize a Halloween party for the children of Maynard. This effort was undertaken in conjunction with the Board's concentrated program to provide recreation activities for the youth of Maynard. The Board also presented an article at the Annual Town Meeting which would have

created a Recreation Committee for Maynard's youth. The article did not receive favorable consideration. The Board will continue this youth development program in 1965 with renewed encouragement.

15. The Board presented an article in 1964 for the funds required to lure doctors to Maynard. The Board contends that this is a major area for continued efforts in 1965. A major formalized program will be forthcoming in order to provide a definite plan of attack.

16. The Board has given serious consideration to a study program for the purpose of examining the entire governmental system in Maynard and presenting findings at the end of 1965. The details of this study committee must be defined in the very near future and a group appointed.

17. The Board met with many Town Departments in 1964 in an effort to create better mutual understanding. An increased effort will be attempted in this area in 1965.

18. The Board enthusiastically endorses pay scale increases for the Police and Fire Departments in 1965 in order to place Maynard in a competitive position with our neighboring communities. Maynard lost two Police Officers in 1964 to other, more lucrative, fields of endeavor.

19. The Board continues to recommend that land be purchased in the northwest section of Maynard in order to prepare us for future expansion. It is evident that our major residential growth will occur in this area, and the Town must prepare for the eventual increased needs which will appear.

The Board wishes to recognize certain outstanding contributions toward our entire community life:

1. The Maynard Chamber of Commerce who worked very closely with the Selectmen and other Town Boards in order to establish a positive direction for commercial and industrial growth in Maynard. Many hours were expended in meetings in order to derive an equitable plan for development of the Town's major assets.

2. Mr Joseph P. Dineen, former Selectman, and Veteran's Agent for the past eighteen years. Mr Dineen works on a limited veteran's aid budget and still manages to provide excellent service to the residents of Maynard. Mr. Dineen also acted as our agent in completing arrangements to move the World War II Memorial.

3. Miss Kathleen Flaherty, age 11, who became the first Honorary Junior Selectman in the Town's history. Miss Flaherty attended a Town Meeting, Selectmen meeting, and kept very informed on all local matters.

4. Mr. Frederick Gould who organized a group known as C.U.R.E. The main purpose of this organization is to clean up the river and thereby give the area some natural beauty. It is this type of enthusiasm which we hope will generate itself into other areas and give us all a sense of pride in our community. We wish Mr Gould success in this most difficult task.

5. The mothers who volunteered their services for the children's Halloween Party; the Rod and Gun Club for donating their grounds, and all those persons who contributed toward the general success of the party.

6. It is unusual for a Board to recognize one of its own members, but, the remaining members are compelled to take this opportunity to congratulate our own Selectman, Howard E. Boeske, for his outstanding contribution to Maynard which was far and above his official duty as a selectman. Mr. Boeske was singularly responsible for the success of Maynard's junk car removal which received State acclaim and the praise of many neighboring communities. Mr. Boeske also directed the committee for the Children's Halloween Party; he guided the organization of activities, collected funds, and personally contributed the balance of the financial responsibilities.

The Board wishes to extend its thanks and appreciation to Mr. James V. King, Town Accountant, and Mr. Paul A. Carbone, Town Counsel, for their co-operation and assistance.

The Board also wishes to recognize the excellent custodial service rendered by Mr. Evald (Swede) Johnson and Mr. Stanley Harding at the Municipal Building. Our shiny floors are the envy of every woman who enters the Municipal Building.

Respectfully submitted,

PATRICK J. DONOVAN,
Chairman
HOWARD E. BOESKE, Clerk
ALBERT G. ALEXANIAN, Jr.

9 Yard Sticks @ 10¢ each	<u>.90</u>
	\$158.70

Respectfully submitted,

JAMES J. RYAN
Sealer of Weights and Measures

REPORT OF THE
TOWN INSURANCE COMMITTEE

This Committee met many times this year due to the change-over of all Town Fire Assurance to the Public and Institutional Property Plan known as P. I. P. This plan gives the Town better coverage and by dividing this up between Mutual and Stock companies further savings were made.

All insurance was given to local agents and their help was greatly appreciated.

The School Committee, Board of Public Works, Board of Fire Engineers, and Selectmen cooperated to make our work much easier.

Respectfully submitted,

R. TOMPKINS, Chairman
E. DUGGAN, Secretary
R. DIONNE
J. PIANTEDOSI
W. HIRONS

REPORT OF THE
MAYNARD HISTORICAL SOCIETY

To the Honorable Board of Selectmen:

Herewith is presented a progress report of the Maynard Historical Committee for the year 1964.

Organizationally one change was made in the Society. The ways and means committee was replaced by an Acquisitions Committee - which fits in with the needs of a Historical Society.

Monthly business and program meetings were instituted which have been productive in arousing interest in research.

The 1921 50th Anniversary film was turned over to the Society by Mr. Burton Coughlan of the Fine Arts Theatre. We had it cut down to 16 MM. for a showing and will replay it on occasion in the future.

The room the Society has in the Municipal Building is in the process of being fixed in such a manner that our research and paper work can all be done there.

Monographs covering all aspects of Maynard's economic, political, and social life (mounting ultimately to around two hundred) are being prepared. Out of this raw material will be culled the history of Maynard. These monographs also will be utilized by the Publicity Committee for articles in the newspaper.

A uniform photographing of all pictures and objects of Historical interest is being conducted by Robert Johnson, chairman of Photography.

The acquisitions Committee is cataloguing all pictures and objects in town, even if not owned by the Society, so knowledge of everything Historical will be at our disposal.

Respectfully submitted,

BIRGER R. KOSKI, Chairman
GERALD D'ERRICO, Vice Chairman
ALICE HAKALA, Secretary
MARY OLLILA, Chairman, Publicity
HERBERT MARTIN, Chairman
Acquisitions

January 4, 1965

REPORT OF THE
INSPECTOR OF BUILDINGS

January 4, 1965

To the Honorable Board of Selectmen:

I hereby submit my report, as Inspector of Buildings, for the year ending December 31, 1964. This being the first resume covering a full year.

In this twelve month period, there were 101 building permits issued. Forty-five (45) were for new dwellings, all single, one (1) each for a school, a restaurant and a new business. The remaining Fifty-three (53) were for additions or alterations. There were two (2) denials which were referred to the Board of Appeals and to the Town Counsel.

I would like to take this opportunity to thank the members of the many boards and the Staff members of the Town House for their cooperation and help.

Respectfully submitted,

FORREST W. NELSON
Inspector of Buildings

REPORT OF THE
INSPECTOR OF WIRES

January 4, 1965

To the Honorable Board of Selectmen
Town of Maynard, Massachusetts

I herewith present the report of the Wire Inspector for the year ending December 31, 1964.

The total permits issued during the year amounted to two hundred and eight (208). Fifty-three (53) new homes were built. Also, one school, one factory, one factory addition, one shopping plaza and one telephone building addition was under construction. Included was twenty-three (23) homes that increased their services; and one hundred and twenty-seven (127) that were for wiring repairs and miscellaneous.

Throughout the year, I was at all times available to check any electrical wiring discrepancies that any home or property owners found existed.

I would like to stress the importance of obtaining a wiring permit whenever electrical work is to be performed. By having a licensed electrician do the work, a property owner safeguards life and property.

The assistant Wire Inspector - Frank Pazaricky - and I wish to thank the Board of Selectmen and the Fire Department for their utmost support and cooperation. Also the Boston Edison Company should be lauded for their constant help throughout the year.

Respectfully submitted,

BENJAMIN A. BIGUSIAK
Inspector of Wires

REPORT OF THE
GAS INSPECTOR

January 8, 1965

To the Honorable Board of Selectmen

Dear Sirs:

The Rules and Regulations covering the installation of gas piping and appliances went into effect on May 13, 1964.

Since that date, 247 permits have been issued and inspections made on all completed work.

The contractors, gas company personnel, and individuals have been very cooperative.

Respectfully submitted,

WARREN E. BEMIS
Gas Inspector for Maynard

REPORT OF
THE BOARD OF FIRE ENGINEERS

To the Honorable Board of Selectmen
Municipal Building
Maynard, Massachusetts

Gentlemen:

We, the Board of Fire Engineers, herewith submit our report of the performance of duties by the Fire Department during the year 1964 and our comments upon several matters which we deem important for discussion.

There have been good results and there have been bad results this year. It is always well to first consider the good results.

RESUSCITATOR

The resuscitator given to the Town of Maynard several years ago has again proven itself to be a marvelous machine. The department had twenty-six calls for its use and it was successful in twenty-one cases. We are particularly proud of our men and their efficient use of the machine. It is almost miraculous when you realize that twenty-one persons were given another chance at life because of the machine and the efficient manner in which the men operated it.

SCUBA GROUP

The development of a group of "Scuba" divers is another good thing. Firemen Higgins, Clancy, King, Tobey, Primitano, Sweeney and others have voluntarily devoted their own time and money to train as underwater men. They have been employed twice this year in our town and once out of town. We emphasize that this work is voluntary and without pay and incorporates serious and ever-present danger. Due to the dangers involved the Police Chief and the Fire Engineers have had to make a rule that the scuba divers will not be called out for general searches after dark. We mean by this that if no one knows, but just guesses that a person may be in the Mill Pond, this is a general search, and we will not call upon these volunteers to risk their lives after dark to search the whole area on the possibility that someone may be in the pond. If there is a reliable source of information that a person has disappeared in the pond at a specific spot we will call upon them to volunteer their services. There are several reasons for this action.

SPECIAL CALLS

2-2-2 All Firemen report to Headquarters

1-1 Test at 12:10 P. M.

2-2-1 Brush Fire Call

1-1 After an alarm indicates fire is out

**6 American Legion, Veterans of Foreign Wars or State
Guard Call**

7 Boy Scout Call

8 Civil Defense Call

Air Raid Alarm — 28 single blasts

All Clear — Three series of 3 single blasts

**3 at 7:15 A. M. or 12 Noon — No school for first six
grades**

5 at 7:15 A. M. or 12 Noon — No school all grades

They have been criticised because a child was missing and after many areas were searched someone said he might have fallen into the pond. We were against such a search at night and it developed that the child was safe elsewhere; but the police and the firemen were sharply criticised because they did not immediately start an underwater search. Such searches are dangerous in daylight; but after dark they are much more so. The lights employed show only a few feet in front of the men and the search is largely made by feeling their way along. Such a search would only rely on luck. The water in the Mill Pond particularly becomes very dark when the men swim near the bottom and stir up the mud, this again reduces visibility. They will willingly take this chance if someone sees the person in the area, or if there is a hole in the ice through which a person might have fallen; but not a vague chance that he might be there.

DUMP FIRES

We are happy to report that the new sanitary land fill operation has proven a good thing for the Fire Department. Our calls to the Town Dump have been reduced to a scattered few that were the result of deliberate acts by persons unknown. The men operating the system are to be commended on their good work. This has eliminated another place where our emergency equipment was tied up on foolish work while the purpose for which it was really intended was only partially covered.

HOUSEKEEPING

The year has found improvement in the housekeeping in the Industrial complex at the Mill. Our inspections have revealed less dirty and dangerous housekeeping than in previous years. The only industry that gave us a great deal of trouble in the past is markedly improved. While there are still many hazards that require careful watching better housekeeping diminishes the danger from them.

EQUIPMENT

We are happy to report that our equipment is in good shape and will not require a major expenditure for some time. Due to the "war" in the fire hose business we were able to get almost a two years' supply from the 1964 appropriation. For this reason we have not asked for any additional hose this year.

BRUSH FIRES

There was a sharp reduction in real brush fires this year in spite of the extremely dry conditions. This is largely

due to the lack of woodland in Maynard. We have had more occasions to go the assistance of neighboring towns.

Now for the bad results.

FIRE LOSSES

Our fire losses increased sharply this year because of the Powdermill Restaurant fire. In this fire alone the fire loss was several times the remainder of the fire losses for the year. While this fire was not due to carelessness or bad housekeeping, it clearly shows that such losses do arise and it is up to everyone to reduce or eliminate fires caused from carelessness and bad housekeeping. Everyone must practice care in the home with cigarettes, extension wires and combustible materials if we want to keep our losses down.

STORM DUTY

We, the Board of Fire Engineers, have deemed it necessary for the safety of the Town to call in the permanent men and sometimes the callmen for extra duty during blizzards and bad storms. We believe that this is a necessary move because of the difficulty in operating the equipment during storm periods and further because of the difficulty in calling the men by whistle or otherwise during the height of a blizzard or storm. This is a bad thing only in that it does increase the cost of running the department as six of the nine permanent men go on overtime. Although the men have been released as soon as possible we have had to call upon the Finance Committee for funds for the Emergency Fund.

FOOLISH CALLS

We have had to instruct the firemen not to report for foolish calls such as removing cats from trees. Cats that can climb trees can also climb down. It is highly ridiculous to call upon men who are engaged to protect the lives and safety of the public to take the risk of climbing trees to reach a cat who can get down by itself. An injury to a fireman on this duty could be just as expensive to the Town as those we mention hereafter.

FALSE ALARMS

We call upon all of the citizens to cooperate in the elimination of the sounding of False Alarms. Of thirty box alarms during 1964, twenty-five were sounded from the station, the remaining five came from the street boxes and every one was false.

A fire alarm sets in motion many persons and vehicles, firemen, callmen, substitute callmen and spectators. The sounding of these alarms causes men, through excitement or urgency, to drive with more speed and less care than usual, and consequently the risk is greater to them and the general public who might be in the way. There is risk to expensive equipment, there is risk to their individual motor vehicles; but by far the greatest risk is to lives. While the firemen are covered for death these claims can run into thousands of dollars. This has not yet happened in Maynard, but did occur in neighboring towns.

If you see people near or at fire boxes, watch these persons and report motor vehicle numbers to the Police or Fire Department.

So much for the good and the bad.

We have felt impelled to join with the Chief of Police and the Selectmen in presenting to the Personnel Board the salary situation in our respective departments. We believe that our firemen and policemen are worth to the Town of Maynard as much as their counterparts are worth to their towns. We realize that our town is not on the same basis as some of our neighbors; but that the duties involved in Maynard are the same duties performed in these other towns and involve the same or greater risks. We recommend a program which would grant raises over the next three years and bring our salaries more nearly in line with our neighboring towns. The Personnel Board did not see fit to recommend our figures but did recognize the problem and is recommending an adjustment for this coming year.

It is a fact that our neighboring towns pay more money. In fact one start their policemen at a higher figure than our top pay. This has been reflected in the employment of police officers and while it has not yet affected the Fire Department it could do so.

We believe that if the salary scale is reasonably close to our neighbors that the men will prefer to work for Maynard and our present caliber of good firemen and good police officers will continue.

The ultimate question of salaries is up to the citizens in town meeting; but if they will think of our problem we believe they will support the Police and Fire Departments and the Personnel Board.

We wish to express our thanks for the cooperation of the other town departments and the many citizens who assisted us in the performance of our duties during the

last year.

For those persons who enjoy statistics they are appended hereto.

REPORT OF THE CHIEF OF
POLICE

To the Honorable Board of Selectmen:

I herewith submit my Annual Report as Chief of Police for the year ending December 31, 1964.

The traffic lines, meter lines and school zone marking areas were painted as required by law. With the removal of the so-called "Taxi Building" on Nason Street, the Town was able to open a new entrance to our Municipal Parking Area. This entrance has greatly improved the flow of traffic into our parking area.

During the year due to the shortage of police officers, the Department was unable to send an officer to the State Police School; however, it is my desire that an additional officer will be available as the result of the recent Civil Service examination and the practice of sending an officer to school will continue.

ARREST REPORT OF 1964

Assault	14

Total	246

In conclusion, I wish to express my appreciation and thanks to the members of the Police Department, Town Counsel, Board of Selectmen, and especially to the Civil Defense Auxiliary Police under the supervision of Donald MacGlashing for their assistance to the Maynard Police Department during the year.

Respectfully submitted,

MICHAEL T. ZAPARESKI,
Chief of Police

TOWN CLERK'S REPORT
 PROCEEDINGS OF
 ANNUAL TOWN MEETING
 Held March 2, 1964

At 7:30 P. M. March 2, 1964, the Annual Town Meeting was called to order by the Moderator, Philip Wilson, in the Maynard Memorial Gymnasium, in accordance with Town Warrant No. 494. The Moderator declared a Quorum to be present.

Guests of the Town Meeting were students of the Rindge Technical High School of Cambridge.

On motion of R. Frank Punch it was voted to waive the reading of the Warrant as a whole.

On motion of Albert G. Alexanian, Jr. it was voted that no article be taken up for action after 11 P. M. and that the meeting then adjourn until 7:30 P. M. on Tuesday, March 3, 1964, in the Maynard Memorial Gymnasium. If an article is under consideration at 11 P. M. action under such article shall be completed.

Article 1. Carlo J. Mistretta read and filed a report for the Parking Space Committee. Arthur J. Brooks read and filed a report for the Personnel Board.

A motion by James S. Wheeler that all articles requiring a two thirds vote be acted upon first was ruled out of order.

Article 3. On motion of Paul T. Foley: Voted to appropriate the sums of money as recommended by the Finance Committee to defray the regular annual expenses of the Town:

1. Selectmens' - Salaries	\$ 900.00

ficiency	

Article 4. On motion of Paul T. Foley: Voted to pay the various elected Town Officials in accordance with Chapter 41, Section 108, of the General Laws, the following salaries. Said salaries to be effective and remain in force until the next Annual Town Meeting unless sooner changed by vote of the Town.

Moderator	\$ 50.00
Town Clerk	3,500.00
Town Treasurer-Collector	6,400.00
Selectmen, Three Members, each	300.00
Board of Assessors, Chairman	900.00
Other Members, each	800.00
Public Works, Board, 3 Members each	300.00
Board of Public Welfare, Chairman	200.00
Other Members, each	150.00
Board of Health, 3 Members, each	50.00
Library Trustees, 3 Members, each	25.00
School Committee, 5 Members	No Salary
Planning Board, 5 Members	No Salary

All fees and charges collected by each department must be paid to the Treasurer at the end of each month.

The above salaries are effective January 1, 1964 to December 31, 1964. For changes in personnel during the year, salaries will be pro-rated according to the length of service at above recommended rates.

Article 5. On motion of Howard L. King: Voted, unanimously, to authorize the Town Treasurer and Collector, with the approval of the Selectmen, to borrow from time to time in anticipation of revenue of the financial year beginning January 1, 1964 and to issue a note or notes therefor, payable within one year and to renew any note or notes as may

be given for a period of less than one year in accordance with Section 4, Chapter 44, of the General Laws.

Article 6. On motion of Paul T. Foley: Voted to raise and appropriate from taxation the sum of \$13,000.00 and to transfer from the Overlay Reserve the sum of \$7,000.00 for the Finance Committee Reserve Fund to provide for extraordinary and unforeseen expenditures. Transfers from the Reserve Fund to be made only by vote of the Finance Committee as provided by Section 6 of Chapter 40 of the General Laws.

Article 7. On motion of Paul T. Foley: Voted to raise and appropriate the sum of \$10,000.00 to the Stabilization Fund as provided in Section 5B of Chapter 40 of the General Laws.

At this time the meeting voted to allow Julian D'Agostino, Attorney, to attend the meeting.

Article 8. The Town Counsel ruled that action under this article would be out of order as no report was given by the Planning Board, and it was passed over.

(re re-zoning of land on Great Road and Parker Street)

At this time the meeting voted to allow the attorney representing the sponsors of this article (Art. 9) to attend the meeting.

Article 9. The Town Counsel ruled that action under this article would be out of order as no report was given by the Planning Board. Passed over.

(re re-zoning of land on Parker Street)

Article 10. A motion by Albert G. Alexanian, Jr., Amended by Ruoff A. Tompkins, to name the new High School the 'John F. Kennedy High School' was lost.

Article 11. On motion of Albert P. Rogers as amended by Paul T. Foley: Voted to instruct the School Committee to use Public Law 874 Funds in the amount of \$6,000.00 as an initial operating fund for the new High School Cafeteria.

Article 12. On motion of Albert P. Rogers: Voted, 411 in favor to 24 opposed, that the sum of \$3,400.00 be appropriated from the Reserve for the Sale of Land Fund, and that the School Committee be authorized to purchase the land of Martin W. and Onerva E. Kangas, et ux, located on

Great Road adjacent to Alumni Field and recorded at the Middlesex South District Registry of Deeds in Book 7739, Page 192, as lots 11 and 1a, and for legal and recording fees.

Article 13. On motion of Albert P. Rogers: Voted 232 in favor to 211 opposed, to appropriate the sum of \$6,500.00 for the re-surfacing and general repair of the Alumni Field Track.

The Counters for these Articles, appointed by the Moderator and sworn by the Town Clerk, were:

Ruthmary Armour, Martha L. Champagne, Pauline E. Foley, Margaret J. McCormack, Frances R. Loomer and Alexandra Larkin.

Article 14. On motion of Gerald J. Nee: Voted that the sum of \$1,078.75 be raised from the tax levy of the current year and appropriated to the Board of Public Works for the reconstruction of the sidewalk in front of the Summer Street School, as recommended by the Finance Committee.

Article 15. A motion to appropriate \$7,348.00 for Public Rest Rooms at Alumni Field House was lost.

Article 16. On motion of Raymond J. Sheridan: Voted to lay this article on the table.

(re sewer mains on Great Road near Alumni Field House)

Article 17. A motion by Arthur J. Brooks to accept this article was lost.

(re amendment to Personnel By-law)

Article 18. Passed over due to failure of Article 17 to be adopted.

Article 19. A motion by Thomas F. Fitzpatrick to accept this article was lost.

(re amendment to Personnel By-law)

Article 20. On motion of R. Frank Punch: Voted to lay this article on the table.

(re amendment to Personnel By-law)

Article 21. On motion of R. Frank Punch: Voted to lay this Article on the table.

(re amendment to Personnel By-law)

A motion by Arthur J. Brooks to reconsider Article 17 was lost.

Article 22. Passed over.

(appropriation subject to acceptance of Article 19)

Article 23. A motion by Patrick J. Donovan to accept this article as printed in the Warrant was lost.

(re changing date of Annual Town Meeting)

Article 24. On motion of Patrick J. Donovan: Voted to appropriate to the Board of Selectmen, from the tax levy of the current year, the sum of \$600.00 for care and maintenance of the Luke S. Brooks Memorial Fountain on Main Street.

Article 25. On motion of Albert G. Alexanian, Jr., as amended by R. Frank Punch, Voted to appropriate the sum of \$800.00 for the purpose of constructing a retaining wall along the Northwesterly boundary of the Police and Fire Station property for the purpose of supporting the adjacent land and for the surveying expenses. The construction to be done by the Public Works Department.

Article 26. On motion of Gerald J. Nee: Voted, unanimously, that the sum of \$15,600.00 be appropriated to the Board of Public Works to continue Chapter 90 Construction on Main Street. The Town's share of \$3,900.00, be raised from the tax levy of the current year and the County share of \$3,900.00 and the State share of \$7,800.00 be borrowed under authority of Chapter 44, Section 6A of the General Laws.

Article 27. On motion of Gerald J. Nee: Voted that the sum of \$4,500.00 be raised from the tax levy of the current year and appropriated to the Board of Public Works for the maintenance of Chapter 90 roads.

Article 28. On motion of Raymond J. Sheridan: Voted that the sum of \$12,180.26 allotted to the Town from State Highway Chapter 822 Funds be appropriated to the Board of Public Works upon receipt of same, for the purpose of resurfacing with Bituminous Mix as approved by the Mass. Dept. of Public Works, the following streets:

Great Road from Dewey St. to Stow Town Line.
 Great Road from Espie Ave. to Thompson St.
 Great Road from Glenwood Cemetery at St
 Bridget's Cemetery to Sudbury Town Line
 Concord St. at Brown and Haynes St intersec-
 tion to Summer St.

Article 29. On motion of Michael Barilone: Voted that the sum of \$7,500.00 be raised from the tax levy of the current year and appropriated to the Board of Public Works to be used for paving and surfacing public streets.

Article 30. On motion of Michael Barilone: Voted that the sum of \$2,500.00 be raised from the tax levy of the current year, and appropriated to the Board of Public Works for Mosquito Control, and that said Board be authorized to aerial spray or to enter a mosquito control district.

Article 31. On motion of Michael Barilone: Voted, unani-
 mously, that the sum of \$850.00 be raised from the tax levy
 of the current year and appropriated to the Board of Pub-
 lic Works to be used for the purpose of replacing and ex-
 tending the storm drain on Butler Ave. from Powder Mill
 Rd. to Garfield Ave. about 420 feet and to construct 2
 catch basins.

Article 32. On motion of Raymond J. Sheridan: Voted
 that the sum of \$1,000.00 be raised from the tax levy of
 the current year and appropriated to the Board of Public
 Works for the purpose of securing survey and report, in-
 cluding cost, of sewerage Assabet Heights.

Article 33. On motion of Gerald J. Nee: Voted, unanim-
 ously, that the sum of \$720.00 be raised from the tax levy
 of the current year and appropriated to the Board of
 Public Works for the purpose of constructing a drain from
 near the sewer lift station on Old Marlboro Road to the
 existing drainage on Parker Street and to authorize the
 Board of Public Works to secure any necessary easement
 therefor.

Article 34. On motion of Michael Barilone: Voted, unanim-
 ously, that the Board of Public Works be and hereby is
 authorized to install sewer mains subject to assessments
 or betterments in accordance with Chapter 340 of the Acts
 of 1916, and all other acts in amendment thereof and in
 addition thereto, on Concord Street from an existing man-
 hole at Hird Street to about 360 feet Northeast and on
 Waltham Street from an existing main at old Mill Road to

about 264 feet East and to authorize said Board to secure any necessary easements or other interests in land necessary therefor and to appropriate for such installations and easements the sum of \$8,500.00 be transferred from the unexpended balance in the appropriation voted under Article 25 at the 1961 Annual Town Meeting.

Article 35. On motion of Raymond J. Sheridan: Voted, unanimously, that for the purpose of providing additional funds for the Sewer Plant construction authorized under Article 21 at the Annual Town Meeting of 1962, the Board of Public Works be authorized to use the Federal Grant of \$16,950.00 already authorized and that an additional sum of \$19,000.00 for this purpose be raised as follows: the sum of \$7,832.93 be transferred from the unexpended balance in the appropriation voted under Article 25 at the Annual Town Meeting of 1961, and the sum of \$20.00 be transferred from the unexpended balance in the appropriation voted under Article 21 at the Annual Town Meeting of 1960, and the sum of \$11,147.07 from tax levy of the current year. The additional Federal Grant of \$10,770.00 or any other sum to be returned to the E & D account upon receipt of same; and to authorize and direct said Board to apply for the additional Federal Grant for this project.

Article 36. On motion of Raymond J. Sheridan: Voted unanimously, that the Board of Public Works be authorized to make an agreement with the Sudbury Water District as approved by the U. S. Government, whereby the Town may secure the right to pump water to replenish our White Pond Water Supply; and to raise for such lease agreement, pipe line construction, pump installation, power supply and rentals, the sum of \$8,000.00; by transfer of the unexpended balance of \$4,841.88 in the appropriation made under Article 5 of the Special Town Meeting held May 4, 1962, and by transfer of the sum of \$3,158.12 from the Water Surplus Account.

At this time, 11:09 P. M. in accordance with the vote of the meeting, the Moderator declared the meeting adjourned until 7:30 P. M. Tuesday, March 3, 1964.

Attest:

ELEANOR JONES,
Town Clerk.

PROCEEDINGS OF
ADJOURNED TOWN MEETING

Held March 3, 1964

The adjourned Town Meeting was called to order by the Moderator, Philip Wilson, at 7:30 P. M. who declared that a quorum was present.

Article V - Foundations

Section 1 (d) shall read as follows

- (d) Lally columns shall have concrete footings at least twenty-four inches square and twelve inches thick, or to be increased at the discretion of the Inspector, and shall be spaced not more than eight feet apart.

Add under Article 3. A ten foot by ten foot area centered over heating unit shall be plastered or sheath with 5/8 inch sheetrock.

Article 43. A motion by Howard E. Boeske under this article was lost.

(re Fees for Building Permits)

Article 44. On motion of Albert G. Alexanian, Jr; Voted to appropriate from the tax levy of the current year, to the Board of Selectmen, the sum of \$200.00 for the purpose of paying expenses which may be incurred in an effort to influence physicians to practice in Maynard.

Article 45. On motion of Albert G. Alexanian, Jr.: Voted to amend the By-Laws of the Town of Maynard by deleting from Chapter I - Town Meetings, Section 5 - The Annual reports of all officers and boards shall be printed and distributed on or before the third Monday of February of each year; said reports shall be acted upon at the Town Meeting held on the second Monday of March and substitute the following: Chapter I - Town Meetings, Section 5. The Annual reports of all officers and boards shall be printed and distributed on or before the third Monday of February of each year; said reports shall be acted upon at the Town Meeting held on the first Monday of March.

Article 46. On motion of Albert G. Alexanian, Jr: Voted to amend the By-Laws of the Town of Maynard by adding

to Chapter XVI a new section as follows:

Section 6. Inspector of Gas Piping and Gas Appliances.

The Board of Selectmen shall in each year, after its organization appoint an Inspector of Gas Piping and Gas Appliances in buildings, whose duty shall be the enforcement of rules and regulations adopted by the Board established by General Laws, Chapter 25, Section 12H, inserted by Section I of Chapter 737 of the Acts of 1960 and amendments thereto.

Article 47. On motion of Albert G. Alexanian, Jr.: Voted to appropriate the sum of \$750.00 for the salary and expenses of the Inspector of Gas Piping and Gas Appliances. All fees and charges collected by the Inspector of Gas Piping and Gas Appliances must be paid to the Treasurer at the end of each month.

Article 48. A motion by Albert G. Alexanian, Jr., under this article was lost

(re appointment of "Recreation Committee".)

Article 49. Passed over

(re appropriation for "Recreation Committee".)

Article 50. On motion of Albert G. Alexanian, Jr.: Voted unanimously, to appropriate the sum of \$995.00 to the Board of Selectmen, for the purpose of destroying the dwelling located at 9 Bancroft Street in accordance with Chapter 139, Sections 1, 2, and 3, from the tax levy of the current year.

Article 51. On motion of Albert G. Alexanian, Jr: Voted to appropriate from the tax levy of the current year, the sum of \$950 00, to the Board of Selectmen, for the purpose of destroying the building located at 53-55 Nason Street.

Article 52. Ruled illegal by Town Counsel.

(re renovation of 53-55 Nason Street)

Article 53. Ruled illegal by Town Counsel.

(re restoration of 53-55 Nason Street)

Article 54. On motion of Howard E. Boeske: Voted to appropriate to the Board of Selectmen the sum of \$600.00 to relocate and renovate the World War Memorial. The Memorial which is presently located on property owned by the Union Congregational Church on Main Street will be relocated on Town owned land known as Memorial Park situated on the corner of Summer Street and Nason Street.

Article 55. A motion by Carlo J. Mistretta under this article was lost.
(re work on Memorial Park)

At 10:40 P. M., on motion of R. Frank Punch, it was voted to adjourn.

Attest: ELEANOR JONES
Town Clerk

Boston, Massachusetts April 1, 1964

The foregoing amendments to By-laws are hereby approved.

Edward W. Brooke
Attorney General

Above refers to Articles 42, 45 and 46.

QUESTION No. 1

PROPOSED AMENDMENT TO THE CONSTITUTION

Do you approve of the adoption of an amendment to the constitution summarized below which was approved by the General Court in a joint session of the two branches held March 29, 1961, received 219 votes in the affirmative and 26 in the negative, and in a joint session of the two branches held May 8, 1963, received 244 votes in the affirmative and 14 in the negative?

SUMMARY

The proposed amendment provides that the terms of office of the Governor, Lieutenant Governor, Secretary of the Commonwealth, Treasurer and Receiver General, Attorney General and Auditor shall be four years. Executive Councillors, Senators and Representatives shall continue to serve for two years. The four-year term for constitutional officers would become effective at the time of the November election in the year 1966.

Yes	2416
No	736
Blanks	798

QUESTION No. 2

PROPOSED AMENDMENT TO THE CONSTITUTION

Do you approve of the adoption of an amendment to the constitution summarized below which was approved by the General Court in a joint session of the two branches held July 18, 1962, received 238 votes in the affirmative and 1 in the negative, and in a joint session of the two branches held May 8, 1963, received 246 votes in the affirmative and 2 in the negative?

SUMMARY

In the event that any public office, whether elective or appointive, shall become vacant as a result of enemy attack, the proposed amendment would enable the General Court to provide for prompt and temporary succession to the powers and duties of such offices, and to take steps to insure con-

tinuity of government of the Commonwealth and its political subdivisions.

Yes	2755
No	304
Blanks	891

QUESTION No. 3

PROPOSED AMENDMENT TO THE CONSTITUTION

Do you approve of the adoption of an amendment to the constitution summarized below which was approved by the General Court in a joint session of the two branches held March 29, 1961, received 251 votes in the affirmative and 0 in the negative, and in a joint session of the two branches held May 8, 1963, received 252 votes in the affirmative and 3 in the negative.

SUMMARY

The proposed amendment provides that the credit of the Commonwealth may be given, loaned or pledged only by a two-thirds vote of each branch of the Legislature. In no event shall the credit of the Commonwealth be given or loaned to or for any individual private association or corporation privately owned or managed.

Yes	2211
No	667
Blanks	1072

QUESTION No. 4

PROPOSED AMENDMENT TO THE CONSTITUTION

Do you approve of the adoption of an amendment to the constitution summarized below which was approved by the General Court in a joint session of the two branches held July 18, 1962, received 220 votes in the affirmative and 24 in the negative, and in a joint session of the two branches held May 8, 1963, received 258 votes in the affirmative and 1 in the negative?

SUMMARY

The proposed amendment authorizes both the Governor and the Executive Council to require opinions of the Justices of the Supreme Judicial Court on questions of law. The

present requirement that the Governor and Council agree before a question may be submitted would be annulled.

Yes	2480
No	381
Blanks	1089

QUESTION No. 5

LAW PROPOSED BY INITIATIVE PETITION

Do you approve of a law summarized below which was disapproved in the House of Representatives by a vote of 109 in the affirmative and 109 in the negative and was disapproved in the Senate by a vote of 16 in the affirmative and 20 in the negative?

SUMMARY

The proposed measure provides that henceforth appointments in the executive branch of the government shall not require the advice and consent of the Governor's Council. Exceptions to this provision include appointments to the Youth Service Board, Industrial Accident Board, Commission of the Department of Public Utilities, Parole Board and Appellate Tax Board, which appointments shall continue to require Council action. However, should the Council fail to act upon such appointments within thirty calendar days, then the person involved shall be deemed to have been lawfully appointed. Any appointment in the executive branch by an officer other than the Governor which heretofore required Council approval shall henceforth require approval by the Governor.

Removals from office shall no longer require the advice and consent of the Council, except in the case of the Youth Service Board, which removals must still receive Council approval. As in the case of appointments still requiring Council approval, such recommended removal from the Youth Service Board must be acted upon by the Council within thirty calendar days; otherwise the proposed removal shall become effective as if approval had been given. In the case of any appointment which heretofore required Council approval the Governor may, within fifteen days of the making of the appointment, remove the person appointed without cause.

The Council shall no longer be required to approve the fixing of any compensation for services rendered in the executive department. And henceforth there need be no approval by the Council of actions or agreements by

executive officers, including but not limited to borrowings and loans, investments leases, licenses, purchases and conveyances, and contracts and also including the promulgation of rules and regulations.

Notwithstanding the foregoing, the Governor shall at all times remain free to seek the advice and consent of the Council upon any matter.

No	982
Blanks	937

QUESTION No. 6

LAW SUBMITTED UPON REFERENDUM AFTER PASSAGE

Do you approve of a law summarized below, which was approved in the House of Representatives by a vote of 180 in the affirmative and 40 in the negative and was approved in the Senate by a vote of 28 in the affirmative and 5 in the negative?

SUMMARY

Under the Act, effective as of January 1, 1964, each member of the General Court shall receive seventy-eight hundred dollars for each regular annual session, the President of the Senate and Speaker of the House of Representatives shall each receive the same amount as additional compensation, and the floor leaders of each of the major political parties in the Senate and House, the Chairman of the Senate Committee on Ways and Means and the Chairman and Vice-Chairman of that committee of the House, shall each receive thirty-nine hundred dollars as additional compensation, to be paid as provided in the Act. After the same date the annual expense allowance is to be six hundred dollars for each member and the travel allowance is to be eight cents per mile with a stated minimum and an alternative, and a member chosen to fill a vacancy or who resigns during a session is to be entitled to per diem compensation at the rate for each regular annual session and to the allowances for travel and other expenses for the time of his membership.

It is also provided that in addition to the compensation for the 1963 annual session the President of the Senate and Speaker of the House shall be paid thirty-nine hundred dollars, the floor leaders of each major political party in the

Senate and House, the Chairman of the Senate Committee on Ways and Means and Chairman and Vice-Chairman of that committee of the House, shall be paid twenty-nine hundred and twenty-five dollars and each other member shall be paid nineteen hundred and fifty dollars. Each member shall also be entitled to an additional expense allowance of two hundred dollars for the calendar year 1963 and the travel allowance shall be at the rate of eight cents per mile with a stated minimum and an alternative for the balance of the calendar year 1963.

NOTICE

All dog licenses here listed expire
March 31, 1965.

Dogs must be licensed on or before April 1st or the owners or keepers thereof are liable to a fine.

The law applies to all dogs three months old or over, regardless of time of year ownership is acquired.

No tax bills are sent to owners of dogs.

ASSESSORS' REPORT

To the Citizens of Maynard:

The Annual Report of the Board of Assessors for the year ending December 31, 1964 is submitted herewith:

In accordance with the provisions of the General Laws of Massachusetts, Chapter 59, Section 29, all owners of taxable property shall, each year, on or before March 1st submit to the local Assessors a list with the valuation of their taxable property. Notices are posted and forms may be obtained at the Assessors' office in the Municipal Building.

Beginning January 1, 1964 as enacted by the Massachusetts Legislature, the law requiring the payment of poll taxes has been repealed.

All requests for abatement or exemption of taxes must be filed on forms which can be obtained at the Assessors' office. All applications for abatement or exemption of Personal Property Taxes or Real Estate Taxes must be filed on or before October 1st of each year.

TOWN ACCOUNTANT'S REPORT

To the Honorable Board of Selectmen:

Herewith is presented the report of the Accounting Department for the year ending December 31, 1964. The report is made in accordance with the requirements of the State System of Accounting.

In accordance with the provisions of Section 61, Chapter 41, of the General Laws, I hereby certify that I have verified the cash balance of the Town Treasurer as of December 31, 1964. The cash balance on December 31, 1964 was \$432,958.30.

In accordance with the provisions of Section 23, Chapter 59, General Laws, as amended, the amount of available funds or "free cash" as of December 31, 1964 is \$173,184.91

The courtesy and co-operation received from the various Town Boards, officials and employees is gratefully appreciated.

Respectfully submitted,

JAMES V. KING
Town Accountant

REPORT OF
REGISTRARS OF VOTERS

To the Honorable Board of Selectmen
Maynard, Massachusetts

Gentlemen:

This has been a busy year for the Board of Registrars. Sessions for the registration of voters were held in February before the Annual Town Meeting and Town Election in March. Sessions were also held before the Presidential Primary, the State Primary and the State Election. Numerous Independent Nomination Papers and Petitions were checked and the signatures certified by the Board.

The Annual Listing of Residents of the Town, twenty years old and older and the Listing of Dog Owners was conducted as usual under supervision of the Registrars.

In May Edward E. Puffer resigned from the Board because of ill health. He had served faithfully and efficiently since his appointment in 1952.

Patrick J. Murray was appointed to fill out Mr. Puffer's term.

The total number of registered voters on December 1, 1964 was as follows:

Men	2170	Democrats	1765
Women	2293	Republicans	803
		Unenrolled	1895
		Total	<u>4463</u>

Respectfully submitted:

FREDERICK S. JOHNSON,
Chairman
ALEXANDER J. BOURKE
PATRICK J. MURRAY
ELEANOR JONES, Clerk
Board of Registrars of Voters

REPORT OF
THE MAYNARD HIGH SCHOOL
BUILDING COMMITTEE

To the Board of Selectmen
Maynard, Massachusetts

The Maynard High School Building Committee herewith presents a report of progress for the year 1964.

1. Twenty-two regular meetings and ten special meetings were held during the year.

2. On May 7, 1964 it was voted to authorize the Architect to issue a certificate of substantial completion to the general contractor as required by law. The building at that date was within 1% of completion.

3. Equipment has been purchased as follows: Administrative Office, Arts and Crafts, Assembly Room, Cafeteria Kitchen Smallwares, Cafeteria Tables and Chairs, Classroom Furniture, Gymnasium Equipment, Health Room Equipment, Homemaking Equipment, Homemaking Appliances, Homemaking Smallwares, Industrial Arts, Kitchen Equipment, Lab Equipment, Library Equipment, Maps and Globes, Metal Cabinets, Miscellaneous Equipment, Music and Practice Rooms, Platform Draperies, Platform Furniture, Sewing Machines, Shades and Drapes, Shelving Storage, Steel Lockers, Student Activity Room, Typing and Business Room.

4. Mr. Elmer Anderson, Clerk of Works, resigned on March 20, 1964 to accept a similar position with the Town of Stoughton, Mass.

5. A sub-committee has been formulating plans for a dedication ceremony to be held in the near future.

6. It is the intent of the Building Committee to continue its work for several more months.

Respectfully submitted,

HARRY F. CHAPPELL, Chairman
For the Committee

REPORT OF THE LIBRARY TRUSTEES

The Board of Trustees of the Maynard Public Library herewith submits its annual report for the year 1964.

Mrs. Eleanor Hunter was re-elected to a three year term as Library Trustee and therefore, the composition of the Board remained unchanged.

The Board held regular monthly meetings during the year and called special meetings whenever the need for them arose.

The Story Hour, for pre-schoolers, which was begun last year on a trial basis, is now a regular bi-weekly feature of the total Library program. During the summer months the Story Hour takes place weekly. It is being conducted by Mrs. Edythe Fawcett, a kindergarten teacher in Acton. Though recreational and educational in nature, the purpose of the Story Hour is to introduce children, at an early age, to the Library and to the various facilities it has to offer.

The reference section, an extremely important part of any library, is continuously being expanded by the acquisition of many excellent materials. The children and the adults of Maynard are making good use of this section in ever increasing numbers.

Consideration is being given to extending the Library hours in order that the community may be better served and that fuller use may be made of the available facilities.

We have been seeking and examining estimates and floor plans for the eventual development of the lower floor into a children's library. Though there are no immediate plans to make such a move at this time, the Board wishes to plan adequately now so that when the time comes to expand, the transition may be accomplished as economically and smoothly as possible.

Recently, a meeting was held with Mrs. Sylvia Clark, the Librarian of the new Maynard High School Library, to investigate, delineate and clarify the respective roles and functions of the two libraries. It was recognized that though the two agencies share a common goal over a considerable area, the Public Library exists for all ages and groups in the Town of Maynard, whereas the High School Library has a special purpose; to provide the school with a learning and teaching tool especially

fitted to its needs and easily accessible to students and teachers alike.

We wish to express our most sincere thanks and appreciation to the Librarian and her conscientious staff, to the many diligent volunteer workers and to the generous donors of books and gifts who have all helped to make the Maynard Public Library an institution of which the community as a whole can be proud.

R. FRANK PUNCH, Chairman
ELEANOR HUNTER, Secretary
GEORGE J. LEMIRE

ANNUAL REPORT OF THE LIBRARIAN

Board of Trustees
Maynard Public Library

Your Public Library provides the community through its Staff: Books, materials, and services for all ages, interests, and reading levels. Supplementary library materials for the young person as an individual. Individual reference and reading guidance for all ages. In addition to all this, the work behind the scenes keeps the library staff more than busy.

Many nights the library has been filled beyond normal seating capacity. This is one indication of the steady increase in the use of the library. We are delighted with the increase, but it does create problems and indicates the need for additional help. The State minimum standards for a town the size of Maynard calls for 3 1/2 staff members. In order to accomplish our objective in recataloging the library collection more help is needed.

Through cooperation with the schools several classes have visited the library for instruction in the use of library facilities. We all enjoy the weekly visits of Mr. Wallace and his class from Green Meadow School. During Children's Book Week, St. Bridget's Kindergarten and classes from Green Meadow and Coolidge Schools visited the library. A few collections of books have been loaned for elementary classroom use.

Mr. Azier and Mr. Magno of the Junior High issued summer reading lists to their students. This required reading along with the High School summer reading kept the library extremely busy all summer.

Under the direction of Mrs. Edythe Fawcett, the Story Hour for pre-schoolers is a very satisfying program, as many as 25 to 40 attend each session. Fire Chief, Philip Wilson, brought a fire truck and firemen for the children to see, Santa Claus was received with great delight, and we have had live rabbits and kittens at different times.

With the cooperation of the teachers reading certificates are still being issued.

During National Library Week the Maynard Historical Society loaned us a collection of photographs of Maynard; these were kept for several months as the people enjoyed them so much. A display of paintings of antique dolls and dolls was furnished by Mrs. Frank Yuchnevicz.

One hundred and one new reference books have been added this year and we would like to see more adults making use of this service.

As your Librarian I have attended many State, Regional, and local library meetings.

A bonus of \$150.00 in childrens books was given to each librarian attending a state sponsored course I attended on Children's Literature. These books were selected by each librarian for their own library. At present I am enrolled in a course on "Library Organization".

Our thanks to the Concord Free Public Library for their continued courtesy in the loaning of books.

The following have donated books or magazines:

Maynard Woman's Club	Mrs. Jeremiah Lynch
United Co-op Guild	Mrs. Charles Warren
Thimblina 4-H Sewing Club	Mrs. Lauri Pekkala
Lutheran Church	Mrs. Ruth Regan
American Legion	Mrs. Madeline Lukashuk
Christian Science Church	Mrs. Robert Hanson
Mr. and Mrs. Clarence Peterson	Mrs. C. E. Jackson
Mr. and Mrs. Donald Macglashing	Mrs. Gilda Mullins
Mr. and Mrs. Joseph McWalter	Mrs. Walter Carbone
Mr. and Mrs. Albert Alexanian	Mrs. J. DeTurris
Miss Janette Taylor	Mr. Fred Fairbanks
Miss Mary Flannery	Mr. Grayson Bates
Mr. Howard Boeske, Jr.	Mr. David Wade
Mr. Albert Rogers	Mr. W. F. McGann
Mr. Philip Murphy	Mr. Howard Whitney
Rotary Club	Mrs. Orville Tucker

Books have been given in memory of Mrs. Thomas French, Albert Batley, Thomas Gramo, Mr. Paul Wende, Robert Madsen and Steven Brian Alexanian.

Flowers have been sent to the library from Mrs. Marguerite Lund, Sophia Soroka and Mr. George Perrone.

A large framed English engraving "Battle of Trafalgar" was presented the library by Mrs. Genevieve Ingham in memory of her husband, Mr. William Ingham. Mrs. William Smith donated many interesting articles from South Africa which had been brought her by her son Rev. William Smith.

STATISTICS

Books added 1964	1692

My sincere thanks to the staff, Mrs. Alice Lyons and Miss Annie Duggan for their courtesy and kindness to all, and to the Board of Trustees, volunteers, custodians and all other Town Boards for their wonderful cooperation.

EDITH H. CARBONE
Librarian

REPORT OF THE
BOARD OF PUBLIC WORKS

To the Citizens of Maynard:

We hereby present the Board of Public Works report for the year 1964.

We are concerned with the continuous rise in the cost of operating and maintaining the various Departments that are under jurisdiction of this Board.

Each year due to new developments and the increased water, drain, and sewer extensions to our system, adds to the work load and cost of running this Department. In addition, the roads leading to and the parking areas of the Town House, Library and new Schools have to be plowed and maintained.

You can see from the Superintendent's report and the articles placed on the Warrant at the Annual Town Meeting, the number of streets up for acceptance and the requests for additional sewer and water extensions or renewals.

The critical problem of our water supply has been somewhat alleviated by the addition of a well at the Army Quartermasters in Sudbury. This well is presently pumping 300 gallons per minute into our supply at White's Pond. The local Civil Defense secured 3500 ft. of 8" pipe to convey the water to White Pond. The pipe is loaned to us for the emergency.

We have an article on the Warrant to allow the Board of Public Works to negotiate a lease with the Army for the use of this well. In return, the Army wants to connect 35 homes for Army Personnel on the Base.

We believe that this is the proper course to take. It not only gives us the right to the water from the well, but it also includes the base with any future water problems that Maynard might have.

We do not want to sound overly optimistic but at the present time we have excellent preliminary reports (but not conclusive) from tests taken of a potential well site. This site is near our present water system and if after further examination and longer tests are made and the end result is as good as the preliminary ones it might be the answer to our water shortage for the immediate future.

Last year the daily covering of rubbish went into effect at the Public Dump. This sanitary method while more costly, eliminated a nuisance and an eyesore from the Community.

This year the cost of operating the dump will be much higher. The reason for this added cost is that we will have to pay for the fill needed to cover refuse. Last year we got most of the needed fill from the dump site for nothing.

The Sanitary Land Fill Committee has been studying this situation and may make recommendations at the coming Town Meeting.

Respectfully submitted,

MICHAEL BARILONE
GERALD NEE
JOHN J. TOBIN

In Memoriam

Roy Everett Marsden

REPORT OF THE
SUPERINTENDENT OF PUBLIC WORKS

To the Board of Public Works:

Gentlemen:

Herewith is submitted the Annual Report of the Superintendent of Public Works for the year ending December 31, 1964, which includes Highway, Water, Sewer, Cemetery, Parks, Trees, Insect Pest Control, Parking Areas, and Sanitary Land Fill.

HIGHWAY DIVISION

Streets treated with Bituminous Oil:

B Street	Lewis St.	Railroad St.
Chandler St.	Lincoln St.	Sheridan Ave.
Concord St.	Elmwood St.	South St.
Deanne St.	Maple St.	Summer Hill Rd.
Driscoll Ave.	Mill St.	Warren St.
Fairfield St.	Old Mill Rd.	Hayes St.
Front St.	Arthur St.	
Harrison St.	Pine St.	

Streets resurfaced with Bituminous Mix:

Waltham St. from Parker St. to First St.
Great Rd. from Stow Line to Dewey St.
Great Rd. from Espie Ave. to Thompson St.

Streets graded with Bituminous Mix:

Acton St. from Haynes St. north.
Old Marlboro Rd. from Marlboro St. east
Rotary at Great Rd. and Parker St.

Street Construction:

Main St. from Spring Lane to Great Rd.

A storm drain was laid from Parker St. to Old Marlboro Rd. and one on Butler Ave. from Powder Mill Rd. to Garfield Ave. and three catch basins built, and one from Sudbury St. to the Mill Pond. Ten catch basins were repaired and three hundred were cleaned of sand and debris.

Sidewalks were repaired on Tremont St., Percival St., Glendale St., Brown St., Main St., Florida Rd., and Summer St. The sidewalk in front of Glenwood Cemetery was raised

and surfaced with stone dust and in front of the Summer St. Schools, the side walk was graded, curb repaired and a new surface of Bituminous concrete was laid.

Off street parking lots were given the same care as streets. That off Main St. was sealed with Bituminous Oil and a new paved entrance was constructed from Nason St. Additional lights were installed at the request of the Chamber of Commerce.

Traffic Signs

Eighteen new signs were installed at the request of the Traffic Department, fifteen traffic meter posts reset, and twenty parking meters adjusted. Signs were also erected at the request of the School Department, and cross walks were painted.

Street Cleaning

Regular sweeping of all streets was done in the Spring, and special sweeping was done during the year, when needed. The business section was swept twice each week from April to December and trash baskets were emptied each week.

Subdivision Streets

Ways in subdivisions were included in the Snow Removal Program for the convenience of home owners. All the streets meeting the requirements of Town Ways, will be laid out by the Board for acceptance as public streets.

Snow Removal

All streets and sidewalks were plowed and sanded as usual and snow removed from public places, and 80 sand barrels were placed at hills and kept filled with sand for emergency use. Increased road mileage, the addition of new streets and new school roads and parking lots, will eventually result in greater cost of this service.

WATER DIVISION

Water Pumping Record

	1953 Gals	1963 Gals.	1964 Gals.
January		19,565,000	20,460,000

New meters installed-new service	15
Meters replaced	150
In subdivisions	50

Services

New water service	15
In subdivisions	24
Water relays	23
Water leaks	12
Curb boxes cleaned and replaced	20

With the help of water from the well leased from the Sudbury Water District and restrictions on non-essential use of water by consumers, the water supply has been maintained. The White Pond level has increased a few inches; however, an increased supply will be necessary if we are to remove restrictions. Increased demands for various uses, and new homes being added, means more water needed.

SEWER DIVISION

Sewer Main Extensions

Wood Lane	356 Ft. 8" A.C. pipe
Concord St.	258 Ft. 8" A.C. pipe
Waltham St.	240 Ft. 8" A.C. pipe
In subdivisions	285 Ft. 8" A.C. pipe

Services

New sewer services	32
In subdivisions	24
Main sewer blocks	20
Service Sewer blocks	29

The additions to our Sewer Disposal Plant have made a more efficient system of operation and the larger variable speed pump at the Powder Mill Rd. station provides a more steady flow of sewage, improving the flow in the collecting main as well as more efficiency in the primary settling tank at the Disposal Plant.

A complete survey of our sewage collecting system of mains should be made so that the increasing year by year load be routed so as not to overtax any particular part.

Sewer Pumping Record

	1953 Gals.	1963 Gals	1964 Gals.
January	10,020,950	16,857,900	15,000,000
February	9,983,000	15,172,900	21,748,890
March	14,189,000	17,524,100	28,376,100
April	25,668,500	18,030,300	22,774,200
May	12,402,150	19,730,400	22,477,900
June	11,146,430	17,569,400	21,466,500
July	10,977,750	15,337,000	22,336,000
August	9,910,950	19,730,400	20,300,500

October	9,613,750	16,730,400	18,272,900
November	10,685,200	15,730,400	16,149,700
December	11,559,670	15,000,000	19,961,000
Total	145,600,300	205,143,600	249,449,090

CEMETERY DIVISION

Grave openings	62	Liners installed	42
Foundations	10	Markers	14

Sunken graves - In the old cemetery, one entire Section #28, single graves was loamed and seeded.

The grass was mowed, trees and shrubs trimmed, and avenues were graded. Seven maple trees were lost due to drought, and should be replaced. It would be very desirable that the main avenue of the cemetery be paved from Parker St., mainly because of muddy conditions in the Spring and early Winter.

TOWN DUMP-SANITARY LAND FILL

We are now disposing of refuse by sanitary land fill operation, in which operation refuse must be compressed and covered each day. This operation has been made possible by use of the heavy front end loader purchased this year. However, a very large amount of cover material must be used which, at present, we are securing from the bank at the Sudbury side of the Dump site. It is a question of how long we will be able to get cover material there, and if we should be required to purchase this material, it will be a comparatively costly operation. Even now, we need to use a truck at least every other day to move cover material.

TREES, PARKS, AND INSECT PEST CONTROL

John A. Crowe Park playing areas were kept in shape for use of school and town groups. The baseball diamond was graded, field mowed, and tennis courts were kept in shape. The Band Stand was made available for Band Concerts and lights were provided.

Memorial Park was kept mowed and cared for. Trees and shrubbery were set to replace those removed when the parking lot was enlarged.

Public shade trees were trimmed, 26 diseased and broken trees were removed and thirty maple trees were planted.

In cooperation with the State, samples were taken for Dutch Elm Disease and 47 trees were found to be positive. They are being taken down and burned as required. During the year, 168 diseased, dead and dying elm trees were removed. The elm wood and brush was burned at the Dump away from the rubbish.

Aerial spraying was done for mosquito control and proved satisfactory. Hand spraying was done for poison ivy and for insect pests.

CONCLUSION:

I wish to thank the Commissioners, employees of the Department, other Town Officials, and the public who have been helpful and cooperative during the year.

Respectfully submitted,

DONALD A. LENT
Superintendent

REPORT OF THE PERSONNEL BOARD

The Personnel Board met thirty-seven times during 1964. During the early part members of this board met with department heads in an attempt to form an alliance between town employees and the Personnel Board which had never existed.

Around the first of November three members of the Board resigned and three new members were appointed: John Page, Adam Mancini and Myron Bates. John Page was named Chairman and Adam Mancini, Secretary. The Board immediately started working on a salary adjustment to be presented at the 1965 Town Meeting. For the first few meetings the Board acquainted itself with the responsibility and the position that the Town of Maynard employees stand in comparison with the other towns in the vicinity. After meeting with the Fire Department and the Police Department representatives, a salary adjustment which met with the approval of all interested parties will be recommended. The Board was presented figures from the Department of Public Works, and in comparing these with the figures available through the Massachusetts Personnel Board Associations Workbench Survey, found that the original recommendation is the only amount that seems fair to the employees as well as the citizens of Maynard.

Our proposal for the 1965 Town Meeting may be unique in treating each department separately, but we feel that each department has individual problems of classification and responsibilities which in some cases prove the fact that the work of the Board will never be completed.

As of January 1, 1965, the following are members of the Personnel Board:

John E. Page II	Term expires March, 1969
Adam Mancini	Term expires March 1965
Myron B. Bates	Term expires March 1966
John Gunn	Term expires March 1967

REPORT OF THE
SANITARY LANDFILL COMMITTEE

To the Citizens of Maynard:

The annual report of the Sanitary Landfill Committee for the year ending December 31, 1964 is herewith submitted.

The sanitary landfill operation carried on at the Boeske property off Waltham Street this year proved highly successful, although quite costly. Suitable cover for the trash is getting harder to find and is high in price. We are limited to the type of cover we are allowed to use, as the better grade is being sold to an outside company.

Once again we suggest the use of the school property off Great Road for sanitary landfill purposes. The use of this town owned land would serve two very important purposes. As it stands now this property is a useless swampy area and could be reclaimed by a sanitary landfill operation with earth already on the site.

It could be graded and seeded to make a useful playground or properly surfaced for a parking area.

From an economical standpoint the town would stand to save many thousands of dollars. In this age of spiraling costs, these are points worthy of consideration.

In conclusion our sincere thanks to Donald A. Lent and the various boards of the town for their able assistance.

Respectfully submitted,

MICHAEL BARILONE
Chairman
KEVIN SPRATT
Secretary

REPORT OF THE
BOARD OF PUBLIC WELFARE

To the Board of Selectmen
Maynard, Massachusetts

Gentlemen:

The Board of Public Welfare and Bureau of Old Age Assistance submits herewith their annual report.

The Board meets each Tuesday in the Welfare Department of the Town Building at 7:30 P. M. Mrs. Barbara P. Hayward, Director, is present at the meetings when necessary.

The Welfare Department operates under the rules and regulations as set forth by the Massachusetts General Court and the State Department of Public Welfare.

Financial aid and assistance has been given to those who qualified for such assistance on General Relief, Old Age Assistance, Medical Assistance for the Aged, Aid to Families of Dependent Children, and Disability Assistance programs.

Mr. Raymond McGilvray was elected to the Board at the Annual Town Election in March.

Due to an unexpected increase in the number of cases qualifying under the various programs, with the exception of Old Age Assistance, the Board found it necessary to transfer funds from the Old Age Assistance account to the other State and Federal sponsored programs in order to meet remaining 1964 commitments. This was done following consultation with the Finance Committee and with the approval of the Board of Selectmen.

Salary increases for the Director and Social Worker were approved in September 1964, in accordance with the wage laws as set forth in Chapter 31, section 47E, amended by Chapter 579 Acts of 1962, and Chapter 702 Acts of 1964.

The Board has determined that a Federally sponsored program of surplus food distribution will be instituted during the early part of 1965. It was the opinion of many interested persons and local organizations who attended a meeting relative to such a program that it would be most beneficial to the Town. We wish to express our appreciation to all persons in attendance at that meeting for their constructive and helpful suggestions for the instituting of

this program.

Our sincere thanks to our Welfare Director, Mrs. Barbara P. Hayward, our Social Worker, Mrs. Marion Mulvany, and our clerk, Mrs. Sophia Minko, for their cooperation throughout the year, and to all other Town Boards and Departments for their able assistance.

CASE SUMMARY

Category of Assistance	Cases 1/1/64	Cases Added	Cases Closed	Cases 12/31/64
Old Age Assistance	70	18	19	69
Medical Assistance for the Aged	63	37	29	71
Aid to Families of Dependent Children	23	31	24	30
Disability Assistance	13	10	7	16
General Relief	15	37	41	11

The financial report will be found in the report of the Town Accountant and the Town Treasurer.

Respectfully submitted.

REPORT OF THE BOARD OF HEALTH

To the Citizens of Maynard:

The Board of Health submits its report for the fiscal year ending December 31, 1964. The Board organized in March with John J. Johnston as Chairman and Irving H. Manning as Secretary. As a result of Dr. John Hraba's resignation in February, J. Conrad Mayberry was appointed as third member of the Board.

The following appointments were made:

Board of Health Nurse	Stella M. Nowick, R. N.
Assistant Nurse	*Mary Foley, R. N.
Inspector of Plumbing	Warren E. Bemis
Milk and Food Inspector	Robert W. Rimbach
Inspector of Slaughtering	Lauri W. Manning
Burier of Animals	Gerald Pendergast

(*) Mrs. Foley resigned from the Health District in June and was replaced by Mrs. Mary White, R. N.

NURSES' REPORT FOR THE YEAR 1964

Patients Visited	690
Morbidity Calls	2,740
Old Age Assistance	256
Medical Aid to Aged	931
Disability Assistance Calls	44
Free Nursing Visits	310

DENTAL CLINIC

Our School Dental Program for children in grades one through six, who had parental approval, continued after the Christmas vacation to the end of the school year. The children were transported to the office of Dr. Joel Karp by Mrs. Mary White, Assistant Nurse, two days a week. In all, approximately 89 children were treated with a

total number of 289 visits involved.

POLIO CLINIC

Many of our residents had not completed their series of three doses of Sabin Oral Vaccine for complete immunization so that make-up clinics were held in April and May at the Board of Health office. A total of 217 doses of Types I, II and III were dispensed. During the three town-wide Immunization Clinics held in September, October, and November an additional 180 doses of the Trivalent Sabin Oral Vaccine were dispensed, bringing the total for the year up to 397.

RABIES DOG CLINIC

The annual Dog Clinic was held on May 23, 1964 at the Town Garage. Dr. Vance Carlson, Veterinarian inoculated 313 dogs. Annually, the Board makes an urgent appeal to the owners of some 300 more dogs who have not attended these clinics to do so for the protection of the community. There is no charge to local residents who should consider it a civic responsibility to protect themselves and others. ONE CASE OF RABIES IS TOO MANY!!

TUBERCULOSIS CLINIC FOR FOOD HANDLERS

Under our Food Handling Regulations, the Board made arrangements to conduct a T. B. Detection Clinic using the Tine Test (skin test) method for all those involved in handling food and beverage in the Town. This clinic was held on September 15, 1964 at the Municipal Building with approximately 255 people being tested and requested to return on September 18th for a reading of the test, i. e., negative or positive. A small group, who were read as positive reactors, returned on September 28th and were further tested by portable X-Ray equipment furnished by the State Department of Health. This program was carried out with the cooperation of Miss Cecelia Gearan, Consultant for the State Tuberculosis Division and Dr. Alice Broadhurst of the Middlesex Health Association.

IMMUNIZATION CLINICS

The local Board, in cooperation with the Massachusetts Department of Public Health and the Middlesex Central District Medical Society, made arrangements to conduct town-wide Immunization clinics during the months of September, October and November, 1964. The purpose of these clinics was to raise the immunization levels against tetanus, diphtheria, whooping cough, polio and smallpox,

especially among the pre-school and adult groups.

The following doctors and nurses were involved in the three clinics: Dr. Raymond Hooper and Dr. Samuel Cremer of Maynard; Dr. Charles Duston, Dr. Elmer Purcell of Concord; Dr. George Spencer of Bedford; Dr. Henry Harvey of Acton; and Dr. James Burke of Wayland. Nurses: Mrs. Mary Clark; Miss Marion Boothroyd; Mrs. Myrna Palmer, Mrs. Ann Maglione; Mrs. Marion Tomyl; Mrs. Frances Clancy; Mrs. Mary Holly; Mrs. Carol Lynch; Mrs. Stella Nowick and Mrs. Mary White.

Some 900 residents took advantage of these three clinics to obtain the much needed protection as follows:

	Doses
Smallpox	435
Tetanus, Diptheria, Whooping Cough	621
Polio	180
	<hr/> 1,236

Eight surrounding towns were involved in these same clinics, with Maynard leading the list in total number of doses administered.

The Board wishes to extend their appreciation to the many volunteers who willingly gave of their time to assist in so many ways at these clinics.

COMPLAINTS

During 1964, the Board feels they were successful in reducing many of the garbage complaints received by furnishing many of the complainants with copies of the regulations concerning garbage pick-up. It is understood that many of the complaints were received from new residents who, of course, were unaware of these rules.

Other complaints of a general nature were investigated and resolved in connection with the regular routine of the Board.

FOOD AND MILK INSPECTION

Mr. Robert W. Rimbach, Registered Sanitary Engineer and Senior Chemist, continued his monthly inspections of stores and restaurants together with his inspections of local dairies and sample testings of milk. The Board is

pleased to note that the food handling rules and regulations to be adopted by the State on January 1, 1965 parallel those that have been in effect in Maynard for five years, making any local changes unnecessary. Even though the list of new stores and restaurants grows, the same careful inspection is afforded all in an effort to give our residents and visitors to the Town maximum protection.

PLUMBING INSPECTOR'S REPORT

Mr. Warren E. Bemis, Inspector of Plumbing reports that he has issued 287 permits covering the installation of plumbing, an increase of 86 permits over 1963; while only 3 permits were issued covering cesspool or septic tank installations. An equal number of inspections covering these permits were made by Mr. Bemis. There were a few violations encountered during the year reported by Mr. Bemis which were handled to a satisfactory conclusion. In all other instances, Mr. Bemis reports fine cooperation from contractors and individuals alike.

The Board wishes to thank the numerous Town Offices and Departments for their cooperation during the year.

Respectfully submitted,

JOHN J. JOHNSTON, Chairman
IRVING H. MANNING,
Secretary
J. CONRADY MAYBERRY

Board of Health

REPORT OF
INSPECTOR OF ANIMALS

Board of Health
Maynard, Massachusetts

Gentlemen:

As Inspector of Animals I hereby submit my report.

Thirty-two (32) dogs were quarantined on suspicion of rabies, and after ten days the quarantine was lifted.

Also four horses and three barns were checked and found to be clean and free from contagious diseases.

Respectfully submitted,

WALTER J. DONOHUE
Inspector of Animals

REPORT OF
DOG OFFICER

Board of Selectmen
Maynard, Massachusetts

Gentlemen:

I hereby submit my report as Dog Officer.

During the year I returned forty-six (46) dogs to their owners, thirty-seven (37) were destroyed after ten (10) days keeping period.

I wish to thank the Chief of Police and his officers for their assistance during the year.

Respectfully submitted,

WALTER J. DONOHUE
Dog Officer

FINANCE COMMITTEE REPORT

To the Citizens of Maynard:

The Finance Committee held twenty-five meetings during the year 1964. Moderator Philip Wilson appointed Mr. Victor Tomyl to the Committee, and re-appointed Mr. Harold Johnston and Mrs. Ingrid Martin. Mr. Raymond Sheridan, Sr., was elected by the members to fill the vacancy caused by the resignation of Mrs. Virginia Robinson.

Two sub-committees appointed by Chairman Genest have been busy in between our regular meetings. They are the Policy Committee and the Long Range Committee.

Transfers from the Reserve Fund totaling \$10,424.84 have been made to various departments.

Respectfully submitted,

EMILE L. GENEST, Chairman
INGRID A. MARTIN, Secretary
ROBERT R. BILLUPS
OWEN F. DUGGAN
PAUL T. FOLEY
HAROLD W. JOHNSTON
PAUL R. MURPHY
RAYMOND J. SHERIDAN
VICTOR A. TOMYL

REPORT OF CIVIL DEFENSE AGENCY

Herewith is submitted the Annual Report of the Maynard Civil Defense Agency for the year ending December 31, 1964.

It has been a year of continued progress and we are pleased that the Civil Defense Agency has been able to fulfill the requests that have been made of the organization.

We are looking for more volunteer help in all departments of the Agency.

Once again we wish to thank the Board of Selectmen, the Police and Fire Departments and all other Town Officials for their help and cooperation during the year 1964.

Respectfully submitted,

DONALD A. MacGLASHING
Civil Defense Director

REPORT OF THE MAYNARD INDUSTRIAL
DEVELOPMENT COMMITTEE

To the Honorable Board of Selectmen:

Herewith is the first annual report of the reactivated Maynard Industrial Development Committee, submitted for the year closing December 31, 1964.

The Committee when first reactivated by the Town Moderator's member-appointments last spring chose for itself a single objective to ensure firm direction and purpose thus averting time consuming side trips into unrelated directions in study and action. Our decided purpose of function became the preparation for, and of, a comprehensive report to the people of Maynard on the feasibility of future industrial development.

Basically, therefore, the committee became a study group and the following report is the concensus of the committee's considerations during the past year. The report has been divided into four categories to further aid in studying its value and logic step by step. These are: (1) reason for industrial development, (2) local development assets, (3) local development liabilities, and (4) recommended program of development.

1. Reason for Industrial Development. A self-supporting economy is based on a balance of consumption and production. This is a continual process which can be damaged dangerously if the production portion of the cycle is not maintained and can be advanced if that same production is strengthened. Basically our local economy is comparable in that, if our industrial level is raised locally so is the consumer level and, also, our service or business level. New industry not only provides new direct payrolls which bolster the local economy, but also creates added jobs and business to service that industry and its employees. This is the direct advantage of industrial development to the citizens of the community as people. As a town, which people also are, the gain comes in the form of a new tax source. A widening of the local tax base in turn either lowers the tax rate, or provides added services for the community at the same rates. Tax-wise, industrially zoned land laying dormant pays far less toward the fiscal operation of the town than would the same land when developed, built-upon, and in productive use.

The Committee feels this is sufficient justification for investment by the Town in the development of a higher industrial level in Maynard.

2. Local Development Assets. Maynard has three industrially zoned areas. One is the area encompassing Maynard Industries so capably managed by Mr. Irving Berg. The Committee feels that this area is maintaining itself under good management and, although willing to assist if necessary, the main effort should be directed toward the two undeveloped areas. These being the Rockland Avenue zone of approximately 100 acres and the Powder Mill zone of about equal acreage.

In listing assets beneficial to industrial development beyond simple land area the Committee advances the following:

a. Economic Geography. In considering Maynard's location as a definite asset we point out that although no superhighway passes through our town we are conveniently located in the very heart of the State's progressing highway system. Minutes to the east lies prospering Route 128; to the west is the equally potential Route 495; to the north lies expanding Route 2, and just south of our town run Routes 9, 20, and the Massachusetts Turnpike. In turn these main highways connect with such routes as 1, 3, 5, 7, 15, 93, 95, and the rest of New England and the continent. Our proximity to the port of Boston and Logan International Airport cannot be discounted either.

Because of this same highway network, local industry could tap the labor market of an area within forty-five minutes drive containing a population of over 2,300,000. The metropolitan population concentrations of Boston, Natick-Framingham, Worcester, Fitchburg-Leominster, Lowell-Lawrence surround us, yet, we have room for growth in our immediate vicinity.

Maynard lies geographically between the space age research stimulus of Boston and 128 and the industrial Worcester County to our west where machinery, paper, plastics have solid economical foothold, this factor is definitely an asset for our growth potential.

b. Local Business and Industrial Environment. Maynard was founded through the stimulation of early industry and came to modern times as an industrial community. When at one point in our recent history industry, in the form of a single super-complex, failed us, local business jumped into the gap and successfully sustained us until new diversified industry could establish locally and reinforce our economy. Today's local business and industry stand as evidence of the Town's tenacity, potential, and sustaining climate. The Committee feels that this is solid foundation for building industrial advancement.

c. State and National Environment. Although this Committee does not profess to be expert in matters of Government and business relationships, it does, however, sense the very apparent surge of Government interest and support toward business and industry. At both state and national levels Government is bringing to bear highly concentrated efforts and legislation for raising the productivity and income of private business and industry. The Committee feels that this very area will feel and benefit from the effects of such efforts.

3. Local Development Liabilities. The Committee in listing our local liabilities toward industrial development do so with concern, but comforted by the realization that these liabilities can be overcome. Since, by far, most are self imposed by human nature, and thereby open to change by understanding, confidence in the future, and the realization that if we are to advance as a community of people we must work together as such toward that goal.

Our physical liabilities are those of road, water, and sewer systems in the areas where industrial development would come. These negative facts can be turned to positive through careful, direct investment in the Town's future. Considering that the future would undoubtedly see these areas serviced through forced expansion, the people must plan and control that future so that it can be an asset to the Town rather than an emergency last minute effort so prone to failure.

4. Recommended Program of Development. Because the Committee feels that there should be industrial development in Maynard and that this development must have not only centralized stimulation, but centralized guidance and control, as well, we have requested an article be placed on the coming Town Warrant calling for a more permanent type committee. In asking the people of Maynard to accept Chapter 40, Section 8A, as it pertains to industrial development, the Committee feels that the benefits of industrial development can be attained at less risk to the community while being assured of firmer direction and constant stimulation.

Basically, the development of Maynard's industrial future will depend on the entire community. Assistance and promotion, as well as investment and effort must come from many and varied sources. Present industry must help as should business. The municipal Government must cooperate as must the individual citizen. Local organizations could induce much stimulation to the program, as could our local news media. There should be county, state, and federal assistance and advisory consultation from

experienced, established agencies and foundations.

To more successfully tap these many resources and most effectively soothe the many possible furrowed brows there must be a central local group to funnel through and originate from.

There must be a coming together of the many concerned; a concentration of thinking and study; an inspiring program of effort for the future; and as a pliable bonding agent to it all there must be an effective, understanding, hard working, effort stimulating industrial development committee.

Respectfully submitted,

RAYMOND E. WUORIO

ANNUAL SCHOOL REPORT

MAYNARD, MASSACHUSETTS

ANNUAL SCHOOL REPORT

This cover for the Annual Report of the School Committee for the year 1964 was designed by Janice Doyle, a student in the Art Class at Maynard High School.

The following students of the Maynard High School Art Classes also submitted very fine drawings and are to be commended for their efforts:

Francis Rizzo
Sherry Mayes

MAYNARD, MASSACHUSETTS

REPORT OF
MAYNARD SCHOOL COMMITTEE

To the Citizens of Maynard:

We herewith submit the annual report of the School Committee for the year ending December 31, 1964.

During the past year, your School Committee has met regularly twice a month and has also had frequent special meetings whenever necessary to act upon matters pertaining to the Maynard Public Schools.

The year 1964 has been one with many changes of personnel and has been particularly noteworthy because it marked the opening of the new Maynard High School and the establishment of the Guyer Fowler Elementary School. The following data pertaining to Maynard's educational program and facilities is summarized for your information.

The following changes in personnel took place as a result of retirements, resignations and the creation of new positions:

PROFESSIONAL PERSONNEL

BY RETIREMENT

Music - Grades 1-6
Eleanor Fletcher

Roosevelt School
Rose B. Standish

Green Meadow School
Mary L. Wood

BY RESIGNATION

Senior High School
Barbara Cashin
Sylvia M. Clark
(Transferred)
Martha J. Cutting
James Hennessy
Robert Steeves
Robert Nelson
Dolores Wendell

APPOINTMENTS

Music - Grades 1-6
Diane Ashjian

Roosevelt School
Winifred Golding

Green Meadow School
Nancy L. Blyler

Senior High School
Judith Connaughton
Dorothy O'Malley

Claire McIntyre
Julie Murphy
William A. Turner
Laura R. Ware
Karen L. Akins

Junior High School
 Robert Coan
 Peter A. Delmonico, Jr.
 (Transferred)
 Russell Dionne
 Ann Littlefield
 Constantine Mourginis
 Suzanne Robinson

Junior High School
 Robert J. Viola

 George Wing
 Adair Miller
 Jeanette Hargroves
 David E. Courchene
 Charlene McBride

Roosevelt School
 Robert Stebbins
 Mary G. Carpenter
 (Transferred)
 Carol G. Lyon
 Joan Vodoklys
 Doris G. Fardy (Trans-
 ferred)
 Kathleen Mulderry
 Georgia Hohmann
 Linda McMahon
 Eileen Atwater

Roosevelt School
 Burdette A. Johnson

 Helen Teittinen
 Jeanne Gunion
 Teresia Ostrach

 Monica Lind
 Flore L. Craig
 Roseann Black
 Marion E. Bova
 Ruth A. Chetkas

Coolidge School
 Marie Sevene
 Marion Ledgard
 (Transferred)
 Eleanor Twomey

 Joan Shea

Coolidge School
 Vincent J. Buscemi

 Annette Johnson
 Marion Ledgard
 (Transfer)
 Deborah G. Singer

CUSTODIAL PERSONNEL

Senior High School

 John F. Howes
 (Transferred)

Junior High School

 Philip Buscemi

NEW POSITIONS

REPAIRS AND REPLACEMENTS

The following list indicates some of the major projects carried out in order to maintain the buildings and educational equipment:

EMERSON JUNIOR HIGH SCHOOL

Painted corridors, stairwells, Rooms 12, 25, 26, outer basements and boys' lavatory.
Replaced drinking fountain on second floor.
Installed fluorescent lights in both stairwells.
Repaired walls in corridors, replacing cloth with masonite.
Replaced window shades in Rooms 14, 24, 25.

FOWLER SCHOOL

Painted inner basements.
Installed wash sink in upper corridor.
Installed fluorescent lights in corridors.

GEORGE WASHINGTON AUDITORIUM

Painted stairwells.

MEMORIAL GYMNASIUM

Repaired bleachers.
General roof repairs.

ROOSEVELT SCHOOL

Painted Rooms 7, 12 and small room used for
Remedial Reading.
Installed new experimental lighting in two classrooms.
Replaced pupils' desks and chairs in two classrooms.

COOLIDGE SCHOOL

Painted Rooms 2 and 6
Ground and re-surfaced all blackboards.
Replaced three folding tables.
General roof repairs.

GREEN MEADOW SCHOOL

Replaced school sign at end of Green Meadow Lane.
General roof repairs.

ALUMNI FIELD

Repaired bleachers.
Repaired hockey rink.
Painted home team bleachers.

In addition to minor repairs and replacements throughout the school system, the usual repair services for business machines, clocks, heater controls, oil burner service, audio-visual equipment, etc., were also maintained.

OUTLAY

EMERSON JUNIOR HIGH SCHOOL

Purchased new piano.

MEMORIAL GYMNASIUM

Purchased new piano.

FOWLER SCHOOL

Purchased Spirit Duplicator
Film Strip Projector
Typewriter
Tape Recorder
Television
Pupil's desks and chairs for three class-
rooms
Twenty Student chairs for Home
Economics Room

SALARIES

One of the major problems confronting Maynard each year has been the difficulty in retaining its experienced teachers. Due to more attractive salary schedules in other communities, Maynard has been hard pressed each year by resignations from its professional staff. The new \$5,000.00 minimum salary law passed by the legislature and effective in September 1965, will go far toward eliminating these problems that have continually confronted us. The new state minimum has necessitated a change in the present Maynard Teachers' Salary Schedule to meet its requirements.

During the year, the School Committee has been working in cooperation with the Maynard Teachers' Association and with the Massachusetts Teachers' Association to develop a schedule that would be comparable with those of towns similar to Maynard in population and background. A new schedule has been approved by the School Committee, effective over a two year period beginning September 1965, the effective date of the new state minimum salary law. Since the present minimum in Maynard is \$4,500.00, the new schedule in its 1965 phase allows for a \$500.00 raise for all teachers. The second phase of the new schedule effective in September 1966, will not only increase maximum salaries but will also allow personnel with thirty approved credits beyond their Master's degree to receive an extra salary differential not presently offered for this degree of professional growth.

Of great importance is the fact that this salary revision will place Maynard in a much better competitive position than it has ever been for obtaining and particularly for retaining good teachers.

NEW FACILITIES

Much could be said about the new high school and its potential effect on the education of Maynard children. As taxpayers and citizens of Maynard, we are well aware that the costs of building and maintaining such a facility cannot be taken lightly. We also know that our children deserve equal opportunity to learn as exists in practically all other communities. A modern building with modern equipment will give them this opportunity. New curricula and new courses of study can now be offered in the high school. The addition of a school library, language laboratory and many other modern educational areas in the new school make it possible to predict a tremendous return in better

education for Maynard children. The lengthening of the school day has been made possible through the establishment of a school cafeteria and each student now is able to obtain one hour more each day of classroom time. This adds up to approximately thirty additional days of schooling each year beyond the time schedule limitations of the old high school.

The opening of the Guyer Fowler School has relieved the overcrowded classrooms of all the other elementary schools in addition to providing classroom space for children continuously entering our schools from homes in the new housing developments off Summer and Concord Streets. Our class sizes now average twenty-five to thirty pupils instead of thirty-five pupils per room. This should insure more individual attention for the children as well as conforming more closely to the size of classes recommended by the State Department of Education.

With the addition of these two schools to our educational system, Maynard has successfully solved its problem of overcrowding and barring any unprecedented influx of families into the town, is now able to offer a program of education equal to that offered in any other community.

The School Committee wishes to take this opportunity to thank all Maynard Civic Organizations, citizens, parents and the various town departments for their interest and cooperation in helping us to build, maintain and operate a good educational system. We also wish to thank the Superintendent of Schools and the entire personnel of the Public Schools for their dedication and efforts in making this a successful year in educational accomplishment.

Respectfully submitted,

WILLIAM H. LARSON,
Chairman

EDMUND W. BEEBE,
Secretary

REPORT OF
SUPERINTENDENT OF SCHOOLS

To the School Committee and Citizens of Maynard:

I herewith submit the Annual Report of the Maynard School System for the year 1964.

Improving the quality of educational programs has been a continuing need which has challenged the public schools since their founding. In no period of our history have educators, lay citizens, government officials, and almost all other groups been as concerned as they are at the present time with the quality of education. The concern for quality has become an issue at all levels of government.

Massachusetts, again, has taken a position of leadership in an attempt to implement a course of action for the improvement of education throughout the Commonwealth. On May 31, 1962 the State Legislature approved Act 108 providing for a Special Commission to be appointed by the Governor for the purpose of making an investigation and study of laws of the Commonwealth pertaining to education, of the educational institutions of the Commonwealth and their organization, of the various school systems therein with a view to revising and modernizing the organizational and financial structure of schools and school systems, extending the facilities, curricula and educational goals of the schools and colleges of the State, and providing increased financial aid for education.

The report of this Special Commission has finally been made and at present is subject to review and action by the legislature. If enacted into law, the effects will be far reaching and will directly involve Maynard as well as all other communities. Recommendations of the report concern themselves with college education, public schools, curriculum, occupational education, special education, pupil personnel services, teacher personnel, school facilities, transportation, finance and other vital areas of the present organization. Although approval of the program is still uncertain, the first reaction to its publication is that the State will have to raise millions of dollars in taxation to assure its introduction in all communities as they themselves are already overburdened with the present property tax system of paying for municipal outlays. This Master Plan for education in Massachusetts, however, will place the Commonwealth once again in the category of states with outstanding educational organizations. The changes recommended will have a high price tag but the question

must always be:- can we afford not to follow the recommendation of the Special Commission.

In his report as consultant to the Commission, Sterling McMurrin, former United States Commissioner of Education wrote: "So when the question is asked, what is the purpose of education, what are its ends, to what are the commitment and energies of our schools properly directed, the answer must be sought across the total spectrum of human interest, experience, and value. It concerns first the well being of the individual and student..... But it concerns as well the strength of the Nation..... And it concerns the quality of the culture..... The question of education is nothing less than the question of how we are to achieve and preserve a genuinely free society in which men are authentic persons who are masters rather than slaves of the forces that shape the world and where there is a culture in which the spirit of man can flourish freely and whose vitality is not threatened by decline and disintegration but promises a future of even greater achievement."

NEW FACILITIES

In its own way, Maynard has recognized the need to prepare its sons and daughters adequately for the problems and opportunities ahead of them. In addition to lengthening the school day for all pupils, the Courses of Study at all levels are constantly being reviewed and modernized. The opening of the Fowler School has allowed a reduction in class size resulting in more individual attention. The new High School has made it possible to offer a greater variety of courses and educational experiences under ideal conditions for learning. Many of the suggestions of the State Report will already have been put into operation by the Maynard School System. The full effects of the Special Commission recommendations will not be felt for sometime. The legislature must first approve the report and then find some means of raising money to reimburse communities and relieve the property taxpayer of the additional costs the new program would entail.

EDUCATIONAL HIGHLIGHTS

In final analysis, the dedication of teachers, parents and Maynard Citizens have made it possible to offer an excellent educational preparation to the children of Maynard. The attendance of our teachers on a part-time basis at many colleges offering refresher courses and modern educational techniques, the acquisition of new equipment, the updating of textbooks, the use of new facilities and the de-

crease in class sizes have all had a profound influence on the study experiences of our pupils.

For further detail on educational innovations and accomplishments, I refer you to the reports submitted as part of this report by the Curriculum Co-ordinator of the Elementary Grades and the Maynard High School Principal.

ADDITIONAL PERSONNEL

The enrollment table included in conjunction with this report will show the continuing expansion of the number of pupils attending the Maynard schools. The impact of new housing and the need to anticipate further expansion has created some problems of facility projection, pupil enrollment and classroom size. The addition of new teachers has been necessary each year and it is hoped that with the addition of the following personnel in September, those needed will have been provided to carry on the work of our schools for the best interest of the children:

- a. Two Physical Education teachers to allow for expansion of this program in both the Junior and Senior High Schools.
- b. One additional Music teacher to work with Mr. Garabedian to develop the instrumental program, particularly at the lower grade levels.
- c. One Business teacher at the High School to further implement this curriculum.
- d. Two Elementary teachers to handle the classes created by two grade progressions now being accommodated in the system.
- e. One additional Industrial Arts teacher to service the Junior High students so that both the Junior and Senior High Schools will have more adequate instruction in this area.
- f. Addition of three-fifths of a teacher for the Junior High Home Economics classes to be able to raise this program to its required level.
- g. Full employment of the part-time clerk at the Junior High School office.
- h. One additional clerk at the school office in the Town Building.

EDUCATIONAL PROGRAM

The excerpts and summaries from reports submitted by principals, supervisors, and other special teachers provide the general public with background concerning the objectives, programs and needs of the Maynard Schools. By reading the accounts one can readily see that the total school curriculum in Maynard is organized into broad units of work, based on the imperative needs of the pupils, and constructed by specialists in every subject field. Provision is made for exploratory experiences, audio-visual learning, reports and discussions, culminating activities, and pupil evaluation. Our educational objectives take into account the following: democratic principles and practices, cooperative group processes, the results of scientific investigations and studies, the changing social structure of society, a positive rather than a negative approach, professional rather than personal relationships, strengths of individual personnel in promoting growth and development, long-range planning, and objective evaluation.

The Maynard school program is adaptive and developmental in nature and regards the building of good human relationships as important. The schools attempt to make children "good" in the ethical sense by teaching them their duties as citizens, as parents, and as individuals. Beyond this, the school attempts to make the child a better person for himself and others to live with.

HEALTH AND ATTENDANCE

The School Health Program, conforming to the recommendations of the Massachusetts Department of Public Health, carried out the following services during the past year:

The annual "Pre-School Roundup" was held in May. Twenty-eight children were given physical examinations by our school physician, Dr. Hooper. This year it is recommended that each child have a physical examination and be re-vaccinated before entering school.

In November, pupils in the first, fourth, eighth, and twelfth grades were given toxoid for the prevention of diphtheria and tetanus.

Pupils in the fourth, seventh, and tenth grades were given physical examinations by Dr. Hooper as were all students participating in competitive sports.

All students were tested for possible visual and auditory difficulties; parents were notified when specialized help was indicated. The services of the Dental Clinic, sponsored by the Board of Health, were available to those students who had particular need of dental care.

One hundred and four home visits were made during the school year.

On August 11, 1964, the State Department of Public Health issued new quarantine requirements for communicable diseases. These regulations were adopted by the Maynard Board of Health and each principal has been given a copy of the regulations issued by the State Public Health Division of Communicable Disease.

The health room in the new Maynard High School is well-equipped and provides an excellent working area for the care of the students.

Dr. Hooper has reported that the Maynard School Health Program, under the direction of Mrs. Dorothy Holt, R. N., has functioned well during the past year. He cited the success of the almost total immunization program, and the fortunate lack of serious outbreaks of contagious diseases as the beneficial result of the health standards maintained by the schools and the community.

During 1964, twenty-one specific cases of truancy were investigated. Conferences concerning these complaints were held with the parents and necessary action was taken.

PHYSICAL EDUCATION

Physical Education is a vital part of the general educational program. In Maynard the Physical Education Program strives to satisfy the social, mental, emotional and physical needs of the students. Muscular skills, proper attitudes and ideals toward physical activity, and desirable attitudes of conduct are created through this program. Our aims are: to enable each child to find his rightful place in society; to develop a strong well-coordinated body; to provide opportunities for participating in activities which can be continued after graduation; to develop leadership and co-operative qualities; to develop the bodily strength and endurance which must be maintained in later life; to provide body control through out-of-door play as much as possible; to provide

sports which will develop the spirit of good sportsmanship, fair play, and a thoughtful responsibility toward others.

A complete program of physical education was carried out in grades three through twelve. Grades three through six were in class two days per week. Grades seven through twelve had a complete testing of motor skills three times during the year and were graded accordingly. Grades seven through twelve were also given the opportunity to participate in gym activities that were aimed at developing these skills and were then tested.

The Junior and Senior High Schools participated in a regular interscholastic sports program. The High School Varsity Program for boys included football, baseball, and basketball. The girls' Junior Varsity Sports Program included field hockey and basketball. In an informal schedule, the trackmen took part in three cross-country meets. The track program has been skillfully handled by Mr. James F. Owens.

The Junior High Boys' Varsity and Junior Varsity Program included basketball, baseball, and football. These athletes participated in the Middlesex League. An Intra-mural Program for girls was carried on in Volley Ball.

The program in physical education and in inter-scholastic sports must expand with the times. The department recognizes this need and feels that it is essential that a course in health education be added to the curriculum.

GUIDANCE

Secondary

The objectives of the Guidance Program continue to be those which offer an organized series of services, activities, and experiences which will help each student to make realistic decisions about his role in society for today and for the future. It is the aim of the services available that such decisions will be self-directed, based on sound self-appraisal by each student of his interests, aptitudes, values, and motivation. Within this frame, therefore, the Guidance Program offers group and individual testing, educational and vocational information, school and job placement assistance, counseling, and follow-up studies to assess its own success in

meeting these aims and to determine areas in which improvement can be made to more fully serve the youth of Maynard.

The opening of the new high school has presented greater opportunities for an adequate program of guidance services than hitherto possible. The lengthened school day provides more time. The additional classroom space provides opportunity for scheduling more visiting speakers. The expanded guidance suite facilities offer for the first time a situation which assures counseling privacy. With more classroom space, expansion of the curriculum has been possible, thus offering a wider choice of electives in line with varying individual differences.

The needs of the ninth grade pupils have been better served this year through the re-apportionment of the counseling load. Dr. David Courchene of the Junior High School counseling office works with the ninth graders two half-days each week. In addition to providing a more realistic pupil-counselor load, this innovation will provide in the years to come a better bridge to high school for eighth grade pupils.

The testing program, using nationally known test instruments, continues to stress the use of local percentiles as well as national figures. Maynard youth continue to perform above average on national tests. School placement of graduates remains at a respectable level. Approximately twenty-five per cent of the graduating class attended a degree college and fifty per cent entered some school of the junior college, nursing, business, technician, mechanical, or secretarial type. This compares favorably with percentages for all towns similar in size and background.

The new time schedule has curtailed job placement to some extent, but local employers have co-operated generously in attempting to furnish part-time work. The facilities of the Employment Security Division of the Commonwealth of Massachusetts continue to be available within the school, as the General Aptitude Test Battery with counseling is offered to all seniors who will be available to the labor market.

Junior High School

The aims of the Guidance Program are met by providing the basic Guidance Cycle which includes all orientation, counseling, testing, conferences, and Spring

orientation. The different phases of the program are divided here for explanation; they are not differentiated in practice. Students go through different phases of the program at different rates of speed, and the same phase for some students may be repeated many times during the year. Each function of the program accepts the student at his level of physiological, psychological, intellectual, and spiritual growth as perceived by the student.

At the first assembly, it was explained that the guidance counselor would meet individually with members of the seventh, eighth, and ninth grades. The orientation interview is intended to introduce the student to the location and resources of the guidance office and to the counselor. The duration of the interview is ten minutes. The aims of the counselor during this interview are

1. To establish adequate rapport
2. To evaluate the extent of success the student is having and his feelings about school
3. To determine what information is needed by the student
4. To end the interview with a good relationship between the counselor and student

The introduction of vocational information, as is true with all information the counselor presents to the student during the orientation interview, differs in degree depending on the individual needs of each student. No attempt is made to bring students through a set pattern of behavior in the Guidance Program, but rather an attempt is made to accept the individual student in his present development.

During the fall orientation, which is more or less the collecting and giving of information, students are continually reminded of the services available in the Guidance Program via guidance assemblies, group discussion programs, bulletin board notices, homeroom guidance notices, homeroom teachers, the Student Council, and warning card interviews.

Counseling is the most important phase of the guidance program, but it must be self-initiated in nature after the first orientation interview. Counseling is a continuing function of the program, initiated by the individual who desires help in solving his personal, vocational, and educational problems. He may be referred by his

parent or teacher; however, it must be his decision to enter into the counseling relationship.

Group work or group discussion is an extension of individual counseling or preparation for individual counseling but allows the participating student to benefit from a social experience which is particularly valuable to teenagers developing social skills and abilities to communicate their ideas and feeling to others. There are four eighth grade groups and one seventh grade group with a maximum of nine students in each which meet once a week. The progress has been especially heartening in the eighth grade groups wherein the students attempt to relate themselves to their environment, learn social graces and skills, and express their ideas and feelings about their problems.

The testing program is limited in the Fall to individual intelligence scales upon referrals from teachers or the administration. The major part of the program is accomplished in the Spring with the administration of the Differential Aptitude Test, the Otis Quick-Scoring Mental Ability Test, and the Stanford Achievement Tests to the seventh and eighth grades. The results of these tests are utilized for program choices by the eighth grade students, for evaluation of the seventh and eighth grade students, and for counselor-parent-student conferences.

The Parent-Teacher Conferences were scheduled on November 30, December 7, and December 9. The other types of conferences held are staff conferences and conferences with organized groups of students to guide them in whatever way possible.

After, and perhaps during, the testing program, Spring orientation will commence with guidance assemblies for the sixth grade to prepare them to meet the standards of the Junior High School, for the seventh grade to help them assume the responsibilities of the eighth grade, and for the eighth grade to aid them in planning their program for the Senior High School. The two points of emphasis would be the in-coming seventh grade and the out-going eighth grade. The advantage of the Junior High School counselor working with the ninth grade becomes apparent when he helps the students plan their individual programs, and then, later, when he is at the high school to greet them at the beginning of the next year. This provides a valuable continuity in the program.

A student appraisal system is being worked out for

students from the grades and for the students who have completed their Junior High School program. Both will add a great deal to the counseling success of the faculty and Guidance Program. What has been done this year is a start, and the most encouraging aspect has been the manner in which parents, faculty, and students have utilized the Guidance Program.

JUNIOR HIGH SCHOOL EDUCATION

At the Junior High School Level, it has been found that pupils who are academically talented and who perform consistently on a high level have the best opportunity when they are grouped together. The Emerson Junior High School has had homogeneous grouping for many years.

In grouping, a check is constantly made for different patterns of achievement. The process of checking and re-checking assures a limited number of pupils in the lower achievement groups. This results in more individual attention. The upper achievement groups receive a program of subject enrichment through this system. Students are shifted to different groups during the year until they reach their best achievement level.

Gifted Junior High School students can participate in a program of acceleration and enrichment in science and mathematics. The students from this top group enrolled in biology in the ninth grade this past year. Students who participate in this program must meet certain requirements for admission which are superior achievement in basic arithmetic skills from the third grade through the sixth, high I. Q. scores, teacher recommendation, and general interest in the field of mathematics and science.

The program begins in the seventh grade with an intensive course designed to review all fundamental mathematics operations. The more advanced student requires less drill than does the average student; therefore, the enriched program provides the same material but in less time. Upon completion of the extensive review of all basic arithmetic skills, the students in the eighth grade are prepared to begin the study of algebra. Thus, in the enriched mathematics program, algebra is taught in the eighth grade. The next mathematics step for the advanced student is plane geometry in the ninth grade.

Mr. Courchene, the guidance counselor, combines a knowledge of each pupils' records with personal counseling to become the key person in the program for accelerated children. He deals with problems of

emotional adjustments, social relationships and educational needs.

The club program in the Junior High School is a vital part of the school experience for an adolescent. This period in a child's life should include an opportunity for guided exploration of interests and abilities. All staff members of the Junior High School assume responsibility for sponsorship of an activity. Staff members volunteer to sponsor the glee clubs, newspaper clubs, sports club, projectionists club, crafts and printing. It is not expected that any boy or girl be in more than two clubs or activities. Participation is based on interest, not on academic achievement.

Recognizing that many students interested in careers in mathematics and science fail because they lack adequate reading skills, remedial instruction is provided for those who need it. Next year it is hoped that special provisions will be made for them by having instructional periods which are in addition to regularly scheduled classes in English. Extra instructional periods in arithmetic are held twice a week for superior students and for pupils who are achieving below grade level expectancy.

The instruction in French which is started in grade four, with the new "American" approach (based on a hearing-speaking introduction to the language) is continued through grade eight where the conversational approach is gradually supplemented by reading, writing, and grammar.

Industrial Arts and Home Economics classes are conducted one period a week by Mr. Yuchnevich and Mrs. Taylor. Pupils obtain practical training in various skills of carpentry for boys and cooking and sewing for girls. Plans are underway to expand the program to two weekly classes per pupil.

Although there are many different ways of keeping the general public informed, the newspaper is generally considered one of the most valuable media for publicity. The newspaper clubs, under the capable direction of the two English teachers, have published their first issue of colorful, interesting and exciting school news.

A seven-period day is scheduled in order to make the daily class program flexible enough to fit the needs of all the students. The instructional program in grades seven and eight is essentially a required program for all pupils. The required subjects, English, Social Studies (with emphasis on history and geography), mathematics

and science, are given one period a day for five days a week.

After two years of part-time classes, the teaching staff and the pupils are deriving full benefit from the expanded six hour school day. This additional study and classroom time will have a great beneficial impact on the preparation of our pupils for the more complex subject areas waiting for them at the high school level.

ELEMENTARY EDUCATION

For decades the methods and content of elementary education have been defined, evaluated and re-defined by educators in an attempt to keep pace with changing attitudes and ways of life in our society. Throughout these sometimes subtle but continuous changes in methodology the very basic purpose and aim of public education has remained steadfast. This very basic goal consists mainly in adequately preparing each student so that he will have the knowledge, skills, and values which will enable him to take his place in society. However, society is constantly changing. Thus the approaches used in preparing students must likewise change. The teacher, in order to be effective must keep abreast of these changes. This requires a certain amount of enthusiasm and dedication on the part of the educator.

Today the teachers are faced with the educational philosophy that pupils should be taught more advanced material at an earlier age. We do not feel that workable methods should be replaced by the rush to be modern, but we do feel that the school must search for and find the areas in which each child, because of his individuality, may become more adept. We try to provide opportunity for each student to experience success in the development of skills and talents so that he may become a well-adjusted member of society. We try to create in each child the desire to do as well as possible the many activities which the school curriculum offers. We also expect our pupils to be courteous and to respect the rights and property of others.

If the children are happy and show academic growth and social improvement, their parents will be satisfied. We feel that the teachers and the principals should work to develop with the parents a feel of co-operation and partnership. The parents should feel free to visit the schools to observe teachers and children in their activities and to discuss problems with the principals at any time.

In the early phases of elementary education more time is spent in the areas of reading and arithmetic than any other subject. We are continuing to use the PHONETIC KEYS TO READING which was introduced last year in grades one, two and three on an experimental basis. The difference between this method and other methods used is that it involves a strong phonetic readiness in the form of an eight week auditory-training period before any formal pre-primer reading is introduced.

In the past, many educators in this country accepted sight reading as the best way to teach reading. Forgotten was the fact that there are individual differences. It was found that all children do not learn to read by one method. Now most beginning readers are exposed not only to sight reading but to phonics and the alphabet as well. The PHONETIC KEYS TO READING that we are using is an excellent source for teaching phonics. The schools of Maynard never did drop phonics completely from the reading program.

A workshop was sponsored by the Economy Company, publishers of the PHONETIC KEYS TO READING, in November at the Green Meadow School. Teachers from surrounding towns were invited. Interested teachers came from Acton, Concord, Stow, Weston, Townsend, Andover, Sudbury, Groton and Beverly. An experienced teacher with an excellent background in the teaching of the PHONETIC KEYS TO READING conducted both sessions. The workshop was very worthwhile, and many of the suggestions and devices have been carried over into the classroom.

Mathematics will be a valuable tool for all people in the world of tomorrow. It is essential, therefore, that children develop the ability to think in terms of the abstract. In the new approach to school mathematics at the elementary level there is little, if any change in actual content. There is some change in grade placement, vocabulary, and considerable change in methods of teaching and presentation. The latter leads to positive attitudes toward arithmetic and mathematics as a whole, to better and more lasting understanding, to simpler teaching and easier learning.

This year we are introducing Modern Mathematics in the first and second grades. The teachers find it very interesting and find the in-service course given here in Maynard by Dr. Weaver from Boston University most helpful. The LAIDLAW WORK BOOK IN MODERN MATH is being used. Next year there will be a continuation of this program into Grade Three.

The work of the classroom teacher, in certain areas, is supplemented by other members of the School Department personnel. Mrs. Albina Donoghue, the Elementary Art teacher, and Miss Diane Ashjian, the Elementary Music Teacher are present in the buildings one day per week to conduct formal lessons in their subject areas in each grade. Follow-up lessons are provided by them for each teacher. Mr. James Duggan and Miss Jennie Magni, the Elementary Physical Education teachers, spend two sessions per week with the upper elementary grades. One afternoon per week, Mr. Donald Saulnier, the High School French teacher, is present to supplement the work of the fourth, fifth and sixth grade teachers in that subject. The Remedial Reading instructor for the elementary grades Miss Irene Canty, works weekly with certain students requiring special attention in that area.

The basic curriculum or classroom program is also supplemented in the areas of Art, Current Events, French, Music, Science, and Social Studies by the 21 Inch Classroom programs. This educational series brings into the classroom, by means of television, many meaningful and helpful experiences and demonstrations which are not otherwise readily available to the teachers.

A necessary part of any school program, if the student is to grow socially as well as intellectually, are those activities which fall outside of the classroom routine. It is our desire to establish extra-curricular activities for the students which will be useful, meaningful, enjoyable and which develop a sense of responsibility.

Trips provide immediate experience and are the most concrete of all teaching techniques. Bus excursions were made to the Children's Museum, Bedford Airport, The Museum of Science, The Worcester Museum, Bunker Hill and the Constitution. Groups have had very informative lessons at the library with Mrs. Carbone lecturing to the children and terminating the lesson with each child acquiring his own library card. Some groups of older children toured the Freedom Trail. Some classes went to the Cinerama in Boston for the showing of a film which correlated with units in Social Studies.

The initiation of a School Safety Patrol has been organized and has been enthusiastically received by the students at the Guyer Fowler School. Its primary purposes are: to help protect the children from automobile accidents on their way to and from school; to help the children develop sound habits in the use of streets and sidewalks; and to foster qualities of leadership and good citizenship in Patrol members. The twelve boys selected to serve as

Patrolmen were those receiving the highest marks on a written examination on school safety. The exam was taken by more than thirty applicants from grades four, five, and six.

The elementary student body has also participated in the following fund raising programs: the American Junior Red Cross Drive; the Band Parents' Candy Sale and a drive sponsored by a committee to preserve the battleship U. S. S. Massachusetts.

The elementary school administrators and educators are fully aware of the increased recognition of the vital role education must play in the future of our nation. It is in the schools that our children must be equipped with the resources and skills needed to face adult responsibilities in a civilization where automation is rapidly diminishing the demand for unskilled labor and where change is the only constant factor.

REMEDIAL READING

Elementary

Within the regular classroom developmental reading program, some children fail to progress in reading in line with their capacities to learn. These children are the ones who profit from intensive remedial instruction. Accordingly, children in the remedial classes receive instruction suited to each individual's level of attainment and for his specific needs.

At the end of the school year the Remedial Reading Program was evaluated on results obtained from the Stanford Achievement Tests. It was gratifying to note that a high percentage of the children in the remedial classes made enough progress to maintain good achievement in the regular classroom. On the other hand, it was disappointing to note that some children had not advanced sufficiently to meet with success in the classroom, but would require more special teaching at their level of achievement.

In any program of remediation or correction, the first step must be to determine objectively whether or not improvement is possible. At the close of the school year in June, the classroom teachers referred children, who in their opinion, could be helped with more individualized instruction. At the opening of the present school year, each child's cumulative record was studied, and if, in the opinion of the remedial reading teacher, a child's record showed evidence of a reading weakness, his name was added to the list of referrals. From the combined lists,

eighty-four children whose reading achievement was low but whose reading potential was average or above average were selected and enrolled in classes for remedial and corrective learning.

In order to group children for the remedial classes and to determine the instructional level of each child, an oral analysis was given to each one. Children were then grouped for instructional purposes according to the specific phases of work needed. The McKee Inventory of Phonetic Skills was administered to all to survey phonetic weaknesses for reteaching purposes. Materials are used that are appropriate for the needs and interests of the individual and the group. These materials consist of basal books, worktype readers of high interest - low vocabulary levels, teacher made materials, games and devices. The materials help to build and strengthen reading skills in word recognition and comprehension.

With the opening of the school year in September, the remedial reading teacher was faced with the problem of covering four elementary buildings. This necessitated a careful scheduling of time. It has been arranged so that each child in the remedial reading classes has two lessons weekly. This has been done by giving the Roosevelt School only one and a half days to allow a day at the Fowler School. Therefore, class periods had to be shortened to provide for all groups proportionately.

The Remedial Reading Program has now grown to such a point that the services of another remedial teacher would be advisable. It is almost impossible for one teacher to cover the reading problems of so many children and to ensure success for all.

Secondary

Reading is far more than pronouncing the words on a page and observing the punctuation guides. If the reading matter is to make sense, the reader must apply his own intelligence and prior knowledge to the interpretation of the printed page. Therefore, the objective of reading instruction in grades seven, eight, and nine is to enable the individual to reach his potential in reading by increasing his competence and understanding.

In grades seven and eight, reading classes are corrective in nature, providing help in reading in specific areas. Students are selected on the basis of general ability, performance on the Stanford Reading Achievement List, teacher judgment, and a careful review of cumulative records. In grade nine, there are developmental reading

classes concerned with the upward expansion of reading skills. In selecting candidates for these classes, an additional consideration is each student's long range academic goals, and priority is given to those who can derive the greatest and most immediate advantage. Of necessity, the classes are kept small. Furthermore, enrollment is voluntary because motivation must be personal and genuine if a skill is to be successfully enriched.

Multiple teaching methods and materials are used in working with Junior High students to correct reading disabilities. The basic text used is Advanced Skills in Reading, a skills book which gives step by step procedures on reading various kinds of material. The Controlled Reader, a device which projects onto a screen a graded reading selection at a rate suitable to the group, helps students to develop the ability to concentrate, to think faster, and to read more rapidly. Prepared Question sheets check comprehension. For the developmental ninth grade program, The Galaxy Program was introduced and has proved to be an exciting, challenging, and effective approach to reading improvements. All students enrolled in reading class keep forms, usually graphs, for every type of lesson. Thus, evaluation of student progress is immediately evident.

This program is engineered to meet special problems. Reading disabilities are not always obvious. Therefore, the increasing interest in and awareness of the program's purposes and facilities on the part of the administration, guidance department, teachers, and parents have been of immeasurable help.

SPECIAL EDUCATION

The Special Class Program stresses the emotional and educational growth of each pupil at his individual level of development. Pupils vary in their needs, and these needs will, again vary from year to year. The program attempts to provide an atmosphere free from regular classroom pressures in which the pupil feels free to concentrate in his own way and to discover his own abilities. The basic aim in the area of Special Education is to direct and encourage the development of pupils so that they may function as worthwhile citizens.

Whenever possible, the pupils are encouraged to participate in outside activities. The physical education teachers have been most co-operative in scheduling the pupils into the programs of various grades at the Green Meadow School. In addition, the children enjoy their weekly visit to the local library where they have an

opportunity to select books and become familiar with library use. The warm reception accorded the children by the library staff contributes a great deal to their pleasure. The music program, too, has been most successful in the special class area.

The core subjects are emphasized in the Special Class. At the present time, the average pupil is reading at the Third grade level with good comprehension. Auditory and visual discrimination is constantly stressed. The levels of learning in the arithmetic area are many. Each individual is encouraged to work to capacity. The pupils help one another in this area which, in turn, help them to develop the social habits of getting along and working well with others.

AUDIO-VISUAL PROGRAM

Elementary

The purpose of the Audio-Visual Program is to enable the classroom teacher to make her instruction more meaningful by presenting the pupil with various supplementary aids which help to clarify certain concepts. Quite often, a pupil needs to visualize in a concrete fashion what the teacher is trying to explain to him in abstract terms. It is here that audio-visual devices are invaluable to the teacher.

Obviously, a teacher will have far greater success in explaining a difficult passage in a musical composition if she can play a recording of it to the class. Through the use of such audio-visual devices and equipment as films, filmstrips, record players, tape recorders, microscopes, maps and globes, it is possible to give the pupil a more detailed and easily understood presentation. Not only do pupils understand and grasp more clearly a point being stressed, but they are also motivated to a greater degree and the interest level of the class can be maintained in a lesson that might otherwise be dull.

In Maynard, the Audio-Visual Program is based primarily on the use of television and filmstrips. For a number of years we have been participating in the 21 inch Classroom, a series of regularly scheduled lessons brought to the classroom by means of television.

Excellent programs are available for all grade levels in many subject areas. This year, our pupils have been viewing programs dealing with the areas of French, phonics science, music, literature, art and current events. There

is also an excellent series of "field trips" to various historical places throughout New England. It is possible for our pupils to visit these places, so to speak, without leaving their desks in the classroom.

We have a library of some two hundred filmstrips which are readily available to all classrooms for viewing. These filmstrips deal with a great number of subject and skill areas. Some recent acquisitions have to do with the space age, the use of the dictionary, map reading, and patriotic holidays.

In the lower grades, teachers make frequent use of such devices as flannel-boards and counting frames to aid them in the teaching of arithmetic. This year, the Industrial Arts department of the high school made some "counting-men" for the primary grade teachers. These are being used with great success in conjunction with the new Mathematics Program which was introduced this year.

All the upper grades have fully equipped science-demonstration tables to enable them to actually perform experiments in the classroom and thus gain a greater understanding of the material being studied from their textbooks.

The opening of the Fowler Elementary School this fall made it necessary to purchase additional equipment so that the students in that building would also be able to make use of the valuable resources of the audio-visual program.

New developments in the field of audio-visual instruction are constantly being followed and evaluated to insure that the pupils of Maynard continue to receive the benefits of the vast amount of research going on in this phase of education today.

Secondary

"Out of sight, out of mind." This familiar saying contains a good deal of meaning in education. Much of our knowledge is gained through the senses, aural and visual, and it is in this area of giving practical effect to learning through seeing and hearing that the Audio-Visual Department is dedicated.

It is not the purpose of the department to supplant or encroach upon the domain of the classroom teacher, but rather to make available teaching tools to implement the latest teaching methods. Audio visual aids will never replace the classroom teacher; however, it is only fitting that these valuable educational tools be given the teacher to provide our children with as broad an approach to

knowledge as possible.

In view of the value of audio-visual education, the department offers a variety of materials and equipment designed to supplement the traditional teaching methods. Visual facilities include an overhead projector, filmstrip projectors, movie projectors, and opaque projectors. Filmstrips are available for the Social Sciences, Mathematics, Home Economics, English, Business and Science Departments. Although there are certain financial limitations, the department is able to provide motion picture films through the Film Cooperative of Shrewsbury, Marlboro, Grafton, Westboro, and Maynard High Schools. The department also maintains a file of films which may be obtained on loan from governmental agencies, industry and various health and social organizations.

Aural equipment includes a high fidelity phonograph, several portable phonographs and tape recorders. Aural materials include phonograph recordings and tapes. In addition, two 21 inch television sets and roller stands were acquired this year under the National Defense Education Act.

Departmental projects this year are concerned with the continuing training program to provide competent equipment operators and projectionists and re-organizing the department in respect to the physical facilities of the new building. It will also be necessary to catalogue and index the newly acquired social science and science filmstrips.

This year considerable effort has been expended by the Industrial Arts and the Science Departments to investigate methods and techniques of preparing overhead projector transparencies and overlays. Both departments have had considerable success in producing projectuals which are now being used regularly as teaching tools in the respective departments.

FINE AND APPLIED ARTS

Elementary

The aims and objectives of the elementary art program for 1964 were as follows:

1. To develop creativity by giving each child an opportunity to make decisions.
2. To encourage sharing by grouping within the art activity.

3. To learn basic skills of cutting, pasting, coloring and painting.
4. To appreciate other media, such as leather, chalk, foil and plastic.
5. To create an awareness of potential beauty in the home.
6. To teach safety rules and proper use of art materials.
7. To develop in the students a sense of personal pride through the display of their work.

Several projects were undertaken during the year which successfully contributed to the fulfillment of these aims and objectives. Attractive window decorations were designed for all four elementary schools. Name tags were made for the teachers to facilitate identification at the P. T. A., and the Green Meadow Christmas pageant was colorfully enhanced by the costumes and props created by the students.

Secondary

This year effort has been concentrated on the general improvement of learned skills and techniques. Each class has had a series of problems, each problem lasting one month. Familiar materials were used for the most part, and the stress was to fulfill the requirement of the project with invention, involvement, and manipulation of material.

Each class worked for one month on drawing. All drawings were then compared and the best one by each student was graded. These drawings will be saved so that they may be compared with drawings that will be done in June. It is important to prove to the student visually that he has improved over the year.

The ninth grade worked on a mosaic tile project, making ash trays, placques and tables. During December, students made greeting cards using the linoleum tile method. This built control and dexterity for the linoleum must first be incised before paint is spread over the tile and a print taken.

Other classes painted in oil. Forms were made first on which canvas was stretched and prepared. Many weeks were taken to do the actual painting which was based on a still life. The problem was visual rather than imaginative involving shadows, reflections, and shapes.

Many classes worked on various forms of sculpture.

Paper mache masks, puppet heads, wire sculpture, wire and plaster combinations, and toothpick sculpture were explored. Straws were formed into pleasing shapes. Plaster relief sculptures were made by allowing the plaster to dry over clay texture. The more advanced students attempted plaster casting.

The Junior High students have experimented with paper mache and other forms of sculpture, and they have done some beautiful work with pen and ink. Their work has been slowed in order to stimulate neatness and quality. A realistic approach to art is suggested in the seventh and eighth grades, because it is felt that the students can branch out with abstractions, new equipment and inventions when they reach high school.

Different art projects will emerge when the new equipment is used in the Spring. An enameling kiln for making and decorating copper jewelry has been purchased. The ceramic kiln and work in clay will start in April. Use of the potter's wheel will continue to be encouraged. The students are learning to adapt and use their mediums in a variety of ways as they work on their projects and invent their own techniques.

MUSIC

Elementary

Music's primary function in the elementary school is to provide the child with a meaningful aesthetic experience. In order to attain this end, the child is educated to recognize, respond to, and identify with the beautiful in music. Thus, aural beauty becomes an integral and essential part of the child's everyday life.

A child's success in the area of music depends largely upon the acquisition and development of basic music skills. The elementary music program includes the following activities which contribute to this development;- singing rote songs, matching tones, playing singing games, making free rhythmic responses to music, playing simple folk dances, distinguishing simple elements of music, learning to use rhythm and melody instruments, and responding creatively. Solo singing and large and small ensemble music is experienced. Song books are utilized beginning on the second grade level. In the intermediate grades, part-songs as well as rounds and descants are taught.

Expansion of the present music program is planned in the near future. A music reading program will be

developed throughout the elementary grades. Class instruction on exploratory instruments, such as the flute-
phone, will become an important part of the third grade music program, thereby preparing musically inclined children for more advanced instrumental instruction on the fourth grade level. Added emphasis will be placed upon the learning of music theory, form, and appreciation. Children will be encouraged to compose original melodies. A modernized music textbook series is now being evaluated for incorporation into the elementary music program.

Through these methods the music program seeks to introduce the child to the universal language of music, to encourage and enrich his abilities and appreciation, for "The language of tones belongs equally to all mankind, and melody is the absolute language in which the musician speaks to every heart."

Secondary

The pleasure which comes from hearing, singing, and playing fine melodies is among life's greatest satisfactions. To encourage this special gratification, the music department provides an opportunity for all students to participate in various musical activities.

During the past year, Maynard students have demonstrated their musical competence in festivals, exchange concerts, and parades. The program is an active one, often providing the means for a beneficial rapport between student body and community. The schedule for the Spring season further illustrates the intrinsic part music plays in student life. The Maynard High School Band will participate at the New York World's Fair and Maynard will be the host town for the annual Northeastern Massachusetts Music festival on May 15, 1965. Both events are signal honors for Maynard for the students who are involved in the program.

INDUSTRIAL ARTS

The aims and goals of an Industrial Arts Program are the same as those of education in general. Educators strive to provide worthwhile citizens for our community who will be able to reason, plan, and perform independently, intelligently, and co-operatively with all members of society.

The program attempts to attain these goals by various means which include research, planning, sampling, and producing various types of products connected with our industrial life.

Industrial Arts is a required subject in grades seven and eight. In these grades, students become familiar with various types of hand tools for both wood and metal work. They also develop the necessary skills for the operation of simple machines. In grades nine through twelve the program is much broader and more intensive.

Our facilities in the new high school consist of a general wood laboratory, a general metal laboratory, and a drafting room. Each department is furnished with modern equipment designed to provide the students with the maximum amount of safety and the opportunity to explore the wide variety of operations needed to achieve the aims of the program.

Students taking this program as a major meet eight periods per week. Six of the periods are combined into three double periods and are devoted to work or instruction on machines, tools, and processes in the wood and metal laboratories. Two single periods are used for work in drafting in the drafting room.

Industrial Arts minors (students whose academic programs place a limit upon the time available for this subject to two periods per week) are provided an opportunity to explore, plan, and operate the various facilities in the department.

A third phase of our program is a class in Technical Drafting which meets two periods per week and is designed to assist and prepare those students who intend to further their education beyond high school at technical and engineering schools.

Pupils will attend classes in five different fields of Industrial Arts during their first two years in the program. The classes include woodwork, machine shop, bench and sheet metal, electricity, and drafting. The pupils will then be provided the opportunity to concentrate or specialize in one or two areas during their third and fourth years, depending upon their skills, interests, and aptitudes.

Projectuals for use with the overhead projection machine are being made by the instructors for the teaching of various phases of drafting and machine operation. Although the making of these projectuals and other types of visual aids require a considerable amount of time, the benefits derived from their use are immeasurable in terms of the students' learning process. Easier understanding of the problems by the pupils, the presentation of more information in less class time, and review at any

point can be quickly brought about. The lesson is always on hand for reference.

The addition of another instructor this year has made it possible to offer a more varied program and to achieve more of the aims and goals of Industrial Arts.

HOME ECONOMICS

Home Economics is concerned primarily with the improvement of family life. Educating students for family living, studying and selecting goods and services used by families, and considering the changing needs of individuals and families are the areas of knowledge covered by the Home Economics Program.

Personal development and family relationships are studied at the Junior and Senior High School level in order that insight into satisfactory relations with other people may be gained. Responsibilities suited to student maturity are given to develop the student's confidence and sense of worth and to provide a deeper understanding of the values of good family life. For example, girls in their teens often help with the care of young children in their own homes and elsewhere. Child care and development are studied in order that the girls may learn to understand how young children grow socially and emotionally and to guide them in constructive activities. Thus, the student is able to evaluate and improve her own personality through the understanding of growth and behavior patterns in others.

Clothing and food are important aspects of the Home Economics Program. Most girls are interested in planning attractive and servicable wardrobes. Therefore, they are taught what constitutes correct dress for various occasions and how to select, construct, and care for clothing. They develop an understanding of the psychological and social significance of being well-dressed and well-groomed. Work in food is so planned that girls can assume responsibility in planning menus, purchasing food, preparing and serving meals which are nutritious and within budgets of various levels.

The Home Economics Program is committed to instruction which emphasizes careful management of resources such as time, energy, ability, knowledge and money which will lead to satisfaction in both personal and family life.

ADULT EVENING EDUCATION

Education is a continuing process and takes place throughout the life of an individual. This process goes on, whether it is given direction or whether it is allowed to take place haphazardly. No matter how much formal or informal education a person has received, there is always something more to be learned, some new skill to be developed, or some already existing attitudes and appreciations to be cultivated. In all of these, the learning process is involved to a greater or lesser degree.

The Adult Evening Education Program exists for the purpose of helping the adult citizens of Maynard to give this learning proper direction and to achieve their educational goals in an efficient, pleasant, and productive manner.

This program provides the citizens of Maynard opportunities to pursue cultural interests, to develop home-making and craft skills, to take refresher courses in order to become more proficient in their occupations, and to make fuller and more rewarding use of their leisure time by participating in meaningful and interesting activities. The adult program has been well-accepted by the townspeople, and as a result has continued to expand and to take on a more diversified aspect.

An innovation, introduced to the program upon the completion of courses in late February, was the awarding of certificates to all of those persons who actually completed courses for which they had originally enrolled. These certificates are attractive and dignified in appearance and will be valuable to those who might need some form of verification to indicate that they have actually participated in an educational program or have attained certain skills as a condition of employment.

This fall, the program was broadened considerably, both in terms of scope in course offerings, and in service and convenience to participants, with the issuance of descriptive brochures. These brochures, mailed in September to every householder in Maynard, contained general information about the total Adult Evening Education Program, described the content of some thirty-three courses, included a calendar of class meetings for the whole year, and had a mail registration blank attached, making it possible for the first time for people to register for courses by mail. Many people took advantage of this convenience.

Courses are offered on both Monday and Wednesday evenings and classes meet for a two-hour weekly period during a ten-week term. This year, we expanded into a two-term program, making it possible for a person to enroll in four different courses during the year. A number of people have taken advantage of this opportunity and have, in fact, enrolled in a number of different courses. Heavy enrollment in Sewing I this fall forced us to conduct classes on Tuesday evenings as well.

A change was made in tuition rates this year, making the fee slightly higher for people who are not residents of Maynard. This change was made in keeping with practices which are common in Adult Education Programs in surrounding communities. A survey made of all the participants indicated that they felt that the tuition rates are quite reasonable.

The courses which were begun in early October and which were completed during the fall term this year were: Conversational French I, Basic English, Typing I, Short-hand I, Sewing I, Tailoring, Knitting I, Rug Braiding, Oil Painting, Cake Decorating, Physical Fitness for Women, and Driver Education for High School students.

The winter term of this year's program is scheduled to begin in mid-January and will be completed at the end of March.

The Adult Evening Education Program was greatly enhanced this year by moving into the new Maynard High School building. It is expected that, now that we have more adequate facilities and more specialized learning areas, the program will continue to grow and that more adults will wish to avail themselves of the many opportunities made possible for them.

CONCLUSION

In the Maynard schools we make every effort to satisfy the fact that no two children are alike. The school program, its curriculum, activities, and special services take into account the differences in children and the individualism of their backgrounds, abilities, ambitions, hopes and fears. The school is always cognizant of the stages of development and changes within the child himself. Productive work with children requires us to know and be sensitive to the developmental tasks each child must meet as he matures to adulthood. Our schools take into account every appropriate point - physical, mental, moral and emotional.

The child is born not only a member of the human race in general but of a family, a neighborhood, and a community. Upon entering the world he is surrounded by the culture into which he has been born. He is handled and spoken to according to patterns which were fixed long before his arrival. The values he learns, the fears he has and his ambition are materially influenced by the practices and purposes which permeate his home and immediate surroundings. The school is only one of the many agencies designed to serve youth. The school attempts to work with the family and other community agencies to carry out successfully programs for the Maynard children. The school recognizes the fact that the home is the central point for affecting the development of most children. The work of the school can be made much more fruitful when it operates in proper relationship to the home and agencies affecting the home.

Due to the relationship and joint effort of the home, community and school, the year 1964 has been a good one for the young people of Maynard. We, in Maynard, are proud of our educational accomplishments in the past year although we realize that we have the potential to reach even greater heights in the future.

In concluding this report, I wish to thank all individuals and groups who contributed to the success of our educational programs. My sincere appreciation is extended to the Maynard School Committee, School Personnel, Civic Organizations, Town Officials and Citizens for their continued support and earnest efforts in behalf of the young people of Maynard.

Respectfully submitted,

ALBERT LERER
Superintendent of Schools

January 6, 1965

REPORT OF
CURRICULUM COORDINATOR

To Albert Lerer
Superintendent of Schools
Maynard, Massachusetts

I herewith submit my fourth annual report as Curriculum Coordinator of the Maynard Public Schools.

This year has proven to be one of the busiest and most demanding in terms of time, effort and inter-personnel cooperation. This was a year that saw the establishment of a new elementary school, the adoption of a new mathematics program, the re-formulation of accounting and budgetary procedures to comply with new state directives, the institution of a modern mathematics course for our teachers, as well as the relocation of this office from one school building to another.

Probably the most significant and noticeable accomplishment at the elementary school level this year was the opening of the Guyer Fowler Elementary School. This move had many desirable results, the two most pronounced being the reduction of the per-teacher pupil ratio and the assignment of pupils, for the most part, to schools situated closer to their homes.

Books, materials, equipment and supplies provided for the pupils of the Fowler School were selected in keeping with our basic philosophy of maintaining relative uniformity of instruction in each of our elementary schools. This standardization of the curriculum in all schools eliminates many difficulties which might otherwise result when it is necessary for a pupil to transfer from one building to another.

Beginning in September of this year, all first and second grades were put into a "modern mathematics" program. This program incorporates most of the latest developments and concepts recently introduced into elementary school mathematics. The teachers feel that the pupils are progressing satisfactorily and that no serious difficulties are being encountered. They do feel, however, that a good deal more preparation is required on the part of the teacher for the planning of each daily lesson.

The books for this program were selected after a careful evaluation of the newer books in this field by the first and second grade teachers and all the elementary principals. Since these new, consumable type books are re-

placing books which were also consumable, this change of programs entailed no additional cost to the Town of Maynard.

It was found that, in order to properly extend this program into the upper grades, our teachers would have to be re-trained in the understanding of these new concepts and in the application of the methods recently developed in experimental programs throughout the nation. It was decided that the most expeditious manner of accomplishing this would be to bring in an expert to train our teachers locally, as a group. Therefore, arrangements were made and in October our elementary teachers began a program of intensive study under the tutelage of a professor of mathematics education from the faculty of Boston University. This professor is an author of elementary school arithmetic textbooks, and has been directly involved in the development of some of the nationally recognized programs of "modern mathematics." We feel confident that the teachers of Maynard are being trained by a specialist who is most proficient in his field.

In the Spring a study-group will be formed and textbooks will be selected so that the new mathematics program may be extended into the middle grades next Fall.

Last year, a pilot-study in reading was begun in some of the first, second and third grade classes at the Roosevelt and Green Meadow Schools. This year, this study was extended and modified somewhat. At present, all of the pupils in grades one, two and three of the Fowler and Green Meadow Schools are taking part in this reading experiment, while the pupils in the Roosevelt and Coolidge Schools proceed with the conventional reading program. The Roosevelt and Coolidge pupils will be used as control groups in evaluating the results of the experiment, and a decision will be made in the Spring as to whether the new program will be continued and extended further.

An evaluation of last year's pilot study indicated that while some gains were made over the control groups in some phases of the reading program, they were not greatly significant. However, significant gains were not really expected to be present so soon. In view of the fact that the experimental program is cumulative in nature, true results are not expected to show up until the third year of study. An evaluation of this year's results, our second year with the program, will give us a more complete picture.

This Fall, Maynard conducted a workshop on this new reading program and was host to the representatives of

twenty-three different school systems which are also experimenting with it. A reading consultant was brought in to discuss the various methods and implications of the program with about 200 teachers, principals, supervisors and school administrators from far and wide.

The reading program in the intermediate grades was updated by the acquisition of new reading books during the summer. All fourth, fifth and sixth grade pupils are now using the latest editions of the basal reading series.

We are planning to introduce a co-basal reading series at the primary level next Fall to provide additional materials for pupils who need extra attention to meet the minimal requirements of our reading program. The use of co-basal readers is a technique which has been adopted and which has proven quite successful in a number of communities. This move will be an attempt to provide more for the slow learner as well as for the average pupil and the academically-gifted student.

The academically talented pupils were again provided for this year in the fields of reading and arithmetic. These more capable students are finding real challenge in the mathematics enrichment program which was introduced to them last year. The regular arithmetic program in grades four, five and six is being supplemented by materials which force these students to make fuller use of their native ability and therefore better prepare themselves for the more advanced mathematics which they will study in higher grades.

The developmental reading activity books which were provided last year for those students who were able to complete the basic reading program for their grade level well ahead of their classmates, will be available again this year. These books will allow the more capable readers to proceed at their own rates, while still participating in a controlled, directed program of reading instruction.

We were again fortunate this fall in having available at the elementary level, the services of a trained French teacher to provide follow-up activities for the French program in the intermediate grades. This role is being performed by the new French teacher who was added to the high school staff to accommodate the conversational French program which has reached grade nine this year. This situation is ideal, in that it allows for a more comprehensive continuity of the program from grades four through nine.

A French workshop was recently conducted for the teachers of grades four, five and six. A consultant, representing the televised French programs which are viewed regularly by the pupils of the intermediate grades, discussed some of the changes being made in the filmed version which is gradually replacing the video-taped edition which has been used in recent years.

The social studies books being used in grades four, five and six were replaced this Fall with new 1964 editions of the same series. The newer editions incorporate some changes and improvements which the publishers feel will improve instruction. The books replaced were 1961 editions and the change was made after extensive negotiations and an extremely generous exchange offer from the publisher. Once again, our children are using the most up-to-date materials in an area of study that is constantly changing.

Last Winter, a screening committee was formed to evaluate those pupils who were referred by classroom teachers as possibly being in need of special education. Almost forty youngsters were evaluated by this committee and psychological tests were administered to twenty of them. Some of the children evaluated were referred further for psychiatric examinations, since they seemed to exhibit symptoms of emotional disturbance. Upon being examined by psychiatrists, some of them were, in fact, found to be emotionally disturbed to some degree, and were recommended for special schools. Some were found to be mentally retarded and were assigned to the Special Class where they will receive more individualized instruction in keeping with their abilities. A number of those evaluated were found to be borderline retardates and it was decided to retain them in their present grades for another year in order to provide them with a more solid academic foundation in those areas where learning is difficult for them.

Parents continue to take advantage of the Parent-Teacher Conferences which occur twice a year. These conferences which supplement the regular report cards in keeping the parents informed of their children's progress in school are becoming increasingly popular. Many people are finding that this is also an excellent means of keeping themselves informed concerning the various new programs being introduced into the Maynard Schools.

The achievement tests which were administered to all elementary school pupils last Spring indicate that our pupils, by and large, are performing quite well in all subject areas. These tests enable us to compare the

academic achievement of our pupils with that of thousands of other youngsters throughout the country by means of newly established national norms which were formulated last year when these tests were revised and re-standardized. Actually, in some areas, the Maynard children surpass the national norms by substantial margins.

A breakdown of the ability tests which were administered to all first, third and sixth grade pupils last month indicates that, of all pupils tested, 46% possessed above-average ability, 45% were in the average range, and only 9% were found to have ability which is considered to be below average. The over-all median places our pupils in the high-average category. This would indicate that the children in our schools, for the most part, are potentially capable of achieving in excess of national norms. The achievement tests indicate that they are, in fact, doing this.

A number of subject area and grade level meetings were held this year, with specialists and consultants brought in to help keep our teachers abreast of some of the latest developments in elementary education. More such meetings are being planned, in a constant effort to provide the best school program for the pupils of Maynard and to enable them to compete successfully with pupils being educated elsewhere.

We have accomplished a great deal this year, and we will continue to up-grade and improve our schools with the continued cooperation, understanding, support and harmonious relationships which exist among the parents, teachers, principals, the Superintendent, the School Committee and all of the various civic groups which give unstintingly of their time and effort in matters related to the education of the children of Maynard.

Respectfully submitted,

GEORGE J. LEMIRE
Curriculum Coordinator

REPORT OF
HIGH SCHOOL PRINCIPAL

Mr. Albert Lerer
Superintendent of Schools
Maynard, Massachusetts

Dear Mr. Lerer:

I herewith submit the Annual Report for the Maynard High School for the year 1964, my tenth Annual Report.

Many words have been written and spoken about American education during the past few years. Proposals have been made which range from substantial changes to minor revisions of the existing educational programs. At Maynard High School, we are cognizant of the importance of education and continually seek improvement in the quality of our school. Goals are set with full awareness of current trends and in keeping with the desires and needs of the local community.

Due to the understanding and support of the Maynard citizens one of our prime goals has now been accomplished - the construction of a new high school. The new building without a doubt will help to determine the character and quality of education in Maynard.

The past year has been an active and exciting one at Maynard High School. The work of several committees which were organized in 1963 culminated in September with our entrance into the new High School. Committees revised the teachers' handbook which defines rules, regulations, and procedures for the new building, made provisions for the transportation of pupils, and planned the actual move (books, equipment, etc.) from Summer Street to Great Road.

The following curriculum changes were effected this year: Honors courses were established for those who qualify in English IV (World Literature) and in 9th grade Biology. An honors Mathematics program is also being contemplated. This will begin next September when Geometry will be offered to a small group of 9th graders who have had Elementary Algebra in Junior High School and who demonstrate unusual promise in mathematics. Advanced Chemistry and Advanced Biology have been added to the curriculum to better provide for college-bound students who are interested in additional preparation in these fields. General Physics and Electronics and Business Law and Consumer Economics were added to better provide for the general student.

The writing of the English curriculum was completed and a copy of this curriculum is now in the hands of all teachers in the department. This will form a common basis for present teaching procedures and a continuity for future revisions and additions as they become necessary.

The new high school building contains an attractive kitchen and cafeteria. The addition of a cafeteria has permitted the scheduling of longer class periods. Nutritionally well-balanced meals are available to students each day. Student participation in this program which hopefully will be self-sustaining has been excellent.

In the high school the library is now the major resource center for learning activities. The library program reflects the philosophy of the school and enriches all phases of its educational program. It has helped in the achievement of our educational goals because in reality it works on the program of individual differences. Classroom instruction is intensified by the use of the library, particularly in the research project, the study of issues, conflicting opinions, basic references, and independent research. From September through December approximately \$1800. has been expended for library books.

A thirty-station language laboratory with facilities for four programs in keeping with the latest research in the aural-oral approach is now used in the teaching of language arts. Included in the science area are laboratories for Chemistry, Physics, Biology, and General Science, a radio room, a special projects room, and a dark room. Two large Industrial Arts shops make possible an expanded program in this area which includes cabinet making, sheet metal work, machine shop work, and drafting. A sizeable attractive and modern area provides the Home Economics teacher with the facilities necessary for an up-to-date program in this subject.

It will be an honor to have the Northeast District Music Festival in Maynard next Spring and it is a pleasure to announce that the Fall convention of the Eastern Massachusetts Division of Student Councils will be held at Maynard High School in November.

During 1964 the Maynard High School Screech Owl was honored by the New England Scholastic Press Association with a "Highest Achievement Award" for editing and publishing.

Maynard High School continues to attempt to provide a sound educational program for every student. Scores on

standard achievement tests show that the work is being done well and that progress is continually being made. More than one half of the students in each of the last three graduating classes have continued their education. The large majority of graduates have adjusted well to their post-secondary school endeavors.

At year's end a summary of the results of the Massachusetts Education Survey were published. It is now up to the citizens of the Commonwealth through their elected representatives to determine the future growth of education in Massachusetts. The effects of this decision will be evident in the educational structure in every community.

I wish to thank the members of the High School staff for their invaluable contributions to the achievement of our objectives. May I also express my appreciation to you for your continued cooperation.

Respectfully submitted,

FREDIANO D. MATTIOLI
