

# ANNUAL MAYNARD TOWN REPORT

65

This cover for the Annual Report of the Town of Maynard was designed by Robert Brooks, a student in the Art Class of Maynard High School.

\* \* \* \* \*

The following students of the Maynard High School Art Classes also submitted very fine drawings and are to be commended for their efforts.

Brian Campbell  
Robert Brooks  
Marianne Barilone  
Judy Hytonen  
Debbie Leard

Barron Hansen  
Shirley Grant  
Sherri Mayes  
Janice Doyle  
Diane Lessard

REPORT OF  
THE BOARD OF SELECTMEN

To the citizens of Maynard:

Herewith is presented the annual report of the Board of Selectmen for the year ending December 31, 1965. The year has seen a general leveling off trend in actual physical growth within Maynard. The leveling trend did not extend into town government; in fact, the total depth of responsibility seems to be widening. The structure of town government has been required to assume many additional functions. The Board of Selectmen has witnessed many changes and additional demands placed on town officials. The Board of Selectmen has had the pleasure of working closely with many Boards and Committees during 1965, and at this time we wish to direct our remarks toward a few of the more significant developments and accomplishments.

1. The Industrial Committee presented a detailed report during the first quarter of 1965. The complex nature of the report shows the intensity of the studies. The Board of Selectmen commends the committee for its fine work and further anticipates implementation of the plan in 1966.

2. The Police Department has conducted an intensive safety drive during the second half of 1965. The drive will continue during 1966. Many types of activities are being conducted; no fix traffic tickets, traffic studies, sign postings, etc.

3. The entire school system is to be commended for many outstanding accomplishments during 1965. The Northeast Music Festival was held in Maynard and was a tremendous success. The Northeast Student Council convention was also held in Maynard. The first class graduated from the new high school. These are only the high lights of a most successful school year.

4. The Fire Department is to be commended for its outstanding contribution during the worst year in history for drought and hazardous fire conditions.

We wish to emphasize that the above mentioned developments are only a portion of the accomplishments in 1965 and we wish to direct the readers' attention to the reports of the many Departments, Committees, and Boards that have served the Town of Maynard during the year. It is evident from the diversity of these reports that Maynard residents are living under a full and comprehensive system of government.

It is now the pleasure of the Board of Selectmen to outline its actions in 1965 and present recommendations for future consideration.

1. The Board's activities included visits to many communities: Acton, Boston, Concord, Groton, Hudson, Plymouth, Stoneham, Stow, Sudbury, Westford, Weston, Wakefield.

2. The Board continued its active participation in both the Middlesex County Selectmen Association and the Massachusetts Selectmen Association.

3. The Board concerned itself with Town by-law enforcement and liquor law enforcement. Many hearings were held and it is felt that equitable decisions were rendered.

4. The Board issued a dozen proclamations, appeared at many social affairs, participated in many official celebrations, and became involved in nearly every function invited to.

5. The State census was released in 1965. An increase of 20% was indicated with the official count recorded at 9070 people. This trend seems to be developing and it would appear that Maynard will continue to grow at a similar rate for the next decade.

6. The Board vigorously supported the home rule bill in the State legislature. The Board received the endorsement of the voters at the annual town meeting and made Maynard's position on this matter known to our legislators.

7. The Board continued its struggle to keep public transportation in Maynard. The Middlesex and Boston Street Railway Company still maintains bus service in Maynard and the Board has pledged itself to retain this valuable service.

The Board of Selectmen appointed a seven member committee to study town government. The committee consisted of the following people:

Robert Billups, Chairman  
Priscilla Page, Secretary  
Arthur Brooks  
Joseph Dineen  
Kathleen Manchester  
James Mertz  
Robert Sullivan  
Janathan Wooster

The Government Study Committee completed a most difficult assignment by presenting the Board of Selectmen a detailed report in December. The report is very comprehensive and concerns many areas of town government. The most glaring conclusion the Board of Selectmen has reached is that Maynard's form of government is not archaic, but that major improvements are eminent to effect overall administration and operation.

The Board of Selectmen will spend much time and energy in this area in the ensuing year. The Town of Maynard is deeply indebted to the study committee for its outstanding contribution.

9. The Board of Selectmen appointed a three member committee to determine the need of housing for the elderly. The Committee consisted of the following people:

Raymond Sheridan, Chairman  
Edward Allard  
Walter Moynihan

The Committee reported a definite need does exist in this area. The Board of Selectmen sponsored an article at a special town meeting to ask the Town to establish a permanent housing for the elderly committee. A vote of the Town approved this project and plans are now in the development stage. We owe the study committee a deep sense of gratitude for its fine work.

10. The Board became actively involved with the War on Poverty program. Maynard joined the Commonwealth Service Corps in a multi-town venture. It became apparent that direction was lacking from the Federal Government level and Maynard chose to withdraw from the program until such time as it appeared advantageous to Maynard. At this time no further action has been taken.

11. The Board involved itself in matters pertaining to appointment of a Postmaster. Mr. Novick has now been appointed to fill the position after a two-year period of filling the position on a temporary basis.

12. The town bounds were perambulated during 1965 with our neighboring communities. This is the custom prescribed by law dating back to the beginning of the Commonwealth whereby the Selectmen are required to walk the bounds every five years.

13. The Board worked for many months on the legal aspects of demolishing a dangerous structure. In August a building on Bancroft Street was demolished and a safe condition now exists.

14. A most stringent safety program was devised with the Chief of Police during 1965. Many programs have been initiated. The Selectmen and Police Department have vowed to make Maynard a safe town in which to live.

15. The population increase gave Maynard two additional liquor licenses. The Board issued these to two very old and reputable clubs. The clubs had seasonal licenses prior to this time. The seasonal licenses were revoked and not reissued.

16. The year 1965 will also be remembered as the year of Town Meetings. The Board of Selectmen called the annual meeting in March, and a special meeting in October. Then in December a petition was received and another special meeting was called. The Board would prefer that all business be brought up at the annual meeting only.

The Board of Selectmen foresees the need for active participation in the following areas during the year 1966:

1. The Board must work closely with all interested parties in order to establish a permanent source of water for Maynard's future needs.

2. The Government Study Report must be explored and studied in detail. A definite plan must be developed and implemented in order to conduct the business at hand in the most efficient manner.

3. The Board must continue the fight to purchase land in the northwest area of the Town for future needs. A parcel of land purchased now could save the Town a huge sum of money when a need develops for additional land.

4. The Board will attempt to continue the search for doctors on an accelerated level. This program has met with little or no success to date, but the need is tremendous and the effort must continue.

5. The need for overall Town planning is evident. The Board will attempt to affect a harmonious intervace of all functions of Municipal Government in order to achieve this end.

6. The need for refuse disposal areas and methods must be renewed with enthusiasm in 1966.

7. Old age housing must become a reality.

8. The Town must obtain membership in Walden Clinic for mental assistance for children. An article will appear on the warrant for this most important service.

9. The Town seal must be redesigned in order to depict Maynard's civic pride and heritage.

10. A cultural advisor should be appointed in an effort to attain the maximum use of our facilities and talents for the benefit of the whole community.

11. Finally, the Board must continue to make a concentrated effort to increase the tax base with industrial and commercial property development. The point is long since past where the tax bill must be stabilized.

The Board wishes to acknowledge one major contribution to the towns people.

The Maynard High School Class of 1965 dedicated their year book to the Town of Maynard. Never before has so high an honor been bestowed upon our community. If this act is an example of the type of child we are maturing in Maynard — then we, the citizens of Maynard, have the right to hold our heads high with pride. Thank you Class of 1965 for showing us the way.

The Board also wishes to point with pride to its own part-time secretary, Miss Ann Beauregard, Queen of the Junior Prom.

The Board wishes to extend its thanks and appreciation to Mr. James V. King, Town Accountant, and Mr. Paul A. Carbone, Town Counsel, for their co-operation and assistance.

Respectfully submitted,

HOWARD E. BOESKE, Chairman  
ALBERT G. ALEXANIAN, JR., Clerk  
RICHARD T. WHITE

REPORT OF  
SEALER OF WEIGHTS AND MEASURES

Year Ending December 31, 1965

Honorable Board of Selectmen:

Below is the report of the Sealer of Weights and Measures:

1 Scale, over 10,000 lbs.	\$ 25.00
15 Scales, 100-5000 lbs. @ \$5.00 each	75.00
47 Scales, under 100 lbs. @ \$2.00 each	94.00
24 Weights, 10¢ each	2.40
46 Weights, 10¢ each	4.60
9 Vehicle Tanks @ \$5.00 each	45.00
5 Measures under 1 gal. @ 10¢ each	.50
2 Measures over 1 gal. @ 25¢ each	.50
41 Gas Pumps @ \$2.00 each	82.00
7 Gas Pumps @ \$1.00 each	7.00
11 Grease Pumps @ \$2.00 each	22.00
1 Grease Pump @ \$1.00 each	1.00
	<u>1.00</u>
	\$359.00

Respectfully submitted,

JAMES J. RYAN  
Sealer of Weights and Measures

REPORT OF THE  
TOWN INSURANCE COMMITTEE

January 5, 1966

To the Honorable Board of Selectmen:

This Committee held six meetings during the year. The Committee efforts resulted in increased coverage at a savings of approximately \$1600.00 to the Town. In addition this year, by direction of the State we assumed coverage for teachers liability in their relationship with students.

We appreciate the cooperation received from various town boards and insurance agents.

Respectfully submitted,

R. TOMPKINS, Chairman  
E. DUGGAN, Secretary  
R. DIONNE  
J. PIANTEDOSI  
W. HIRONS

TOWN INSURANCE COMMITTEE

## REPORT OF THE

## MAYNARD HISTORICAL SOCIETY

To the Honorable Board of Selectmen:

Herewith is presented a progress report of the Maynard Historical Society Committee for the year 1965.

Research is continuing satisfactorily as per our plan in the form of Monographs on all individual aspects of Maynard life. The flow of photographs and objects of historical interest from residents and former residents of Maynard to us is gratifying. Please continue searching your attics.

The 1921 50th Anniversary silent film will have sound in the near future. The various shots of the town and individuals will be narrated by Frank and Ralph Sheridan. The film will be shown again at our April 1966 meeting — the 95th Anniversary of Maynard. An important paper on the Incorporation and dedication exercises of Maynard in 1871 will be read at this meeting also by Elizabeth Schnair. All are welcome.

Two antique glass cases turned over to us by Elizabeth Schnair house a display of Maynard memorabilia in the large downstairs meeting room of the Municipal Building.

Finally, may we urge more participation by those who are interested in Maynard History. Attend our meetings as participants or guests.

Respectfully submitted,

BIRGER KOSKI, Chairman  
WALTER MATTSON, Vice Chairman  
ALICE HAKALA, Secretary  
ELIZABETH SCHNAIR, Chairman Publicity  
RALPH SHERIDAN, Acquisitions

REPORT OF THE  
INSPECTOR OF BUILDINGS

January 3, 1966

To the Honorable Board of Selectmen:

May I, hereby, submit a report of the activities of the Building Inspector's office for the year ending December 31, 1965.

In this twelve-month period 83 permits were issued, in the following categories:

Single housing units	33	Renovations	29
Duplex housing units	3	Garages	10
Business properties	5	Swim Pools	2

One permit was issued for an apartment house, the first of its kind in Maynard.

Some changes are indicated in the Building Code and an early meeting with the Planning Board and the Appeals Board is planned.

I would like to take this opportunity to thank the Staff members at the Town House for their co-operation and assistance.

Respectfully submitted,

FORREST W. NELSON  
Inspector of Buildings

REPORT OF THE  
INSPECTOR OF WIRES

January 7, 1966

To the Honorable Board of Selectmen:

I herewith submit the Annual Report of the Wire Inspector for the year ending December 31, 1965.

The total of one hundred & fifty (150) permits were issued throughout the year. Thirty-four (34) new homes were built. One school and one factory were also constructed. One hundred and fourteen (114) were for wiring repairs, service increases and miscellaneous.

The Wire Department wishes to thank the Board of Selectmen, the Fire Department and the Boston Edison Company for their co-operation and help.

Respectfully submitted,

BENJAMIN A. BIGUSIAK  
Inspector of Wires

REPORT OF THE  
GAS INSPECTOR

January 8, 1966

To the Honorable Board of Selectmen:

I hereby submit my report, as Gas Inspector, for the year ending December 31, 1965.

During the year there were 297 permits issued. These permits covered piping, installation and replacement of gas appliances in both old and new buildings. Inspections were made on all work.

I wish to thank the Board of Selectmen, Contractors and Gas Company personnel for their help and cooperation. Most especially for stressing the need of permits and inspections and work to be done by licensed men.

Respectfully submitted,

WARREN E. BEMIS  
Gas Inspector

REPORT OF  
THE BOARD OF FIRE ENGINEERS

To the Honorable Board of Selectmen:

1965 has been one of the worst years fire wise in our experience. We have been involved in serious building fires, one of which has been a classic fire problem for us over the years.

The fire at Dartmouth Street, which fortunately involved an unoccupied three story house, presented all the problems that fire departments worry about such as exposure to other properties, very limited water supplies, highly flammable building, insurance on a property which is difficult or impossible to sell and an absentee landlord. We were very fortunate in that the wind was a very minor factor, and the exposure was only effected by radiant heat. The lack of water and pressure allowed us no opportunity to attack the fire in its early stages at the top of the building with the result that all fire fighting resolved itself into a matter of pouring water onto the embers.

Our men did an outstanding job on the Seder and Richmond property where they confined a vicious fire to the property involved.

In each instance our mutual aid arrangements clearly proved its benefit and effectiveness.

Our primary problem for 1965 has been set fires and false alarms. We have had thirty-eight fires which have been classified as set. Two are building fires, but proof is lacking. Because of the dry nature of the year the set woods fires have caused us to be extremely worried about these fires and the result has been a large increase in the number of box alarms. To extinguish them the volunteer force has been diligent in its response. Many other towns without such a force have had much more costly results.

We urge every citizen who has any idea as to the person or persons who may be responsible for both the set fires and the false alarms to notify us or the police department, so that this dangerous and evil practice can be brought to a stop.

In this time of high taxes, the taxpayer should bear in mind that all set fires and false alarms expose the Town to vast sums of money for injuries received by firemen responding to or at the fire, together with substantial sums of money to replace damaged equipment injured in collisions enroute to such fires. These factors are present in any fire; but in those cases it is not the result of a deliberate criminal act which could have been avoided.

The volunteers who conduct the "Scuba" group have worked efficiently all year. They have been involved in numerous searches. To these men we say "thanks and well done".

Because of the unusual use of our hose supply this year we have had to recommend the purchase of replacement for each classification. While the average life of our hose is about twenty-five years, we do lose lengths where traffic passes over them.

Our first run equipment is in good condition. The passage of time makes all equipment deteriorate. We have had numerous fires this year where it was deemed necessary to employ three pieces. This left us with one piece on reserve which was thirty-one years old. The Town should be making preparations by way of setting aside money in the stabilization fund toward about \$20,000.00 in the next three years to keep our equipment up to date.

We are concerned about the lack of Fire Drills in our Maynard Industry complex. On several occasions alarms have come in from this area but the personnel do not leave the premises, nor do they make any effort to evacuate when fire alarms ring in their respective buildings. This is highly dangerous practice which is appreciated by their employers but not so well appreciated by some of the bosses or individuals. We have called to the attention of all parties that this is a practice which could cause extreme loss of life since our department is not equipped to direct people out of this complex and still locate and extinguish fires at the same time.

We extend our heartfelt thanks to all persons and departments who have offered us their cooperation during the year. These persons and departments have made it possible for us to do our work better than we would have otherwise been able to do.

The engineers desire particularly to express our appreciation to the men of our department who have performed with great skill and efficiency throughout the year.

For those who are interested in the statistics of this year, they are appended hereto.

Respectfully submitted,

PHILIP A. WILSON  
MARTIN GRUBER  
ROBERT P. WHITEHOUSE

REPORT OF THE  
CHIEF OF POLICE

January 8, 1966

To the Honorable Board of Selectmen:

I herewith submit my Annual Report as Chief of Police for the year ending December 31, 1965.

The traffic lines, meter lines, parking area lines, and school cross walks were painted as required by law. The redesign of the Municipal Parking Area greatly improved the parking conditions and the flow of traffic in the parking area.

During the year two new patrolmen were added to the Police Department and one of them was sent to the State Police training school. The other officer is expected to attend the same school this year. Also, during the year, Patrolman Charles Sullivan submitted his resignation and accepted a position with a State agency. Sgt. Tervo retired after over 30 years of faithful service. No department can lose the services of two such qualified employees without affecting the efficiency of that department. Patrolman Albert Crowley was appointed Sergeant from the Civil Service eligible list by the Selectmen.

Because of the increased complaints of speeding, I have inserted an article in the town warrant for the purchase of a Radar to help combat the speeding problem.

MICHAEL ZAPARESKI  
Chief of Police

TOWN CLERK'S REPORT  
 PROCEEDINGS OF  
 ANNUAL TOWN MEETING

Held March 1, 1965

Pursuant to Town Warrant No 499, the Annual Town Meeting was held in the Maynard Memorial Gymnasium on March 1, 1965.

The meeting was called to order by Moderator Philip Wilson, at 7:30 P. M., who declared a quorum to be present.

On motion of R. Frank Punch it was voted to waive the reading of the Warrant as a whole.

It was voted to admit news reporters, visiting students from Worcester and an engineer. The engineer to explain some of the Public Works projects.

Article 1. A report for the Sanitary Land Fill Committee was read and filed with the Town Clerk, by Michael Barilone.

Article 2. No vacancies to be filled.

Article 3. On motion of Emile A. Genest, as amended by William H. Larson: Voted that the column entitled "Finance Committee Budget Recommendations", be approved as printed in the warrant, with the exception of Items 85 and 86.

1. Selectmen's Salaries	\$900.00
2. Selectmen's - Maintenance	1,000.00
3. Town Accountant - Salaries	12,528.30
4. Town Accountant - Salaries	700.00
5. Treasurer-Collector - Salaries	10,786.84
6. Treasurer-Collector - Maintenance	3,300.00
7. Treasurer-Collector - Outlay	375.00
8. Assessors - Salaries	4,500.00
9. Assessors - Maintenance	1,715.00

## Item 85.

A motion by William H. Larson to appropriate the sum of \$117,546.62 to be expended by the School Committee for the maintenance of the Maynard Public Schools was defeated

On motion of Emile A. Genest: Voted to appropriate the sum of \$91,546.62 to be expended by the School Committee for the maintenance of the Maynard Public Schools.

## Item 86.

A motion by William H. Larson to appropriate \$7,866.56 to be expended by the School Committee for Outlay for the Maynard Public Schools was defeated.

On motion of Emile A. Genest: Voted to appropriate \$4,866.56 to be expended by the School Committee for Outlay for the Maynard Public Schools.

Article 4. On motion of Emile A. Genest: Voted that the salaries or compensations paid to the various elected Town Officials, in accordance with Chapter 41, Section 108 of the General Laws, said salaries or compensations to be effective and remain in force until the next Annual Town Meeting unless sooner changed by vote of the Town, be as follows:

Moderator	\$50.00
Town Clerk	4,000.00
Town Treasurer-Collector	6,800.00
Selectmen, 3 members, each	300.00
Board of Assessors, Chairman	900.00
Other Members, each	800.00

Public Works Board, 3 members, each	300.00
Board of Public Welfare, Chairman	200.00
Other Members, each	150.00
Board of Health, 3 members, each	50.00
Library Trustees, 3 members, each	25.00
School Committee, 5 members	No Salary
Planning Board, 5 members	No Salary

All fees and charges collected by each department must be paid to the Treasurer by the end of each month.

The above salaries are effective January 1, 1965, to December 31, 1965. For changes in personnel during the year salaries will be pro-rated according to the length of service at the above recommended rates.

Article 5. On motion of Howard L. King: Voted, unanimously, to authorize the Town Treasurer and Collector, with the approval of the Selectmen, to borrow from time to time in anticipation of revenue of the financial year beginning January 1, 1965, and to issue a note or notes therefor, payable within one year and to renew any note or notes as may be given for a period of less than one year in accordance with Section 4, Chapter 44 of the General Laws.

Article 6. On motion of John E. Page, II: Voted, under authority of Section 108A of Chapter 41 of the General Laws to amend the By-Laws of the Town by deleting the following

They shall be paid on the basis of \$75.00 per week of fifty-six hours on a three week average and for any fraction of a week at a rate of 1/56th of \$75.00 per week, except when they are on for a full week and are called back for additional duty, their rate shall be determined in the same manner as a permanent man (1/40th of \$75.00 per week). They may be appointed from time to time as the occasion arises without further notice to the Personnel Board, unless said Board requests such notice. This type employee shall not be entitled to premium pay.

Section XX Job Description of Principal Assignment

Add Under Fire Department

Substitute Firefighter

Under immediate supervision works as a member of the fire fighting force of the Town performing such duties as required during the vacation or sick leave of a regular firefighter.

Public Works Department

Assistant to the Superintendent

As directed by the Superintendent, assists in co-ordinating and directing all divisions in Public Works Department; may be assigned by the superintendent to any division for indefinite period. Office duties include working with plans and records; and shall represent Superintendent in his absence. Requires knowledge of all division activities including some technical and engineering knowledge and skill in dealing with the Public.

#### Inspector of Sub-division Utility Work

Under general direction of Public Works Superintendent inspects, observes and makes written reports on construction and installation of utilities in sub-divisions; shall record on plan, progress of construction, shall report to Superintendent immediately any requested deviation from plan, also any change which seems desirable due to conditions encountered in field. Shall have sufficient practical engineering knowledge to read plans, to hire and assign new employees on temporary basis as this job exists only as needed.

#### Health Department - Practical Nurse

Under general supervision assist this department in transferring and care of school children to our Dental Clinic from the elementary schools.

#### Agent-Investigator

Under general supervision of this department shall investigate all health complaints and submit written reports and when necessary provide photostatic evidence.

At 11:16 o'clock P. M. the Moderator declared the meeting adjourned until 7:30 P. M. March 2, 1965.

Attest: ELEANOR JONES  
Town Clerk

PROCEEDINGS OF  
ADJOURNED TOWN MEETING  
March 2, 1965

At 7:30 P. M. on Tuesday, March 2, 1965, the adjourned Town Meeting was called to order by the Moderator who stated that a quorum was not present.

On motion of R. Frank Punch it was voted to recess for ten minutes until a quorum should be present. At 7:40 P. M. the Moderator called the meeting to order and declared a quorum to be present.

On motion of James V. King it was voted to allow newspaper representatives to sit in the meeting.

Article 18. On motion of Gerald J. Nee: Voted, unanimously, that the sum of \$15,000.00 be appropriated to the Board of Public Works for Chapter 90 Construction, as approved by the State Department of Public Works: the Town share of \$3900.00 to be raised from the Tax levy of the current year, the County share of \$3900.00 and the State share of \$7800.00 to be borrowed under authority of Chapter 44, Section 6A of the General Laws.

Article 19. On motion of Gerald J. Nee: Voted that the sum of \$5,000.00 be raised from the tax levy of the current year and appropriated to the Board of Public Works and used for paving and surfacing Public Streets.

Article 20. On motion of Michael Barilone: Voted that the Board of Public Works be authorized to purchase a new 1965 3/4 ton pickup truck for the Water Division and to trade the 1958 Ford pickup truck and that the sum of \$1961.00 be raised from the tax levy of the current year for this purpose.

Article 21. On motion of Michael Barilone: Voted that the Board of Public Works be authorized to aerial spray for mosquito control and that the sum of \$2500.00 be raised from the tax levy of the current year for this purpose.

Article 22. On motion of Gerald J. Nee: Voted, unanimously, that the sum of \$34,000.00 be raised from the tax levy of the current year and appropriated for the purpose of installing sewer mains subject to assessments of Betterments or otherwise, in accepted or unaccepted streets, or in other lands, in accordance with Chapter 340 of the Acts of 1916 and all other acts in amendment thereof and in addition thereto; and to take by eminent domain and otherwise acquire any fee, easement or other interests in land necessary therefore, for sewerage Elaine Ave., Riverview Ave., and Assabet St. west of Riverview Ave. by gravity thru Fletcher St. to the existing main on Great Rd. about 2580 ft. of 8" AC pipe.

Article 23. On motion of Michael Barilone: Voted, unanimously, that the sum of \$20,217.00 be raised from the tax levy of the current year and appropriated for the purpose of extending the common sewer on Douglas Ave. about 700 ft. from an existing manhole, and on Concord St. about 650 ft. from an existing manhole.

A motion by John F. Tomyl to take Article 9 from the table was lost, 117 opposed to 10 in favor.

Article 24. On motion of Michael Barilone: Voted that the sum of \$2,926.00 be appropriated for the purpose of extending 8" water main on Riverbank Road about 300 ft. to replace the present 1½" main and to make necessary connections; and that to meet said appropriation, the balance of \$1,359.12 in Article 18 of 1963 be transferred and the sum of \$1,566.88 be transferred from water surplus.

Article 25. On motion of Henry T. Hanson: Voted to lay this article on the table. (re purchase of land and installation of well as supplementary source of water)

Article 26. On motion of Gerald J. Nee: Voted, unanimously that the Board of Public Works be authorized to make an agreement with the United States, Dept. of the Army, to secure for the Town the right to continue to take water from the well located at the Maynard Quartermaster Test Activity, and to authorize said Board to furnish water for domestic use to dwellings owned by said U. S. Government and located near said well, on such terms as may be agreed upon by said Board.

Article 27. On motion of Gerald J. Nee: Voted that the sum of \$4,300.00 be transferred from the Water Surplus Account to be used to purchase a pump and for pumping and other expenses in operating the Army well at White Pond.

Article 28. Acted on before Article 18.

On motion of Raymond E. Wuorio it was voted to act on Article 30 before Article 29.

Article 30. On motion of Gerald J. Nee: Voted that the sum of \$2,500.00 be raised from the tax levy of the current year and used for construction of asphalt concrete sidewalks on Parker Street and Great Road to provide better walks for school children.

Article 29. On motion of Gerald J. Nee: Voted that the sum of \$600.00 be raised from the tax levy of the current year and used to install asphalt berm on Parker St. adjacent to Glenwood Cemetery.

Article 31. A motion by Emile A. Genest to accept this article was lost. (re distribution of Town and Finance Committee Reports)

Article 32. No motion being made, the Moderator ruled to pass over this article.

Article 33. No motion being made, the Moderator ruled to pass over this article.

Article 34. On motion of Raymond E. Wuorio: Voted to lay this article on the table. (re Industrial Committee)

Article 35. On motion of Gerald J. Nee: Voted, unanimously, that the sum of \$2,839.00 be transferred from Water Surplus for the purpose of installing about 300 ft. of 8" AC Water Main with fittings and appurtenances, north on Old Mill Road from an existing main on Wlatham Street; one half the cost to be assessed upon owners of land abutting on said street and benefitting by the laying of water pipes; said assessments

in accordance with Sections 42G, 42H and 42I of Chapter 40 of the General Laws.

Article 36. On motion of Michael Barilone: Voted, unanimously, to establish as Town Ways and accept the layouts of Second Street and Butler Avenue extensions as laid out by the Board of Public Works under the provisions of Chapters 79, 80, 82 and 83 of the General Laws relating to layouts of ways and assessments of betterments; plans with Bounds and measurements being filed in the office of the Town Clerk; and to authorize said Board to acquire by easement or otherwise any interest in land necessary therefore, and to appropriate the sum of \$2,600.00 for construction of these ways and for land damage if any and for recording fees. Owners of land abutting on said ways and benefitting by said construction, to be assessed 1/2 the costs.

Article 37. On motion of Gerald J. Nee: Voted, unanimously, to establish as Town Ways and accept the layouts of Streets in Subdivisions as laid out by the Board of Public Works and shown with bounds and measurements on plans filed in the office of the Town Clerk, the subdivision plans being registered in the Middlesex South Registry of Deeds, book and page as noted; and to accept sewer, water and drain lines and appurtenances connected in said roads and dedicated to the Town.

Article 38. On motion of Michael Barilone: Voted, unanimously, that the Board of Public Works be authorized to lease the property of Mrs. Grace Boeske, off Waltham St., for the disposal of rubbish; and that the sum of \$3,000.00 be raised from the tax levy of the current year for this purpose.

Article 39. On motion of Raymond E. Wuorio: Voted to lay this article on the table. (re boundary lines of Old Mill Rd.)

Article 40. On motion of Michael Barilone: Voted that the sum of \$1,600.00 be raised from the tax levy of the current year and used to make corrections and additions to storm drains on Great Rd., Summer Hill Rd., and Powder Mill Rd.

Article 41. On motion of Forrest W. Nelson: Voted to amend the Building By-law by adding to Article III thereof, the following:

Section 10. The builder shall submit to the Inspector, after the foundation is poured and before construction of the building is started, a plot plan showing the location of the building on the lot with dimensions of lot lines to front, sides and rear. The plot plan shall be drawn by a Massachusetts registered engineer or land surveyor, signed by him and stamped with his registry number and seal.

Article 42. A motion by Edmund W. Beebe to accept this article was lost. (re appropriation for new High School)

Article 43. On motion of Emile A. Genest: Voted, unanimously, to raise and appropriate the sum of \$20,000.00 for the Finance Committee Reserve Fund to provide for extraordinary and unforeseen expenditures. Transfer to be made to departments only by vote of the Finance Committee, as provided by Section 6 of Chapter 40 of the General Laws.

Article 44. On motion of Emile A. Genest: Voted to raise and appropriate the sum of \$10,000.00 to the Stabilization Fund as provided in Section 5B of Chapter 40 of the General Laws.

Article 45. On motion of Albert G. Alexanian, Jr.: Voted to adopt the following resolution:

WHEREAS the General Court sitting as a Constitutional convention, did on July 16, 1963, give initial approval to a Home Rule amendment to the State Constitution, and

WHEREAS this bill of rights for local governments requires a second approval by the members of the General Court during this legislative session, and

WHEREAS We, as members of this Town Meeting, feel competent to handle the affairs of our Town without strict supervision by the Commonwealth of our every act and deed

NOW THEREFORE BE IT RESOLVED that this town meeting hereby instructs its representatives to the General Court to vote in favor of the Home Rule proposal (H 1384 of 1963 as revised) - when it comes before them.

On motion of Patrick J. Donovan it was voted to adjourn.  
Time of adjournment 11:00 P. M.

Attest: ELEANOR JONES,  
Town Clerk

Approval of Attorney General.

Boston, Massachusetts

March 10, 1965

The foregoing amendment to building by-laws is hereby approved. (Art. 41).

## PROCEEDINGS OF SPECIAL TOWN MEETING

held November 1, 1965

At 7:36 o'clock P. M., on the above date, a Special Town Meeting, in accordance with Town Warrant No. 501, was called to order by Town Mederator, Philip Wilson, in the Maynard Memorial Gymnasium, who declared a quorum to be present.

On motion of R. Frank Punch it was voted to waive the reading of the Warrant as a whole.

Article 1. There were no reports from Town Officials and Committees.

Permission was granted to newspaper reporters, an engineer and Mrs. Martin to attend.

Article 2. On motion of Richard T. White: Voted that whereas there exists in the Town of Maynard a shortage of safe, sanitary dwellings available for families of low income at rentals which they can afford to pay; and that whereas it is hereby determined that a Housing Authority is needed for the Town of Maynard, in order to provide housing for elderly persons of low income; now therefore it is hereby moved that the Maynard Housing Authority be organized and established under the provisions of Massachusetts General Laws, (Tercentary Edition) Chapter 121, Section 26K and acts in amendment thereof and in addition thereto.

Article 3. On motion of Donald A. Lent: Voted, unanimously, that the sum of \$5,650.00 be transferred from the Water Surplus Account for the purpose of installing about 850 feet of AC Water Main with fittings and appurtenances on Old Marlboro Road from the existing water main to Great Road, one half the cost of said installation to be assessed upon owners of land abutting upon said street and benefitting by the laying of the water pipes; said assessments in accordance with sections 42G, 42H and 42I of Chapter 40 of the General Laws.

Article 4. On motion of Donald A. Lent: Voted that the Town ratify, confirm and adopt the agreement made by the Board of Public Works and Robert D. and Norma L. Quirk on May 18, 1965 for the purpose of securing an additional water supply for the Town of Maynard, from a well on the Quirk property, and further that all actions of the Board of Public Works pertaining thereto be ratified, confirmed and adopted; and to transfer from the Water Surplus Account the sum of \$7,294.50 therefore.

Permission was granted at this time for Attorney George P. Luker and other interested parties to attend the meeting.

Article 5. On motion of William H. Tobin, Jr., as amended by James F. Coleman, (amendment voted 152 in favor to 55 opposed); Voted, 146 in favor to 59 opposed, to amend Section 3-1, Single Residence Districts, by adding thereto subsection d-10, Nursing and Convalescent Homes.

The Finance Committee recommended this action. Report was given by Planning Board and filed with Town Clerk.

Article 6. A motion to adopt this article, by William H. Tobin, Jr., amended by John J. Tobin, was lost by a vote of 91 opposed to none in favor. (re re-zoning on Waltham Street) (amendment lost 77 opposed to 60 in favor)

On motion of George S. Mead: Voted to act on Article 8 before Article 7.

Article 8. On motion of Donald A. Lent: Voted, unanimously, that the Town establish as a Town Way 296.3 feet of Chandler Street Extension and accept the layout of such made by the Board of Public Works, under the provisions of Chapters 79, 80, 80A, 82 and 83 of the General Laws relating to the laying out of ways and assessments of betterments, and filed in the office of the Town Clerk with a plan thereof, and that the sum of \$1,700.00 be taken from the Excess and Deficiency Account for construction and for payment of any damages resulting from taking of land and easement and for recording fees. Owners of land abutting on said way and benefitting by said construction shall be assessed one half the cost.

Article 7. On motion of Emile A. Genest: Voted to lay this article on the table. (re Chandler St. Extension)

At 10:20 o'clock P. M. on motion of R. Frank Punch, it was voted to adjourn.

Attest: ELEANOR JONES,  
Town Clerk

Boston, Mass. November 30, 1965

The foregoing amendment to zoning by-laws adopted under Article 5 is hereby approved.

EDWARD W. BROOKE  
Attorney

## NOTICE

All dog licenses here listed expire  
March 31, 1966.

Dogs must be licensed on or before April 1st or the owners or keepers thereof are liable to a fine.

The law applies to all dogs three months old or over, regardless of time of year ownership is acquired.

No tax bills are sent to owners of dogs.

## ASSESSORS' REPORT

To the Citizens of Maynard:

The Annual Report of the Board of Assessors for the year ending December 31, 1965 is submitted herewith:

In accordance with the provisions of the General Laws of Massachusetts, Chapter 59, Section 29, all owners of taxable property, shall each year, on or before March 1st submit to the local Assessors a list with the valuation of their taxable property. Notices are posted and forms may be obtained at the Assessors' office in the Municipal Building.

All requests for abatement or exemption of taxes must be filed on forms which can be obtained at the Assessors' Office. All applications for abatement or exemption of Personal Property Taxes or Real Estate Taxes must be filed on or before October 1st of each year, except for certain Veterans, Widows and Elderly persons who must file on or before December 15th of each year.

## TOWN ACCOUNTANT'S REPORT

To the Honorable Board of Selectmen:

Herewith is presented the report of the Accounting Department for the year ending December 31, 1965. The report is made in accordance with the requirements of the State System of Accounting.

In accordance with the provisions of Section 61, Chapter 41, of the General Laws, I hereby certify that I have verified the cash balance of the Town Treasurer as of December 31, 1965. The cash balance on December 31, 1965 was \$431,886.08.

In accordance with the provisions of Section 23, Chapter 59, General Laws, as amended, the amount of available funds or "free cash" as of December 31, 1965 is \$189,500.14.

The courtesy and co-operation received from the various Town Boards, officials and employees is gratefully appreciated.

Respectfully submitted,

JAMES V. King  
Town Accountant

## REPORT OF REGISTRARS OF VOTERS

To the Board of Selectmen  
Maynard, Massachusetts

Gentlemen:

The Registrars of Voters were appointed by your Board to conduct the State Census in conjunction with the Annual Listing of Residents of the town. The Census and Listing were supervised by Doris Z. McGarry. The Census count of 9,070 inhabitants on January 1, 1965, was certified by the State Secretary's Office.

A total of 462 names were certified on nomination papers filed for the Town Election. A recount of the ballots cast for the office of Planning Board was held March 19, 1965.

The General Register of Voters at the last revision, June 1, 1965, contained a total number of voters, as follows:

Men	2,095	Democrats	1,703
Women	2,217	Republicans	776
		Unenrolled	<u>1,833</u>

REPORT OF THE  
MAYNARD HIGH SCHOOL BUILDING COMMITTEE

To the Board of Selectmen  
Maynard, Massachusetts

Gentlemen:

The Maynard High School Building Committee herewith presents a report of progress for the year 1965.

The committee met nineteen times and held an open house and dedication ceremony in cooperation with the school department on June 20, 1965.

The Committee had hoped to complete its activities in 1965, but unforeseen delays have made this impossible. Several minor tasks have not been completed by the contractors and architects to the satisfaction of the committee. The committee is reluctant to exhaust its funds until these tasks are completed. As a result the purchase of some needed equipment has been deferred.

The process of purchasing equipment was further delayed when a request for additional funds was defeated at the annual Town Meeting.

It appears likely that the additional equipment items will appear in subsequent School Department budgets. However, the chance for state assistance may have been lost.

Mrs. Lorraine Whitney has been hired by the committee to prepare final project accounting forms for the Massachusetts School Building Assistance Commission.

Respectfully submitted,

HARRY F. CHAPPELL, Chairman  
MRS. JANE JOHNSON, Secretary  
WALTER E. CARBONE  
WILFRED DeROSA  
WORSLEY FARDY

JOHN J. TOBIN  
MRS. FERNANDE SMITH

## REPORT OF THE LIBRARY TRUSTEES.

The Board of Trustees of the Maynard Public Library herewith submits its annual report for the year 1965.

Mr. Frank Punch was re-elected to the Board in March for a three-year term. At a reorganizational meeting Mr. George Lemire was elected Chairman, Mrs. Eleanor Hunter, Secretary and Mr. Frank Punch, third member.

Regular monthly meetings were held as well as special meetings whenever the need arose.

During the summer months it was voted to close the Library on Saturdays. Having all staff members off on one day provided better coverage through the week during vacations. The Library was open three nights instead of the usual two on the summer schedule.

The Board feels that the Library needs the addition of a part-time worker to help meet the growing demands of an ever-increasing population. We hope with the addition of such a person that the hours might be extended to include at least one more morning.

Our thanks to Mrs. Carbone and her assistants for being so willing and able and to the volunteers who gave so generously of their time. Many thanks to the donors of books, magazines and gifts.

May the Library continue to enrich our community!

Respectfully submitted,  
GEORGE LEMIRE, Chairman  
ELEANOR HUNTER, Secretary  
R. FRANK PUNCH

## ANNUAL REPORT OF THE LIBRARIAN

We must all be concerned with the "Role of the Public Library in the Sixties." Public education of all kinds is on the increase, more books are written than ever before, and the numbers of readers is constantly rising. How does a Public Library cope with all this? Can our libraries keep pace and avoid coming forward with too little, too late? These are the problems that concern everyone and the only way they can be solved is by 100% backing by the taxpayer.

Story Hour is the first step at the first level in encouraging small children to use the library. The exposure to books obtained through this program is very worthwhile and the children love to select and borrow books. Twenty-four story hours were held under the direction of Mrs. Edythe Fawcett, with one trip to Drumlin Farm during the summer. There is a definite need for a summer program for the next age group.

Several classes from the elementary schools and kindergarten have visited the library, small collections of books have been loaned for elementary classroom and kindergarten use.

Reading certificates were issued through the cooperation of the teachers, these are required in the 7th and 8th grades before promotion, so over 300 five-book and 35 twenty-book certificates were issued.

Special book displays were arranged for the Music Festival, National Library Week and Children's Book Week. We are planning to have book lists of current adult books and new children's books for distribution to patrons of the library soon.

Weeding is an integral part of book selection and a continuous project. When our collection has been thoroughly weeded and eventually rebuilt an inventory which shows an equal amount of discard and acquisitions is considered healthy. The end of this year shows a marked improvement in the appearance of the books on our shelves.

To keep abreast of what's new in the library field I have attended many meetings at the local, regional and state level. In May, I completed the second semester of a course "Library Organization".

The following have donated books or magazines:

Mrs. Katherine Maginnis	Mrs. Edith Carbone
Mrs. Irving Baker	Mrs. C. E. Jackson
Mrs. Lauri Pekkala	Mrs. Gilda Mullins
Mrs. John Page	Miss Eileen Keane
Mrs. Mary Carpenter	Miss Dorothy Marsden
Mrs. Bertha Studivan	Miss Jennie Zack

Miss Mary Flannery	Maynard Woman's Club
Eric Maki	Worcester Telegram
David Wade	Library Staff
Howard F. Boeske, Jr.	High School Building Comm.
Mr. & Mrs. L. Albert Daloz	League of Women's Voters
Mr. James Azier	Democrat Nat'l. Comm.
Mr. Howard Whitney	St. George's Church
Mr. George Lemire	American Legion
Mr. Grayson Bates	Class of '55
Mr. Thomas Maley	General Radio Corp.
Lynn Dapper	

Books have been given in the memory of Mrs. John Taylor, Mrs. John Ingham, Mr. Carl Stockbridge, Mr. William Tobin, Mr. Freddie Fairbanks, Mr. Leonard Hendrickson, Jackie Shaw and Steven Alexanian. Flowers were sent to the library in memory of Mr. Michael Sofka.

Old post cards of Maynard were donated by Mr. William Towler of Concord. Mrs. Worsley Fardy presented the library with an old print of the Assabet Mills and Mr. Irving Manning an antique school desk.

Mr. Richard Carleton has donated a complete set of 51 volumes of Corpus Juris Sexundum, these volumes are stored in the lower part of the building but are available to any one who needs them. Mrs. Delphine Campbell of the Twombly Funeral Home supplies the library with bookmarks the year round.

Our sincere appreciation to the many who have recognized the library and staff in so many thoughtful ways.

#### Statistics

Books added 1965	1836
References	45
Adults	967
Juvenile	824
Book Inventory, December 31, 1965	13,969
Books Discarded	643
Fines	\$469.18
Lost Library Cards	43.75
Lost and Damaged Books	22.71
Registration Fees	18.00
Book circulation has increased 10% over 1964.	

My sincere thanks to the staff, Mrs. Alice Lyons and Miss Annie Duggan for their courtesy and kindness to all, and to the Board of Trustees, volunteers, custodians and all other Town Boards for their wonderful cooperation.

EDITH H. CARBONE, Librarian

REPORT OF THE  
BOARD OF PUBLIC WORKS

To the Citizens of Maynard:

We hereby present the Board of Public Works report for the year of 1965.

We are pleased with the economical operation of the various Departments that are under control of this Board. This is shown by the considerable balances to be returned to the Town Treasury.

Each year new homes and subdivisions add street, water, drain and sewer extensions to our systems; these extensions result in added work load and costs in running the Department. In addition new parking areas are maintained and snow and ice removed.

The Superintendent's report and articles placed on the warrant for the Annual Town Meeting give you an idea of why cost continues to increase.

In addition to the Army Well pumping into White Pond, mentioned last year, water is being pumped into the system from a well site off Old Marlboro Road. This water has been approved by the State Department of Health and is pumped at a rate of 280 gallons per minute or 403,200 gallons per day, and from July 20th when the pump was started to December 31st, 63,557,600 gallons were pumped. At the invitation of the Board the Selectmen and a member of the Finance Committee are consulting with us to negotiate for a lease or purchase of the land containing the well site. An article will be considered at the Town Meeting concerning this.

We have an article on the warrant for Water Search, for if the present drought continues more sources of water will be needed.

Sanitary Landfill is relatively costly and uses much space but is the method required by the State. We may have a problem of finding a site for the method of rubbish disposal in the near future.

The Sanitary Landfill Committee has been studying the rubbish disposal problem and may make recommendations at the Town Meeting.

The State Board of Health advises that we should complete the additions to our Sewer Plant as outlined in our 1961 report which they approved. Accordingly, an article will ask for authority to secure a Federal Loan for construction plans and specifications.

Respectfully submitted,

GERALD J. NEE, Chairman  
JOHN J. TOBIN, Secretary  
MICHAEL BARILONE

REPORT OF THE  
SUPERINTENDENT OF PUBLIC WORKS

To the Board of Public Works

Gentlemen:

Herewith is submitted the Annual Report of the Superintendent of Public Works for the year ending December 31, 1965, which includes Highway, Water, Sewer, Cemetery, Parks, Trees, Insect Pest Control, Parking Areas, and Sanitary Land Fill.

HIGHWAY DIVISION

Streets treated with Asphalt Oil:

Park Street	Bates Avenue	Dartmouth Street
Sherman Street	Crane Avenue	Chandler Street
Burnside Street	Butler Avenue	Oak & Summit Street
Acton Street		Hird Street

Streets resurfaced with Type I Bituminous Mix:

Parker Street and Rotary at Great Road  
Great Road Rotary to Marlboro Street  
Bituminous curb installed on Parker Street adjacent to Glenwood Cemetery

Sidewalks, Bituminous Mix:

Town sidewalks for Schools  
Parker Street at Glenwood Cemetery  
Great Road Rotary to Mill Street  
Betterment— abutter paying  $\frac{1}{2}$  cost  
Tremont Street - Salamone  
Great Road - Pierozzi

Street & Traffic Signs & Meters

Cooperation with Traffic Department.

Twenty street signs and posts were replaced, twenty-five meter posts adjusted; new signs erected and cross walks painted for the School Department.

Two-thirds of the Town now has modern street signs, 1966 should see this project completed.

Storm Drains and Basins

2 Basins with drain pipe at Parker Street Rotary  
2 Basins and manhole with pipe at Summer Hill Road and Mill Street  
1 Basin and pipe at Old Marlboro Road  
1 Basin at Great Road and Mill Street

200 Catch Basins cleaned  
 10 Catch Basins rebuilt.  
 In Sub-divisions 2,015 feet of 12" R. C. Pipe, manholes and  
 catch basins.

#### Street Sweeping

Regular Spring sweeping and street cleaning was done, and extra sweeping for the Music Festival. The business district was swept twice weekly, March to December, and sidewalks swept as usual.

#### Snow Removal

Streets and walks were plowed and sanded. Snow was removed from congested districts, and parking places cleared. 78 sand barrels were placed in usual places and kept filled as needed.

It is my opinion that the snow removal program can be carried out more efficiently and economically if we have our own trucks. With instant snow plow hitches no lost time or extra help is needed to get ready to plow. Plow drivers constantly going over the same route, learn the easy and best way to plow. It is becoming difficult to secure private trucks and operators who remain with us long enough to learn the routes.

It is impossible to foresee the cost of such a program as snow removal: in fact the past years operation resulted in a balance left in the snow removal funds of \$10,622.76, whereas some other years a transfer from reserve funds was necessary to complete the year's work.

#### Street Construction

No work was done on Chapter 90 Highway construction during 1965. The 1965 allotment from State and County will be added to that for 1966 so as to secure a lower bid which we can expect if any job is twice as extensive. We plan reconstruction of Great Road from Parker Street to Sudbury Street. This is necessary especially for drainage which is inadequate.

Maynard is indeed fortunate that we have been able to have water during this prolonged period of drought. In 1963 our pond receded to its lowest point ever, down to 5 inches over the low water limit below which air would be sucked into the pumps stopping them. A stand-by pump was rented to raise water from lower levels of the pond if needed. Fortunately the low level of the pond occurred in November and cooler weather lessened the need to pump so much water to

the Town. Some Fall and Winter rains and snow storms resulted in a continuous rise in the pond level until a high point of 37 inches for 1964 was reached in May.

From May 1964 a drop in the pond level began again, but this time we were prepared, so that when a low point of  $14\frac{1}{4}$ " above low water level for 1964 was reached in August, we started pumping into the pond from a well leased from the Town of Sudbury and located in Army land about 3,500 feet from the Pond.

Gradually the level of the pond rose as more than 400,000 gals. per day were pumped into the pond. This rise in pond level continued until March of 1965 when the level of the Pond stood at 33" over the low water limit.

In March of 1965 the rented pump was stopped and a less expensive pump was purchased. During the period of pumping from the Army well the level of the ground water receded to 31' 10" below the top of the well. After the pump was stopped, the level of the Pond gradually receded until July 1st. When the water level was at 20" over the low water level, the new pump was started, and the level of the ground water, having risen 21 feet, began to drop immediately; the continued drought had failed to restore the underground supply.

The deficiency at the Army well had been anticipated, and during the latter part of 1964 and early 1965 tests had been made of a well site off Old Marlboro Rd. and on July 20th a well was established with pump and pipe supplied by the land owner, Mr. Robert Quirk. The quality of the water was approved by the State Board of Health as suitable. Pumping into the Town water mains was started July 20, 1965.

Pumping at a rate of 280 G.P.M. or 403,200 gal. per day from the Quirk well reduced the pumping from White Pond and the level of the Pond rose until at the end of the year it was  $31\frac{1}{2}$ " above the low water limit.

During the second half of 1965, the amount of water produced from the Army well began to decline because of a lowering level of underground water. In the middle of August the rate of pumping was cut back to 195 G.P.M. and this slowed the decline in the underground water level. In the middle of October the pumping rate was further reduced to 172 G.P.M. again slowing the recession of the underground water level. In fact, for a short time, the level rose slightly with the help of some rain. At the present time the level of the underground water is receding slowly and we hope that some rain may come to replenish the water being taken from this well.

The drought continues, and both the Army well and the Quirk well slowly lower the levels of the underground water

from which they pump. If we are to continue to supply the water needs of the Town without drastic restrictions on uses, we must find some additional sources. The only way our present sources of supply can furnish more water is from abundant rainfall. New homes require more water and existing homes find more ways to use water, and it will be futile to attempt to attract new industries unless water is available.

From July 20, 1965 when the Quirk well pump started to December 31, 1965, 63,672,600 gal. of water were pumped into the Town water mains, and cost:

63,672,600 gal. water @ \$100.00	
per million gals.	\$6,367.26
Power	1,764.00
Chemicals & Chemical Pumps	803.63
	<u>\$8,934.89</u>

From July 1, 1965, when the Army well pump was started to December 31, 1965, 53,160,960 gal. of water was pumped into White Pond and cost:

Pump	\$1,527.30
Power	795.84
Chemicals & Chemical Pump	835.49
Incidentals - gate valve	72.00
	<u>\$3,230.63</u>

From July 1, 1965, to December 31, 1965, 84,655,000 gals. of water was pumped into the Town System.

Since the Army well provided 53,260,960 gals. to the Pond, the Pond only provided 31,494,140 gals. of its own water. At the same time the Quirk well provided 63,672,600 gals. during the period from July 1, 1965, to December 31, 1965, and the Pond level rose  $11\frac{1}{4}$  inches.

#### Sewer Pumping Record

	1954 Gals.	1964 Gals.	1965 Gals.
January	10,299,250	15,000,000	21,513,000

March	11,869,250	28,376,100	23,276,000
April	14,076,500	22,774,200	24,093,000
May	19,566,000	22,477,900	24,051,000
June	10,861,500	21,466,500	24,036,000
July	10,056,250	22,336,000	21,391,000
August	10,528,750	20,300,500	21,819,000
September	11,734,250	20,585,400	20,461,000
October	7,692,250	18,272,900	21,339,000
November	13,922,000	16,149,700	20,446,000
December	15,436,000	19,961,000	21,426,000
Total	<u>146,325,750</u>	<u>249,449,090</u>	<u>264,351,000</u>

The additions to our Sewer Disposal Plant are working satisfactory, and much humus is being removed from the effluent discharged into the river. Removal of the humus and returning it to the old digesting tanks has, however, intensified the problem of sludge disposal and the problem of chlorination of the effluent needs to be provided for.

The state has recommended that we proceed with plans for sludge handling facilities and chlorination. A non-interest bearing loan is available from the Federal Government to finance plans and specifications. The loan to be repaid if and when construction takes place, and a grant of 30% of cost will then be available for construction.

As a result of authorization of the March 1965 Town Meeting a loan has been applied for and approved by the Federal government for a complete survey of our Sewage collection system and Whitman and Howard, Engineers, have been contracted to make the survey and plans. Any construction must be authorized by vote of Town Meeting and repayment of loans for planning will be made if and when such construction takes place.

#### CEMETERY DIVISION

Grave openings	77 (26 on week-ends or holidays)
Liners installed	34
Foundations	9
Markers set	36

15 sunken graves were raised, one lot graded, loamed and reseeded. Brush was cut and banks burned over in the old cemetery. Regular mowing of entire cemetery when needed, and shrubs and trees trimmed and dead trees removed, and avenues graded.

The road slope between the old and new cemeteries was paved to prevent continued washouts. A chain link fence should be erected from Great Road along the west and south cemetery bounds.

#### STREET LIGHTING

Street lighting continues to be an increasing expense. Streets in Sub-divisions need to be lighted when homes become occupied, and on other Town and Private streets new homes continually request additional lights. Off street parking require adequate lighting.

#### TOWN DUMP - SANITARY LANDFILL

The area which has been used for Sanitary Landfill operation is becoming used up fast. Additional space will need to be secured soon. Cover material which has been

secured from a nearby area at a relatively low price, will not last much longer. This operation will be more costly in the future if we have cover material hauled in from a more distant source. The Sanitary Landfill Committee is actively trying to solve the problem of a site for disposal operations where cover material is available.

I recommend that more attention be paid to incineration with, if possible, a regional incinerator in cooperation with nearby towns. Open space for Sanitary Landfill is not too easy to find especially with so much land being taken up for new homes.

#### TREES, PARKS, AND INSECT PEST CONTROL

John A. Crowe Park playing areas were kept in shape for use of school and town groups. The baseball diamond was graded, field mowed, and tennis courts were kept in shape. The Band Stand was made available for Band Concerts and lights were provided.

Memorial Park was kept mowed and cared for. Trees and shrubbery were set to replace those removed when the parking lot was enlarged.

Public shade trees were trimmed, 20 diseased and broken trees were removed and 96 maple trees were planted.

In cooperation with the State, samples were taken for Dutch Elm Disease and 36 trees were found to be positive. They are being taken down and burned as required. During the year, 126 diseased, dead and dying elm trees were removed. The elm wood and brush was burned at the Dump away from the rubbish.

Aerial spraying was done for mosquito control and proved satisfactory. Hand spraying was done for poison ivy and for insect pests.

#### CONCLUSION:

I wish to thank the Commissioners, employees of the Department, other Town Officials, and the public who have been helpful and cooperative during the year.

Respectfully submitted,

DONALD A. LENT  
Superintendent

## REPORT OF THE PERSONNEL BOARD

The Personnel Board met forty-seven (47) times during 1965. During the early part of 1965, the Board worked on Salary Recommendations for the 1965 Town Meeting. The Town accepted our basic wage recommendations at this meeting and voted not to amend our recommended schedule.

After the March Town Meeting the Board began research work with each town department to facilitate the Wage and By-Law Changes to be acted on at the March 1966 Town Meeting. John Page worked with the Police and Fire Departments. Myron Bates worked with the Public Works Department and Adam Mancini with the balance of the town employees. We received a great deal of cooperation from all departments and this has been instrumental finally bringing about one article that both the Board and the employees think is fair to the Town. In November Mr. Charles Willet was appointed to fill Mr. Mancini's seat on the Board. Mr. John Gunn still is an Absentee Member of the Board. If this year's Town Meeting approves the Wage Scale as recommended, the employees of the Town of Maynard will be in a very competitive position in relation to comparative positions in surrounding towns. In the future, the Board will be able to maintain this favorable situation with a much smaller expenditure.

The Board also strongly recommends the proposed By-Law Change as having a Town Employee on the Board will definitely allow for fewer misunderstandings between the Board and the Employees.

As of January 17, 1965 the following are members of the Personnel Board:

John E. Page, II	Term expires: 1969
Myron B. Bates	1966
John Gunn	1967
Charles Willett	1970

REPORT OF THE  
SANITARY LANDFILL COMMITTEE

To the Citizens of Maynard:

The Sanitary Landfill Committee has had meetings during the year with a good attendance. The attention of the Committee was almost entirely devoted to finding a location for a sanitary landfill operation.

At the present site off Waltham St. the space is nearly used up. It is a question if it will last until our lease expires in March. The ownership of the land has changed, and we do not know what the situation might be for any other land at that location.

We have carefully considered the pros and cons of using land owned by the Town between the new High School and the Green Meadow School, and also land of John and Annie Coughlan off Great Rd. and abutting front and rear on the Town land.

We are presenting two Articles to the Town Meeting, one in relation to this land, and one in relation to Town land used for School purposes.

Respectfully submitted,  
MICHAEL BARILONE  
Chairman

REPORT OF THE  
BOARD OF PUBLIC WELFARE

To the Board of Selectmen:  
Maynard, Massachusetts

Gentlemen:

The Board of Public Welfare and Bureau of Old Age Assistance submits herewith their annual report.

The Board meets each Tuesday in the Welfare Department of the Town Building at 7:30 P. M. Mrs. Barbara P. Hayward, Director, is present at the meetings when necessary.

The Welfare Department operates under the rules and regulations as set forth by the Massachusetts General Court and the State Department of Public Welfare.

Financial Aid and assistance has been given to those who qualified for such assistance on General Relief, Old Age Assistance, Medical Assistance for the Aged, Aid to Families of Dependent Children, and Disability Assistance programs.

A concerted effort was made to institute a Federally sponsored food program in Maynard during the year. In the opinion of the Board, the lack of interest and poor response by the public to this program, participation was not feasible at this time.

On several occasions the Director and members of the Board attended several meetings to include Maynard in the Assabet Valley Regional Opportunity Council. This Council is to implement the President's Office of Economic Opportunity Act (The Poverty Program) on a regional basis. We believe this program could help the people of Maynard who are in need, but such a program is going to need the co-operation of many responsible residents of the Town. The Welfare Department still maintains representation in this Council.

The Medicare Program under Social Security will come into being as of July 1, 1966, and the nursing home part of this act will be implemented in January, 1967. At this time we have no way of knowing what effect this Medicare Program will have on the Medical Assistance for the Aged (Kerr Mills Bill) that has been administered by the Department since 1960.

Our sincere thanks to our Welfare Director, Mrs. Barbara P. Hayward, our Social Worker, Mrs. Marion Mulvany, and our clerk, Mrs. Sophia Minko, for their co-operation throughout the year, and to all other Town Boards and Departments for their able assistance.

## CASE SUMMARY

Category of Assistance	Cases 1/1/65	Cases Aided	Cases Closed	Cases 12/31/65
Old Age Assistance	69	12	19	62
Medical Assistance for the Aged	71	33	33	71
Aid to Families of Dependent Children	30	23	29	24
Disability Assistance	16	5	7	14
General Relief	11	46	50	7

The financial report will be found in the report of the Town Accountant and the Town Treasurer.

Respectfully submitted,

## REPORT OF THE BOARD OF HEALTH

To the Citizens of Maynard:

The Board of Health hereby submits its report for the fiscal year ending December 31, 1965. The Board organized with John J. Johnston as Chairman, Irving H. Manning as Secretary and J. Conrad Mayberry as the third member of the Board.

The following appointments were made:

Board of Health Nurse	Stella M. Nowick, R. N.
Assistant Nurse	*Mary White, R. N.
Inspector of Plumbing	Warren E. Bemis
Milk and Food Inspector	Robert W. Rimbach
Inspector of Slaughtering	Lauri W. Manning
Burier of Animals	Gerald Pendergast

(\* Mrs. White was replaced by Mrs. Katherine McNulty, R. N.

## NURSE'S REPORT FOR 1965

Patients Visited	700
Morbidity Calls	2845
Old Age Assistance	447
Medical Aid to Aged	913
Disability Assistance	30
Free Nursing Visits	487

## RABIES DOG CLINIC

On May 22, 1965, the annual Dog Clinic was held at the Town Garage. A total of 354 Dogs were inoculated by Dr. Vance Carlson. This number is only 65 to 70% of the registered dogs in the Town of Maynard and it would be an advantage to everyone if ALL dogs were inoculated. There is no charge to local residents.

## FOOD HANDLING REGULATIONS

A change in the Food Handling Regulations was made on January 12, 1965, under Section II. It is now the responsibility of the employer to show proof to the Board of suitable Chest X-Ray of all new employees regardless of the number

of hours employed. This is a very important part of T. B. detection and is for the protection of all.

### IMMUNIZATION CLINICS

Because of the tremendous success of the Immunization Clinics held in 1964 the Board of Health felt it was unnecessary to hold any this year. However, the Board wishes to remind all residents that anyone not having completed his immunization to do so through his family physician.

### MEASLES

A very successful Measles Clinic was held on Saturday, March 20, 1965, at the Town House. A total of 428 children, ages 1-6 received this vaccine. Maynard was, as far as is known, the second community in the Commonwealth to have conducted such a clinic and to protect its children from this serious disease.

Much of the success of this Clinic was due to the doctors, nurses and lay people who gave their time and energy for the greater good of the community. The Board of Health wishes to publicly thank the following. Dr. Raymond E. Hooper, Dr. Charles H. Duston, Dr. Jack Holmes, Dr. Randolph Piper. Nurses: Mrs. Stella Nowick, Mrs. Mary White, Mrs. Audrey Duggan, Mrs. Mary Foley, Mrs. Mary Holly, Mrs. Carol Lynch, Mrs. Myrna Palmer. The following assisted with the registration: Mrs. Elizabeth Britt, Mrs. Edith Carbone, Mrs. Constance Quinn, Mrs. Ann Mac-Glashing, Mrs. Pauline Foley, Mrs. Jeanette Robblee, Mrs. Lucy Johnson, Mrs. Teresa Morrill, Mrs. Ann Jarmulowicz, Mrs. Helen Sullivan, Mrs. Rosalie Walsh, Mrs. Mary Mayberry, Mrs. Ruth Manning and Miss Alice Thane.

### COMPLAINTS

Garbage complaints continue to come in occasionally but with co-operation from all residents these are taken care of without difficulty.

Complaints of a general nature are resolved by the Board after thorough investigation.

### FOOD AND MILK INSPECTION

Mr. Robert W. Rimbach continues to check stores and restaurants monthly. Also local dairies are inspected and sample testings are made of milk. A change was made in the dates of issuing licenses. Some licenses shall become effective from January 1 to December 31. There will be no change in fees.

## WALDEN CLINIC

Maynard has been invited along with other surrounding towns to join in the facilities of the Walden Clinic. This Clinic offers professional psychiatric help to children whose emotional conflicts make it difficult for them to adjust to their families, school, or community. This is located in nearby Concord and patients are charged fees based on the families' ability to pay.

The Board of Health, in cooperation with the Selectmen and the School Department, will sponser an article at the Town Meeting for this very important Mental Health Program.

## PLUMBING INSPECTOR'S REPORT

Mr. Warren E. Bemis, Inspector of Plumbing, reports he has issued 175 plumbing permits and 2 permits for installation of septic tanks.

Inspections were made and violations noted and remedied. Mr. Bemis wishes to thank the members of the Board of Health, Contractors and individuals for their cooperation.

The Board of Health regrets the passing of Miss Alice R. Thane who served faithfully and efficiently as Clerk of this office.

Respectfully submitted,

JOHN J. JOHNSTON, Chairman  
IRVING H. MANNING,  
Secretary  
J. CONRAD MAYBERRY

REPORT OF THE  
INSPECTOR OF ANIMALS

Board of Health  
Maynard, Massachusetts

Gentlemen:

As Inspector of Animals I hereby submit my report. Thirty-seven (37) dogs were quarantined on suspicion of rabies, and after ten (10) days the quarantine lifted.

Also 5 houses, and three (3) barns were checked and found clean and free from contagious diseases.

Respectfully submitted,

WALTER J. DONOHUE  
Inspector of Animals

---

REPORT OF THE  
DOG OFFICER

Board of Selectmen  
Maynard, Massachusetts

Gentlemen:

I hereby submit my report as Dog Officer.

During the year I returned forty-seven (47) dogs to their owners, twenty-five (25) were destroyed after a ten (10) day period.

I wish to thank the Chief of Police, and his officers for their assistance during the year.

Respectfully submitted,

WALTER J. DONOHUE  
Dog Officer

## REPORT OF THE FINANCE COMMITTEE

To the Citizens of Maynard:

The Finance Committee held twenty-three meetings during the year 1965. Moderator Philip Wilson appointed George S. Mead to the committee, and re-appointed Emile L. Genest and Paul T. Foley.

The Policy sub-committee, Owen Duggan chairman, and the Long Range sub-committee, Raymond Sheridan chairman, have met during the year to update their studies.

Transfers from the Reserve Fund totaling \$10,840.28 were made to various departments during the year.

Respectfully submitted,

EMILE L. GENEST, Chairman  
 INGRID A. MARTIN, Secretary  
 OWEN DUGGAN  
 PAUL T. FOLEY  
 HAROLD W. JOHNSTON  
 GEORGE S. MEAD  
 PAUL R. MURPHY  
 RAYMOND J. SHERIDAN  
 VICTOR A. TOMYL

## FINANCE COMMITTEE MEMBERS

Owen Duggan	Term Expires 1966
Paul R. Murphy	Term Expires 1966
Raymond J. Sheridan	Term Expires 1966
Harold W. Johnston	Term Expires 1967
Victor A. Tomyl	Term Expires 1967
Ingrid A. Martin	Term Expires 1967
Emile L. Genest	Term Expires 1968
Paul T. Foley	Term Expires 1968
George S. Mead	Term Expires 1968

TOTAL		\$16,058.56
BALANCE		\$ 3,941.44

## REPORT OF CIVIL DEFENSE AGENCY

The following is the report of the Civil Defense Agency for the period January 1, 1965 to December 31, 1965.

The Civil Defense Agency has cooperated to the best of its ability with the various Town Departments as well as the people of the town and will continue to do so whenever and wherever they are needed.

There has been added a Rescue Team so that Civil Defense is now of greater service to the community.

There is a never ceasing need for volunteers in the various units of the Civil Defense Agency.

The staff of the Civil Defense Agency wish to thank the Board of Selectmen and all other town officials for their co-operation during the year.

Respectfully submitted,

NORMAN W. BEMIS

Director of Civil Defense

## REPORT OF THE PLANNING BOARD

To the Board of Selectmen  
Maynard, Massachusetts

Gentlemen:

We hereby present the report of the Planning Board for the year 1965.

## BUILDING ACTIVITY

17 houses were completed in one development off Summer Street.

## SUBDIVISION CONTROL

A subdivision of 218 lots was approved, but no construction begun, in 1965.

A subdivision to permit the erection of a 13-unit garden-type apartment building was approved and has been partially completed. Occupancy is expected by spring of 1966.

Several new subdivision plans are expected to be submitted to this board by the summer of 1966.

## HEARINGS

Hearings were held on all subdivision projects as well as several proposed Zoning By-Law changes. At a Special Town Meeting a change in Single Residence Districts was approved, permitting the possible erection of nursing and convalescent homes. At the same meeting a proposed change from Single to General Residence Districts was not approved. The board is still considering the possible increase in lot sizes and frontage requirements for future subdivisions.

## PLANNING

A study group has been formed to compile an up-to-date file of Zoning By-Laws and Planning Board Regulations for all nearby cities and towns. This is the preliminary step in the revision of Maynard Planning Board Rules and Regulations in 1966.

Plans have been made to update the Street and Zoning Maps of the Town of Maynard. Copies will be made available to all Town Boards and Agencies in the early spring.

We are currently investigating the future plans of the U. S. Army for the land it owns in the Town.

Although we are not ready to recommend a full-time Town Engineer at this point, we do recommend an increase

in services of consulting engineers. Many times, from the moment a preliminary subdivision plan is submitted to the final stages of completion of the project, progress should be closely checked.

#### SUMMARY

In conclusion, the Planning Board would like to take this opportunity to express its thanks and appreciation to the following:

Middlesex County National Bank, for showing its faith in the future of Maynard with its new, enlarged and modern facility in the heart of the business district.

The Board of Selectmen, for their help and guidance in the past year;

The Finance Committee and Appeals Board, for their assistance and cooperation;

The Beacon and Enterprise newspapers, for their kind offer to make news space available to us for a column for the Planning Board.

Respectfully submitted,

JAMES F. COLEMAN,  
Chairman  
IAN T. ALEXANDER  
JAMES T. HANSON  
GEORGE R. MANNING  
HERBERT D. HILL, JR.,  
Secretary

# ANNUAL SCHOOL REPORT

MAYNARD  
MASSACHUSETTS

ANNUAL  
SCHOOL REPORT

This cover for the Annual Report of the School Committee for the year 1965 was designed by Ruth Keto, a student in the Art Class at Maynard High School.

The following students of the Maynard High School Art Classes also submitted very fine drawings and are to be commended for their efforts:

Deborah French  
David French  
Kristen Johnson

MAYNARD  
MASSACHUSETTS

REPORT OF  
MAYNARD SCHOOL COMMITTEE

To the Citizens of Maynard:

We herewith submit the Annual Report of the School Committee for the year ending December 31, 1965.

The Committee has met regularly, twice monthly, for the transaction of routine business and all matters pertaining to the Maynard Public Schools. In addition, special meetings have been held with parental groups, the Maynard Finance Committee, and for the study and revision of our school budget.

During the year 1965 there have been many changes and improvements in our school system. The following data concerning personnel and school building maintenance should be of interest to each of our citizens:

PROFESSIONAL PERSONNEL

BY RESIGNATION	APPOINTMENTS
Senior High School Karen L. Akins	Senior High School Adair Miller (transferred from Emerson Junior High
Patricia Murray Lois Beckwith Julie Murphy	Kenneth Najjar Alice J. Rand Alice Mullin
Emerson Junior High School Mary J. Taylor Robert Viola Adair Miller (transferred to High School) Frank Yuchnevicz	Emerson Junior High School Ruth A. Burke Barbara Gormley Peter Garipay Robert Trustcott
Fowler School Peter A. Delmonico, Jr. Mary Carpenter Carol Ritterbush	Fowler School Joseph F. Gramolini Janet Greene Susan Furness
Roosevelt School Jeanne Gunion	Roosevelt School Kathleen D. O'Brien
Coolidge School Annette Johnson Deborah G. Singer Jeannette Cooper	Coolidge School Joan Kalafatas Irma Florio

Green Meadow School Nancy Roundy Thomas B. Concannon Jane M. Quilty Judith Wing	Green Meadow School John F. X. Maloney Mary Pacione Gloria Levin Karen Oswalt Venita Young
Art - Grades 1-6 Albina Donoghue	Art - Grades 1-6 Mable McMahan
Art - Grades 7-12 Cynthia Chapin	Art - Grades 7-12 Giovanna O'Brien
Physical Education - Grades 1-6 - Boys James Duggan (transferred to Junior High)	Physical Education - Grades 1-6 - Boys Leonard Curcio

#### ADDITIONAL PERSONNEL

##### High School

Industrial Arts Business	John Kendra Mary Hayes
-----------------------------	---------------------------

##### Emerson Junior High School

Girls' Physical Education Boys' Physical Education	Doris Schofield James Duggan (Transferred from Grades 1-6)
---	---

##### Fowler School

Grade One	Evelyn Carpenter
-----------	------------------

##### Coolidge School

Grade Three	Loretta J. Rossetti
-------------	---------------------

Instrumental Music	Bernard Kosc
--------------------	--------------

#### REPAIRS AND REPLACEMENTS

The following list indicates some of the major projects carried out in order to maintain the buildings and educational equipment:

##### EMERSON JUNIOR HIGH SCHOOL

Auditorium -	Installed new stage outlets Painted ceiling, walls and wood trim
Gymnasium -	Painted shower rooms, girl coaches' office men's and women's toilets.
School -	Painted ceiling, walls & wood trim in Room 11 - walls & wood trim in Room 15

Replaced ten window shades and four soap dispensers

#### ROOSEVELT SCHOOL

Replaced lights in lower corridor and Rooms 2, 8, 9, 10 with fluorescent lights  
 Painted exterior, Rooms 1, 4, 6, Cloak Room Doors in Room 2 and Teachers' Toilet  
 New toilet fixtures installed - Girls'  
 Doors installed on toilets - Girls'  
 Replaced window shades in Room 2

#### COOLIDGE SCHOOL

Installed fluorescent lights in eight classrooms  
 Painted Rooms 1, 5 and 7, also touched up ceiling in upper hall  
 Installed door  
 Replaced four window shades

#### GREEN MEADOW SCHOOL

Repaired doors, toilet panels and tiles

#### FOWLER SCHOOL

Repaired doors and eight window runners  
 Replaced six window shades

#### ALUMNI FIELD

Repaired and painted Home Team Bleachers

In addition to minor repairs and replacements throughout the school system, the usual repair services for business machines, clocks, heater controls, oil burner service, audio-visual equipment, etc., were also maintained.

The Maynard School Committee was proud and pleased to have Maynard High School act as host for the Northeast Music Festival with some forty cities and towns participating. This festival was applauded, near and far, and we wish to express our gratitude for the expert guidance furnished by our music director, Mr. Charles Garabedian, and the members of the Maynard Band Parents Steering Committee. The H. H. Scott Company was very generous and cooperative in setting up and providing acoustical equipment for this festival.

The increasing costs of education, at all levels, should be a prime concern to all thinking persons. College tuitions alone are more and more costly. Therefore it was gratifying to receive a substantial scholarship grant from Victory Market with an indication this will be an annual scholarship. We are hopeful other business concerns in Maynard will follow the lead and grant scholarships for worthy graduates in June 1966.

During 1965 the last available elementary classroom was occupied. Within a few years we expect additional elementary

classrooms will be required, due to expanding school population as well as requirements set forth by the implementation of the Willis Report which was passed by the Massachusetts Legislature. Your school committee has engaged the services of the Center for Field Studies of the Harvard Graduate School of Education to conduct a detailed facility survey of the Maynard Public School System. This survey will be conducted during the spring of 1966.

In conclusion, we wish to thank our Superintendent of Schools, Principals, School Personnel and the Parents who were responsible for a very successful and rewarding school year. We also wish to extend our appreciation to all Town Boards, Committees and Organizations who have assisted us with our school program.

Respectfully submitted,

WILLIAM H. LARSON,  
Chairman  
EDMUND W. BEEBE,  
Secretary  
THOMAS F. FITZPATRICK  
ALBERT P. ROGERS  
FRANK J. WHITE, JR.

REPORT OF  
SUPERINTENDENT OF SCHOOLS

To the School Committee and Citizens of Maynard:

I herewith submit the Annual Report of the Maynard Public Schools for the year 1965.

American public education is complex in organization and control. Legal responsibility for the conduct of education has traditionally been vested in the states. The federal government, national groups and political forces also influence the schools, but decisions on questions of educational policy are, in the main, made locally. The aim of this arrangement is to make sure that the local schools will answer to local needs, and that parents will have a voice in the education of their children. The quality of an educational system is largely determined in each locality. High quality in a school depends directly on the character of the community at large and on the abilities and attitudes of the parents, the school committee, the administrators and the school staff. The attitudes as well as the decisions of local school officials reflect the views of local citizens. Thus, the motivating factor to quality in a school is a vigorous public commitment to education based on understanding of what education can do and what good schools are like.

It has long been an article of faith in America that public education, if universal and excellent, would help immeasurably to eradicate social ills, elevate the tone of human life, and strengthen democracy. The validity of this belief is about to be tested. During the past year the long awaited financial assist from the federal government became a fact. The Elementary and Secondary Education Act (Public Law 89-10) went into effect and will help to relieve the tremendous financial burden presently carried by local property taxation for the support of schools.

The application of the Willis Report to the schools of the Commonwealth of Massachusetts will soon be a reality. This implementation will introduce quality and equality throughout our educational system. As soon as the State passes the necessary revenue bills to assist our communities, we can expect to be part of a long-term escalation of educational improvement and opportunity for our children in the public schools.

EDUCATIONAL TRENDS

In line with the desire to improve and maintain the quality of education in the Maynard Schools, the School committee has affiliated itself this year with one hundred seventy-five other school systems of New England in an organization dedicated to improving the quality of education through cooperative action and known as the New England School

Development Council. This group was founded in 1945 at Harvard College and has in its membership most of the outstanding school systems of the State as well as the rest of New England. Its major goals are to stimulate more effective school practices, conduct cooperative studies of the emerging patterns of education and to study problems of education through experimentation and research. The findings of this group will be shared by Maynard and will be invaluable in keeping us informed concerning the innovations and positive thinking of those in the forefront of educational research.

#### EDUCATIONAL HIGHLIGHTS

With the assistance of the Better Regional Initiation and Development of Good Education organization of the New England School Development Council, Maynard has joined with the neighboring towns of Acton, Concord, Sudbury, Union 47 and Lincoln to begin the formation of a federal project to establish a regional material and research center in this area to service all the communities listed. The cost of the center will be borne initially by the federal government under Title III of Public Law 89-10. The existence of such a center will enable each school system involved to have access to many materials and much valuable educational equipment which normally no one town could afford to purchase to supplement its teaching program.

#### ENROLLMENT TRENDS

While we are on the brink of great changes and developments in the area of quality education for the pupils of Maynard, we still must keep our feet on the ground and constantly appraise our immediate and local needs. Our major problem appears to be concerned with the continuous need for space. The new parochial school undoubtedly relieved us of some of the pressure of increasing enrollments. However, we still had an overall increase of fifty pupils in our schools and still needed eight first grades as we did the previous year. All elementary class rooms are now in use and we presently are having difficulty in finding areas for our remedial and special subject teachers to carry on their work with any degree of privacy. At present, we have two grade progressions existing in the elementary schools and if Maynard housing developments materialize as all indications point, we can expect that our present school accommodations will be completely inadequate for an acceptable educational program.

The Maynard Finance Committee has been made aware of this in the Capital Outlay Report of the School Committee and it is hoped that plans will be made and completed in time to anticipate our facility needs to care for both the increasing enrollments and the impact of the Willis Report.

Recognizing the seriousness of this problem, the Maynard School Committee has contracted with the Center for

Field Studies of the Harvard Graduate School of Education for a school facility survey of the Town of Maynard so that it can utilize the research of the professional study when it finds it necessary to make recommendations to the town for any additions that may be needed in the future if school enrollments continue to rise.

### REGIONAL VOCATIONAL SCHOOL

In planning for the best interests of the children of Maynard, your School Committee has entered preliminary planning meetings with neighboring communities to investigate the need for an area Vocational School. The Vocational Division of the Massachusetts Department of Education is now in the process of making a survey to determine this need and it is hoped that this survey will be completed by September, 1966. At present, at least fifteen neighboring communities are interested in this type of school and it is hoped that there will be sufficient enrollment potential to warrant the creation of such a regional facility. Its use would not necessarily be limited to high school boys, but its facilities could be used by girls and by graduates and other adults for vocational retraining and also for avocational courses. Further information on the development of a Regional Vocational School will be made available as soon as your Planning Committee has been appointed and has had an opportunity to meet with the Planning Committees of other communities.

### EDUCATIONAL PROGRAM

The excerpts and summaries from reports submitted by principals, special teachers and other instructional personnel will provide you with some of the highlights, details and understandings of the day by day routine work of our staff. The educational offering in the Maynard Schools is comprehensive and complex and the sampling you will read about in this report should convey to you the variation and extent of the work we do.

The reports of the Elementary Curriculum Coordinator, the High School and Junior High School Principals are in some detail and tend to show the vast areas of educational experiences with which we are continually involved.

### HEALTH AND ATTENDANCE

The school health program as recommended by the Massachusetts Department of Public Health has been followed throughout the year.

The annual "Pre-School Round-up" was held in May when twenty-five children were given physical examinations by our school physician, Dr. Raymond E. Hooper. This year, the majority of parents took their children to their own family physicians as recommended.

In October, pupils in the first and ninth grades were given booster shots for the prevention of diphtheria and tetanus. Only sixty of approximately two hundred first graders needed the shot. Parents apparently are taking their children to their own doctors or to the public clinic for the pre-school shots.

In April, the first and ninth graders were given the "tine test" for tuberculosis. One student had a positive reaction but his chest x-ray was negative.

Pupils in the fourth, seventh and tenth grades were given physical examinations. All students participating in competitive sports were also given physical examinations by the School Physician.

All students had their vision tested with the Massachusetts Vision equipment. Seventy-eight children failed and were referred to an eye specialist. Seventy-four were corrected with glasses.

Twenty-four students failed the audiometer test and were referred to an ear specialist.

One hundred and ten home visits were made during the school year by the School Nurse.

We had an average number of cases of german measles and chickenpox. The new regulations for quarantine of children with communicable diseases worked out well.

The Attendance Officer reports that during 1965, thirty-four cases of truancy (one habitual) and one case of a school offender were investigated. Conferences concerning these complaints were held with the parents and necessary action was taken.

#### PHYSICAL EDUCATION

The aim and objectives of the physical education program are to develop the whole child, physically, mentally, morally, socially, and emotionally in order for him to take his place in life as a contributing, positive member of society.

To help attain this total fitness and growth, a program of selected physical activities was carried on. With this in mind, activities were selected to develop motor-skills through the development of both small and large muscle groups, calisthenics, tumbling, apparatus such as side-horse, vaulting box, parallel bars, rope climbing, etc. These activities tend to develop the boy or girl where they desire to participate in competitive and team games, with the knowledge that they are physically and mentally able to compete and hold their own against equally fit competitors.

These activities were presented to them in a sports program that consisted of football, touch football, baseball, basketball, field hockey, track cross country, and golf -- each activity contributing to help attain the objectives desired.

The boys and girls were tested twice during the school year, in the fall and again in May. The results, as recorded, showed a vast improvement from the first testing to the last testing.

The addition of full time instructors at the High School Junior High and Elementary schools has enabled us to make many improvements in the physical education program.

The addition of track and cross country has not only helped physically but has given the students the mental attitude that we are trying to give everyone a chance to participate (according to ability) in activities where they can be of importance to a team and those with whom they are in competition on that team.

The total program has brought about a stronger desire by the individual for more physical development and a stronger competitive spirit which is so important and essential to everyday life.

In the future, emphasis will be placed on the addition of carry-over sports in the program such as tennis, golf, archery etc.

#### Pupil Scheduling and Events

##### Junior High Gymnasium - Six periods per day

Each pupil has two period of gym per week with the opportunity to learn the techniques involved with the following equipment and exercises:

Tumbling, Parallel bars, Vaulting box, Rope Climb, Side-Horse, Trampoline, Springboard, Weight training and Organized games.

##### Sports in Junior High School in Interscholastic Competition:

Baseball, Basketball and Football

Intramural Basketball and Volleyball is offered to all students (boys and girls). All pupils are tested twice a year -- September and May.

##### Roosevelt, Green Meadow and Coolidge Schools

Tumbling, Vaulting Box, Organized Indoor Games

Sports in their season outdoors - Touch Football, Basketball, Baseball

## GUIDANCE

## SENIOR HIGH SCHOOL

The guidance program at the high school is continuing to profit from improved physical facilities, expanded curriculum, and lengthened school day afforded, in serving the needs of Maynard secondary age youth. In our second year in the new building we are finding increased opportunity to reach our basic guidance objectives -- to provide a planned series of experiences, activities, and services which will help each Maynard youngster to make realistic decisions with respect to his future role in the community around him. Such realistic decisions are made only after sound self-appraisal on the part of each student of his interests, aptitudes and values.

Testing: In the interest of offering basis for this sound self-appraisal our program begins with an intensive testing program. Through the junior high school program our students are introduced to standardized tests of the achievement and aptitude type. Through appraisal of their comparisons to local and national groups of the same age and grade level, our eighth graders are introduced to the mysteries of high school programming. The availability of the junior high counselor at the ninth grade level offers continuity in the counseling begun in the junior high, and gives the freshman the feeling that some familiar figure is available to him at the high school. Testing continues in the high school with further extensive reading and general scholastic aptitude testing at the tenth grade with nationally known test instruments. Comparison of Maynard results with national norms continues to show that the average Maynard youngster performs above the national average. All test results are made available to students in the form of a picture of his performance with his own local group and with national groups. In addition, distribution studies of scores are made available to teachers and administrators for study in connection with possible curriculum revision. Formalized general aptitude testing for all students terminates at the tenth grade. In the eleventh grade extensive provision for testing for those probably going on to further post-high school education is made available on a voluntary basis with such national test programs as the Preliminary Scholastic Aptitude Test, National Merit Scholarship Test, and Scholastic Aptitude Test and Achievement Tests of the College Entrance Examination Board, available to students both in their Junior and Senior years. In the study of the significance of these results to the student in his further educational planning, group and individual counseling is available.

Additional testing opportunity is available to those seniors apt to be immediately available to the labor market through cooperation with the Employment Security Division, whose General Aptitude Test Battery with counseling on the results, is administered within the school day.

Young men, with possible military service interests, through the area recruiting staffs, find it possible to take in-school preliminary service screening tests on the basis of which some prior determination of military training schools open to graduates may be made.

Vocational Information - The lengthened school day and room availability make possible a better program of vocational experiences. Through the courtesy of the Northeastern University Career Information Service a monthly series of exploratory career talks by experts from within many fields is available. Through the same service, tapes of radio broadcasts made by radio station WEEI of its Sunday night Career Center for Teenagers on dozens of fields are available for listening. Sound tapes with film-strips on other areas are also circulated to Maynard High School for student use. Each year military service information is brought in assembly to all seniors. Opportunity for further voluntary counseling with individual branches is given to those who wish it.

The cooperation of Emerson Hospital in making available to our students an excellent program of seminars after school on jobs in all areas of hospital work is especially commendable. Some eight or so seminars each year are sponsored, and the response on the part of our students to the invitation to participate is growing rapidly. Seminars planned for this school year include exploration of careers in the following fields: medical records, business, social service, dietary work, purchasing, maintenance, x-ray, physical therapy, medicine, and mental health.

At the conclusion of the seminar programs in the late spring, a career day is held where each interested student is afforded the opportunity to perform for several hours the work of the specialist in whose area he displays interest. Transportation to and from the after-school programs is arranged by the coordinator for Maynard, Mrs. Myron Bates of Woodridge Road. For several years Mrs. Nicholas Barilone of Parker Street lent assistance in making this fine series annually available.

Educational Information - An extensive library of information resources of all types is displayed in the attractive reading room of the guidance office, and further materials are available in the school library. The cooperation of the staff in providing educational counseling as resource people is appreciated.

Extensive opportunity to hear many school admissions representatives is provided. Maynard High School is fortunate to be so placed as to be readily accessible to many school and college personnel who have found on their visits that Maynard youth are anxious to become better informed on educational requirements for post-high school training. We are constantly striving to promote the feeling that the

reading room is available during study periods and after school as a place where students may find the answers to questions.

Counseling for the best possible high school program to meet the needs of each student in the light of his later needs is based on considerations by both counselors and students of the previous grades, aptitude scores, achievement test scores, and known interests. We continue to get satisfaction from the degree of flexibility available in programming to meet individual needs more and more evident as Maynard High School grows larger.

Job Placement - Employment opportunities on a part-time basis for students is somewhat less than was the case when the shorter day was in vogue. We are pleased with the confidence manifested in our students by local employers large and small who call on us.

Full-time placement after graduation remains high for those desiring to immediately enter the labor market. Reports of employees, and their greater reliance on the placement recommendations of the guidance office bespeak the fine reputations Maynard graduates have established.

Follow-Up Study - No guidance program would be complete without some form of study given to the paths followed by Maynard High School graduates. From such research, information on curriculum needs, information for more effective school placement, and some evaluation of school awareness of the needs of the community it serves, is obtainable.

Of the class graduated in June 1965, numbering one hundred twenty-five students, preliminary information shows distribution as follows:

Attending degree-granting schools . . . . .	32
Attending other schools . . . . .	20
Military service . . . . .	17
At work . . . . .	52
Married . . . . .	2
Post-graduate work . . . . .	2
Unemployed (reason unknown) . . . . .	2

Additional study of the activities of this class will be made after it has been out of school one year.

## JUNIOR HIGH SCHOOL

The aims procedures, and evaluation of the Guidance program at the Emerson Junior High School have been based upon the requirements established by the Director of Elementary and Secondary Education in Massachusetts, Office of Guidance and Pupil Personnel; and by the American Personnel and Guidance Association.

The aims of the Guidance program are met by providing the basic Guidance cycle which includes Orientation, Counseling, Testing, Conferences, and Follow-up. The different phases of the program are divided here for explanation; they are not differentiated in practice.

Students go through different phases of the program at different rates of speed, and the same phase for some students may be repeated many times during the year. Each function of the program accepts the student at his level of physiological, psychological, intellectual, and spiritual growth.

During visits to individual sixth grade classrooms last Spring, the counselor explained the program at the Junior High School. The students were also informed that the counselor would meet individually with each student in the Fall for an Orientation Interview.

The Orientation Interview is intended to introduce the student to the location and resources of the Guidance office and to the counselor. The aims of the counselor during this interview are: 1) to establish adequate rapport; 2) to evaluate the extent of success the student is having and his feelings about his program; 3) to determine what information is needed by the student; and 4) to end the interview with a good relationship between the counselor and student.

The introduction of vocational information, as is true with all information the counselor presents to the student, differs in degree depending on the individual. No attempt is made to bring students through a set pattern of behavior in the Guidance Program, but rather an attempt is made to accept the student on his present level of development.

During the Fall orientation, which is the collecting and giving of information, students are continually reminded of the services available in the Guidance program via guidance assemblies, group discussion programs, bulletin board notices, homeroom guidance notices, student handbook, home-room teachers, and by the Student Council.

Counseling is the most important phase of the Guidance program, but it must be self-initiated. Counseling is a continuing function of the program, initiated by the individual who desires help in solving his personal, vocational, and educational problems. He may be referred by his parent or teacher, but it is his decision to enter into a counseling relationship.

Group counseling is conducted as an extension of individual counseling. This experience helps participating students to develop social skills and abilities to communicate their ideas and feelings to others, and to relate themselves to their environment.

The testing program is limited in the Fall to individual intelligence scales upon referrals from teachers or the administration. The major part of the program is accomplished in the Spring with the administration of Differential Aptitude Test, the Otis Quick-Scoring Mental Ability Test, and the Stanford Achievement Tests. The results of these tests are utilized for program choices by the eighth grade students, for the evaluation of the seventh and eighth grade students, and for counselor-parent-student conferences.

The Parent-Teacher conferences are held in the Fall and the Spring of each year. The Guidance office is open for appointments with the counselor every Monday evening from 7:00 to 9:00 p.m. Parents may also make appointments to visit the counselor every afternoon from 2:30 to 3:30 p.m.

Routine follow-up procedures are used in making the Guidance program more efficient, and to evaluate the program. Follow-ups on conferences with parents are made by telephone, or by any other method determined at the time of the conference which is mutually convenient with both parties.

#### ELEMENTARY EDUCATION

The trend in elementary education today is toward the "discovery" approach to learning. Practices in methodology indicate that children in the elementary grades should be taught how to think rather than what to think. The children should be taught now to reason out conclusions for themselves rather than accept the conclusions given to them by the teacher. Many methods are employed in reaching this goal, but probably the most significant one is the problem-solving method. In this process, the child is presented with a problem which has many possible solutions. His task is to find that solution which best resolves the problem at hand. Often, in searching for the proper solution to his problem, the pupil finds it necessary to read extensively in order to secure more information which has a bearing on the problem. This helps to further develop and extend the reading skills which he already possesses. The recording of the data which he gathers will help to improve his writing, spelling, and grammatical skills. Frequently, computational skills must be put to use in his problem-solving activities. This strengthens his mathematical skills and understandings. In effect, what is happening is that an attempt is being made to prod the pupil into putting into play as many as possible of the skills that he has thus far acquired so that he may further refine them by actually using them in a functional manner. In the "discovery" approach, different pupils will arrive at the solution of a given problem in different manners. In fact, these different procedures may well yield different solutions to a given problem, many of which are perfectly acceptable.

The children are encouraged to experiment and to try different approaches in reaching conclusions. They are made to realize that experiencing failure is not as important as the

ability to recognize and admit failure when it occurs and to take steps to correct it.

In discussing the "solution of problems" we no longer restrict our thinking to arithmetic problems as such, but apply these techniques to the study of science, social studies, language, art, etc.

A continual attempt is made to allow the children to apply their learning skills to real life situations and not restrict them to text book situations. This is accomplished by providing them with first-hand experiences. This year, our pupils have gained these first-hand experiences by participating in well planned field trip activities. Some of these field trips have included visits to such places as: Drumlin Farm, the Science Museum, Sturbridge Village, General Motors, the Peabody Museum, the United Cooperative, the Maynard Public Library, and the Maynard woodlands.

Whenever possible, resource persons are brought into the classroom to discuss with the pupils personal experiences which they have had as a result of travel abroad or interesting occupations. This year, people have come in to relate to the pupils personal experiences which they have had in such places as Peru, Japan, Europe and Alaska. Some of these people traveled to such far-away places as members of the Peace Corps, while others either resided there for a period of time or visited these places while on a vacation trip.

In planning the educational program for our elementary pupils, we place a strong emphasis on the individuality of our children and on the fact that some of them have greater needs than others. To better meet these needs, we employ a number of specialists, who, in their training as teachers, have concentrated on a specific area and have become expert in that particular area. These teachers are used to provide specialized instruction in the fields of art, vocal music, instrumental music, remedial reading, physical education, and hearing and speech therapy.

With the use of educational television, we are able to expose the pupils to broad areas of learning which would otherwise not be available in the regular classroom. Teachers especially trained in the techniques of televised teaching are able to present lessons, making use of equipment and locale, the cost and availability of which would be prohibitive for Maynard to provide.

Parents are always encouraged to visit their schools in order that they may see the learning process in action. They are especially encouraged to do so during American Education Week, when special activities are planned to give them a greater insight into the total school program. This year, as in past years, many people visited the schools during this period and took advantage of the opportunity to discuss various aspects of the school program with

teachers and principals.

We are pleased that the parents also continue to make use of the time set aside for Parent-Teacher Conferences, at which time they may come to school and discuss with the teacher, their own child's progress or lack of progress, as the case may be. By means of these conferences, it is possible for parents and teachers to share any significant information which may be helpful in better providing for the peculiar needs of a particular child.

The children are given an opportunity for social expression by participation in a wide variety of social functions and community activities. They are taught the amenities of social grace by means of the pleasurable experiences of seasonal class and school parties during the Christmas, Halloween and Valentine periods. By performing individually and in groups in concerts and playlets, they acquire confidence in appearing before large groups of people.

This year, elementary pupils again took part in the Junior Red Cross drive and in the Band Parents' annual candy sale. By sharing in community projects of this type, pupils become an integral part of the total effort in helping to make their town and its activities more meaningful in their everyday lives.

Fire drills are held periodically in all of the schools so that, should the need arise, the buildings could be vacated speedily and with a minimum of confusion.

The Science Fair, which has become an annual expectation at the Coolidge School, was conducted again this year with pupils from all grade levels participating.

Each of the elementary schools gratefully accepted a check of \$25 from the P.T.A. This annual gift was put to good use in providing additional books for the classroom libraries and in subscribing to various educational magazines.

The supervisory, administrative and teaching staff of the Maynard elementary schools are always trying to improve their joint efforts in maintaining and further up-grading the quality of the educational services provided for the pupils under their charge. Only by constant vigilance in this regard can we hope to continue to prepare our children with adequate backgrounds for the learning experiences they will encounter later.

## REMEDIAL READING

### Elementary

The goal of reading instruction provided at all educational levels is to help each child move steadily towards greater competency in reading. This goal is attained by many child-

ren through the instructional program offered in the regular classroom. A small number of children, however, with average ability for learning, will find it difficult or impossible to learn to read without specialized or individual help. It is for the purpose of helping these children that the Remedial Reading Program in the Maynard Elementary Schools is conducted.

The regular classroom teacher is the person most qualified to know each child's reading needs in the light of his ability. In June the teachers referred any child who in their opinions could profit from specialized help in reading instruction. At the opening of the present school year, the cumulative records of those children for whom a referral had been made were carefully reviewed. If there was evidence of help being needed and the child showed the potential for greater achievement, that child was considered for remedial instruction.

To determine each child's correct instructional level, the scores on the Stanford Achievement Tests which were administered last May were used as indicators of his reading achievement. An individual informal inventory was made to ascertain his needs in silent and oral reading, in word recognition and comprehension skills. Each child was then placed in a group for additional training, reteaching and reinforcement of reading skills according to his needs. Materials of the proper level of difficulty and interest were used and systematic instruction in word analysis, comprehension and study skills were provided to enable the children in the Remedial Reading Classes to improve in reading commensurate with their abilities. Each group in all four elementary buildings had two instructional periods weekly varying in length from thirty to forty minutes.

An evaluation of the Remedial Reading Program was made at the end of the school year in June by comparing previous results from standardized tests with the results obtained this year. It was gratifying to note that a good percentage had made considerable growth in reading development in reading skills. This situation sometimes exists because of factors which are beyond the control of the school's instructional program. It is hoped that those children whose advancement was good have been prevented from developing serious reading problems and that they will achieve successfully in the regular classroom.

Reading for pleasure is an aspect of remedial reading that is most effective in giving problem readers the idea that reading is something to be enjoyed. This phase of the program, because of limited time and facilities, is one that needs the cooperation and support of the parents. If parents would foster and encourage recreational reading in the home, all children -- not only those in the remedial classes -- would show growth in reading development.

## Secondary

The need to learn more, in increasingly numerous and varied fields, has brought with it the demand that both children and adults learn to read better today than in the past. A half century ago, when the average family had relatively little leisure time or matter available, ability to read in a limited variety of ways and at a slow pace was fairly adequate, but such limited skill today would be inadequate to meet the demands of many jobs, as well as to keep pace with the stream of new developments and ideas which pour daily from the press.

Therefore, the purpose of reading classes in grades seven, eight and nine is to 1) develop, maintain and increase those basic reading abilities and study skills most needed by junior and senior high students in working with reading materials in the various subject areas and 2) encourage reading as a pleasurable activity.

Students in grades seven and eight showing average or above average intelligence and exhibiting difficulty with any phase of reading are singled out for this instruction. Performance on a standardized reading test, teachers' judgement and a careful review of cumulative records are the criteria for selection. In selecting candidates in grade nine, an additional consideration is each student's long range academic goals. Priority is given to those who can derive the greatest and most immediate advantage.

The basic areas of instruction given specific attention are as follows:

- I. Becoming independent in word attack skills through the use of:
  - A. Context clues
  - B. Phonetic analysis
  - C. Structural analysis
  - D. Syllabication and accent
  - E. The dictionary
  
- II. Comprehending sentences, paragraphs, chapters, and stories by:
  - A. Getting the main idea
  - B. Locating supporting details
  - C. Distinguishing relevant from irrelevant information
  - D. Finding sequence and organization
  - E. Determining tone and mood
  - F. Applying different kinds of reading materials
  
- III. Building a more extensive vocabulary by:
  - A. Working with common word parts

- B. Using new and different words correctly in writing and speech
- C. Becoming interested in word origins and multiple meanings.

To provide an extensive sampling of a wide variety of worthwhile literature, reading classes at the junior high were exposed to the Literature Sampler, (Secondary Edition). This is a kit containing one hundred forty-four book previews in the author's own words on a variety of topics most interesting to students at this level. A sampling of these books in paperback form accompanies the kit and so provides an informal library in the reading room to encourage formation of the reading habit. Other teaching materials used include S.R.A. Reading Laboratories, Tactics in Reading Kit, the Controlled Reader, and various skill building textbooks and workbooks. Much of the instruction is done using the students' content area textbooks so as to make the reading experience as meaningful as possible. This year reading materials have been loaned to English teachers for a period of time to use in working with groups of students who would benefit from them but are not attending special reading classes. In this way, an increasing number of students are being exposed to reading instruction at these upper levels.

#### SPECIAL EDUCATION

The Special Class provides an educational atmosphere whereby a child is able to develop under a systematic program that meets his educational, emotional, and social needs. This program enables the students to receive small group instruction as well as individual assistance in the core skill subjects. To foster a child's confidence and independence, the Special Class promotes a "give and take" situation among the students. Once the student becomes a part of the total program and is actively involved, behavior problems decrease and the active learning process becomes dominant.

Outside activities have been taken advantage of by the students. At the junior high school level two boys are taking Industrial Arts, and three girls are taking Home Economics. The instructors report that the students are able to follow directions and have completed all the required assignments. It should also be noted that two of the boys are participating in the beginners drum lessons.

Whenever a student shows signs of achieving in the core subjects he is placed in the regular school program. This placement as well as the amount of time the student will spend in a regular classroom situation is determined by his performance. This flexible type of programming has enabled two of the students to be placed into regular classes on a full time basis.

## AUDIO-VISUAL PROGRAM

Elementary

The purposes of an audio-visual program are to enable the classroom teacher to present her lessons more vividly and interestingly and to provide her with the means of introducing to her class certain concepts which might otherwise be extremely difficult to explain by the use of the printed and spoken word alone.

To this end, we have attempted to provide the teachers of Maynard with a great variety of equipment and materials which are designed to help her make her teaching more meaningful, interesting and easily understood. The equipment used by the teacher for this purpose includes; tape recorders, record players, filmstrip projectors, movie projectors, television receivers, microscopes, charts, maps, globe, health studies and the systems of the human body, early exploration routes, and Indian life in pre-colonial America.

Maynard continues to participate in The 21 Inch Classroom, a series of regularly scheduled lessons brought to the classroom by means of television.

Many excellent and well-prepared programs are available for all grade levels in many subject areas. These programs range from fifteen to thirty minutes in duration and our teachers have detailed guide books so that they may prepare the class before the viewing actually takes place. Programs which are regularly viewed deal with the areas of science, literature, French, phonics, music, art and current events. An excellent series of "field trips" to various historical places throughout New England is also presented.

This year, the teachers of grades four and five were given complete sets of recordings which cover the French programs in their respective grades for the entire year. Next year, the sixth grade French series will be revised and sets of recordings will be provided for the teachers of those classes.

We now have a number of commercially prepared microscope slides dealing with elementary biology and physiology. These are very basic and are helpful in giving pupils a clearer understanding of the various types of tissue and other microscopic structures.

The upper-grade classes all have access to fully equipped science demonstration tables with which they can perform various experiments in order to gain a better understanding of the concepts presented in their textbooks.

We are hopeful that we will soon be able to provide all of our elementary school buildings with overhead projectors.

Commercially prepared transparencies for use with these projectors are now becoming more readily available and are being produced for use at all grade levels and in all subject areas. We also plan to conduct in-service workshops for our teachers in order to train them in the many new techniques which have been developed in the preparation of teacher-made transparencies.

We are constantly trying to incorporate new developments in the audio-visual field into the Maynard school program, while at the same time guarding against the creation of a top-heavy audio-visual program.

### Secondary

Perception is the foundation of learning. Perception depends upon the ability to see, hear, taste, and smell. Perception leading to knowledge then is dependent upon real sensory experience. Because in this complex world the learner is unable to have a wide range of firsthand experience, the problems of effective teaching are many. The responsibility for providing firsthand experience is a heavy burden to be borne by the classroom teacher. It is to this aim that the efforts of the Audio-Visual Department are directed.

The most effective teaching machine is the teacher, and it is not the intent of the department to replace the teacher, but rather to aid the teacher in providing the necessary sensory experience which our children require for effective learning. Thus, the Audio-Visual Department is to be considered an educational adjunct providing through its equipment and materials valuable tools for the classroom teacher.

The department offers both aural and visual equipment and materials. Among the aural equipment, the department is able to offer several portable phonographs, tape recorders, and a high fidelity phonograph. Aural materials include various recordings and tape recordings.

Included in the department's visual facilities are film-strip projectors, opaque and overhead projectors, motion picture projectors, and television. An extensive filmstrip file is maintained offering a variety of filmstrips in Science, Home Economics, Social Studies, Business and English. Motion pictures are provided by the department on request from the Film Cooperative of Shrewsbury, Marlboro, Maynard, Grafton, and Westboro High Schools. In Addition, films are obtained on a loan basis from various governmental agencies, industry, and social organizations. The department continues to maintain a pool of equipment operators and projectionists.

The major emphasis this year has again been placed upon the expanded use of overhead projectors and overhead projectural materials. With the acquisition of an additional

overhead projector, the department has attempted to more fully investigate and promote the use of the overhead projector and materials as an effective teaching adjunct. Various projectual materials have been procured and placed at the disposal of the faculty. Presently, materials for several transparency techniques are available, and the department is encouraged to see that these materials are being employed by the faculty.

### HIGH SCHOOL LIBRARY

The primary objective of the high school library is to implement, enrich, and support the educational program of the school. Materials for the school library are selected by professional personnel in consultation with faculty and students. Great effort is made to provide materials that will stimulate growth in factual knowledge, literary appreciation, aesthetic values, and ethical standards. Every boy and girl within the school is reached by the library program according to his individual needs.

At present, there are approximately 2,300 titles available for student and teacher use. Steady progress is being made in building the collection. However, within the next three years every effort must be made to satisfy the standards set for a school the size of Maynard High School - the American Library Association recommended a minimum size of the collection as 6,000 titles. Much of the book expenditure during the past year was for basic reference books. Two newspaper subscriptions and fifteen magazine subscriptions have been received this year. A file which contains pamphlets, and other curricula materials and a community resource file have been established.

During the past year three conference-workshops were held at the high school concerning library and curriculum; library and state or federal aid; library organization and administration. Mr. Adams of The Library Services of the State Department of Education visited the library and gave several suggestions to aid in the founding and establishment of the library; his concern was with both materials and programs.

The library instruction program was given to grade eight as well as high school students. It is a sequential and developmental program which begins with the teaching of basic library skills and culminates with the teaching of a formal research paper.

A Library Club was formed. Along with assisting in the library, the club members have been responsible for the displays in the south corridor of the high school.

The high school library in its founding year has been the recipient of approximately \$1,400 in gifts from both

individuals and groups in the community

The high school librarian, the town librarian and the Board of Trustees of the town library have had meetings to determine the role and purpose of each library so that gaps and unnecessary overlapping in the total library program would be avoided.

Mrs. Carbone, the Town Librarian, and her assistants, Mrs. Lyons and Miss Duggan, have given consistent aid and support to the high school people and their library.

## FINE AND APPLIED ARTS

### Elementary

Art must be recognized as an intrinsic part of our everyday life. It enters into all our daily discussions, choices and performances. A child finds a relationship with that aspect of daily life as his aesthetic sensitivity develops through his school art activities.

All children have creative ability and possess some measure of originality which stems from his own fresh perception of life and experiences. Every child has potential power of aesthetic enjoyment. Therefore art education is and should be for everyone, not just the choice talented few.

The objectives and intentions of the elementary art curriculum are to provide each child with an opportunity to visually express his original thoughts and ideas and to deepen learning through the expression of ideas and experimentation with different media.

Art is creative and not imitative. It is a developmental activity whose worth lies not in the final product alone but in the quality of the experience which the child undergoes in the process.

### Secondary

In keeping with the philosophy and objectives of the high school as stated in the 1965-66 Program of Studies, we have developed a curriculum which will encompass these ideals.

Working within the limitations of heterogeneous classes, work was begun on a unit of three dimensional design. This has been presented in the form of three major problems:

- 1) Drawing: This was a problem in rendering a three dimensional object - a crumpled piece of paper. The students were required to capture a three dimensional feeling on a flat surface.

- 2) Sculpture: Starting with a solid mass, this problem involved the carving of design and form best suited to the basic mass involved.
- 3) Paper Mache: This problem dealt with the forming of a three dimensional object from paper, the building up of areas. Here we also employed color and design in finishing the object.

Upperclassmen and advanced students have been working individually with the use of color and design in painting. We have employed the use of the following: oils, water color, and crayon and turpentine. This has provided the students with a knowledge of a variety of techniques and materials, plus an opportunity for self-expression.

It is our philosophy that in addition to the visual arts, our program should include some formal studies in the history of art. A paper has been assigned to each student covering a particular aspect of the history of art.

This paper will provide the student with a concept of the great work that has been done in the past.

Some of our students have submitted entries to the Globe Scholastic Art Contest which is held annually in Boston. This provides the student with the opportunity to compete with other schools in the New England area.

## MUSIC

### Elementary

The primary function of the elementary school music program is to initiate the elementary school child to the joys of music. The child is introduced to aural beauty; he is motivated to respond freely to it. What was once foreign and meaningless sound is now a vital and meaningful part of his being. Thus the child has become one with this tangible substance. Naturally, the achievement of this end is contingent upon the acquisition of basic music skills.

The music program may be regarded as incorporating five general areas of development: singing, responding rhythmically, listening, playing, and creating.

In the primary grades specific activities in these areas include the following: the learning of rote songs, the matching of tones, the playing of singing games, the utilization of song books, the making of free rhythmic responses to music, the distinguishing of simple elements of music, the use of rhythm instruments, and the giving of opportunities for original responses to music.

In the intermediate grades, the following activities are added: the singing of rounds and descants, the singing of two and three-part songs, the use of melody and chordal instruments, and the composition of original melodies.

The first semi-annual concert presented by the elementary school children of Maynard was successfully given on December 14, 1965. Students of the Fowler School performed on the occasion of its dedication ceremony. Christmas assembly programs were held at the Green Meadow and Fowler Schools.

Expansion and development of the present music program is foreseen. A music curriculum guide for the Maynard School System is now in the process of formulation. A new music textbook series will be adopted for the elementary curriculum in 1966. Emphasis will be placed upon the learning of music theory, especially the development of actual music reading. Greater opportunities will be provided for public performance. In short, music will be taught in greater depth in all areas.

### Secondary

One of the primary functions of the Maynard School Music Department is to develop musical standards with each student. This is achieved through contact with an extensive repertoire, representing the best of the world's music, balanced by attention to theory, skill development, and listening. Quality rather than quantity receives the emphasis.

Emphasis is also being given to the development of the ensembles. This valuable training enhances the musical growth of the participating students. Some of the newly created ensembles are the High School Acapella Choir, the Junior High Brass Choir and Dance Band, and several High School wind ensembles.

A new course in Music Appreciation and Theory is offered to the students in the High School. Supplementary reading materials in music is made available in the school library.

The highly successful Maynard Music Festival and the Maynard High School Band's participation in the New York World's Fair were two outstanding events for the Town of Maynard and the Maynard School Department. These highlights brought pride and honor to the area and will be recorded historically in the town's records.

With the emphasis on musical growth and development, students are trained to be musically sensitive individuals whose interest, participation and love of music will be lifelong.

## INDUSTRIAL ARTS

The Industrial Arts program in the Maynard Schools continued to expand its offerings to the young people of Maynard during the past year. The addition of one more instructor in September made it possible to have one instructor at the Junior High School and two at the High School thereby eliminating the part-time scheduling of former years.

The Junior High pupils are now able to meet three periods a week for a program which will include the following: hand woodwork, and bench metalwork for the seventh grade, and more advanced woodwork, drawing, plastic, and metalwork for the eighth graders. It is the intent of the instructor to maintain a varied, flexible, and exploratory program adjusted to the needs, interests, and aptitudes of the pupils, however, keeping abreast of the many changes in industrial processes, materials, and tools as they occur in industry.

The Senior High School program provides a much broader scope of opportunities for the pupil to further advance his knowledge, skills, and interests. Industrial Arts as a major subject is available to all boys and includes work in the drafting room, metals laboratory, and wood laboratory. These rooms contain equipment for planning, woodwork, upholstery, welding, foundry, sheet metal, and machine work. Units on automotive work were begun this year. A test engine, which is complete with all external and internal parts was given to the shops by Mr. Otis Hunter. This piece of equipment will become a most valued asset to this part of the program.

Industrial Arts as a minor subject is offered to both girls and boys (the former for the first time this year) whose academic programs do not provide sufficient time for participation in the full time Industrial Arts program. These pupils are thus able to obtain some of the benefits of our fine Industrial Arts facilities.

There are two groups of girls actively engaged in the making of coffee tables, jewelry boxes, and turned bowls in the woodworking room. The girls will derive many benefits from their Industrial Arts experiences. Skills and knowledge learned may, in post high school years, become salable assets as industries continue to hire women for manipulative tasks. These girls will tend to become more discriminating consumers and purchasers of household articles since their experiences in this area will provide them with the knowledge and appreciation of fine workmanship, design, and materials. It is also planned to provide the Junior High school girls with an exploratory course of a similar content.

Pattern making will be introduced in the Industrial Arts Major course during the next half year in connection with the foundry area.

Additional time is also provided and made available to the students several days each week at both the High School and Junior High School for those who wish to work beyond the regular class time on their projects.

### HOME ECONOMICS

The work in Home Economics is planned so that pupils are trained for better family life -- to study and to know how to select goods and services used by families, to consider the changing needs of individuals, and how to satisfy these needs in the best way possible.

One of the prime objectives of the Home Economics program is to develop satisfactory relations with other people; therefore, personal development and family relations are studied. This is done by giving pupils responsibilities suited to their maturity in order to gain better understanding of the values of good family life and also to develop confidence in themselves and to give them a sense of worth.

Child care and development are studied because teen-age girls often help with the care of young children in their homes or outside their homes as babysitters. Classes are planned so that the girls learn to understand how young children grow, to recognize their emotional and social needs, and to know how to guide them in constructive activities. All these should help the girls evaluate and improve their own personality through learning and understanding growth and behavior patterns.

Work in the clothing area is organized to help girls know how to plan attractive and serviceable wardrobes to meet their own particular requirements. Girls are taught what constitutes correct attire for various occasions; how to select, construct, and care for clothing; and to begin to understand the psychological and social significance of being well-dressed and well-groomed. Many new textiles are being used today for clothing and articles for the home so girls are taught how to handle and care for them.

In foods, girls are taught to assume some responsibility in planning menus, to purchase food wisely, to prepare and serve meals which are nutritious, easy to prepare, and meet various budgets.

Another important part of Home Economics is the management of resources, time, energy, and money. Classes are planned to emphasize how to carefully plan use of time, energy, ability, knowledge, and money to get the most satisfaction in personal and family living.

The Home Economics Room in the High School now has most of the equipment and furnishings and the girls will have more actual experience instead of watching and helping in demonstrations. Various projects and activities are arranged and carried out so that they can be done in home-like situations.

#### ADULT EVENING EDUCATION

The Adult Evening Education Program in Maynard was established a few years ago on a very limited basis and accomodated, at best, a mere handful of people. In the relatively short period of its existence, we have delighted in seeing this program grow as more and more of the townspeople availed themselves of the opportunity to engage in meaningful activities.

Basically, the objectives of the Adult Evening Education Program are to provide opportunities for the adult citizens of Maynard to pursue their cultural interest, to develop homemaking and craft skills, to take refresher courses in order to become more proficient in their occupations, and to make fuller and more rewarding use of their leisure time by participating in meaningful and interesting activities.

The scope of the program now encompasses many areas of learning and more than thirty different courses are being offered every year, accomodating hundreds of interested citizens. As people express the areas which interest them, the program is altered accordingly and new courses are offered to them.

The decision, made last year, to expand to a two-term program, appears to have met with some degree of success, in that it is now possible to make fuller use of the existing facilities. The winter term continues to show a slump in enrollments. However, this seems to follow a predictable pattern. A comparison made with the programs in surrounding communities shows that interest is lacking during this term which, unfortunately comes at a time of year when people are confronted with bad weather and are busily engaged with holiday preparations.

The courses which took place last winter were: Tailoring II, Sewing II, Knitting II, Shorthand II, Typing II, and Basic English.

The fall term, which began in October, consisted of: Typing I, Business Machines, Basic English, Income Tax Preparation, Sewing I, Advanced Sewing, Knitting I, Rug Braiding I and Oil Painting. A fifteen week course in Driver Education is also offered during the evening program, however this course, an extension of the high school program, is limited to high school juniors and seniors.

As was done last year, descriptive brochures were mailed to the townspeople this fall. These brochures contained general information about the entire Adult Evening Education Program, described the content of the courses offered, included a calendar of class meetings for the whole year, and had a mail registration blank attached, making it possible for people to register for courses by mail. Many people took advantage of this convenience. We continue, of course, to conduct personal registration, allowing people the opportunity to come in and discuss with us any questions they might have concerning the various courses.

Classes are regularly scheduled for Monday and Wednesday evenings and are conducted in the Maynard High School building. On occasion, an unusually large enrollment forces us to also schedule classes on Tuesday evenings.

As we have done in the past, we will continue to offer any course which the public desires, providing that there is enough interest to provide sufficient people to form a class.

#### CONCLUSION

Although American Schools have constantly been exposed to appraisal and program modification, the urgency of the present, together with new means of communication, has made the quality of education an agitating topic of national concern. Ceaseless pressures on schools necessitate constant study, evaluation and revision of educational programs. Because they most directly affect the quality of education, teachers occupy a key position in any program for educational improvement. We must encourage them to accept this responsibility and we must work with them to reach their objectives.

The legislation enacted during the year, both federal and state, such as the Elementary and Secondary Act of 1965, the Willis Report and Chapter 763, the Collective Bargaining Act for teachers, will have a profound effect on the course of education in the future.

If we are to make continuous progress toward quality teaching in our schools, we must understand the potential impact of these laws as they are defined and incorporated into our present learning environment.

We must not lose sight of our educational goals for our children. We, in Maynard, are just as much a part of this great effort to develop quality as any community in the United States. Today, the architects of our future must be sought among the young people in the schools of America. It is of vital interest to us and to the nation that their vision be stimulated, and that paths be opened to them for its realization. You and I and the citizenry of Maynard must help to motivate our students to explore their individual aptitudes and interests for the good of all.

As we review the past year, it stands out as one of growth and accomplishment. Our children have excelled in many areas of intellectual and physical development. Our success, in a great measure is due to the untiring efforts of our school personnel, School Committee, our Maynard citizens and the wonderful cooperation and enthusiasm of our pupils.

May I take this opportunity to express my sincere appreciation to the School Committee, School Personnel, Town Officials, parents and citizens of Maynard who have sacrificed and contributed in so many ways toward the priceless objectives we all understand so well.

Respectfully submitted,

ALBERT LERER

Superintendent of Schools

January 7, 1965

REPORT OF THE  
ELEMENTARY CURRICULUM COORDINATOR

Mr. Albert Lerer  
Superintendent of Schools  
Maynard, Massachusetts

I herewith submit my fifth annual report as Elementary Curriculum Coordinator of the Maynard Public Schools.

The elementary schools of Maynard are once again operating at peak capacity in terms of available space and facilities. The opening of the Fowler Elementary School last fall and of St. Bridget's Parochial School this fall, have not been able to stem the tide of continuously increasing enrollments. Every available elementary classroom is presently being utilized and some classes are being conducted in spaces which were originally designed to accomodate somewhat smaller groups.

One of the results of this strain on our facilities has been the loss of space previously devoted to use for specialized purposes. A spare room here and there is invaluable as a resource room in today's complex school program. There are many functions of modern education which must, by their very nature, be conducted somewhere other than in the traditional classroom as we have known it. Some of these functions are: remedial reading, speech and hearing therapy, individual testing and counselling, specialized small group instruction, instrumental instruction, health services and physical examinations. These areas are also valuable for use as teachers' rooms, for the storage and preparation of instructional materials, the centralization of resource materials and school libraries, and for conducting teachers' meetings and workshops which are becoming more and more frequent and necessary every year.

If we are to continue to provide quality education for the pupils of Maynard and meet the specialized needs of individual pupils, we will have to try to find some way to fill this gap which has resulted from our growing population.

In recent years, many inovations have been made in the field of elementary education. We have been examining these new programs carefully and evaluating them in terms of their suitability for the Maynard schools. Some of them have been rejected as being completely unsuitable for Maynard, while others have been incorporated into our curriculum. Others are still in the process of being evaluated. The underlying philosophy with which we have tempered our decisions has been that of proceeding cautiously and studying, whenever possible, the successes or failures which have been produced by such programs in school systems which have experimented with them.

Maynard itself is now in its third year of experimentation with a relatively new approach to the teaching of reading in the primary grades. It is expected that in the spring we will make important decisions regarding this program. At that time we should have sufficient evidence available to determine whether we should continue the program, expand it or drop it entirely. While we have experienced only success with it and no failure, the successes have not been as outstanding as we might have hoped them to be.

Last May, all of the elementary teachers completed an in-service training course dealing with the new approaches in the teaching of mathematics. Some of these new techniques have been incorporated into the arithmetic program at all elementary grade levels. All first and second grade pupils in Maynard are now using new arithmetic text materials. It had been hoped that we might extend the use of newer text books up into the middle grades this fall, but it was decided to put this off for another year. This seems to be a year when many of the publishers of mathematics books are taking a hard look at their programs and are planning considerable revision. We expect to be able to make a selection within the next few months which will enable us to gradually extend the new approaches to mathematics instruction up into the grades.

Extensive changes were made this year which should greatly enhance Maynard's already outstanding reading program at the primary level. With the addition of an entirely new basal reading series, we are now presenting reading instruction by use of the co-basal approach, whereby pupils at different levels of reading achievement are using different reading materials. This approach, while it requires much more extensive preparation on the part of the teacher, eliminates the problems of motivation resulting from children in one reading group already having been exposed to a reading situation which has been presented to another group. The two reading series place varying degrees of stress and emphasis on the many different reading skills which the pupils are required to master in the attainment of sound reading habits, thereby making it possible for the teacher to tailor her instruction to more adequately meet the individual needs of the different reading groups in her class.

We plan to extend this approach further next fall by adopting a third basal reading series for use in all primary level classrooms. A tri-basal reading program such as this, along with the developmental readers, literary readers, library books, and our remedial reading program, will undoubtedly provide Maynard with a reading program which will be the envy of primary teachers from far and wide.

Another major curriculum change is scheduled to take place next year in the field of elementary science. We have long classified science as a minor-subject area at the

elementary school level. In keeping with the greater emphasis being placed on science instruction at all levels, an emphasis which has already been felt and reflected in the Maynard elementary schools, consideration is now being given to the re-classification of science as a major-subject area at the fourth, fifth and sixth grade levels.

In a few weeks, a study group will be formed, consisting of upper-grade teachers, to review and evaluate the many new text books which are now available in this field. We expect this group to make a recommendation for the adoption of a text that is more in line with the program of science instruction as it has developed in Maynard over the last few years.

We have been working closely with the Division of Special Education of the Massachusetts Department of Education and with the Massachusetts Department of Mental Health in an effort to incorporate into the Maynard school program many of the broad changes which have recently taken place in the field of special education. Our intent has been to insure that Maynard youngsters are not deprived of the opportunity to participate in the various new programs recently provided for by the state legislature.

There are a number of pupils who, for one reason or another, require a more individualized approach in the learning situation. For the past two years, a screening committee has been established for the purpose of locating these youngsters and trying to determine the nature of their learning difficulties. When necessary, they are referred to more specialized professional agencies for detailed diagnostic evaluations.

As a result of the work of this screening committee, we are now able to provide a myriad of individualized services to the pupils who are found to be in need of them. Sometimes it is found that, because of severe learning limitations, the needs of a child are best met in the Special Class. Pupils with problems of a different type are helped through a program of home instruction. At times the regular classroom program is supplemented with speech or hearing therapy. When a pupil is experiencing emotional problems which are so intense that they preclude his participation in a normal classroom situation, arrangements are often made for him to attend either a residential or day school which specializes in working with such problems.

Some of the tools used by the screening committee in identifying youngsters with learning difficulties are group mental ability tests administered by classroom teachers and individual tests administered by psychometrists. This fall, a workshop was conducted in the field of tests and measurement as an aid to our teachers and to provide them with a better understanding of the nature of tests and their relation to learning difficulties. It is hoped that this will enable them to become more cognizant of the symptoms exhibited by

children who are in need of more specialized and individualized help than can be provided in the regular classroom. Negotiations are now underway in an attempt to affiliate with a nearby mental health clinic. Success in this direction would give Maynard speedy access to professional diagnostic and therapeutic services for our pupils when they are required.

Much more needs to be done in the field of special education in order to provide for all of the needs of all of the pupils, but Maynard has not been sitting still in this regard and many of these needs are now being met.

Many teachers' meetings and workshops have been conducted in an effort to keep our teachers abreast of new developments in the field of education. Specialists and consultants in many areas have been brought in to work with our teachers and to help them to continue to provide quality education for the children of Maynard. In some cases, these specialists have actually gone into the classroom and conducted demonstration lessons with our pupils. At other times they have met with small groups of teachers to discuss specific areas of concern. Some meetings included the entire elementary staff, while other meetings centered around certain grade levels or subject areas. Many more such meetings are being planned for the near and distant future in a continuing attempt to bring to Maynard some of the latest thinking and techniques in education.

Some thought has been given to the possibility of devising separate report cards for primary pupils rather than using the same cards for all elementary pupils as is being done at present. This would enable us to better report pupil progress to the parents. The nature of the learning activities at the primary level being somewhat different from that at the upper-grade level, it is sometimes difficult for a teacher to indicate to a parent certain peculiarities which she feels the parent should know. A group will probably be set up soon to determine the advisability of such a move and to recommend any changes which it is felt should be made.

A breakdown of the ability tests which were administered to all first, third and sixth grade pupils recently indicates that, of all pupils tested, 39% possessed above-average ability, 53% were in the average range, and only 8% were found to have ability which is considered to be below average. The over-all median places our pupils in the high-average category. A comparison of this ability range with the results of the achievement tests administered to all elementary pupils last spring shows a good correlation. The achievement tests enable us to compare the academic achievement of our pupils with that of hundreds of thousands of other youngsters throughout the country by means of national norms. The pupils of Maynard, by and large, are performing quite well in all subject areas, and in some areas are actually

surpassing the national norms.

We have been quite busy studying the various implications of the Willis Report and the changes which it will necessitate in the Maynard schools. It has been found that in some areas we are already meeting and even exceeding some of the report's many recommendations, while of course in others, as is the case with just about every school system in the state, certain changes will have to be made. Some of the more obvious changes will be the establishment of kindergartens and school libraries.

We are also involved, at this time, with an investigation of the many federal aid programs and their implications for Maynard. It is expected that Maynard will participate in some of the programs created by the Elementary and Secondary Education Act of 1965.

We can expect to see many new and exciting changes in all aspects of education in the next few years. These changes have been taking place for some time now, but the pace is rapidly increasing. With the continued support and cooperation of the School Committee, the Superintendent, the principals, the teachers and all of the parents and various civic groups, Maynard will take its rightful place in this movement and will be recognized as a community which provides quality education for all of its pupils.

Respectfully submitted,

GEORGE J. LEMIRE  
Elementary Curriculum  
Coordinator

January 7, 1966

REPORT OF THE  
EMERSON JUNIOR HIGH SCHOOL PRINCIPAL

Mr. Albert Lerer  
Superintendent of Schools  
Maynard, Massachusetts

I submit my twenty-first annual report as Principal of the Emerson Junior High School.

The school year 1965-66 found us in our new building, the former high school for the second year. Adjustments in rooms and program have been made to accomodate the fifteen full time staff members and two part-time members, one secretary and two hundred ninety students.

At the opening of school in September 1965 four of our previous staff members did not return; two left the teaching field, one left because of family responsibility and one was transferred to the high school.

To the staff we added the following members:  
Mrs. Giovanna O'Brien - art; Miss Doris Schofield and Mr. James Duggan - physical education; Mrs. Ruth Burke - home economics; Mr. Robert Truscott - industrial arts; Miss Barbara Gormley - history; and Mr. Peter Garipay - mathematics.

Our program consists of seven forty-five minute periods arranged to offer five periods per week in the major subjects, two periods each in music, practical arts, and physical education and one period in art.

One of the best ways to promote democracy and still provide an opportunity for individualized instruction is to place pupils in homerooms alphabetically and schedule them homogeneously for skill subjects.

To arrange classes homogeneously is not easier, administratively. It is more difficult. Only the advantage of tailoring the education to the individual makes it worthwhile.

Of course there are more discipline problems among the slower students, wherever you put them. They have problems in reading, socializing and understanding the basic concepts of education. However, they must go at their own pace. Many of these problems disappear with a challenging educational program for the students.

Our task is to place each and every student in the grade or group best suited for his improvement, after weighing all factors. The factors used to group are: Results of achievement tests, Past teacher's rating, Work habits, Intelligence and Teacher's judgment.

The grouping and reviewing procedures should be inherently flexible to allow for adjustment of the pupil's schedule as his marks reflect increased achievement or lack of it. The reviewing process should involve the major-subject teachers. Their considered judgment should form the basis for making any adjustment in the pupil's schedule. The teachers must demand of every pupil the highest intellectual achievement of which he is capable. The text-book and materials are selected on the reading-difficulty and interest level of the group.

It is necessary to relate the scholarship mark with the level of the group. The marks given to students in each group are determined by teachers' evaluation of students' progress within each class. Each class is made up of students working at the same general levels of achievement ability.

Increased emphasis has been placed upon modern mathematics with the use of two volumes of School Mathematics Study Group, S.M.S.G., and the Silver Burdett Modern Mathematics text. Mr. Leo McSweeney covers algebra with the eighth grade accelerated class.

The French program is continuous through grade seven and eight. Along with the conversational program, Mrs. Charlene Barranco draws attention to the French cultural setting for the language.

Vocal music (Miss Jeannette Hargroves) and instrumental music (Mr. Bernard Kosc) offer opportunities for pupils to participate in choral and orchestral groups during the club periods. Singing, listening, music reading, rhythmic movement, instrument playing, and creativity are the main areas stressed in regular class lessons for all pupils.

Rather than a general survey of all the areas of science we concentrate on certain key areas which are of particular interest to the young adolescent and make reference to other areas when pertinent. Thus we concentrate with the seventh grade students in physics, anatomy and first aid. The eighth grade students study such topics as astronomy, the atom and energy.

Mr. James Duggan and Miss Doris Schofield set aside a portion of each class period for fitness practice. Other emphasis in the program are placed upon ball drills, coordination, gymnastics and appropriate games. A voluntary afternoon program of intramurals is carried on by Miss Schofield with the seventh and eighth grade girls.

Students in the seventh grade English and Literature classes, conducted by Mr. James R. Azier have been developing better skills in the areas of grammar and usage through the addition of Warriner's Handbook of English Grammar and in the area of literature through the addition of "Four

Famous Adventures" which enables classes to study a term novel during the school year. Projects evolved from "Treasure Island" by Stevenson and "Gods, Heroes, and Men of Ancient Greece" by Rouse have enriched the reading program and led to supplementary readings for reports and panel discussions. The addition of the Harcourt Brace "Sound & Sense Spelling" texts throughout the seventh and eighth grades has increased co-ordination of spelling and English with its emphasis on sound in spelling -- that is, phonics. It also emphasizes sense in spelling -- that is spelling generalizations which enable the student to obtain an understanding of the principles and uses of words as well as their correct spelling.

A summary of the year's activities would not be complete without noting the growth of the school library. Over 400 new books were added to the existing collection. The purchases have been recommended by the faculty and center around the curriculum. Donations of \$100.00 from the P.T.A. and \$300.00 from the Women's Athletic Association were deeply appreciated.

The library has been open to students one half hour before school and one half hour after school and a 45-minute study period each Thursday. During the year the teachers took their classes to the library to locate books for reports, for unit assignments or for viewing display of new books. Cumulative Reading Records are used to record quantity of reading.

The school library is organized and operated by Mr. Joseph Magno, the eighth grade English teacher, who has had attractive book and bulletin board displays which correlate with the instruction that is going on in teachers' classrooms. Our library has a maximum seating space of sixty. We would like to build up the library's reference collection, since this is the backbone of a school library.

Our eighth grade accelerated literature class is doing advanced reading on Shakespeare, using their new book "Studies in Literature" by Eller, Reeves and Gordon.

In an effort to orientate this year's eighth grade class toward an understanding of the Dewey Decimal System and the card catalogue as used in the majority of libraries, Mr. Magno has accompanied five eighth grade classes to the high school library. Mrs. Sylvia Clark, the high school librarian, and her student library staff passed out detailed sheets which illustrated the structure of the Dewey Decimal System and the card catalogue under the supervision and instruction of the library staff. This brought the program into very clear focus.

A complete run-down was given of the materials available in the library, where they are stored, and how they are used. Instruction was also given in the use of the various

reference materials such as encyclopedias, dictionaries, etc. It proved to be a very profitable experience for the junior high students.

The High School Library is opened three afternoons a week: Wednesday, Thursday and Friday from 2:50 to 4:00 P.M. for Junior High School pupils.

The guidance program at the Junior High School provided for the orientation, individual counseling, testing and ability grouping of seventh and eighth grade students.

The services offered by the guidance counselor are primarily educational in nature. The orientation phase was completed during the month of May by assisting each eighth year student with his high school program. The counselor, Mr. David Courchene, made visits to all sixth year classes to explain the Junior High School curriculum and activities. In June the sixth-graders visited their new school.

The testing program included the administration of the Otis Test of Mental Ability in February and the Stanford Achievement Test in May. Each student in Junior High School was scheduled for at least one conference during the school year. Parent conferences were arranged by request. The requests were made by either the counselor or parent or by both.

The open house has become the most widely accepted means of acquainting the community with its schools. "Back to School Night" was held on November 8th from 7 to 9 P.M. Following a brief program in the school auditorium, the parents followed their child's schedule, attending each class for 10 minutes, to hear the teacher explain the work in his course. This was followed by a tour of the school library and the gymnasium. A band concert was given by the schoolband, directed by Mr. Bernard Kosci. Each room had a display that dramatized its work. Coffee, tea and cookies were served in the lunch room by Mrs. Ruth Burke, Home Economics teacher.

All students eat in the school lunchroom which seats only 155, on a two seating lunch schedule. This year the students were able to buy a well balanced cold lunch with white milk for twenty-five cents. The service is cafeteria style. Student workers in the lunchroom render a valuable service. Helpers are also given their lunch. Two teachers are present at all times to assist with the general supervision of the lunch period.

Mr. Varrichione, the eighth grade science teacher, held the Science Count-Down like an old-fashioned spelling bee in order to create maximum interest in the student body. Winners in each group competed in a second contest to determine the school champion. The school champion Ann Minko, then took a test forwarded to us from Lowell

Technological Institute in January.

Barbara Zancewicz, the Spelling Bee Champion, represented our school at the National Division Spelling Bee in Lowell on April 30th, where over sixty-five school champions from Middlesex County competed for prizes. Barbara finished sixth.

Emerson Junior High's Third Annual Science-Math Fair was conducted on Sunday, March 14, 1965, at the Maynard Memorial Gymnasium with over 800 parents and friends viewing more than 200 projects on display in the areas of science, mathematics, and art. The Fair was opened to the public from 4:00 - 6:00 P.M.; whereas, judging took place from 2:00 - 4:00 P.M. Students from both the seventh and eighth grades displayed their ingenuity, knowledge and poise in explaining their projects to both the judges and the public.

Undertaking a Science Fair of this size required the combined efforts of teachers and pupils. The tremendous task of planning, organizing and arranging this most successful fair was under the capable direction of Mr. Leo McSweeney, the eighth grade mathematics teacher assisted by the science and mathematics teachers, Mr. George Wing, Mr. Louis Varrichione and Miss Adair Miller.

Our third Handbook was issued to all students this year. The pages contain information for pupils and parents so that when they talk at home about school life, father and mother can understand them better.

We hope this handbook has helped the pupils become acquainted with their school.

Mr. James Azier, seventh grade English teacher is responsible for revising, typing and duplicating this Handbook. The faculty and a few pupils assembled it in time for the opening of school in September.

Intensive effort has been devoted to organization of materials and use of equipment.

Major subject teachers have supply areas where supplementary material and additional texts pertaining to their subject are stored for easy reference.

A suggested addition to the personnel in the English Department will enrich the developmental reading and literature program.

I wish to express my appreciation to the faculty and to you for a most successful year.

Respectfully submitted,

FLORENCE WILDER, Principal

REPORT OF THE  
HIGH SCHOOL PRINCIPAL

Mr. Albert Lerer  
Superintendent of Schools  
Maynard, Massachusetts

I herewith submit the Annual Report for the Maynard High School for the year 1965, my eleventh Annual Report.

The first full year in the new building has been an extremely productive one. The addition of a second full-time teacher in Industrial Arts has made possible a power mechanics unit in the Industrial Arts program and an Industrial Arts Minor program for girls. Additional personnel in the music department has enabled us to present a course in music theory and appreciation. Various woodwind ensembles have also been organized as separate units for the performance of chamber music and an acapella choir has been formed. A National Defense Education Act project enabled us to include tapes, books, records, films, and filmstrips which make it possible to better present French, music, art, geography and literature to the student. The Physical Sciences Study committee (PSSC) Physics laboratory course was introduced. Units in advertising and selling were added to the Business curriculum. A revision of the English curriculum will enable all students to study World Literature in the Senior year. A "modern mathematics" approach is now being used in General Mathematics classes.

The new building has also made more flexibility possible and some teachers have attempted correlation of subject matter by team teaching methods. Curricular changes have also enhanced our social studies offerings.

The past year has also been a unforgettable one from the standpoint of activity at Maynard High School.

In May, after extensive and thorough preparation, the Maynard High School music organizations were hosts to the Northeast Music Festival. The activities of the day involved many interested citizens and organizations and proved to be notably successful. Later in the spring a gym show demonstrated the work being done in gym classes. In June, Open House was held. Flags were given to the High School by the Frank J. DeMars Post #235 (American Legion) and the Maynard Post #1812 (Veterans of Foreign Wars). Mr. Erol Beach represented the New England Association of Colleges and Secondary Schools at the ceremonies which gave the townspeople an opportunity to view the new facilities.

In November, the Maynard High School Student Council was host to the Fall Convention of the Eastern Massachusetts Division of Student Councils, a gathering involving sixty-one

area secondary schools and attended by some 300 delegates and guests. During the year the English Department hosted a work-shop conference for the New England Speech Association with Mr. Reed Taylor as guest speaker and the Maynard High School cafeteria workers conducted the Middlesex County School Lunch Meeting.

During 1965, the Educational Testing Service established Maynard High School as testing center #2809 and the Scholastic Aptitude and Achievement Tests of the College Entrance Examination Board were administered at Maynard High School for the first time on December 4th.

The Maynard High School Science Team was victorious in all of its encounters in the competitions sponsored by the Massachusetts Department of Education and the American Chemical Society on WHDH-TV.

Approximately one half of our graduates will be continuing their education once they leave high school. The large majority of these students and also those who are entering the labor field are adjusting well to their post secondary school endeavors.

Our library now has 2400 volumes. The generosity of civic groups and individual citizens has been most gratifying. A sum of \$1400 in gifts for the library has been received.

With increased class enrollments and the expansion of the total school program, the need for department heads or area chairmen should be given serious consideration. Curriculum work, research, and correlation of the various programs could be the responsibility of the department head or area chairman.

In conclusion, I wish to thank the many interested parents, other citizens, civic and fraternal groups, for their continued interest in the high school and its activities.

I wish also to express my appreciation to the members of the High School staff for their excellent contributions to the furtherance of our educational objectives. May I also thank you for your continued assistance and support.

Respectfully submitted,  
FREDIANO D. MATTIOLI
