Department credits,	<u>42 18</u>
Total,	\$1,042 18
Expended,	<u>1,036 48</u>
Balance unexpended,	\$5 70

To the citizens of Maynard:

The reports of the various departments under the control of the selectmen are hereby submitted:

## HIGHWAYS AND SIDEWALKS.

During the past year we have endeavored to expend the appropriation under this department in permanent improvements, as far as possible, and have made a beginning in a line of work, which, we trust, will be continued to completion. The application of Tarvia on Main and Nason Streets has been very successful in holding the surface,

prevention of dust and general good appearance of streets.

The manufacturers of Tarvia recommend that the surface be covered three times, in order to withstand weather and wear.

The small portion of the work which has been covered twice, at the junction of Main and Nason Streets, shows excellent condition, with but little, if any, indications of wear during the past year.

All of the surface that was covered last spring should receive a second application and the work should be extended a little each year, in order to eventually cover, at least, the main line of automobile traffic. But for some method of this kind for holding the surface, the cost of maintaining these roads in passable shape would be very large.

A beginning has been made toward regravelling Parker Street, near Sudbury line, Summer Street and Great Road, which were badly in need of this work.

We are seriously handicapped on account of having no good gravel at convenient points, but hope this work will be continued.

Acton Street, from the State road towards the village, also needs attention.

We were fortunate in securing an allotment of \$1500.00 from the State which with like appropriation granted by the town gave us \$3000.00 which could be expended on Waltham Street for a macadam road. We thought a cheaper road could be built which would answer every purpose, and leave a balance to be expended elsewhere.

A State road between Marlboro and Hudson was brought to our attention built of oil and gravel, which had withstood the traffic and elements successfully and could be built for much less money than macadam. Waltham Street has been completed with this style of road to the Sudbury line leaving a balance available which is sufficient to build a road of like material from the junction of Main

Street and Great Road to the Stow line where it was much needed.

Permission having been given by town and Highway Commission, work was commenced on Great Road last fall, and funds sufficient to complete same in the spring are available.

The work has been done by our own men saving a contractor's profit.

Much credit should be given your efficient road superintendent for quality and economy of the work done.

The raising of the surface on Walnut Street from bridge to Main Street, while expensive, for the showing made, will, we think, warrant the outlay considering central location and previous condition. Bancroft Street recently accepted by town has been placed in safe condition for travel.

In pursuance of vote of town appropriating \$1000.00 for sidewalk at Summer Street bridge, the work has been completed to the best of our ability keeping within the appropriation. The expense for appropriations being taken out of sidewalk appropriation.

It appeared more economical to have the work done by our own men than to let it out by contract. In this connection we wish to extend to the C. M. & H St. Railway Co. the thanks of town and appreciation of the fact that but for their permitting us the use of their abutments and other concessions it would have been impossible to have made this improvement for the amount appropriated.

A contract has been drawn up giving the town permanent use of abutments and facilities for vehicle traffic over their portion of bridge. The complete structure gives the town a wide highway where it is very much needed and a safe and convenient sidewalk.

The stone work under old portion of bridge should be pointed with cement in order to keep it from any further

deterioration, also top stripped, covered with coat of cement and dirt replaced.

The appropriation granted by the town for permanent sidewalks has been of great benefit to the citizens and hope the same will be continued as there is much need of this work.

We have requested the B. & M. R. R. Co. to give us gate or flag protection at Concord Street crossing and have their promise of early compliance.

### LIGHTING.

A new contract for three years has been drawn up with the American Woolen Co. for street lighting at the same price per light as previously paid with concessions for extension of the system and for use of all night lights. No money being available or appropriated the selectmen were powerless to comply with the vote of town for all night lights or for extension of system on the recently accepted streets. This matter will, no doubt, receive the attention of the appropriation committee for the coming year.

We have recently entered into an agreement and granted a franchise to the Marlboro & Hudson Gas Co., whereby they agree to complete a system of piping in this town by November 1, 1911, and furnish the inhabitants with gas for fuel and lighting purposes.

### POLICE.

We are pleased to show a good balance under this department. The system by which each license holder should pay for a special officer to be stationed at his place of business subject to the orders of the chief of police has worked well. We think this town has been very free from lawless-

ness the past year owing to the good work and efficiency of the police officers.

In conclusion would say that we have kept within the amounts appropriated in each department under our jurisdiction and have paid all bills leaving no unpaid balances for the following year.

Respectfully submitted,

WILLIAM JONES,  
WILLIAM CONNOLLY,  
ARTHUR E. WALKER.

WILLIAM JONES,  
Chief of Police,

TOWN CLERK'S REPORT.  
FOR THE YEAR 1910.

---

From the Town Clerk's Records, March 1, 1910, to  
March 1, 1911.

**Town Warrant No. 182      Town Meeting, March 14, 1910.**

Commonwealth of Massachusetts.                      Middlesex, SS.

To either of the Constables of the Town of Maynard, in  
said County, Greeting: —

In the name of the Commonwealth of Massachusetts you  
are hereby directed to notify and warn the legal voters of  
said Maynard to assemble in Co-operative Hall in said  
Town, on Monday, the 14th day of March next, at 7:30  
A. M. there and thereto act on the following articles:

Article 1. To choose a Moderator to preside at said  
meeting.

Article 2. To choose by the Australian system of  
balloting the following town officers: One Town Clerk,  
One Town Treasurer, one Collector of Taxes, each for one  
year, three Selectmen for one year, one Overseer of the  
Poor for three years, one member of the Board of Health  
for three years, one Water Commissioner for three years,  
one Water Commissioner for two years, one member of  
the School Committee for three years, one Assessor for  
three years, one Trustee of the Public Library for three

years, one Tree Warden for one year, two Auditors for one year, three Constables for one year, one Cemetery Commissioner for three years, and all town officers to be chosen at said meeting. Also to answer by the said Australian system of balloting, the following Question:—Shall licenses for the sale of intoxicating liquors be granted in this town?

For the purpose specified in this article the polls will be opened after the election of a Moderator and will remain open until four o'clock in the afternoon, when they shall be closed unless the meeting there assembled otherwise determine.

Article 3. To hear and act upon the reports of the town officers and committees.

Article 4. To see if the Town will appoint a committee to consider appropriations for the ensuing year and report at the April meeting. To do or act thereon.

Article 5. To see if the Town will authorize the Treasurer, with the approval of the Selectmen, to borrow during the municipal year beginning Feb. 1, 1910, in anticipation of taxes for said municipal year, such sums of money as may be necessary for the current expenses of the Town, giving the notes of the Town therefor, payable within one year from the dates thereof.

Article 6. To see if the Town will vote to appoint a Committee to investigate the need of a new Hook and Ladder Truck for the Fire Department. To do or act thereon.

And you are directed to serve this Warrant by posting an attested copy at the Post Office and one at each of ten other public places in said town, seven days at least, before the time of holding said meeting.

Hereof fail not, and make due return of this Warrant with your doings thereon, to the Town Clerk or the Select-

men, at or before the time appointed for holding said meeting.

Given under our hands this 26th day of February in the year of our Lord, one thousand nine hundred and ten.

WILLIAM JONES,  
ARTHUR E. WALKER,  
WILLIAM CONNOLLY,  
Selectmen of Maynard.

Middlesex SS.

Maynard, March 4, 1910.

I have served the within named Warrant by posting an attested copy of the same at the Post Office and one at ten other public places in said town seven days before the time of holding said meeting as within directed.

WILLIAM JONES,  
Constable of Maynard.

A true copy, Attest:

LILLIAN MEAD,  
Assistant Town Clerk.

## PROCEEDINGS AT TOWN MEETING.

March 14, 1910.

Pursuant to Town Warrant No. 182 the Voters of Maynard assembled at Co-operative Hall on the above date and acted upon the several articles in the Warrant as follows:

The meeting was called to order at 7.30 o'clock A. M. by the Town Clerk and the Warrant read, cards of instruction and specimen ballots having previously been posted.

Article 1. Albert Batley was choosen Moderator by ballot, the check list being used.

Article 2. The ballot clerks, Joshua Edwards, Joseph Hanna and Charles S. Bradley, appointed by the Selectmen, were sworn by the Town Clerk, who delivered to them a sealed package of ballots containing twelve hundred general ballots and two hundred and forty special ballots. The ballot box was opened and examined by the election officers and the register set at 0000, after which it was locked and put in charge of John Connors, Constable, who was sworn by the Town Clerk. The polls were declared open by the Moderator at 7.45 o'clock A. M.

Albert Larkin, George Smith, Matthew Campbell and Mark Kelly were appointed Tellers by the Selectmen and were sworn by the Town Clerk.

It was voted to postpone action on the other articles in the Warrant until two o'clock P. M.

It being deemed advisable by the Moderator and Town Clerk, it was decided to begin counting the ballots before the close of the polls and ballots were accordingly taken from the ballot box from time to time during the day and counted.

The polls were closed at 4 o'clock P. M.

The total number of ballots cast was nine hundred and eighty-one and this was the number registered by the ballot box. Of this number there were eight hundred and eighty-seven general ballots and ninety-four special ballots. Both check lists of the male voters showed eight hundred and eighty-seven names checked thereon, and the check lists for the women voters showed ninety-four names checked. The count was made by the use of the Counting-board and resulted as follows:—

Luke S. Brooks, three hundred and ninety votes,	390
Blanks, one hundred and forty-eight votes,	148
Luke S. Brooks, elected, qualified.	

## Constables, one year.

John Connors, six hundred and seventy-six votes,	676
N. J. Driscoll, four hundred and eighty-three votes,	483
William Jones, five hundred and seven votes,	507
Samuel G. King, four hundred and forty-four votes,	444
Blanks, five hundred and fifty-one votes,	551
John Connors, elected, qualified.	
Nicholas J. Driscoll, elected, qualified.	
William Jones, elected, qualified.	

Shall licenses be granted for the Sale of Intoxicating Liquors in this Town?

Yes, four hundred and fifty-seven,	457
No, three hundred and ninety-six,	396
Blanks, thirty-four,	34

The following were appointed by acclamation:—

Field Drivers—Fred W. Taylor, Wm. Bishop, sworn, Ainsley O. Dunham.

Fence Viewers,—George A. Whitney, (sworn) James R. Bent, (sworn) William Naylor, (sworn).

Measurers of Wood and Bark,—Albert W. Haynes, (sworn) Hiram Parkin, (sworn) James R. Bent, (sworn)

Surveyors of Lumber.—Albert W. Haynes, (sworn) Samuel Lawton, Sidney B. Shattuck.

Article 3. The Reports of the various Town Officers and Boards were taken up separately and accepted. The report of the Committee on the Bancroft Street School Building was accepted as one of progress. It was further voted to adopt the recommendation of the Board of Water Commissioners, to wit—that a committee be appointed to act in conjunction with the Water Commissioners to investigate the condition of the conduct line to White Pond and the need of any action in regard to the protection of the Town against a possible failure of the water supply, and to report at some future meeting. The following committee was appointed: —

Arthur J. Coughlan, George Murphy, Abel G. Haynes, James Mahoney and Paul Wilson.

Article 4. It was voted that a committee of seven be appointed to consider appropriations for the ensuing year and report at the April meeting. The following were appointed members of said committee:—

Abel G. Haynes, John W. Flood, Charles D. Holmes, John Hannon, Orrin S. Fowler, Julius Loewe and Patrick J. Sullivan.

Article 5. Voted:—That the Treasurer be, and he hereby is authorized with the approval of the majority of the

Selectmen, to borrow from time to time during the Current Municipal Year, beginning February 1, 1910, in anticipation of the taxes of said municipal year, a sum or sums not exceeding at any one time outstanding fifty thousand dollars (\$50,000.00) for the purpose of meeting the current expenses of the Town, and to give the notes of the Town therefor, payable within one year from their dates. All debts incurred under the authority of this vote shall be paid from the taxes of said current municipal year. Said notes shall not be valid unless authenticated by the certificate of the Old Colony Trust Co. of Boston. This note was carried unanimously.

Article 6. It was voted to appoint a Committee of five to investigate the need of a new Hook and Ladder truck for the Fire Department, and the following committee was appointed:—

Arthur J. Coughlan, James A. Cleary, Julius Loewe, Abel G. Haynes and Joseph V. Gately.

The meeting adjourned at 7.15 o'clock P. M.

Attest.

ALFRED E. McCLEARY,  
Town Clerk.

Warrant No. 183

Town Meeting April 2, 1910

Commonwealth of Massachusetts, Middlesex ss.

To either of the Constables of the Town of Maynard, in said  
County, Greeting:

In the name of the Commonwealth of Massachusetts you are hereby directed to notify and warn the legal voters of said Maynard to assemble in Co-operative Hall in said town, on Saturday, the second day of April next at 7.30 A. M. then and there to act on the following articles.

Article 1. To choose a moderator to preside at said meeting.

Article 2. To choose by the Australian system of balloting the following Town Officers: One Assessor for three years. For the purpose specified in this article, the polls will be opened after the election of a Moderator, and will remain open until 4 P. M., when they shall be closed, unless the meeting there assembled otherwise determine.

And you are directed to serve this Warrant by posting an attested copy at the Post Office and one at each of ten other public places in said town, seven days at least, before the time of holding said meeting.

Hereof fail not, and make due return of this Warrant with your doings thereon, to the Town Clerk or the Selectmen, at or before the time appointed for holding said meeting.

Given under our hands this twenty-third day of March in the year of our Lord one thousand nine hundred and ten.

WILLIAM JONES,  
WILLIAM CONNOLLY,  
ARTHUR E. WALKER,  
Selectmen of Maynard.

---

Middlesex SS.

Maynard, March 25, 1910.

I have served the within named Warrant by posting an attested copy at the Post Office, and one each at ten other public places in said Town, seven days at least before the time of holding said meeting, as within directed.

JOHN CONNORS,  
Constable of Maynard.

A true copy,  
Attest:

ALFRED E. McCLEARY,  
Town Clerk.

### Proceedings at Town Meeting, April 2, 1910.

Pursuant to Town Warrant No. 183. the Voters of Maynard assembled at Co-operative Hall on the above date and acted upon the several articles in the Warrant as follows:—

The meeting was called to order at 7.30 A. M. by the Town Clerk and the Warrant read, cards of instruction and specimen ballots having previously been posted.

Article 1. On motion of Arthur J. Coughlan, it was unanimously voted that the Town Clerk cast in ballot for Albert Batley as Moderator, which was done. The check list was used.

Article 2. The ballot clerks, James J. Morgan, George F. Thane, Edward J. Riley, appointed by the Selectmen were sworn by the Town Clerk, who delivered to them duplicate check lists and a package of ballots containing twelve hundred ballots. The ballot box was opened and examined by the election officers and the register set at 0000, after which it was locked and put in charge of William Jones, constable, who was sworn by the Town Clerk, after which the polls were declared open by the Moderator.

Mark Kelley, and George Smith, Tellers, appointed by the Selectmen were sworn by the Town Clerk. It being deemed advisable by the Moderator and Town Clerk, it was decided to begin counting the ballots before the close of the polls and ballots were accordingly taken from the ballot box from time to time during the day and counted. The polls were closed at four o'clock P. M.

The total number of ballots cast was five hundred and ninety-five, and this was the number registered by the ballot box. The same number of names was checked on both check lists. The count resulted as follows:—

Assessor, three years.

A. J. Coughlan, three hundred and thirty-seven votes, 337

Frank S. Johnson, two hundred and fifty-eight votes, 258

Arthur J. Coughlan, elected, qualified.

The meeting adjourned at 4.10 P. M.

Attest:

ALFRED E. McCLEARY,  
Town Clerk.

Warrant No. 184.

Town Meeting April 4, 1910.

Commonwealth of Massachusetts, Middlesex ss.

To either of the Constables of the Town of Maynard, in said  
County, Greeting:

In the name of the Commonwealth of Massachusetts  
you are hereby directed to notify and warn the legal voters  
of said Maynard, to assemble in Co-operative Hall in said  
Town, on Monday the fourth day of April next at 7.30 P.  
M., then and there to act on the following Articles:—

Article 1. To choose a Moderator to preside at said  
Meeting.

Article 2. To hear and act on reports of Town Officers  
and Committees.

Article 3. To fill all vacancies in Town Offices.

Article 4. To see if the Town will vote to appropriate  
the sum of two hundred dollars (200) for band concerts. To  
do or act thereon.

Article 5. To see if the Town will vote to grant and  
appropriate money for all Town purposes. To do or act  
thereon.

Article 6. To see if the Town will vote to appropriate  
a sum of money for Memorial Day.

Article 7. To see if the Town will vote to appropriate the sum of fifteen hundred dollars (\$1,500) for the improvement of Summer Street, under the provisions of Chapter 47 of the Revised Laws and Acts in amendment. To do or act thereon.

Article 8. To see if the Town will vote to appropriate a sum of money for fighting the elm beetle. To do or act thereon.

Article 9. To see if the Town will vote to appropriate a sum of money for the purchase of a power sprayer, to be used in fighting the elm beetle and other insect pests. To do or act thereon.

Article 10. To see if the Town will vote to accept Bancroft Street, as laid out. To do or act thereon.

Article 11. To see what action the Town will take in regard to the salary of its Treasurer. To do or act thereon.

Article 12. To see what rate of interest the Town will charge upon its unpaid taxes, after Sept. 10th, in the year of assessment. To do or act thereon.

Article 13. To see if the Town will vote to print in its annual Town Report, a list of all unpaid taxes on all taxable property, due the Town, after the close of the fiscal year, giving the name and amount due from each party. To do or act anything relative to the same.

Article 14. To see if the Town will vote to install a modern system of indexing the vital statistics in the office of the Town Clerk, and appropriate a sufficient sum of money therefore. To do or act thereon.

And you are directed to serve this Warrant by posting an attested copy at the Post Office and one at each of ten other public places in said Town, seven days at least, before the time of holding said meeting.

Hereof fail not, and make due return of this Warrant with your doings thereon, to the Town Clerk or the Selectmen at or before the time appointed for holding said meeting.

Given under our hands this twenty-third day of March in the year of our Lord, one thousand nine hundred and ten.

	<hr/>
	\$57,550 00

ABEL G. HAYNES,  
CHARLES D. HOLMES,  
P. J. SULLIVAN,  
JOHN W. FLOOD,  
O. S. FOWLER,  
JOHN HANNON,

The above report is on file at the office of the Town Clerk.

The Committee appointed to investigate the need of a new Hook and Ladder Truck submitted the following report.

Maynard, Mass., April 1, 1910.

The meeting was called to order by A. J. Coughlan, Voted that this Committee report that the Hook and Ladder Wagon is unsafe to carry the apparatus and a sufficient number of men to handle it.

ARTHUR J. COUGHLAN,  
JAMES A. CLEARY,  
JULIUS LOEWE,  
ABEL G. HAYNES,  
JOSEPH GATELY,  
Committee.

It was voted to receive the report of the Committee on Appropriations and lay it on the Table, to be taken up under Article 5, in the Warrant.

It was voted to receive the report of the Committee to investigate the need of a new Hook and Ladder Truck and place the same on file.

Article 3. There being no vacancies in any of the Town Offices it was voted to pass over this article.

Article 4. This article on motion of John Hannon, was taken up under Article 5.

Article 5. The report of the Committee on Appropriations was here taken from the table and the several recommendations contained therein, were taken up separately, this being the sentiment of the meeting. Articles four, six, seven, eight, ten and fourteen were also acted upon under this Article. The following appropriations were voted:—

For support of schools	\$25,000 00
Highways	4,000 00
Gravel sidewalks	500 00

Attest:

ALFRED E. McCLEARY,  
Town Clerk.

Warrant No. 185.

Town Meeting October 19, 1910.

Commonwealth of Massachusetts.

Middlesex ss.

To either of the Constables of the Town of Maynard, in said  
County, Greeting:

In the name of the Commonwealth of Massachusetts you are hereby directed to notify and warn the legal voters of said Maynard, to assemble in Co-operative Hall in said Town, on Wednesday, the Nineteenth day of October next, at 7.30 p. m., then and there to act on the following Articles:

Article 1. To chose a Moderator to preside at said meeting.

Article 2. To see if the Town will vote to appropriate the sum of \$1500 for the purpose of widening Summer street bridge and construction of sidewalk between Main and Parker streets on westerly side of C. M. & H. Street Railway Co.'s tracks as per plans drawn and approved by the Massachusetts Highway Commission. To do or act thereon.

Article 3. To see if the Town will vote to instruct the Selectmen to use any funds unexpended from the appropriation granted at the April meeting 1910, for improvement of Summer street, for a like improvement on Great road between C. M. & H. Street Railway Co.'s car barn and the Stow Town line. To do or act thereon.

Article 4. To see what action the Town wishes to take regarding extending time of lighting streets to an all night service, for all or a portion of lights. To do or act thereon.

Article 5. To see if the Town will vote to have a plan drawn of the Town for the use of the Assessors and appropriate a sufficient sum of money therefor. To do or act thereon.

Article 6. To see if the Town will vote to rename that portion of Summer Street running southeasterly from the Paper Mill Bridge (so-called) to the Sudbury town line. To do or act thereon.

Article 7. To see if the Town will accept as a public street, the private way known as Brooks Street extension, running from Concord Street northerly about eight hundred and twenty-five (825) feet to the junction of a way called Charles Street, according to plans in possession of the Selectmen. To do or act thereon.

Article 8. To see if the Town will accept as a public street, the private way called Charles Street, extending from a point on Brooks Street extension near the residence of Kenneth Damren, westerly about two hundred (200) feet to a way called Lincoln Street. Locations and measurements according to plans in the possession of the Selectmen. To do or act thereon.

Article 9. To see if the Town will accept as a public street the private way called Lincoln Street, commencing at a point near the residence of Israel Jannell on Concord Street, running northerly parallel with Brooks Street extension about nine hundred (900) feet to the westerly point on Charles Street as described under Article 8. Location and measurements according to plans in possession of the Selectmen. To do or act thereon.

Article 10. To see if the Town will vote to accept from Mrs. Hugh McGowan the sum of one hundred and fifty (\$150.00) dollars, as a fund to be invested and the interest to pay for the perpetual care of the Hugh McGowan lot in Glenwood Cemetery. To do or act thereon.

Article 11. To see what action the Town wishes to take regarding the acceptance and enforcement of a Curfew law. To do or act thereon.

Article 12. To see if the Town will accept from Mrs. Emma Whilcomb the sum of one hundred (\$100.00) dollars as a Cemetery Fund, the income to be used for the perpetual care of her lot in Glenwood Cemetery. To do or act thereon.

Article 13. To see if the Town will accept from Betsey C. Green the sum of one hundred (\$100.00) dollars as a Cemetery Fund, the income to be used for the perpetual care of her lot in Glenwood Cemetery. To do or act thereon.

Article 14. To see if the Town will accept from the estate of Mary V. Thompson, the sum of two hundred (\$200.00) dollars as a Cemetery Fund, the income to be used for the perpetual care of her lot in Glenwood Cemetery. To do or act thereon.

Article 15. To see if the Town will accept Summit and Oak Streets, which are now private ways, as public streets. To do or act thereon.

And you are directed to serve this Warrant by posting an attested copy at the Post Office and one at each of ten other public places in said Town, seven days at least, before the time of holding said meeting.

Hereof fail not, and make due return of this Warrant with your doings thereon, to the Town Clerk or the Selectmen, at or before the time appointed for holding said meeting.

Given under our hands this eighth day of October in the year of our Lord, one thousand nine hundred and ten.

WILLIAM JONES,  
WILLIAM CONNOLLY,  
ARTHUR E. WALKER,

Selectmen of Maynard.

Middlesex, ss.

Maynard, Oct. 12, 1910.

I have served the within named Warrant by posting an attested copy of the same at the Post Office, and one at each of ten other public places in said town, seven days before the time of holding said meeting.

WILLIAM JONES,  
Constable of Maynard.

A true copy, Attest:

ALFRED E. McCLEARY,  
Town Clerk.

---

**Proceedings at Town Meeting October 19, 1910.**

Pursuant to Town Warrant No. 185, the voters of Maynard assembled at Co-operative Hall on the above date and acted on the various articles in the Warrant as follows:

The meeting was called to order at 7.30 p. m., by the Town Clerk and the Warrant read.

Article 1. It was voted unanimously that the Town Clerk cast one ballot for Arthur J. Coughlan as Moderator. The check list was used.

Article 2. Albert Bately and Robert P. Denniston were appointed tellers and duly sworn by the Chairman.

On motion of Patrick J. Sullivan it was voted one hundred and two in favor and eight opposed to appropriate the sum of one thousand (\$1,000.00) dollars for the purpose of widening Summer Street Bridge and the construction of a sidewalk between Main and Parker Streets, on the westerly side of said bridge, according to the plans drawn and approved by the Massachusetts Highway Commission.

It was further voted that the above appropriation be charged to the Taxes of 1911.

Article 3. Voted, that the Selectmen be empowered to use the unexpended balance from the appropriation made at the April, 1910, meeting for the improvement of Summer street, for a like improvement of Great Road, between the C. M. & H. Street Railway Co.'s car barn and the Stow line.

Article 4. Voted, that the Selectmen be instructed to amend the contract with the American Woolen Company so that the Town should receive all night electric light service in accordance with the terms of a letter from said company, which is hereto appended.

Maynard, Mass., Sept. 17, 1910.

To the Honorable Board of Selectmen,  
Maynard, Mass.

Gentlemen—In accordance with verbal proposition made at the Selectmen's Rooms this morning, Sept. 17, we will give the Town of Maynard all night service at an additional rate of 18 percent per lamp, assuming the number of hours burned under the present moonlight schedule to be approximately eight hours per night, average for twelve months. Burning the present number of lights, this will make an increase over the present amount paid per annum of approximately \$517.00. This is a reduction of 50 percent, charged for additional hours burned over the present schedule, making the total per lamp per year \$18.88 in place of the existing rate of \$16.00. The same rate of reduction applies to arc lamps.

Yours truly,

ELEC. LT. DEPT. AM. WOOLEN CO.,

S. R. Kitchen, Mgr.

This letter is on file at the Town Clerk's office.

Article 5. Voted, that the Selectmen and Assessors acting together, have a survey of Town made and a plan drawn thereupon for the use of the Assessors, and that the sum of two hundred dollars be appropriated therefor.

Article 6. Voted, to rename that portion of Summer Street running southeasterly from the Paper Mill Bridge, so-called, to the Sudbury Town line, said street to be named Waltham Street.

Article 7. Voted, to accept as a public street the private way known as Brooks Street extension, laid out according to plan filed with the Selectmen, and that said street be known as Brooks Street.

Article 8. Voted, to accept as a public street, the private way known as Charles Street as laid out according to plans filed with the Selectmen.

Article 9. Voted, to accept as a public street, the private way known as Lincoln Street, as laid out according to plans filed with the Selectmen.

Article 10. Voted, to accept from Mrs. Hugh McGowan the sum of one hundred and fifty dollars, as a fund to be invested and the interest to pay for the perpetual care of the Hugh McGowan lot and surroundings in Glenwood Cemetery.

Article 11. Voted to pass over this Article.

Article 12. Voted to accept from Mrs. Emma Wilcomb the sum of one hundred dollars as a cemetery fund, the income to be used for the perpetual care of her lot and surroundings in Glenwood Cemetery.

Article 13. Voted to accept from Betsey C. Green the sum of one hundred dollars as a cemetery fund, the income to be used for the perpetual care of her lot and surroundings in Glenwood Cemetery.

Article 14. Voted, that we accept from the Estate of Mary V. Thompson the sum of two hundred dollars for a cemetery fund to be invested and the income to be spent for the perpetual care of her lot and surroundings in Glenwood Cemetery.

Article 15. Voted, to refer the question of the acceptance of Summit and Oak Streets to the Selectmen, they to report at the April meeting, if plans are filed before that date and the streets are in proper condition and of sufficient width.

The meeting adjourned at 9.05.

Attest:

ALFRED E. McCLEARY,  
Town Clerk.

Warrant No. 186.

Town Meeting Nov. 8, 1910.

Commonwealth of Massachusetts.

Middlesex, ss.

To either of the Constables of the Town of Maynard, in  
said County, Greeting:

In the name of the Commonwealth of Massachusetts you are hereby directed to notify and warn the legal voters of said Maynard, to assemble in Co-operative Hall in said Town, on Tuesday the Eighth day of November next, being the first Tuesday after the first Monday in November, at 7 a. m., then and thereto bring in their votes to the Selectmen for Governor, Lieutenant Governor, Secretary, Treasurer, Auditor, Attorney-General, Councillor, Senator, Representative in the General Court, Representative in Congress, Representative in Congress to fill vacancy for the term ending March, 1911, County Commissioner, County Commissioner to fill a vacancy for the term ending January, 1913. Two Associate Commissioners, District Attorney, Sheriff and all other State, County and District officers.

The polls will be opened at seven o'clock a. m., and may be closed at four p. m.

And you are directed to serve this Warrant by posting an attested copy at the Post Office and one at each of ten

other public places in said town, seven days at least before the time of holding said meeting.

Hereof fail not, and make due return of this Warrant with your doings thereon, to the Town Clerk or the Selectmen, at or before the time appointed for holding said meeting.

Given under our hands this twenty-ninth day of October, in the year of our Lord, one thousand nine hundred and ten.

WILLIAM JONES,  
WILLIAM CONNOLLY,  
ARTHUR E. WALKER,  
Selectmen of Maynard.

Middlesex, ss.

Maynard, Oct. 31, 1910.

I have served the within named Warrant by posting an attested copy of the same at the Post Office and one at ten other Public Places in said town, seven days before the time of holding said meeting, as within directed.

WILLIAM JONES,  
Constable of Maynard.

A true copy, Attest:

ALFRED E. McCLEARY,  
Town Clerk.

### Proceedings at Town Meeting Nov. 8, 1910.

Pursuant to Town Warrant No. 186, the voters of Maynard assembled at Co-operative Hall on the above date for the purpose of casting their ballots for the several State, County and District Officials to be elected at said meeting.

The meeting was called to order at 7.00 a. m., and the Warrant read by the Town Clerk, after which the polls

were declared open by William Jones, Chairman of the Board of Selectmen, who acted as presiding officer.

A package of ballots and the duplicate check-lists were delivered to the ballot clerks, Luke J. Hannon and William F. Morrison, who were duly sworn by the Town Clerk, and their receipt taken therefor. This receipt is on file at the Town Clerk's office, Edward G. Cheney, being duly sworn, was in charge of the check list at the ballot box.

The ballot box was opened and examined and the register set at 0000, after which it was locked and placed in charge of Constable John Connors, who was sworn by the Town Clerk.

George Smith, Albert Batley, Mark Kelley and Charles S. Bradley, tellers, appointed by the Selectmen, were sworn by the Town Clerk.

It being deemed advisable by the election officers, ballots were taken from the ballot box from time to time during the day and counted. The polls were closed at 4.15 o'clock.

The total number of ballots cast during the day was eight hundred and twelve and both check lists showed the above number of names of voters checked thereon. The register of the ballot box indicated eight hundred and sixteen ballots cast.

The count was made with the aid of the Counting Board and resulted as follows:

#### Governor.

Eben S. Draper of Hopedale, R., three hundred and fifty-six votes,	356

The Town Clerk requests information of any omissions or errors in the lists of births, deaths or marriages.

This office is prepared to furnish blanks for the proper return of births, and calls particular attention to the law in relation to returns being filed with the Town Clerk within the first five days of each month of all births occurring during the preceeding month, the neglect or failure of any physician or midwife to make such returns for ten days thereafter being punishable by a fine not exceeding \$25 for each offense.

ALFRED E. McCLEARY,  
Town Clerk.

## REPORT OF THE BOARD OF HEALTH.

---

To the citizens of Maynard:

The Board of Health respectfully submit their report for the year ending Feb. 1, 1911.

Gentlemen:—The Board this year has had some difficult problems arising at different times to contend with requiring prompt (and it may seem) stern action.

We refer now to the case of one Michael Millora, who owing to his not being educated in our laws regarding quarantine caused the Board some trouble and unnecessary expense.

We also made an inspection of the Town and found that taking things as a whole and everything in consideration it was in a very good condition, and in most cases where we were obliged to notify the property owners they were given prompt attention, and in some instances they were a little slow and the matter was brought to their attention again.

During the past year we have had numerous complaints regarding the collecting of garbage which necessitated a change and we hope the matter will be given better attention in the future.

Owing to our mixed population sometimes we have to inform them of certain rules regarding sanitary condition.

All complaints received by the Board have been investigated, and the Board would appreciate it if each and every citizen would co-operate with us and give information regarding nuisances and unsanitary conditions in their vicinity.

We desire to call your attention to the diseases defined by the State Board of Health as dangerous to public health.

Actinomycosis	Small Pox
Anterior Poliomyelitis	Tentanus
Asiatic Cholera	Trachoma
Cerebro-Spinal-Meningitis	Trichinosis
Diphtheria	Tuberculosis
Glanders	Typhoid Fever
Leprosy	Typhus Fever
Malignant Pustule	Varicella
Measles	Whooping Cough
Ophthalmia Neonatorum	Yellow Fever
Scarlet Fever	

Boards of Health throughout the Commonwealth have since March, 1892 taken care of and provided for diphtheria and scarlet fever cases and for many years prior to 1892 such boards had sole charge of small pox cases, to their care are added by act of Legislature, tuberculosis or consumption a leader among diseases and typhoid fever also a leader in hospitals.

Cities and towns may recover from other cities and towns as under the settlement laws, settlement to be determined by the Overseers of the Poor but no person for whose care and maintenance a city or town or the Commonwealth has incurred expense in consequence of any disease dangerous to the public health shall be deemed a pauper by reason of such expenditures. The effect of this latest legislation to abolish the word "pauperism" is to make distinction without a difference. A person sick with consumption or typhoid fever and treated at a hospital at public expense is not pauperized. In the next bed is a person sick with pneumonia or peritonitis or any other disease treated at the hospital and at public expense and that person is pauperized.

A consumptive is a Board of Health case, a man with pneumonia is an Overseer of the Poor case. The former must be treated in a hospital for if given care and attendance in an almshouse he will be pauperized then later may be a poor house case.

Again, the head of a family is in his home sick with consumption. If aided it must be by and at the expense of the Board of Health. If the wife and children require public aid it must be given by and at the expense of the Overseers of the Poor. The head of the family is not pauperized. the wife and children are pauperized. Two sets of public officials must attend to the needs of one family.

During the last part of the year we have received from the State Board of Health the names of persons arriving from foreign countries infected with Cholera and landed either in New York or Boston with their destination Maynard, with some difficulty those parties were found and examined by our Board physician.

Number of contagious diseases reported.

Scarlet Fever	4	deaths	1
Typhoid Fever	6	no deaths	
Measles	6	no deaths	
Diphtheria	1	no deaths	
Tuberculosis	7	deaths	4
		1 case not reported

REPORT OF THE TRUSTEES OF PUBLIC  
LIBRARY FOR YEAR ENDING  
MARCH 1st, 1911.

---

We herewith submit the following:—

Circulating Books, March 1st, 1910	4,955
Less sold or worn out	42
	<hr/>
	4,913
New Books bought during the year	163
	<hr/>
Total Circulating Books	5,076

There were 29 new books bought to replace worn out ones.

Public documents and pamphlets received during the year, 35.

All books are in good condition and the room is kept in first-class order. The reading tables seem to meet with popular favor, and there is a fine line of the current magazines on hand.

We recommend an appropriation of \$500.00 and the Dog Tax for the incoming year.

We are indebted to the Librarian for the tidy appearance of the room and the goods kept therein.

Following is the financial report:—

REPORT OF BOARD OF FIRE ENGINEERS.

---

To the Board of Selectmen:

Gentlemen:—The annual report of this department is herewith submitted.

We are again able to report a continuation of the immunity from serious fires that has obtained the past few years. Taking into consideration the great number of frame buildings and our mixed population, this surely is a matter of sincere congratulation.

We must repeat our recommendation of last year, as to the need of a new Hook and Ladder truck. The present one is absolutely unsafe and should be replaced. The committee appointed at the last March meeting reported in April that a new truck should be purchased. This report was tabled, without argument, but we must insist that the responsibility for accidents, if any, shall not be on the Engineers.

During the year we purchased 1,100 feet of new hose, agreeable to the vote of the town in April. We were able to secure 1,100 feet, instead of the 1,000 feet figured on.

We have also added four protective blankets, such as are used in the Boston Protective Department, to be used at fires to protect furniture or merchandise from water damage.

The appropriation of \$3,000.00 is recommended for maintenance for the ensuing year.

Respectfully,

ARTHUR J. COUGHLAN,

C. F. CAHILL,

T. A. SWEENEY,

Board of Fire Engineers.

## ASSESSORS' REPORT

---

For the year ending February 1, 1911.

The Assessors have this year made a general revaluation of land, endeavoring to equalize values according to streets and locations. That the changes made, have been satisfactory to the tax-payer, is evident from the fact that no complaints have been made as to land valuation.

That there are some inequalities in the valuation of buildings is apparent.

The present year the Assessors will give special attention to valuation of buildings endeavoring so far as possible to make the distribution of taxation just and equitable.

The Town recently voted to have a plan of the land of the town, made for the use of the Assessors. Owners of land who have correct plans, will lessen the cost and labor of this work, by allowing the Assessors to have a copy made of their plans.

The responsibility for the rate of taxation rests upon the Voters. The amount of money appropriated determines the rate of taxes.

### TABLE OF AGGREGATES

## REPORT OF OVERSEERS OF THE POOR.

---

To the Selectmen of Maynard:—

Gentlemen,—The annual report of the Overseers of the Poor for the year ending Jan. 31, 1911, is herewith submitted:

The year just closed has proved itself a strenuous one in this department. The business depression of the two previous years continued to make itself felt during the past year and the calls on this department have been materially increased, and it was at once seen that only by the greatest care could our books be kept clear of those unworthy cases that would endeavor to take advantage of the prevailing business conditions to secure unnecessary public aid. In such cases it takes just as much and sometimes more thought, time and care in investigating and declining to give aid, than it does to allow it.

The poor we have always with us. Through hard times, through physical accidents, through sickness, they lose their grip on life and imperceptibly slip beyond the line of self support. The question should not be how will we get rid of them, at the lowest cost and with the least trouble but how can we best care for them with the best results for themselves and others.

The Town Farm and Almshouse still continue under the same care and successful management of Mr. and Mrs. A. O. Dunham, who have proved themselves to be "the right people in the right place," and have kept the farm and buildings in the best possible condition.

We also desire to call to your attention an Act of the Legislature of 1910, Chap. 412. An Act relative to Annual and other reports of city and town officials.

Be it enacted, etc. as follows:

Section 1. No city or town, and no department or official of any city or town in this Commonwealth, shall publish in any annual or other report for general distribution to the public, or to the citizens of any city or town, the names of persons assisted in any way by the poor department of any city or town, or the names of any persons receiving aid under the provisions of chapter seventy-nine of the Revised Laws and Acts in Amendments thereof and in addition thereto, residing in such city or town.

Section 2. This act shall take effect upon its passage.

(Approved April 16, 1910.)

#### TOWN FARM AND ALMSHOUSE.

Paid	A. O. Dunham, salary,	\$500.00
	A. O. Dunham, supplies,	12.02
	E. Henderson & Co., fuel,	59.25

## AUDITORS' REPORT.

---

Maynard, Mass., Feb. 11, 1911.

To the Board of Selectmen:

We hereby certify that we have examined the accounts of the following town officers and find them correct: Selectmen, Treasurer, Tax Collector, School Committee, Trustees of Public Library, Water Commissioners, Water Registrar, Water Sinking Fund Commissioners, Overseers of the Poor, Town Clerk dog account, Cemetery Commissioners, and Board of Health. We have adopted plan, inaugurated last year, of mailing a notice to all persons whose names appear on the lists of unpaid taxes or unpaid water rates, stating the amount charged to them, and requesting a reply if any error is shown in the amount.

ALEXANDER PETTIGREW,  
KENNETH H. DAMREN,

Auditors.

Total uncollected,	\$6,582 01	

Respectfully submitted,  
 GEORGE N. SALISBURY,  
 Collector of Taxes.

REPORT OF WATER COMMISSIONERS.

---

To the Selectmen:—

We herewith submit the report of the Water Commissioners, including the reports of the Superintendent, the Engineer, the Water Registrar and the Sinking Fund Commissioners.

The committee appointed at the March Meeting to act in conjunction with the Commissioners in investigating the condition of the conduit line, after consultation with the State Board of Health procured Mr. Lewis D. Thorpe, Engineer, to go over the line and make measurements of the water supply at the different chimneys, after which he was requested to make surveys and plans, and give an estimated cost of construction of a new 12 in. line from the receiving well to chimney 2a., and we herewith submit his report on same.

Mr. Thorpe's report:—

The following are the results of the measurements taken at Maynard.

at chimney No. 1	270,000 gallons per day
at chimney No. 2	300,000 gallons per day.
at chimney 2A	450,000 gallons per day
at chimney No. 3	475,000 gallons per day.

I am strongly of the opinion that if the new cast iron pipe line is laid from a point near the pumping station to chimney No. 2A you will secure a supply of water of from 400,000 to 450,000 gallons at all times. It does not seem to me policy to run much beyond No. 2A at present as there

is such a slight difference in flow between chimneys No. 2A and No. 3.

I estimate the total cost of constructing the above line, exclusive of the cost of pipe which you now have on hand, at the sum of \$2,567.40.

### MAINTENANCE.

From February 1, 1910 to February 1, 1911.

## SUPERINTENDENT'S REPORT.

---

To the Board of Water Commissioners:

Gentlemen: My report as superintendent and registrar, together with the report of the engineer, for the year ending January 31, 1911, is herewith submitted.

### Source of Supply.

The year just closed has been the driest year since the works were built and the water in the pond reached a lower level than ever before. The water was about two feet over the pipe last spring but has gradually receded till the high point in the pipe is about eight inches out of water.

### Conduit Line and Receiving Wells

This line is in the same condition as has been reported from year to year.

A leak in a joint was fixed up during the summer and the lower part of the line was cleaned out.

It will be necessary in a short time to plaster the walls of the round well as the bricks are chipping off under the action of the water and frost.

### Reservoir.

No work has been done at the reservoir except to burn it over and cut the grass.

The leak which was discovered some time ago does not seem to increase any and it does not seem wise to do anything more about it unless it should increase in flow.

## Mains

The leaks which have been repaired in the mains are; one on High St., where a joint was leaking; one under the Sudbury St. bridge where a joint was leaking; one on Great Road near the double house owned by W. H. Eveleth where a six inch pipe cracked open, and the one on Waltham St. near the residence of Wm. Barns where a pipe was cracked.

The following extensions have been made:

	Distance	Size	Valves	Hydrants
Haynes Street	130 feet	1¼ inch	1	
Summer Street	212	2		
Great Road	1019	6	1	2
Great Road	707	6	2	1
Lincoln Street	24	6		
Elmwood Street	140	4	1	
Bates Avenue	159	4	1	

---

2391

On Great Road the pipe is now at the town line. All of these mains were laid to supply new houses.

## Services.

Leaks have been repaired in seven services. Fifteen services have been cleaned out and one has been renewed from the street line to the cellar.

Number of taps for new services,	28
Number of taps reported last year	897
	<hr/>
	925
Number discontinued,	1
	<hr/>
Number of taps now in use,	924

## Meters.

The meters which have been purchased this year are of a new pattern and are supposed to drain when the water is turned off.

Thirty-six additional meters have been set this year; making the number in use 929. About 100 meters have been changed for repairs.

#### Hydrants and Valves.

Three new hydrants have been set, all in the new extensions.

Valves have been placed on all new extensions and a valve was placed on Dewey St., corner of Great Road. New stems were put in on the valve at the corner of Acton and Walcott streets and the one at the corner of Concord and Tremont streets.

#### Recommendation.

I recommend that two thousand feet of iron pipe be laid on the conduit line and that the plan of Engineer L. D. Thorpe to be followed. Gentlemen I wish to thank you for your kind co-operation during the year.

Respectfully submitted,

WILLIAM NAYLOR,  
Superintendent.

## ENGINEER'S REPORT.

---

To the superintendent:

Sir:—No changes have been made to the machinery during the year and only minor repairs has been made. The pumps in general are in fair condition.

The boilers and all their fixtures are in the very best condition. During the year the fire box walls in No. 1 and the bridge wall on No. 2 have been rebuilt. The blow-off cocks on both boilers have been changed to comply with the state laws.

The supplies on hand Feb. 1, 1911 are:—30 tons of coal, 40 gallons of cylinder oil, 1-2 barrel of grease, 25 pounds of packing, 80 pounds cotton waste and 25 pounds of soda.

## PUMPING RECORD.

	Coal	Gallon	Daily Aver.
February	29,195	6,461,991	230,785
March	29,050	6,414,147	206,907
April	27,800	6,206,139	206,871
May	31,380	7,019,244	226,427
June	29,555	7,016,247	233,874
July	32,885	7,812,990	252,031
August	31,310	7,193,934	232,062
September	30,110	7,020,270	234,009
October	31,635	7,129,863	229,995
November	30,840	6,980,823	232,694
December	33,685	7,225,200	233,070
January	34,130	7,553,061	243,647
	<hr/> 371,575	<hr/> 84,033,909	

Average daily consumption, 230,229 gallons.

Average daily consumption for each person, figured on  
5,500 consumers 41.9 gallons.

The coal consumption includes banking and starting  
fires.

Respectfully submitted,

STEPHEN BEATON,

Engineer.

### STORM SIGNALS FOR OUR SCHOOLS.

2 blasts for 1st four grades.

3 blasts for 1st eight grades.

4 blasts for entire system.

Blown at 7.30 and 11.30 respectively.

## REPORT OF SCHOOL COMMITTEE.

---

To the Citizens of Maynard:

In submitting the report of the School Committee to the citizens of the town, the committee believe the standard of the Maynard schools was never better than at the present time. This condition we believe due to the success of our Superintendent and the co-operation of the teachers.

We have been unfortunate during the past year in losing many of our teachers, who were lured away by larger salaries to larger communities. Miss Warren and Miss Bagster resigned in June, and were succeeded by Miss Fletcher and Miss Wheeler. In September, Miss Doherty resigned, to go to Woburn, and was succeeded by Miss McClellen, who was with us six weeks and resigned to go to New York City. She was succeeded by Miss McLaughlin. Miss Myrick resigned to go to Chelsea, and was succeeded by Miss Bateman. Miss Crowell resigned to take up charitable work in Boston, and was followed by Miss Schwartz. Miss Ware resigned on account of poor health, and was succeeded by Miss Corey.

In September we were surprised by an enrolment of two hundred pupils in the first grade, which made the four first grades too large, and Miss Pearley was added to the teaching force at this time.

The last year the partition between the 8th and 9th grade rooms was removed, making one large room for the High School, which now occupies all the second floor but one room. All the rooms in the Nason Street building were tinted and varnished, at an expense of three hundred

and fifty-six dollars. The coming year the High School Hall will need to be tinted and varnished; more skylight is needed in the rooms adjoining the hall and new curtains in the High School rooms and hall will be needed.

We have used part of our appropriation the past year in furnishing the new rooms in the Bancroft Street building, which were not furnished by the building committee. We furnished desks and chairs for the four rooms, also curtains, desks and closets. We also built a supply room in the basement. The electric wiring was condemned, and will have to be attended to, and the bells and fixtures completed. We also had an expense in plumbing.

The Main Street building is still in good repair.

During the past year a law has come into effect prohibiting public drinking cups. This means that we must equip all the buildings with sanitary drinking fountains. At present the children are asked to bring their own drinking cups, but this is not satisfactory, as they borrow and lend to each other.

The past year we have had an appropriation of twenty-five thousand dollars, and at the end of the year there was a shortage of about fourteen hundred (1,400) dollars, which we account for in the following manner:

We carried unpaid bills to the amount of five hundred dollars from last year. In September we had to have one more teacher, owing to the large enrolment when school began. We made permanent repairs in the Nason Street and Bancroft buildings. We had the new rooms in the Bancroft building to furnish and complete, which was left us by the building committee. We also had the insurance on two buildings to pay, amounting to two hundred and eighty-four dollars, which have previously been paid by the Selectmen.

The committee feels confident that it has conducted the affairs of the schools during the past year in a most

economical manner, and for the best interest of the town, and with an appropriation of twenty-five thousand dollars for the coming year, we feel sure there will be no unpaid bills at the end of the year.

## MEDICAL INSPECTOR'S REPORT.

---

To Superintendent and School Committee:

During the last half century civilization, in all its phases, has made most prodigious strides, no factor of which, however, has been more pronounced than that of education. What, in the days of our forefathers, were considered hardships and trials, are, at the present time, looked upon with pleasure, and the days of yore, with their cold, cheerless, inadequate and poorly ventilated school-rooms, are dreams of the past.

How are we to account for this radical change? Simply for the reason that, with the steady and general progress of civilization, we have come to know that book-learning is not the only essential factor of education, but that other and more important adjuncts are fully as requisite for the furtherance of that aim.

We now know that without a sound body, there can be no such thing as a strong mind, and with this accumulated knowledge, the trend and bent of the State and local school boards, of school supervision, has been to cultivate the body as well as the mind.

Laws are in vogue, in nearly all the States of the Union, and it is only the matter of a little time before the same becomes universal, that there shall be medical supervision of every pupil, from the time he or she enters the lower grades, until the course of study is completed, and even at this latter period the responsibility does not entirely cease, for it is requisite that every applicant for positions

in mills and factories shall be pronounced physically sound before such a one can obtain an employment certificate.

In this way the powers that be are endeavoring to mould the bodies of the young, in the hope that future generations may be in marked contrast with those of the present day, with its disease, contagion and ill-health.

It is the province of every medical inspector or supervisor not only to see to it that the sanitary conditions are perfect, for therein lies one of the greatest boons to good health, but, with the hearty co-operation of parents and guardians, to remedy such defects as impaired hearing and defective vision, enlarged tonsils and adenoids, both of which are among the greatest causes of a child's supposed stupidity, and the many other ailments which mortals are heir to.

Advice and counsel must be given concerning uncleanness, mal-nutrition, loathsome sores, and skin diseases, of various characters, which in themselves, although not contagious, detract from the welfare of the schools, which advice, if carried out, cannot but result in more active intellects and keener perceptions.

Your Medical Inspector congratulates not only the School Board, but the Town of Maynard as well, upon the fact that not only has the amount of sickness been greatly minimized during the past year, but that there has been an entire lack of anything of an epidemic or contagious nature, which is the more remarkable when our cosmopolitan population is taken into consideration.

With the hearty co-operation of your excellent corps of teachers, who have made tests for hearing and vision, with the result that seventy-seven were found to have defective vision, while thirty had impaired hearing, the parents or guardians being notified to that effect, I have had general supervision of between 800 and 900 pupils, among whom I have found but a remarkably few number

of ailments, which, if treated properly, could not but result in a betterment of the afflicted's condition.

Such ailments I will not enumerate, as statistics are tiresome, especially when referring to combative features to our happiness and health.

The sanitary arrangements of our school buildings are all that is desired, with possibly the exception of the Nason Street building, where the installation of an electric motor to operate the fan in the basement would be productive of better ventilation, and consequently brighter spirits.

In conclusion, I would make reference to the kind and generous services of Mr. H. P. N. Dahl, who, without any recompense, has examined all cases of defective vision, of those who would avail themselves of the opportunity, and not only prescribed for them, but also prepared a succinct and tabulated report of each case, the publishing of which space will not permit, but which have been carefully filed away for future reference.

Let this good work continue, and let every one put his shoulder to the wheel, not mindful of the benefit which may accrue to himself, but of the good he can do to humanity and his neighbor as well.

Especially would I express thanks to the Superintendent of our schools, Mr. Brick, and to the teachers of the different schools, who have been most energetic in furthering this good work, and to the parents and guardians for their endeavors to bring about the happiness and welfare not only of the schools, but that of the entire community as well.

Respectfully submitted,

DANIEL GOODENOW, M. D.

## REPORT OF SUPERINTENDENT OF SCHOOLS.

---

To the School Committee of Maynard, Mass.:

Gentlemen:—I have the honor of submitting the report of the School Department for the year ending Jan. 1, 1911. This is the third report of the present administration, and as such it may be well to survey the past two and one-half years to see wherein we have progressed and wherein we have failed.

As I said in my first report, the present administration inherited from the past a most excellent foundation, and as time goes on I am more convinced of this than ever. The beginnings of a radical departure in school affairs is always fraught with difficulties, and the first Superintendent is the real pioneer in any school system, and necessarily bears many burdens which disappear with the advance of time. The present administration, therefore, is fully alive to the debt it owes to the past.

This statement is made here in order that any criticism made in this or any report may not be misapplied to the past by the uninitiated. Any criticisms made here or elsewhere are applicable only to the present, in order that failures may be corrected and more progress made in the future.

The elevation of the grade work has been one of our chief aims. In this we have been but partially successful. Our grade standard should still be higher than it is. This fact is shown in the condition in the classes which enter

the sub-freshman or 9th class in the High School, and in the number of pupils left over as repeaters in the various grades.

The causes are numerous, some of which are purely local and some are constitutional. Among them are (1) our shifting population, (2) the undeveloped condition of many of our children who enter the first grade, (3) the changes in our teaching force during the year, and (4) the fact that knowledge rather than power has been the chief factor of our teaching.

The first is unavoidable. The second can be avoided by raising the age limit and by refusing to promote to the second grade those who are not strong and well up to grade standard. The third, like the first, is unavoidable. So long as we have desirable teachers, there will be other towns who will want them and can offer them better inducements. It has always been the policy of your present Superintendent to encourage superior work, with the prospect of growth in a larger and more lucrative field, but he has no sympathy and little patience with the class of teachers who use any field as a stepping stone during the first year of service in that field. As to the fourth element of failure, I believe that this year will see a decided change in this respect.

This is the first year that the present administration has had a clear field, with no crowded conditions and no buildings torn up. The teachers are working for development and power in their pupils as much as for knowledge.

### THE COURSE OF STUDY.

As yet no course of study has been formulated, the work being carried on by detailed outlines and the monthly grade meetings. Twice during the past two years your Superintendent has attempted to formulate a course, but

the shifting conditions, both local and otherwise, have prevented him from carrying it to completion.

A course of study should be made for a series of years, and in order to be effective, the educational situation should be fairly stable. This can hardly be said to be the condition at the present time. There are so many "isms" abroad that it is difficult for one to know what and what not to teach and how much.

This is especially true when applied to a community like ours. We have two classes of children to educate for life,—(1) those who from the sheer force of circumstances drop out as soon as the age limit is reached and must be equipped in a limited way to earn their livelihood, and (2) those who remain longer with us and enter the secondary or High School work. It would seem at first glance that two definite and distinct courses of study are needed, but this is impossible. There is a very decided tendency to meet the situation in the following manner:

First. To limit the elementary course to eight years.

Second. To arrange the course in two parts. Part

I. To include all grade groups up to and including grade VI.

Part II. To cover grades VII and VIII, to carry the work along in two divisions and to differentiate the work in the various divisions.

I am positive that the work of the elementary schools can be done in eight years, if we can wholly eliminate from the second grade those who are undeveloped and immature. The same is true with regard to the ninth grade or sub-freshman year. I think that this year can in time be dropped from the curriculum if we train our children for power and promote only those to the High School who can stand the rigid work of the High School. Certainly, experience in the past two years has demonstrated the fact that those in the High School who have dropped out are

those who have gone forward on trial or on condition, and who have been of doubtful power and training.

With reference to the elevation of the graded standard and the difficulties pertaining thereto, the following conditions may throw light on some of the problems with which we are struggling.

### ELEVATION OF SCHOOL STANDARDS.

In all of the primary grades to the fourth, inclusive, each respective school is divided into three divisions: A, B, C. These groups are divided according to power and ability to do the work, and in almost every case the A and C divisions are nearly half a year apart in the curriculum. The grouping is made so that, as far as possible, each type of pupil may be allowed to advance as rapidly as possible without being handicapped by the slower ones. In nearly all cases the C division in one grade is but little in advance of the A division in the preceding grade. Thus, it is very often a fact that the third grade is doing work with its C division that is nearly identical with the advance division of the second grade. The elimination of this third division is one of our greatest problems and is a problem of the ages.

The causes of this third division are many:—

It is generally made up of pupils who are promoted on condition, augmented by those who are irregular in attendance for various causes; and by those who are physically weak and whose life is such as to render them slow.

This is the group that recruits that vast army of retarded ones of whom I wrote in my report last year.

### HIGH SCHOOL PROBLEM.

The decreasing enrolment in the High School and the attending lethargy is a situation that is a cause for considerable anxiety as to the outcome.

The teaching is good, the faithfulness and industry of the teachers is strong, but we are failing to hold our numbers. It is possible that the better preparation of our incoming classes will correct this in a measure. We are striving hard to improve each incoming class over the preceding one, and in this, I believe we are succeeding. But we must improve the quality of our teaching. Book knowledge is no longer sufficient. The ability to pass a test in mere knowledge is no longer sufficient to insure success in the High School. We must aim to mature our children in thinking power, in judgment and in the earnest interest in educational pursuits before they reach the High School.

"Formalized methods of instruction and a lack of sympathetic understanding of the peculiarities in temperament, mental equipment and environment of the dullard and the delinquent will continue as they have in the past to send them to the waste pile of life, carrying with them undeveloped rich assets in skill and talent and character."

Children with quick memories by repeating such abstractions glibly often measure up to the tests laid down for promotion, and pass from the schools unretarded only to find themselves, in after life, without any power to either recall or apply them. Those without quick memories fail of promotion, waste their days in the hopeless attempt to profit by instruction that seems unable to substitute substance for shadow and at the earliest opportunity pass into life branded as failures, discouraged and intimidated.

But what of those who enter properly equipped and fail to maintain enough interest to remain to complete the course? When a High School with a strong teaching force and a strong equipment fails to hold its members, and that too with the total enrollment of the system on the increase, it is a fair conclusion that the curriculum does not meet the demands either in quality or in kind. In a recent visit of the State Agent a sharp criticism on our course of study was made to the effect that there should be less fitting for

college and more of the studies that would fit for life; an extended course in practical English through convenient forms, a knowledge of everyday business methods and a daily use of the typewriter was recommended. This would not mean to supplant the work already there, but it would tend to give it a practical trend and vitalize the whole course with interest to the pupils. It would seem therefore course with interest to the pupils. It would tend to give that a revision of the entire course was necessary.

### INDUSTRIAL EDUCATION.

Industrial education has taken a firm hold on the mind of educators during the past five years. We have arrived at the point where we must admit that our schools everywhere do not educate as they should. A broader education is demanded; not one that will misplace the present culture tendency, but will augment it and make it more effective. The day is not far distant when every child above the sixth grade will receive as a part of his or her education some training along industrial lines as a part of each day's work.

Chas. A. Prosser, Deputy Commissioner of Education for Massachusetts, in a recent address crystalizes the situation as follows:

"A conservative estimate would be that every year in the state of Massachusetts from 25,000 to 30,000 boys and girls on reaching the age of fourteen leave the schools and go to work. This army is four times as large as the group which at approximately the same age enters the high school. Only one out of every six of these children of tender years taking up some wage-earning occupation have reached the eighth year or grade of the elementary schools; only one of every four has attained the seventh year; only one out of every two the sixth year. The record of the commonwealth in the matter of the retardation of pupils

and their survival for high school and college careers is probably as good or better than that of any other state.

The question as to whether the public schools, as at present constituted, are providing proper educational facilities for the pupil who goes to work at fourteen, divides itself naturally into these questions: (1) Are the schools giving such children in the years preceding their fifteenth birthday the training that is best for them? (2) Do the schools offer such children the opportunity to secure the training that would be best for them in the years following their fifteenth birthday? This discussion addresses itself to the first of these two issues.

That this deplorable retardation, which is country wide, constitutes a serious handicap to the children entering industrial life, as soon as they have passed beyond the control of the compulsory education law, will be admitted without debate. Much of the failure of such children to advance in their school work cannot justly be laid at the door of the schools themselves. In too many instances biological inheritance has transmitted to them from an unworthy ancestry a mental equipment in the face of which the best teaching stands helpless. Sickness and poverty and broken homes and an evil environment have brought irregular attendance, truancy, arrested development, indifference and delinquency. For these causes of retardation the home and the social order are to a large extent responsible.

It seems equally certain that for the future at least the schools cannot escape the responsibility for the inadequate preparation with which many children fourteen years of age enter upon industrial careers. Hard and fast systems of gradation and promotion will continue as they have in the past, to waste the time of so-called backward children in the profitless repetition of work for which they have neither taste nor ability, shut them off from large development in the fields for which they display aptitude and bury in the grind of a rigid educational process latent

possibilities which we have neither appreciated nor understood."

A narrow course of study offering only academic instruction along time-honored lines, affords but little aid in the solution of this problem, particularly in the case of the boy or the girl who has not been very successful with the things of the book. In the simpler life of fifty years ago children were tested by their active contact with a simple, but diversified life experience. The farmer and the artisan in his home shop came to know the interests and the aptitudes of his offspring. Practical activities in the schools will afford, to a large extent, at least, the same opportunity to the school authorities.

Manual activities in the lower grades will serve as a basis of right teaching; in the upper grades they will serve the additional aim of vocational direction. In the upper grades of the elementary schools, beginning with the seventh grade, the children might well take certain studies together, differentiating so far as facilities will permit in others.

Girls returning home to mother at fourteen might well take the rich courses in domestic science and art, first aid to injured, sanitation and hygiene.

Boys expecting to enter upon business life at fourteen should be offered opportunity for training in commercial arithmetic, commercial geography and the keeping of simple accounts. Boys entering industrial life at fourteen or who expect to attend industrial schools, should have rich courses in mechanical drawing, manual training, industrial geography and arithmetic.

In these grades under careful direction each would find his bent and tendency. Such courses would place in the hands of the school authorities information on the basis of which wise vocational direction could be given.

No one has yet been able to measure the psychological

and moral effect upon the child of the consciousness of failure or success in his school career.

The industrial and trade schools of this and other states appeal strongly to the boys and girls who are markedly concrete or motor minded. Some of these schools, notably those of Massachusetts, open their doors to such pupils when they become fourteen years of age and set up as the sole entrance requirement that they shall prove by their work an ability to profit by the instruction offered. In such schools the shopwork which occupies about 50 per cent. of the time of the pupils supplies the concrete experience out of which the problems in shop mathematics, shop science, shop drawing, and shop English grows. Practice and thinking about the practice go hand in hand. The experience of these schools proves conclusively that many boys and girls who have been unable to master principles and theories as taught by the ordinary method of the book have a large power of doing so when these are approached through illustration and observation and motor activity; and that best of all, they possess large capacity to retain and apply knowledge so taught and so comprehended.

All this is but saying in other words that if we wish to reduce the waste pile of retarded children we must remember that the normal child, however capable, is concrete and motor minded; that he grasps principles and theories in proportion as previous training has given him an apperceptive basis of concrete experience involving them; and that in all our schoolroom processes we need, in so far as circumstances will permit, to substitute the real for the unreal, the experience for the summary of the experience, the substance for the shadow, life for the book.

The book has its place, but it is occupying too dominant a place in the American schools. It should suggest and direct and summarize knowledge and its application, but it ought not to dominate the method of the school and shut both teacher and pupil off from that contact with life

by which, in every instance, like Anteus of old, they gain interest and apperception; insight and mental vigor.

There is even more need today than formerly for concrete as set over against abstract teaching in the schools. In the simpler conditions of farm and village life that obtained a quarter of a century ago boys and girls were brought into intimate motor contact with many life experiences of which the town and city child knows nothing. These experiences gave such children an apperceptive basis for the work of the schoolroom, for which thus far we have not been able to supply an effective substitute. Hence, the demand today for the introduction of some of the practical activities of life in simple form into the elementary schools.

Among the activities found available for this purpose are weaving, knitting, sewing, cooking, simple accounting, woodworking and metal working. Such activities, if taught aright, will give much of the life experience through which the pupil of more primitive days brought to his studies a background of concrete knowledge that aided measurably in the mastery of rules and principles and theories.

To do this, however, it is necessary (1) that such practical activities shall be so closely connected with the other work of the school that it may constitute to a considerable extent the basis of teaching from which the motor minded at least may approach with interest and understanding the so-called regular fundamental studies of arithmetic, reading, spelling, language, geography, etc. (2) These activities must not be formalized in the schoolroom, but kept real.

To do this they must grow out of the home and shop situation, be carried on, in so far as the school facilities can be made to permit, as they are carried on in real life, and send the children to home and shop situations to fix there by further application principles and skill bestowed in the schoolroom.

There are other reasons equally potent for the introduction of training in the domestic and manual activities into the educational processes. Such training will give an elementary skill in the use of home and shop implements and appliances which the average child cannot acquire elsewhere, and without which he is handicapped in the game of life.

Such training gives the child contact and insight, not to be gained otherwise, into the work and the problems of the worker and the artisan that will measurably increase the fund of social understanding and social sympathy in the future days of this people. Such training is within itself as much and probably more educative than the academic instruction of the book. Such training gives a considerable body of insight and skill to many who leave the elementary schools at fourteen.

It seems probable that manual training in the upper grades of the elementary school is destined to serve as preliminary vocational training for boys electing to enter industrial schools at fourteen and that training in the household arts of cooking and the needle will give basic skill to girls desiring to attend such schools in order to fit themselves for the needlework trades. For them instruction in household arts will aid measurably when in later years they leave the shop to take upon themselves the responsibility of home-makers.

The schools are awakening to the need of vocational direction for boys and girls making the choice of a future career at the age of fourteen. Massachusetts seems destined to lead in the development of this work. The leaders in this movement realize keenly that a scheme of vocational direction cannot render the largest service until the schools develop some method of ascertaining what are the interests and the aptitudes of such children.

## INDUSTRIAL WORK IN MAYNARD.

For the purpose of developing power and skill in the pupils, an attempt has been made to extend the industrial work (which was begun in the primary grades) through the entire system to the High School. The details of this work are given below.

I am positive, however, that this work ought to be projected into the High School, and could be done so with profit. Many schools have established a printing plant which does all the printing of the department, and so pays a good profit on the money invested. The same may be said of book binding. A course of carpentry is in operation in many schools, and if such a course could be established here in our High School, it would hold many pupils who now drop out.

A semi-commercial course might be established in the sub-freshman year to extend, if necessary, into the freshman year. This course would consist of a year's work in practical book-keeping and business forms, training in letter writing, spelling and punctual daily work in English composition. The use of the typewriter would tend to crystalize this work and make it interesting. All this would in no way interfere with the culture work in the school, but would rather crystalize it into definite results. Culture in the abstract is one thing, but culture in the concrete, through actual operation, through doing things, through industry is quite another.

## INDUSTRIAL COURSE.

Grade I.

Subject:—

Paper Cutting and Folding.

Application:—

Much of this work is done in correlation with Race teaching and in recognition of special events, flag days,

holidays, etc. It is done by the use of hektographed patterns or free hand.

## Grade II.

Subject:—

Weaving.

Application:—

Dolls' clothing and articles in which the children are interested. Toy rugs and hammocks are made on rectangular looms. Dolls' caps, tamoshanters, bags, coats, skirts, etc., are made on shaped cardboard looms. The work is introduced by simple over and under weaving by use of splints with oil cloth mats or paper mats and weaver strips cut by the children.

In one room much interest has been taken in braiding raffia and sewing the braids into dolls' hats and small baskets.

## Grade III.

Subject:—

Weaving.

Application:—

In this and all following grades the work done is set up by the children, and carried through by them to the finished article. It is introduced by weaving a paper mat of the child's own cutting, that is followed by weaving a circular raffia mat, small circular tops for pen wipers, etc. Raffia winding of napkin rings, picture frames, pin balls, pen wiper tops, brush and broom holders, etc., with weaving in designs is of interest.

## Grades IV and V.

Subject:—

Paper and Cardboard Construction:

Application:—

Boxes are taken first. The work is dictated by the children in the first exercises, which are done by all to-

gether. These are followed by individual exercises, the size of the box being left to each child to decide for himself or in dictation to be worked out alone by each. The cover is sometimes stated, often left to the child to be hinged on, removable, shallow or deep, or a slide cover just as he chooses.

Then comes entirely original work, tables, chairs, stools, sleds or any problems the child fancies or suggests.

#### Grade VI.

Subject:—

Basketry.

Application:—

Sewed baskets, tied raffia. Some excellent results have been produced. This is slow work, and much time out of school has been spent upon it.

#### Grades VII and VIII.

Subject:—

Caning of chairs, book binding and sewing.

Application:—

Repairing of chair seats. The chairs are brought from home. Two boys work together on a chair. Much interest has been taken in this work.

Book binding will of necessity be applied to simple problems, and small books, as we have not the equipment for advanced work.

While the boys of these two grades are engaged in the above work the girls are taught sewing by the regular teachers of these grades.

#### THE LIBRARY AND SCHOOL.

One of the things that is lacking for the development of the children in our upper grades and in our High School is suitable library facilities.

We have a small reference library in the High School, but it is out of date, and the regular appropriation does not admit of replenishing it from our regular funds. Consequently the schools today, both High and Grammar, stand without library facilities to stimulate special outside study. A remedy for this is close at hand, if we would apply it.

The Public Library could come to the aid of the school by supplementing the work of the school in the following ways:—

1. By loaning teachers books for personal study, on special cards. Many of our teachers now go out of town for this advantage.
2. By having a reference corner in the library available with suitable reference books under supervision of the librarian within the reach of the children. If a part of the money spent now for fiction could be spent for reference books for the children, it would do a great deal to supplement the education system.
3. Frequent bulletins posted or sent out throughout the schools by the library, indicating the desirable list of books for children of certain ages and grades.
4. If a reference corner were in existence in the Public Library, the High School classes might receive instruction in the use of reference books. This is a skill that many of us need and comparatively few of us possess or acquire.
5. A small number of desirable books could be placed in various grades for a limited time under the care of the teacher to influence children toward the reading habit and away from the cheap literature of the day. The schools would welcome any help on the part of the Public Library to supplement our work.

## HABIT, HYGIENE AND HEALTH.

In connection with the lessons for teaching physiology in the Public Schools, I desire to say that a ceaseless fight is being waged through our schools for Habit and Health.

A greater gain could be made in the upper grades toward more vigorous bodies, more manly and womanly bearing, to say nothing of increased vigor, if some form of military drill was made compulsory in our Grammar and High School.

## CONCLUSION.

I present herewith the reports of the High School department and the department of drawing for your consideration. The Supervisor of Music having recently resigned before submitting any report, your Superintendent is unable to present any report of this department.

Your Superintendent desires to express his appreciation to the corps of teachers for their faithfulness and to your committee for whatever courtesy and support he may have received.

FRANCIS S. BRICK,  
Superintendent.

\* Principal.

## REPORT OF THE PRINCIPAL OF THE HIGH SCHOOL.

---

To the Superintendent and School Committee of the Town of Maynard:

The present enrollment of the High School is 90.

The proportion of boys and girls is normal, the percentage being 41 per cent. and 58 per cent. respectively. Owing to an unusually small entering class (27), as compared with the year before (45), the total enrollment is less. The large incoming class of next year we hope will replace this loss. The drop in membership apart from this, while larger than desirable, has been mainly from the lower classes, the upper classes changing little.

To hold the membership of the entering classes is, therefore, the critical question. The opposing forces are the attractions of a position that shall have money value, the feeling that High School studies do not necessarily produce money-getting power and the lack of means or desire to complete an education. To the first we can only say that it is the parents' choice of the present as against the future. To the second there is the reply that the High School is not and cannot afford to be a trade school. It offers, however, such work as must increase power and efficiency in future careers and the courses are being steadily reorganized to meet that end. Third, it is manifestly unfortunate that a pupil be deprived of a partial education because he cannot take a college course. It is for this majority who will not take college work that the school ex-

ists, rather than for the smaller number who can go farther. And any disposition on a pupil's part to drop his work in part or move along the line of least resistance should be resisted by both parent and teacher.

The following changes have been made in the course of study since last year. In the 9th grade there has been introduced as an alternative to Latin, which now extends throughout the year, a half year of Concrete Geometry, followed by a half year of Bookkeeping. The Concrete Geometry has been in an experimental stage this year. The aim is to train the pupil in the measuring of familiar surfaces and solids, estimating areas and volumes from direct measurement and reducing to scale. Throughout the course the underlying geometric facts have been noted, but the course is in no way intended to be a preparation for Geometry. Rather it has proven a remarkably strong review in Arithmetic.

The Bookkeeping has not thus far been of the value it might be because the course selected is not adapted to the length of time at our disposal, the nature of the equipment, or the local need. An augmented course of one year is imperative.

In the Freshman year a course in General Science is offered as an alternative to Latin. This course is also in an experimental stage. Its aim is to give the scientific basis of those things that come within the range of the students' thought and experience,—machinery, electricity, simple chemical facts. In no case is there an effort to present theory, but merely the simple illustration, and explanation of those things which every one sees about him.

There is regular drill in spelling in all the classes, in accordance with a system that has been found needful and adopted in most schools. The English classes throughout furnish in addition regular correction in spelling. Public speaking is put on the following basis. Debates are given by the Senior class on questions of national moment.

These are open to the public and are held in the evening, and are accompanied by some simple musical program. It is felt that they are a necessary and helpful preparation, not alone for graduation but for after life.

The Juniors give declamations before the school in the morning exercises, the Sophomores before their own number and the rest of the students have drill on reading aloud, with emphasis on enunciation and carriage. As much time as possible is given in preliminary drill, but the number of available periods is of course limited.

The work in English is receiving at present a very large amount of attention in High Schools. It is everywhere apparent that scholars forget to spell correctly unless the drill be regularly continued each year; that punctuation and the mechanical features of composition suffer in the same way; and that the quantity and rapidity of the flow of thought or ordinary conversation is wonderfully lessened when pupils are asked to write essays and themes. The causes are haste and rapidity of work, and, second, a feeling that ordinary conversation or ordinary writing is in some way different from formal composition and not subject to the same rules and scrutiny. A student, moreover, who may be able to produce a neatly written, correctly spelled and punctuated composition will on the same day write something else that is full of mistakes, without sensing the fact. The remedy which the school can apply, as far as it can control the students' output, is to have regular composition work in all classes, and to continually criticise these errors. The course at present is as follows. For the ninth grade, a study of the elements that make up the sentence and paragraph, coupled with writing on topics suggested by masterpieces that are being studied, news collecting, letter writing, etc. The Freshman year centers around the narrative as a source of material and composition on related matter is regularly required.

In the Sophomore year Description is studied, with the

same drill in writing. The Junior and Senior years are occupied with the Literatures of England and America, and while the formal study of Grammar and Rhetoric is dropped, there is a weekly practice in writing in the Junior year and a study of a very practical book in every-day English in the Senior year. In addition, in all the courses given in the school there is a constant effort to require neatness, legibility and care in all written work, of which there is much. Papers that do not show this are returned to be rewritten.

It is apparent that some general reading course would be highly desirable. One book a month, chosen from some stipulated list, and read for the sake of familiarizing the student with a larger range of good and desirable books, would be helpful. To that end the school library needs to be materially increased.

There are to be found, as always, three classes of pupils, as determined by scholarship—those whose work is regularly strong, those who are weak and hover about the passing point, and those who fall decidedly below. The second and third classes are being aided by the afternoon session, which is designed for those who have failed in that day's preparation, either from lack of work or ability. In certain cases a regular daily attendance at the afternoon session is required. It is apparent that much of the weakness found is due to lack of sufficient time in preparation and lack of ability or readiness to concentrate. Sufficient time in preparation means that an average of two hours, and one-half should be spent in home study. Those students who may be seen on the streets or in the stores or at entertainments given on evenings during the week, do not generally put in very much of that time. Poor work on their part is a natural result. Our afternoon session is not intended to take the place of this home study. It is a remedy for poor work preceding, and must be considered as extra time. It is not understood to be a punishment,

although it undoubtedly stimulates into action better than a simple report card. It has had a decided effect for good, and because of this and its purpose, parents are urged to allow nothing to interfere with its working. Home work or a previously made engagement are sometimes urged. But anything of this kind is an injustice to the scholar.

The lack of concentration is a difficult problem to meet. We hold the pupil for five hours a day. In many cases the rest of his waking hours are filled with things that excite the emotions—social life, entertainments, emotional literature—compared with which study seems insipid and colorless. When a young person sits down at his study today, these other attractions are too compelling to be destroyed. And the hour that is spent in apparent study may have resulted in little achievement. It is difficult for either parent or teacher to meet this condition. Study cannot be either dramatic or sugar-coated. It is plain, unemotional work and the average boy or girl pursues it because he must, rather than from choice. From these reasons home study should be rigorously and regularly observed.

It is unfortunate that many parents pay so little attention to the report cards. A poor monthly report should bring the parent to the principal. This will always result in a better understanding of the case, and usually the trouble is helped directly. These interviews sometimes bring to light conditions in which the school methods can be modified or changed to advantage.

These facts show a condition that has to be counteracted by constant pressure, the more so as there is a marked lack of self-direction among the pupils. The teachers must both furnish the mental food and cause it to be digested and assimilated in the face of competition that they cannot control. If this could be lessened, more energy would be thrown into those lesser but pleasant fea-

tures which would create a stronger school spirit, and render the working of the machinery more automatic.

The Washington trip has had an annual existence of some years—enough to demonstrate its salient features. The two most valuable results coming from it are, first, the inspiration received from a visit to the seat of our national government and a glimpse at the larger elements of its machinery. This ought to be a matter of lasting and permanent value to every one who makes the trip. Second, the plan probably holds in school some who might otherwise not complete the course. The necessity of finding money to accomplish the trip on the other hand, means that a large amount of energy must be spent, which could be used in other ways. It is almost out of the question to plan for social enterprises which would benefit the school as a whole or to raise money for athletics or other school interests. It would be eminently desirable if each pupil should become personally responsible for his own expenses, planning for it at the beginning of his course and making or saving \$5 or \$6 each year. There are exceedingly few who could not do so, and the whole experience would be more valuable as an education in thrift and the habit of saving.

Among the needs of the school is the lighting of the school room. At present, on dark or winter days it is not possible to work therein after 4 o'clock. The large windows of the assembly hall are unprovided with curtains. Suitable dark curtains would, in addition, make available the use of the stereopticon in the daytime. If a reflectoscope were provided for use with the stereopticon, it would be easy to throw on the screen pictures from books, drawings, and a hundred devices to illustrate and illuminate all the studies.

The assembly hall is unavailable for use on cold days, unless heat is drafted from other rooms. To make it available there would be required a line of steam pipes along

the rear of the room. The connecting pipes are all in place at present. The curtains in the main study room are old and worn. New curtains would improve the appearance of the room greatly. The laboratory is lighted only by four small windows and those are so placed as to give illumination to only a limited area. It is desirable that more abundant natural light be provided here. This might be obtained by cutting a skylight in the roof, such as now exists in the drawing room.

Lastly, the warmth of those parts of the building which are so difficult to heat would be increased by double windows. There is a very great loss of heat all over the upper floor because of the large window area and the necessarily loose fittings.

The graduation program of last June was as follows:

Invocation,	Rev. Arthur P. Papineau
Music, "Dance of the Fairies,"	C. B. Rich
	School Chorus.
Salutation,	Gertrude Rich
Music,	
a. "Neapolitan Boat Song,"	Denza
b. "Merry June,"	Vincent
	Girls' Glee Club.
Educational Address,	A. E. Winship
	Editor of the Journal of Education.
Music, "Blow Soft Winds,"	Exenford
	School Chorus.
Valedictory,	Edith Anne Wolfenden
Presentation of Diplomas,	Dr. Daniel Goodenow
	Secretary of the School Board.
Music, "The Soldiers' Life,"	A. Sullivan
	School Chorus.

## CLASS SONG.

TUNE: "The Vacant Chair."

Ended now are joyous schooldays.  
 Time hath led us to this place,  
 Where our loyal hearts these farewells  
 Give and take with saddened face.  
 Oh, the pleasant memories given!  
 Never shall they be forgot.  
 But renewed, revived forever,  
 In the storehouse of the heart.

## Chorus:

Let us aim, whate'er befall us,  
 Bright the path, or shadowed mall,  
 That in truth we'll look above us,  
 Saying, "Aye, God ruleth all."

We can say with grateful voices,  
 Friends have helped us with their zeal  
 Teachers kind have smoothed the pathway,  
 Lightened, cheered our work and toil.  
 Let us then to all these helpers,  
 Give our praise in earnest strain,  
 Well deserves each faithful teacher,  
 These the thanks of "nineteen ten."

Rena E. Smith.

The students from this school who entered other institutions last September are as follows:

Edward McPherson, Tufts College.  
 Louis Sullivan, Tufts College.  
 Gertude Rich, Fitchburg Normal.  
 Mabel Comeau, Fitchburg Normal.  
 Christine Heffernan, Fitchburg Normal.  
 Grace Wood, Fitchburg Normal.  
 Leslie Sims, B. U. Law School.  
 Annie McCarron, Trinity College.

At the close of the school year, last June, the graduating class presented the school a fine cast of the Aurora, which now hangs in the main study room.

I wish to thank the School Board and Superintendent for their help and co-operation, and also to recognize the faithful and conscientious work of my assistants.

Respectfully submitted,

J. D. W. CHESTER,  
Principal.

## REPORT OF THE SUPERVISOR OF DRAWING.

---

Mr. F. S. Brick, Superintendent of Schools:

The quality of work in Drawing done throughout the schools of Maynard could best be judged by the exhibitions held in the various rooms last spring. The exhibitions represented every phase of drawing outlined in the course given in the report of last year. It also represented the work of every pupil attending school thus striving to give a fair presentation of the work actually being done.

The course this year has been somewhat changed but the changes are not so numerous or vital as to warrant a repetition of the course at this time.

Interest in the so-called "Industrial Work" for public schools has reached us and an effort is being made to introduce an acceptable course of this kind. At present it stands as follows:—

Grade 1. Paper folding and cutting.

Grades 2 and 3. Weaving.

Grades 4 and 5. Paper and cardboard construction.

Grade 6. Basketry.

Grades 7 and 8. Caning of chairs and book binding for the boys.

### Sewing for the Girls.

The sewing is handled by two of the regular teachers. As is usual in the introduction of such courses the supervision of the rest of the work becomes a part of the duties of the Supervisor of Drawing. This takes time from the

regular work in Drawing, necessitating more supervision and less actual teaching. It has not affected the interest of either teachers or pupils. All are striving to do their part toward making this subject a successful part of our school work.

Drawing is in itself an industrial subject. Hardly a phase of the work as carried on under the usual Public School course but has its industrial side. We are doing far more true industrial work than is often thought.

Respectfully submitted,

MAUD I. DOLAN.

Dec. 27, 1910.

## TOWN WARRANT.

COMMONWEALTH OF MASSACHUSETTS.  
MIDDLESEX, SS.

To either of the Constables of the Town of Maynard, in  
said County, Greeting:

In the name of the Commonwealth of Massachusetts  
you are hereby directed to notify and warn the legal  
voters of said Maynard, to assemble in Co-operative hall  
in said town, on Monday, the thirteenth day of March next,  
at 7.00 a. m., then and there to act on the following  
articles:

Article 1. To choose a moderator to preside at said  
meeting.

Article 2. To choose by the Australian system of bal-  
loting the following town officers: One town clerk, one  
town treasurer, one collector of taxes, each for one year,  
three selectmen for one year, one overseer of the poor for  
three years, one member of the board of health for three  
years, one water commissioner for three years, one mem-  
ber of the school committee for three years, one assessor  
for three years, one trustee of the public library for three  
years, one tree warden for one year, two auditors for one  
year, three constables for one year, one cemetery com-

missioner for three years, and all town officers to be chosen at said meeting. Also to answer by the said Australian system of balloting the following question: "Shall licenses for the sale of intoxicating liquors be granted in this town?"

For the purpose specified in this article the polls will be open after the election of a moderator and will remain open until four o'clock in the afternoon when they shall be closed unless the meeting there assembled otherwise determine.

Article 3. To hear and act upon the reports of town officers and committees.

Article 4. To see if the town will appoint a committee to consider appropriations for the ensuing year and report at the April meeting. To do or act thereon.

Article 5. To see if the Town will authorize the Treas-treasurer with the approval of the selectmen, to borrow, during the municipal year, beginning February 1, 1911, in anticipation of taxes for said municipal year, such sums of money as may be necessary for the current expenses of the town, giving the notes of the town therefor, payable within one year from the dates thereof.

And you are directed to serve this Warrant by posting an attested copy at the Post Office and one at each of ten other public places in said town, seven days at least, before the time of holding said meeting.

Hereof fail not, and make due return of this warrant, with your doings thereon, to the town clerk, or the selectmen, at or before the time appointed for holding said meeting.

Given under our hands this twenty-sixth day of February, in the year of our Lord, one thousand nine hundred and eleven.

WILLIAM JONES,  
WILLIAM CONNOLLY,  
ARTHUR E. WALKER,  
Selectmen of Maynard.
