Report of the Board of Selectmen

To the Citizens of Maynard:—

The Board of Selectmen respectfully submit for your consideration the Annual Reports of the Town Officers and Committees for the year 1951.

The financial condition of the town is excellent and our cash balance on December 31, 1951 shows a substantial increase over that of December 31, 1950.

The American Woolen Company continued during the year to keep the employees guessing as to their future policies, but at this writing there is some hope for the continued production of woolen cloth in Maynard. Two small companies have hired space in the mill, and it is hoped that more will come to Maynard to replace the loss of our principal industry.

During the year a section of Powdermill Road was resurfaced, and we hope this year to resurface another section.

Several pieces of equipment in our Highway Department should be replaced, notably the road grader. We have tried several times in the past few years to secure favorable action in the Town Meeting on an article which would allow the town to purchase this piece of equipment, but each time we have been unsuccessful. Our present grader is 15 years old, and the motor is older. To completely overload such an old piece of equipment would be foolish economy. A new set of tires alone would cost \$1,500.00. The Conant Sand Loader which is used for loading purposes at the Highway Department Garage is in poor repair, and one of our trucks should be replaced.

Inasmuch as the replacement of old or worn equipment is wise spending, it might be a good idea in the future to set up a Machinery Replacement Revolving Fund which spreads costs of replacement so that they would not be great in any one year.

The lack of an adequate Municipal Parking Area continues to plague us. In the past year we tried to have the town meeting vote favorably to establish such an area, but the vote was unfavorable. This year we would like to install parking meters which would help to relieve the congestion that exists daily in our business section. Parking meters are now in use in hundreds of towns and cities, and in every single case they have improved parking facilities and helped business.

In 1951 the town accepted a zoning by-law designed to protect the property owners. We have had a few cases which did not conform to the by-law and these were sent to the Appeal

Board which acted on them. We must emphasize once again that a **Permit to Build** is necessary before construction starts.

As Police Commissioners we note the passing of Patrolman Alexander Sluyski, who gave many years of faithful service to the town.

We wish to thank the Planning Board and the Appeal Board and all other Boards and Committees for their co-operation and assistance during the year.

Respectfully submitted,

WILLIAM BAIN, Secretary,
LEO A. MULLIN, Chairman,
JOSEPH P. DINEEN,
Board of Selectmen.

Report of State Audit of Books and Accounts

To the Board of Selectmen
Mr. Leo F. Mullin, Chairman
Maynard, Massachusetts

Gentlemen:

I submit herewith my report of an audit of the tax, excise, and special assessment accounts of the town collector of Maynard for the period from May 15, 1950, and of the departmental and water accounts from March 7, 1951, to July 13, 1951, made in accordance with the provisions of Chapter 44, General Laws. This is in the form of a report made to me by Mr. Herman B. Dine, Assistant Director of Accounts.

Very truly yours,

FRANCIS X. LANG,
Director of Accounts.

Mr. Francis X. Lang
Director of Accounts
Department of Corporations and Taxation
State House, Boston

Sir:

In accordance with your instructions, I have made an audit of the tax, excise, and special assessment accounts of the town collector of Maynard for the period from May 14, 1950, and of the departmental and water accounts from March 7, 1951, the dates of the previous audits, to July 13, 1951, preparatory to a recommitment of these accounts to the town collector, and report thereon as follows:

The tax, motor vehicle and trailer excise, and special assessment accounts outstanding as of May 14, 1950 and all subsequent commitments were audited and proved. The payments to the treasurer were checked to the treasurer's cash book, the recorded abatements were compared with the assessors' records of abatements granted, the transfers to the tax title account were verified, and the outstanding accounts were listed and reconciled with the town accountant's ledger.

The recommitments of departmental and water accounts receivable as of March 1, 1951 and all subsequent commitments were examined and checked in detail. The recorded payments to the treasurer were compared with the treasurer's cash book,

the abatements were verified, and the outstanding accounts were listed and reconciled with the town accountant's ledger.

Verification of the outstanding tax, departmental and water accounts was made by mailing notices to a number of persons whose names appeared on the books as owing money to the town, the replies received thereto indicating that the accounts, as listed, are correct.

Appended to this report are tables showing a reconciliation of the town collector's cash together with summaries of the tax, excise, special assessment, departmental and water accounts.

While engaged in making the audit cooperation was received from all town officials, for which, on behalf of my assistants and for myself, I wish to express appreciation.

Respectfully submitted,

HERMAN B. DINE,
Assistant Director of Accounts.

Report of the Superintendent of Streets

To the Honorable Board of Selectmen :

Gentlemen :

I herewith submit my report for the year 1951 as Superintendent of the Street Department.

MAINTENANCE

The general services performed included the clearing of streets and sidewalks; collection of rubbish from business establishments; the cleaning of catch basins; the surfacing, oiling and patching of streets; cutting grass and brush and the painting of signs, fences and posts.

STREET CLEANING

Where so much sand is used in the winter we can no longer clean all the streets by hand sweeping. We need a sweeper and shovel front tractor for this work.

DRAINAGE

No new drainage was constructed; just the cleaning and maintaining of existing structures, lines and ditches were performed.

| February 3 | 5" | |
| February 24 | 2" | |
| | <hr/> | |
| Total | | 7" |
| March 1 | 2" | |
| March 22 | 3" | |
| | <hr/> | |
| Total | | 5" |
| December 14 | 3" | |
| December 15 | 5" | |
| December 25 | 5" | |
| | <hr/> | |
| Total | | 13" |
| | <hr/> | |
| Total | | 43" |

The cost of snow removal and sanding amounted to \$15,240.03; of this amount \$9,470.17 was from the Special appropriation for snow removal.

The snow was removed from the business areas, churches, schools and all the streets and sidewalks were plowed and sanded.

The Massachusetts Department of Public Works renewed their contract for paying one-half the cost of plowing Route 117 — Great Road.

Seventy-five sand barrels have been placed for public use at various places and 3,050 linear feet of snow fence was erected.

CHAPTER 90 — MAINTENANCE

Shoulders and drainage were cleaned. The guard rail fences were painted and the brush was cut along the roadsides. 4,445 square yards of Brown Street was treated with a mixed in

place surface. 10,501 square yards of Great Road was treated with a mixed in place surface. A section of the sewer trench on Great Road by home of Joseph Boothroyd had to be excavated and backfilled with new gravel and resurfaced. The State, Town and County each allotted \$1,200.00 for this work, making a total of \$3,600.00.

CHAPTER 90 — CONSTRUCTION

The State allotted \$8,000.00 for construction on Powdermill Road and the Town and County \$4,000.00 each, making a total of \$16,000.00. 1050' of Powdermill Road was constructed with a gravel subgrade, penetrated stone base and a Bituminous concrete wearing surface. A storm drainage system was also constructed in conjunction with this work consisting of three manholes and five catch basins. 144' of 15" R. C. pipe and 603' of 12" R. C. pipe. We are requesting an appropriation to rebuild a section of this road next year under Chapter 90.

NEW EQUIPMENT PURCHASED

No equipment was purchased this year. But something has got to be done very soon if the work is to be done. The average age of the Highway equipment is ten years.

GARAGE

The repair and maintenance service for the department is carried out at the garage. Gasoline, oil, etc. are secured from the garage by the various Town Departments. There is an item in the budget for the painting of this building this year.

EXPENDITURES OF HIGHWAY APPROPRIATION

CONCLUSION

The Town Accountant's report will also show expenditures of this department.

I wish to thank the Board of Selectmen and the other Town officials for the assistance they have given me and also to the departmental employees.

Respectfully submitted,

RAYMOND J. SHERIDAN,
Superintendent of Streets.

Report of John A. Crowe Park Superintendent

To the Honorable Board of Selectmen:

I herewith submit my report of John A. Crowe Park for year ending December 31, 1951.

During the year the baseball diamond was graded and a galvanized fence installed along Taylor Road.

In my budget for the year 1952 I have requested funds to grade the baseball diamond.

In conclusion I wish to express my appreciation to the people of Maynard and the various Town Departments for the co-operation received during the past year.

Respectfully submitted,

WILLIAM F. KITOWICZ,
Superintendent.

Report of Dog Officer

To the Honorable Board of Selectmen:

I herewith submit my report as Dog Officer:

Eleven dogs were destroyed after six days. Five dogs were returned to their owners. Fourteen dogs were quarantined on suspicion of rabies. After fourteen days they were returned.

There were five complaints of dogs destroying property.

I want to thank the Chief of Police and his officers for their assistance.

Signed,

JOSIAH M. HERRICK.

Report of Tree Warden and Moth Superintendent

To the Honorable Board of Selectmen:

Gentlemen:

I. Public Shade Trees

- A. The proper care of shade trees to promote healthful growth to useful maturity and the removal of trees, which because of age, storm damage or other cause, become hazardous, requires continuous attention. Young trees need regular pruning for desired shape; injuries caused by motor vehicles and other agencies, happen every day and must be given surgical treatment right away for proper healing. Branches that break must be removed and torn bark properly treated to prevent later decay. If this care is not continuous and regular, trees grow wild and as a result we lose the beauty and usefulness of our shade trees and eventually the trees themselves become a hazard to the public and may cause damage for which the town may be liable. During four years of the W. P. A. there were several shade tree projects which reconditioned our public shade trees. The amount of work done is indicated by the fact that over \$8,000.00 was spent each year. It was fortunate that our trees were put in such splendid condition that they were able to survive as well as they have the small amount of care they have received since. During the past four years less than \$700.00 was spent for this purpose each year. Now our trees are again in need of a lot of work. Over 5,000 young trees planted since 1938 must be given individual attention to attain desirable growth and proper shape. Injuries are especially damaging to small trees if not quickly and properly treated, and injuries of varying degree are occurring every day. Middle-aged trees need to be pruned and many branches removed. Branches which should have been removed when the trees were small are now large and dangerous because they have grown too low over the streets and may cause damage to travelling vehicles for which the town will be liable. Many branches have grown so as to cause damage to buildings and must be removed. During the past year this department responded to 16 special requests to remove branches which had become nuisances to private dwellings. We have many old trees on which dead limbs and large branches have become hazardous and some of these trees are in

such shape as to require removal. During the year 7 such trees being charged a hazard to travel, were taken down. A recent survey shows over 30 more trees from 2' to 12' in circumference that should be removed soon. **The Public is requested to notify the Tree Warden immediately of any injury or damage to a public shade tree and if possible to be able to trace the cause of such damage.**

- B. **Gas Damage.** During the year four beautiful shade trees were found to be dying and an inspection proved leaking gas to be the cause. The Gas Company was notified and being liable, will reimburse the town for its liability. One other tree was found to be affected by leaking gas but the amount of damage cannot be ascertained until next year. Gas leakage is suspected to have been the cause of killing five other trees but the trees had been killed before 1951 and we could not prove the cause of death.
- C. **Shade Tree Planting.** Only twenty-eight trees were planted this year as the most desirable specie of trees, the rock maple, were difficult to obtain. Twenty Norway maple were planted as well as five rock maple, donated by Donald Lent and three by Bernard Dawson, for which we express our appreciation. Some of these trees were planted as replacements to those planted in other years which had died, others as requested, most of them near new homes.
- D. **Future Needs.** So much work needs to be done and we have so little equipment that requests for appropriations in 1952 are considerably higher than in recent years. Most of the equipment we have is left overs from W. P. A. days and is not worth much; for example, all the rope we have is so old that it is unsafe to use on trees when safety depends upon good rope. Power saws are needed to make possible economy in doing tree work. In these times when there is need to save the tax dollar, we must take advantage of the savings made possible by use of power equipment. Appropriations during the past few years have not been large enough to do all the work which should have been done. Not only this, but the thousands of new trees set out since 1938, the increasing age and resultant decay of old trees, and the cumulative effect of hurricane damage of some years ago, all add up to a total of greatly increasing amounts of work needing to be done now and in future years. If we are going to enjoy the use and beauty of our Public shade trees, we must provide for their proper care.

II. Public Nuisance Suppression.

- A. In order that the citizens better understand what we commonly refer to as the Moth Department, the following information is submitted. Some of the older generation may remember the days of the invasion by the gypsy and brown-tail moth, when it became the task of a Moth Superintendent to direct the work of suppressing these insect pests in towns. As years passed, changes in the laws of the Commonwealth added to the duties of the local Moth Superintendent until now.

"By Section 11 of Chapter 132 of the General laws, the Gypsy and Brown-tail moth, their larvae, pupae, nest, eggs and caterpillars, and tent caterpillars, cankerworms, oriental hag moths, fall webworms and elm leaf beetles, the dutch elm disease, and the beetles, which spread said disease, and wood ticks, all of which pests are hereby declared public nuisances."

"By Section 13 of Chapter 132, the local Superintendent shall under the advice and general direction of the Chief Superintendent, destroy the eggs, caterpillars, larvae, pupae and nests of said public nuisances, including wood infected by Dutch Elm disease."

"By Section 25 of Chapter 132, the local Superintendent having charge of the suppression of the Public nuisances referred to in Section 11, shall have like jurisdiction over the suppression of all foliage-destroying pests within the limits of his town."

From the above regulations it can readily be understood that to comply becomes more and more of a complex problem. Foliage-destroying pests invade our town from time to time and the task of suppression, mainly by spraying, becomes more complex and costly as new spray materials and more sprayings are added to our suppression program. During the past year we have found it necessary to make several special sprayings due to unusual weather conditions which influenced the hatching and resultant feeding time of foliage-eating pests. We found it necessary also to secure special insecticides to combat certain life-cycle stages of the insect pests. It was quite noticeable that the use of D. D. T. spray mixture resulted in an increase in sucking pests such as red-spider, birch-miner and the aphid. In one instance, the increase in red-spider damage lead one woman to think that the D. D. T. spray had injured her shrubs. It was necessary to secure a different insecticide

for control of these pests. It would be of great assistance to our suppression program if you would notify the Moth Superintendent immediately of any outbreak of a foliage destroying pest.

- B. **Dutch Elm Disease.** The outbreak of this public nuisance has assumed such proportions that the Legislature has enacted several laws for its suppression. The Department of Conservation which directs the battle of eradication, has made regulations governing the suppression work by towns. From evidence developed by state and local authorities, it has been established that Dutch Elm disease can be controlled but only by prompt and continuous eradication of diseased elm trees and those infested by beetles which spread the disease. Special funds must be made available and year round eradication carried on. The Dutch Elm disease is caused by a yeast-like fungus. It grows in the water-conducting vessels of the sapwood, clogging the vessels and poisoning the living tissue. It is usually carried from tree to tree by elm bark beetles. These insects breed in dead and dying elms and when they infest the bark of elm trees dying from the Dutch Elm disease the new generation of beetles emerge contaminated by the disease fungus which they may carry to healthy trees and infect them. In case a tree is suspected to be infected, a sample must be taken and sent to the State shade tree laboratory for testing. If the test is positive the tree must be taken down and burned or buried to check the spread of the disease. The disease spreads rapidly and the eradication fight must be faster. In Maynard, one tree was reported infected in 1950. In 1951 we found 35 infected trees and seven more samples are now being tested. Twenty-eight of these infected trees have been cut down, cut up, carried to the dump and burned. Two other elms, recently dead, and two elms felled by wind were disposed of in the same way to prevent them from becoming breeding places for the beetles which spread the disease. We could not have accomplished so much but for the cooperation of the Edison Company and Power Saw salesmen and demonstrators. Several trees were topped by tree gangs provided by the Edison Company, where power lines ran through the tree tops. Most helpful were the power saws for without them the cost of the work done would have been prohibitive.
- C. **Poison Ivy Eradication.** Many people have requested help in combatting this pest that has become a serious nuisance, especially to children. Poison Ivy seems to be

spreading along many of our roads and streets. Eradication work will be done in 1952 if an appropriation is made for this purpose.

Respectfully submitted,

CLIFFORD F. KING,
Tree Warden and Moth Superintendent.

Report of Inspector of Animals and Slaughtering

I herewith submit my report as Inspector of Animals and Slaughtering for the year 1951.

Two pigs were slaughtered. Six barns and twenty-five cows were inspected.

The barns were clean and animals were free from Mange and other diseases.

Two hundred pigs were inspected and they were free from disease.

Signed,

JOSIAH M. HERRICK.

- Three blasts at 6:30 P. M. for Evening School.
- One blast at 9:30 A. M. and one blast at 12:30 P. M. for Supervised Recreation for children during summer months.

(OVER)

Instructions for Giving Fire Alarms

Alarms should be given from the box nearest the fire. Open the box, pull the hook clear down once and let go. After giving an alarm remain at the box and direct the firemen to the fire.

Never open a box except in case of fire.

Do not sound an alarm for a chimney fire or brush fire, or fire seen in the distance. Telephone the Fire Station or the Fire Engineers.

AN ACT TO PROHIBIT THE DRIVING OF VEHICLES OVER MUNICIPAL FIRE HOSE—1926, Chapter 278

Section 7A. Upon the approach of any fire apparatus which is going to a fire responding to an alarm, every person driving a vehicle on a way shall immediately drive said vehicle as far as possible toward the right-hand curb or side of said way and shall keep the same at a standstill until such fire apparatus has passed. No person shall drive a vehicle over a hose of a fire department without the consent of a member of such department. No person shall drive a vehicle within three hundred feet of any fire apparatus going to a fire or responding to an alarm, nor drive said vehicle, or park or leave the same unattended within six hundred feet of a fire or within the fire lines established thereat by the fire department. Violation of any provision of this section shall be punished by a fine of not more than twenty-five dollars. (Approved April 28, 1926.)

Remain at box until apparatus arrives.

Investigate your chimneys and keep them clean.

Do not throw lighted cigarettes.

Traffic siren means pull out and stop.

Oil stoves need to be inspected and cleaned frequently.

Drive 300 feet from fire apparatus.

Remain 600 feet from fire.

A permit is required for all open fires.

False alarms are punishable by fine or imprisonment.

How to send an alarm from box: Go to the nearest box, open door, pull lever way down once and let go, then shut door, remain at box and direct firemen to fire.

When calling headquarters by telephone for fire speak calmly and distinctly, giving street, location on street, and name of person calling; this will insure more prompt response by the firemen.

Do not allow rubbish, paper, or any inflammable material to accumulate in or about your property.

Always call the Department before attempting to extinguish a fire yourself.

The Fire Department will be enabled to render better service if these instructions are followed.

Board of Fire Engineers

To the Honorable Board of Selectmen:

135 runs.

So what!

This is what.

1. It is more than last year.
2. It meant more chances of bigger fires, and we had them. Our fire insurance loss went up to about \$20,600 on the basis of actual payment; a great deal higher on estimated losses not covered by insurance.
3. It meant more people are being careless about fire prevention in their homes and stores. They are not looking for fire hazards and eliminating them. If they continue, 135 will become 200, and fire losses will rise and people will be killed.
4. It meant that your engineers have looked for more ways to reduce and off-set the possibilities of a rising fire loss. For instance, we have put on another man on each shift to assure better and more efficient work in those precious first few minutes of a fire. We have had more training sessions with the call men on a more systematic basis. One instructor being in charge, reduces confusion. We have kept the equipment as nearly at a peak of efficiency as possible, to avert break downs at crucial moments. We have cooperated with other towns on mutual aid with a weather eye to the time when we will need the assistance of others ourselves.

EQUIPMENT

A word about the equipment put in our hands.

The trucks are in good shape. We have asked for more money for repairs in view of the increased depreciation due to old age. But they are, nevertheless, in good working order.

Our fire house is suffering badly from old age and very little can be done to change this situation, outside of repairing what must be repaired. Last year the boiler was a problem. The stairs were also unsafe and were replaced by the volunteer labor of the men. The ceilings were sheathed with sheetrock also done by volunteer labor. This year exterior painting is a must. However, the general and more serious work cannot be undertaken on a volunteer basis. Windows have to be replaced, the heating system is old and inefficient and many more things.

We are pleased to note that the resuscitator has been successfully used in saving the lives of six persons during the course of the calendar year.

FIRE INSURANCE

At a recent Town Meeting, a discussion took place relative to a survey for reducing the fire insurance rates for Maynard. It was a very pleasant and educational discussion, but it glibly overlooked our main obstacle in ever securing a lower classification. It recalled that the water pressure and supply were not up to fire insurance standards at many locations. This is true. It recalled that our pumpers did not meet one of the requirements of the Rating Bureau for towns in a lower rate. This is also true. But this factor does not take into consideration the fact that we do not employ a pump in 95% of our fires. Nor did the discussion point out that we could do all of the things required by the survey and still not get the lower rate classification —

BECAUSE

1. The type and construction of much of our residential area forbids it. We have too many areas where wooden frame construction presents the strong possibility of conflagration. Too close together — heated by space heaters — no fire stops in the walls and the like.
2. Our business area is made of wooden frame construction which presents too high a risk.
3. There was no wire or building inspection when these were built, with the result that many questionable practices took place which make them hazards so far as fire insurance is concerned.

To give you an example — Our fire insurance loss on just two fires this year increased tremendously. The firemen, in our opinion, conducted themselves in a manner consistent with the highest degree of firemanship. The fire alarm system summoned aid at the earliest possible moment. The water supply was not only adequate, but excellent, and yet the fire went so far that extreme losses were sustained.

What have we in mind for the future?

More mutual aid. We have had Acton come to our assistance on two occasions this year and we have gone to their assistance three times. We have assisted Sudbury and Stow once each. We intend to continue this practice.

We have recommended three two-way radios to improve our communications to and from fires and between towns. We believe that this would increase the efficiency of mutual aid by enabling us to call directly to the neighboring towns of Acton

or Concord from the scene of a fire. This item is about \$1,750 and will be highly beneficial if we are ever in a position where civilian defense becomes a reality. The radio problem has been presented to the Finance Committee and they have declined to recommend the appropriation. Since we believe that it is our duty to present our considered recommendations for the public safety to the Town Meeting, we have prepared an article for that purpose.

We had requested an additional two call men, but the Finance Committee did not recommend them and we have withdrawn them from the budget.

The parking situation is of great concern to your Fire Department. The enforcement of our present parking laws near fire hydrants and in front of the Station is imperative. In addition, Summer Street from Nason Street to Main Street should be restricted particularly at the corners and also Summer Street from the railroad crossing to Concord Street. It is nearly impossible to pass between parked cars on these streets at times.

We want to thank all persons who have assisted us during this year.

We have attached to our report, the usual statistics which may be of interest to some.

Respectfully submitted,

PHILIP A. WILSON,
HENRY MARIANI,
MARTIN GRUBER,
Board of Fire Engineers.

Report of Sealer of Weights and Measures

To the Honorable Board of Selectmen:
Gentlemen:

I herewith submit my annual report as Sealer of Weights and Measures for the year 1951.

In submitting this report, I wish to state that at the close of the year all weighing devices and measures in the town were in good condition in accordance with the law.

I wish to take this opportunity to express my gratitude to the merchants and all those who come under the requirements of this department for their co-operation.

CLIFFORD F. KING,
Sealer of Weights and Measures.

Report of Police Chief

To the Honorable Board of Selectmen:

I hereby submit my annual report as Chief of Police for the year ending December 31, 1951.

All complaints received by this Department during the year were investigated and properly disposed of.

EQUIPMENT

The police budget for 1951 includes funds to purchase a new police cruiser to replace our present police car as it is in the opinion of this Department that it is more economical to trade annually.

SAFETY

The following streets have been designated by the Board of Selectmen to be closed for coasting: These streets are: Roosevelt, Elmwood, Spring Lane, Newton Drive, Butler, and Lewis Street. For the safety of the children, parents should advise their children to slide on these streets only, during the period the streets are closed for sliding.

IN MEMORIAM

Alexander J. Sluyski

Appointed
April 1, 1946

Died
December 8, 1951

TRAFFIC AND PARKING

Traffic signals have been installed at the intersection of Powder Mill corner. As in previous years all traffic lines and signs have been painted in various sections of the Town.

With the increased registration of automobiles in Maynard and surrounding Towns, causing considerable congestion to traffic conditions the idea of a Municipal Parking Area should not be abandoned.

HENRY F. PIECEWICZ,
Chief of Police.

Town Clerk's Report

For the year ending December 31, 1951

Proceedings of Town Election

March 5, 1951

The Annual Town Election was held on the above date at the George Washington Auditorium in accordance with Town Warrant No. 435.

Prior to opening the polls the Moderator and Town Clerk examined the Ballot Boxes, found them to be empty, set the registers at zero and delivered the keys to the Constables in charge of the boxes.

The Ballot Clerks, who were appointed by the Board of Selectmen, were sworn by the Town Clerk, who delivered 4000 official Ballots to them taking their receipt therefor, also for duplicate check lists containing 3,822 names.

The Ballots Clerks were, Bertha L. Davis, Evelyn M. Mulcahy, Timothy F. Hickey, Helen M. Gilleney and Phyllis P. Savikoski. Constable William J. Spratt at the ballot box, in Area 1. Martha M. Champagne, Margaret J. McCormack, Helena M. Murphy, Ruthmary Armour, Donald A. Brayden, with Constable Henry F. Piecewicz at the ballot box in Area 2.

Moderator Philip Wilson called the meeting to order at eight o'clock A. M. and on motion of Lester F. Cowle it was voted to waive the reading of the warrant. The Moderator declared the polls open at 8:01 A. M.

At 12:45 the following Tellers, appointed by the Selectmen, were sworn by the Town Clerk and counting began at 1 o'clock P. M.

TELLERS

Helen M. Hinds
Mabel A. Bemis
Grace E. French
Michael J. Nee
Eva H. Evers
M. Mabel Holly
Agnes V. Driscoll
Dorothy E. Hamlin
Alice C. Smith

Elsie P. Brayden
Laura Quinn
Elizabeth M. Farrell
Gertrude Duggan
Dorothy E. Alving
Margaret M. Boothroyd
Gladys Fraser
Mildred M. Morgan
Eva M. Frye

The polls were declared closed at 8 o'clock P. M.

The total number of ballots cast and names checked on the voting list was 2,451.

In area 1 the ballot box jammed with one ballot which registered five times before it could be released. The register on the box showed 1252 but only 1248 ballots were actually cast.

The Moderator announced the result at 10:20 as follows:

In area 2 the register on the ballot box showed 1203 ballots were cast.

SELECTMAN — ONE YEAR

| | |
|---------------------|------|
| Leo F. Mullin | 1228 |
| Olavi Warila | 936 |
| Blanks | 287 |

Leo F. Mullin, elected, qualified March 5, 1951.

SELECTMAN — TWO YEARS

| | |

Attest:

ELEANOR JONES,
 Town Clerk.

March 9, 1951

In accordance with the provisions of Section 19 of Chapter 41 of the General Laws of Massachusetts, I hereby appoint James V. King of Maynard to be Assistant Town Clerk during

the current municipal year, or until this appointment is revoked.

ELEANOR JONES,
Town Clerk of Maynard.

I, James V. King, above named, do solemnly swear that I will faithfully perform the duties devolving upon me as Assistant Town Clerk of the Town of Maynard, Massachusetts.

JAMES V. KING.

Subscribed and sworn to this ninth day of March, 1951, before me.

ELEANOR JONES,
Town Clerk.

Proceedings of Town Meeting

March 12, 1951

In accordance with Town Warrant No. 436, the annual Town Meeting to consider appropriations for the year 1951, was held on the above date at the George Washington Auditorium.

Moderator Philip Wilson presided and called the meeting to order at 7:30 P. M.

On motion of Thomas J. Duggan it was voted to waive the reading of the Warrant.

Article 1. On motion of Harold R. Goodwin: Voted that the "Annual Reports of the Town Officers, including the Financial Report of the Town Accountant, of the Town of Maynard, Massachusetts, for the year ending December 31, 1950," as printed and published be accepted.

Michael Tomyl read a report for the Parking Area Committee which was filed with the Town Clerk. On motion of William Naylor it was voted to accept this report.

Leo F. Mullin read a report for the Building Committee which was filed with the Town Clerk. On motion of William Naylor it was voted to accept this report as a report of progress.

Article 2. There were no vacancies in Town Offices to be filled.

Article 3. On motion of Harold R. Goodwin, as amended by Leo F. Mullin; Voted that the sums of money as designated in the Budget Schedule under Article Three in the column headed "Recommended to be Appropriated" be appropriated for the several specific purposes as designated, and that the same be expended only for such purposes under the direction of the respective boards, committees, or officers of the Town, with these corrections:

Item No. 49 — Snow Removal to be \$8,000.00 instead of \$10,300.00

Item No. 55 — That the Board of Selectmen be authorized to appoint one of its members or a veteran to said position

Item No. 60 — \$1,180.00 — Typographical Error

Item No. 61 — \$1,250.00 — Typographical Error
and that Items 1, 8, 24, 48, and 86 be taken up separately.

Attest:

ELEANOR JONES,
Town Clerk.

Proceedings of Special Town Meeting

June 4, 1951

In accordance with Town Warrant No. 437, a Special Town Meeting was held at the George Washington Auditorium, on the above date.

Moderator Philip Wilson called the meeting to order at 7:30 o'clock P. M. and read the Warrant.

Article 1. Clifford King, Tree Warden, read a report regarding the work of and appropriations requested for his department which was filed with the Town Clerk.

A report of progress was made by James S. Wheeler for the Wage and Job Classification Committee.

Harold R. Goodwin read a report for the Finance Committee which was filed with the Town Clerk.

Walter E. Carbone read a report for the Planning Board which was filed with the Town Clerk.

A report of progress for the By-Law Committee was made by Dorothy M. McGrath.

It was voted that these several reports be received.

Article 2. There were no vacancies in Town Offices to be filled.

The Moderator appointed Auno O. Koskinen, Henry T. Hanson, Warren Johnson and Ruoff A. Tompkins to act as Tellers and they were sworn by him.

Article 3. On motion of Raymond Sheridan — Voted unanimously that the sum of \$1,500.00 be transferred and appropriated from the Excess and Deficiency account for the Town's share of Chapter 90 construction on Powder Mill Road; also that the Town Treasurer be authorized to borrow the sum of \$4,500.00 for the State and County share for this work in anticipation of their receipts.

Article 4. Raymond Sheridan read a report regarding the appropriation for a new grader under this article and made a motion to appropriate \$3,000.00 from Excess and Deficiency and to authorize the Treasurer to borrow \$10,000.00 for the purchase of a grader but the motion was not carried.

Article 5. On motion of William A. Bain — Voted to authorize the Board of Selectmen to sell the 1937 Chevrolet stake body truck, which was used by the Moth Department.

Article 6. On motion of Joseph P. Dineen, twice amended by Harold R. Goodwin — Voted that action on this Article be postponed until the Maynard Planning Board has completed their survey now in progress. A report of their survey to be made at the next Town Meeting, with a warrant article to be presented at that time to cover their recommendations. (This article is in regard to Parking Areas.)

Article 7. A motion by Clifford King to appropriate \$465.00 from Excess and Deficiency, to purchase a Power Chain Saw was lost.

Article 8. A motion by Clifford King to appropriate \$115.00 from Excess and Deficiency, to purchase an electric hand chain saw, was lost.

Article 9. A motion by Clifford King to appropriate \$1,000.00 for removal and repair of dead trees, was lost.

Article 10. A motion by Peter T. Peterson to raise and appropriate \$125,000.00 for laying and relaying water mains, was lost.

Article 11. On motion of Peter T. Peterson — Voted unanimously, that the Sewer Commissioners be authorized to install the necessary control equipment and to repair or rebuild the present equipment necessary for satisfactory operation and to transfer from Sewer Surplus the sum of \$1,500.00 for this purpose.

Article 12. On motion of Peter T. Peterson — Voted unanimously, to authorize the Sewer Commissioners to extend the Common Sewer on Randell Road to No. 17 Randell Road and to transfer from the Excess and Deficiency account the sum of \$1,050.00 for this purpose. To further authorize the Sewer Commissioners to acquire necessary property, rights of ways or easements and to do anything lawfully pertaining thereto.

Article 13. On motion of Peter T. Peterson — Voted unanimously, to authorize the Sewer Commissioners to extend the Common Sewer on Glenhill Terrace from Powder Mill Road and to transfer from the Excess and Deficiency account the sum of \$1,100.00 for this purpose. To further authorize the Sewer Commissioners to acquire necessary property,

rights-of-ways, or easements and to do anything lawfully pertaining thereto.

Article 14. On motion of Peter T. Peterson — Voted unanimously, to authorize the Sewer Commissioners to extend the Common Sewer on Charles Street to the house being constructed by Anthony J. Pizza and to transfer from the Excess and Deficiency account the sum of \$860.00 for this purpose. To further authorize the Sewer Commissioners to acquire necessary property, rights-of-ways, or easements and to do anything lawfully pertaining thereto.

Article 15. On motion of William F. Kitowicz — Voted unanimously, to authorize the Board of Selectmen to enlarge John A. Crowe Park by using a portion of the land now owned by the Town that is adjacent to the Park.

Article 16. A motion by Leo F. Mullin to appropriate \$2,000.00 from Excess and Deficiency for working plans for a Fire and Police Building, was lost.

Article 17. On motion of Rowland W. Dawson, amended by Donald A. Lent — Voted to raise and appropriate \$200.00 from Excess and Deficiency account for Planning Board Maintenance.

Article 18. On motion of Thomas J. Duggan — Voted to appropriate and transfer from the Excess and Deficiency account the sum of \$336.00 for Police Department Salaries.

On motion of Harold R. Goodwin — Voted to adjourn.
Meeting adjourned at 9:55 P. M.
Attest:

ELEANOR JONES,
Town Clerk.

Proceedings of Special Town Meeting

November 19, 1951

In accordance with Town Warrant No. 438, a Special Town Meeting was held in the George Washington Auditorium, on the above date.

The meeting was called to order at 7:30 by the Moderator, Philip Wilson.

On motion of R. Frank Punch it was voted to waive the reading of the Warrant.

Article 1. Dorothy M. McGrath read a report for the Committee on the Revision of By-Laws.

James S. Wheeler read a report for the Wage and Job Classification Committee.

Walter E. Carbone read a report for the Planning Board.

On motion of R. Frank Punch it was voted to receive these reports.

All reports were filed with the Town Clerk.

Article 2. There were no vacancies in Town Offices to be filled.

Article 3. The following motion was made by Rowland W. Dawson — That the Town vote to appropriate the sum of Five Thousand (\$5,000.00) Dollars for the construction and maintenance of a municipal parking area on Summer Street, between Memorial Park and the Osbeck property, on land owned by the Town and to determine whether the money shall be provided for by transfer from available funds. To further authorize the Selectmen in conjunction with a committee appointed by them, not to exceed five, to construct and maintain the same, to acquire necessary rights of way or easements and to do anything lawfully pertaining thereto.

An amendment was made that the money should be taken from the Excess and Deficiency fund, which was carried.

An amendment was made that the Moderator appoint the committee of five, which was lost .

On motion of R. F. Punch it was voted to go into a committee of the whole. After considerable discussion the committee of the whole voted to return to Town Meeting.

William F. Osbeck, Howard L. King, Auno Koskinen and Noble J. Morton were appointed and sworn as Tellers by the Moderator.

The count was 72 in favor — 60 opposed.

The Moderator announced that the motion was lost as a two thirds vote was required under this article.

Article 4. A motion by Rowland W. Dawson under this article was lost by a count of 36 in favor — 72 opposed. (re parking area at Acton and Summer Streets.)

Article 5. On motion of Peter T. Peterson — voted to authorize the Sewer Commissioners to extend the common sewer on Chandler Street from Fairfield Street a distance of about 150 feet and to transfer from the Sewer Surplus the sum of \$1,050.00 for this purpose.

Article 6. The Moderator ruled that this Article was out of order.

At 9:30 P. M., on motion of R. Frank Punch it was voted to adjourn.

Attest:

ELEANOR JONES,
Town Clerk.

NOTICE

All dog licenses here listed expire
March 31, 1952.

Dogs must be licensed on or before
April 1st or the owners or keepers
thereof are liable to a fine.

The law applies to all dogs three
months old or over, regardless of
time of year ownership is acquired.
No tax bills are sent to owners
of dogs.

Board of Registrars of Voters

To the Board of Selectmen
Maynard, Massachusetts

Gentlemen :

The Board of Registrars held the usual number of meetings to register voters, preceding the Town Election last March.

The Voting List was corrected prior to the Town Election by removing the names of all women who were married during 1950, all deceased voters, and all persons who had removed from town. In removing the names of those who have left town, the Registrars must use the Listing of Persons made by the canvassers beginning January 1st each year. We would like to emphasize again that all persons who are twenty years of age and over, men and women, should make sure that they are listed as residents of Maynard every year. No one (except deceased persons) is removed from the Voting List until a notice has been mailed to the address on the list and sufficient time has elapsed for a reply to have been received. It is surprising, however, that so many voters will not give names to the canvassers and ignore notices sent to them.

The Annual Listing of Persons twenty years of age and over, was made under the direction of the Registrars by Bertha L. Davis, Ralph L. Barnes, Thomas J. Maley, Irene R. Martin, Michael J. Nee, Gladys Fraser and Eva M. Frye, beginning January 2nd and ending January 9th, 1951.

On December 31st the Voting List contained 3,798 names, 1909 Men and 1889 Women; 920 enrolled Democrats and 946 enrolled Republicans. This is 138 less than last year but we anticipate the usual large increase in 1952, it being a national election year.

JOHN C. BRAYDEN, Chairman
REGINALD JONES
ALEXANDER J. BOURKE
ELEANOR JONES, Clerk

JOHN C. BRAYDEN

Mr. John C. Brayden, Chairman of the Board of Registrars of Voters, having passed his 81st birthday and not wishing to continue in office, has retired. He was appointed to the Board on March 1, 1916, by Frank S. Binks, James Mahoney and

Harry B. Morse, Board of Selectmen, and has been reappointed every three years since. He has served faithfully and efficiently as a member of the Board and has seen many changes in the Town and Town government during the years. He, with Frank E. Sanderson, Town Clerk, was in charge of registering men for the draft at the time of the First World War and served in the same capacity for the second World War.

The Registrars extend their best wishes to Mr. Brayden for good health and happiness in his retirement.

REGINALD JONES,
ALEXANDER J. BOURKE
ELEANOR JONES

Report of Water Commissioners

To the Board of Selectmen:

Gentlemen:

The report of the Water Commissioners for the year ending December 31, 1951 is herewith submitted. The report of the Superintendent is included. This is the sixty-third report of the Water Department.

The daily consumption of water has increased over the past ten years to the point where some thought should be given for an additional source of supply. The maximum amount of water available daily for any new industry at the present time is 35,000 gallons. The Water Commissioners intend to investigate the cost of a survey and possible sources of supply in 1952.

Mains were extended on the following streets: Allen Drive, Randall Road, Charles Street, Assabet Street and Elaine Avenue. Mains on the following streets were cleaned: Powdermill Road, Forest Street and Colbert Avenue.

The observation tower at the reservoir was completely destroyed by fire on October 30, 1951.

The fence posts for the fence around the reservoir are rotted away so that most of the fence is sagging or down. It is planned to renew these with regular galvanized fence posts and to install a three strand barbed fence on the top of the rebuilt fence.

The cutouts for the motors at the White Pond pumping station have been installed. This station is now in perfect order with every type of safeguard for the motors.

The voters at a Special Town Meeting voted down the appropriation to replace certain mains in the distribution system. This is a very serious matter and we hope the Fire Department will not be hampered by lack of sufficient water at a large fire.

Respectfully submitted,

GAVIN TAYLOR,
EDWARD J. BOULDEN,
JAMES J. BAKUN,
Water Commissioners.

Report of the Water Superintendent

To the Board of Water Commissioners:

Gentlemen:

The report of the Superintendent and Registra of the Water Department for the year ending December 31, 1951 is herewith submitted.

January 1, 1951 the water in the pond was 33 inches below full pond. It remained about the same all year and December 31, 1951 the pond was 28 inches from high water elevation.

A progressive increase in the use of water is indicated by the daily and yearly pumping records. The important physical data of the source of supply is as follows:

| | |
|-------------------------------------|---------------------|
| Area of watershed | 66 sq. mi. |
| Area of full pond water surface .. | 58.0 acres |
| High water-elevation | 191.8 |
| Intake invert at pond, elevation .. | 182.0 |
| Volume in pond-elevation 191.8 .. | 158,000,000 gallons |
| Elevation December 31, 1951 | 189.5 |
| Volume in pond elevation 189.5 .. | 106,500,000 gallons |
| Safe yield of pond | 500,00 daily |
| Average daily use 1951 | 446,092 gallons |
| Margin of safety | 53,908 gallons |

If the consumption of water continues to rise and we have two extremely dry years as we had in 1949 there would in all probability be a shortage of water and a curtailment would have to be placed on the use of water. Any upturn in industrial activity might result in a demand which could not be met by the present source of supply.

Fourteen new services have been added this year making a total in use 1,734. Thirty-four services have been relaid. Twenty-three cellar stops were replaced, and nineteen services were cleaned.

Fourteen services have been metered making the total 1,791 now in use. Three hundred and four meters were repaired.

The brush on both sides of the road leading to the reservoir has been cut and burned.

On October 30 the observation tower was set on fire by persons unknown and completely destroyed.

Eight leaks in services and two in the main lines have been repaired.

Four new hydrants were added to the distribution system, two were reset and three that were broken were repaired.

Mains were extended on the following streets: Allen Drive — 160 feet with 6 inch cast iron; Randall Road — 300 feet with 6 inch cast iron; Charles Street — 346 feet with 6 inch cast iron; Assabet Street with 276 feet of cement asbestos; Elaine Avenue — 495 feet with cement asbestos.

A four inch cast iron main was extended into the Town dump and a hydrant set for the convenience of the Fire Department and the caretaker of the dump.

The Police Department reported a leak at 11:30 P. M. December 27, on Summer Street. Before all the control gates could be shut on this line over 500,000 gallons of water was lost. Some damage was done to the adjacent property which will be restored in the spring.

Samples of water were taken from four different points in the distribution system and sent to the laboratory for an analysis of the Calgon content. The result of the analysis showed that for better results about ten percent more Calgon should be added. This has been done.

All samples required by the State Board of Health were taken when required and sent promptly to the specified laboratory for analysis. All samples taken passed all the requirements of the State Board of Health. Cross connections with private water supplies were inspected periodically by the Department and a representative of the private water supply and also when the State Board of Health made their semi annual examinations. All such cross-connections were found to be in working order upon every inspection.

The special cutout controls ordered a few years ago finally arrived and were immediately installed at the White Pond

Pumping Station.

| Month | Gallons | K. W. Hours |
|-----------------|------------|-------------|
| January | 14,905,200 | 15,756 |
| February | 11,340,600 | 11,988 |
| March | 10,372,900 | 10,965 |
| April | 13,667,700 | 14,448 |
| May | 14,685,300 | 15,853 |
| June | 13,339,500 | 15,842 |
| July | 16,449,100 | 17,987 |
| August | 15,631,300 | 16,305 |
| September | 13,931,900 | 13,085 |
| October | 13,153,500 | 13,084 |
| November | 13,760,300 | 13,321 |

| | | |
|--|--------------------|----------------|
| December | 11,576,500 | 12,021 |
| Total | <u>162,813,800</u> | <u>170,655</u> |
| Average daily consumption | | 446,092 |
| Average daily per person for 7,000 | | 63.72 |
| % Consumption over 1950 | | 7.6% |

I am grateful for the assistance given me by the Water Commissioners and the other Town Departments and to the department employees who have been cooperative.

Respectfully submitted,

PETER T. PETERSON,
Superintendent.

Report of the Sewer Commissioners

To the Board of Selectmen :

Gentlemen :

The twenty-second report of the Sewer Department for the year ending December 31, 1951 is herewith submitted. The Superintendent's report is also included.

The contract for the construction of lateral sewers and the contract for additional sludge beds at the disposal plant have been completed. Plans and assessment schedules have been made and recorded with the Registry of Deeds in Cambridge. Copies of these have been given to the Assessors and the Town Accountant.

We wish to call to your attention the report from Metcalf and Eddy, consulting engineers, attached to the Superintendent's report in regard to sewer assessments and sewer rental charges. This department proposes sewer rental charges in 1949. We believe some thought should be given to this matter again.

The planks covering the secondary tank have rotted to the point where they constitute a hazard and a fence or suitable barrier erected in its place.

We are recommending the purchase of a power drive to turn the street rods used in clearing stoppages in the main lines. As the system gets older more maintenance is required to keep the main lines free from roots of trees that have found their way into the system.

Common sewers were extended on the following streets: Lewis, Prospect, Hird, Brooks, Charles, Everett, Lincoln, Chandler, Espie Avenue, Great Road, Powdermill Road, Randell Road, Glenhill Terrace, Woodbine Terrace, Birch Terrace, Bellevue Terrace, Glenview Terrace, Pinecrest Terrace.

Twenty-seven house connections have been made this year making the number in use 1144.

The sewerage disposal system was designed for 1000 connections, 5000 population, 500,000 gallons per day. Due to the unusual lack of ground water leaking into the system the capacity of the tank has not been reached. This shows that careful supervision in the construction of sewer extensions has been maintained at all times.

Respectfully submitted,

THOMAS H. TIERNEY,
VINCENT CROTTY,
GERALD F. TIERNEY,
Sewer Commissioners.

Report of the Superintendent of Sewers

To the Board of Sewer Commissioners:

Gentlemen:

The report of the Superintendent of Sewers for the year ending December 31, 1951 is herewith submitted.

Analysis and tests of sewerage taken from different points in the disposal system by the Massachusetts Department of Public Health show that the Imhoff tank and the entire disposal plant is operating efficiently.

The Common Sewer was extended on the following streets: Lewis, Prospect, Hird, Brooks, Charles, Everett, Lincoln, Chandler, Espie Avenue, Great Road, Powdermill Road, Randall Road, Glenhill Terrace, Woodbine Terrace, Birch Terrace, Bellevue Terrace, Glenview Terrace, Pinecrest Terrace. With the common sewer laid this year the system comprises 15.751 miles of Common Sewers.

Nineteen stoppages in the Common Sewer and forty-one in the house connections were cleared.

Twenty-seven house connections have been made this year making the number in use 1144.

The brush at the disposal plant has been cut and burned.

The contractor has completed his contract to the satisfaction of the Engineers and this department. The addition of two sludge drying beds has been needed for some years.

Early in the year 1951 this Department received a questionnaire from Metcalf & Eddy, Consulting Engineers, Boston, Mass., relative to sewer assessment practice and sewer rental charges in Maynard. This questionnaire was answered and a tabulation of the replies received together with a brief discussion has been received and is attached to this report.

The planks covering the secondary tank are rotted and are not safe to walk on. I recommend that a fence be built around this tank to keep children away. If a child or an adult ever fell into this tank it is doubtful if they could get out alone.

Stoppages in the common sewer are increasing each year and are quite difficult to clear due to the system being in operation longer each year. I recommend that a power drive for the street rod be purchased.

Record of pumping at the Powder Mill Road Pumping Station:

| | |
|--|---------------------|
| Total flow for year | 115,695,800 Gallons |
| Average daily flow | 316,974 Gallons |
| Average daily per person-population served 5 per connection | 5,720-55.41 Gallons |

I am grateful for the assistance given me by the Sewer Commissioners and other Town Departments and to the department employees who have been so co-operative.

Respectfully submitted,

PETER T. PETERSON,
Superintendent.
December 31, 1951

Mr. Peter T. Peterson
Superintendent of Sewers
Maynard, Massachusetts

Dear Sir:

In accordance with the promise made in our letter of transmittal of the questionnaire relative to sewer assessment practice and sewer rental charges in your community, we enclose herewith a tabulation of the replies received together with a brief discussion thereon.

In our opinion, the principal value of this study is that it indicates the need in many communities to increase sewer assessment charges in line with the increase in sewer construction costs, if the costs are to be divided in accordance with the original intent when the sewer assessments were established. Of secondary interest is the growth in sewer service charges.

Very truly yours,

METCALF & EDDY
By FRANK L. FLOOD

FLF:MF
Enclosure

**SEWER ASSESSMENT PRACTICE AND
SEWER SERVICE CHARGES IN MASSACHUSETTS**

By Frank L. Flood*

During 1951, we sent out a questionnaire relative to current practice on sewer assessments and sewer rental or service charges to 73 municipalities in Massachusetts. To date, (De-

ember 28, 1951) replies have been received from 41. These replies have been tabulated.

Sewer Assessment Rates. The sewer assessments as received vary from a minimum of \$0.50 to a maximum of \$7.60 per linear foot of frontage. For comparative purposes, the assessments based on area have been converted to the equivalent cost per linear foot as reported in the tabulation.

In many municipalities, the assessment rate was established years ago and was based upon a percentage of the then prevailing construction costs. In the majority of the municipalities reporting, the assessment rate has not been changed in keeping with increasing costs. In fact, until recently, in most cases it was deemed unlawful to change the assessment rate once it had been established. However, recent legislation has made it possible to re-establish the assessment rate in keeping with the rise in prices.

During recent years, a number of municipalities have increased the sewer assessment charge about in proportion to the increase in construction costs. It is of interest to compare the apparent construction costs in this latter group. This has been done based on the reported percentage of construction costs paid under the general tax levy, the reported equivalent assessment rate per linear foot and the assumption that the assessable frontage is equivalent to 175 percent of the actual length of sewer constructed. The results are as follows:

| Municipality | Apparent construction cost of sewers per linear foot |
|--------------|---|
| Braintree | \$10.20 |
| Lexington | 11.00 |
| Needham | 10.70 |
| Newton | 20.30 |
| Quincy | 13.80 |
| Northbridge | 17.60 |
| Swampscott | 12.00 |
| Wellesley | 12.22 |
| Winchester | 15.66 |
| Maynard | 10.40 |

*Partner, Metcalf & Eddy
Consulting Engineers
Boston, Massachusetts

Omitting Winchester, Northbridge, and Newton where the estimated costs, as above derived, are apparently somewhat high, the estimated average cost of sewers is about \$12 per linear foot. It is reported that the actual average cost of all sewers constructed in Quincy during the five years prior to 1951 was \$11.83 per foot.

The reported median equivalent sewer assessment rate is about \$2 per foot. This represents only about 29 percent of construction costs at the present time.

Portion of Sewer Costs Assessed Upon Property Benefitted. An analysis of the returns indicates that the portion of sewer costs supposedly assessed upon property benefitted varies as follows:

| Reported portion of sewer cost paid by assessment, % | Number of municipalities |
|--|--------------------------|
| 100 | 1 |
| 75 | 2 |
| 66- $\frac{2}{3}$ | 2 |
| 60 | 2 |
| 58- $\frac{1}{2}$ | 1 |
| 50 | 9 |
| 40 | 1 |
| 35 | 1 |
| 33- $\frac{1}{3}$ | 1 |
| 30 | 1 |
| 25 | 3 |
| 20 | 3 |
| 17- $\frac{1}{2}$ | 1 |
| 15 | 1 |
| 0 | 4 |

The above tabulation indicates that 17 out of 33 municipalities are reported to charge 50 percent or more of the construction costs in sewer assessments. Actually, only eight municipalities assess sewer costs at rates representing 50 percent or more of the construction costs.

In Natick for new private developments, 100 percent of the construction cost of new sewers and house connections is paid by the developers. For any existing unaccepted street, 37 $\frac{1}{2}$ percent of the cost is assessed on each side of the street based upon the lot frontages. The Town pays 25 percent of the cost of sewers in these streets.

Exemption on Corner Lots. The assessment of sewer benefits on corner lots has frequently been the cause of strenuous objection on the part of the property owners affected. Needham has increased the exemption on corner lots from 60 ft. to 100 ft. In nine of the municipalities, the exemption includes the depth of the lot on one street. In six cases, the exemption is 100 ft. and in three cases it is 80 ft. In two municipalities, it is 75 ft.; in one, 70 ft.; in four, 60 ft.; in two, 50 ft.; and in one, it is 40 ft. No exemption is allowed on corner lots in five municipalities.

Sewer Service Charges. From the returns received from the municipalities in Massachusetts, we have summarized the sewer rental practice as follows:

Wellesley —

Same as water service charge.

Reading —

Unmetered service \$6 per annum. For metered service as follows:

First 3,000 cu. ft. \$0.23 per 100 cu. ft.

Next 3,000 cu. ft. 0.20 per 100 cu. ft.

Next 4,000 cu. ft. 0.16 per 100 cu. ft.

Next 10,000 cu. ft. 0.12 per 100 cu. ft.

Next 10,000 cu. ft. 0.08 per 100 cu. ft.

Next 70,000 cu. ft. 0.04 per 100 cu. ft.

All in excess of 100,000 cu. ft. \$0.02 per 100 cu. ft.

Brockton —

\$0.15 per 100 cu. ft. as measured by water meters.

Gloucester —

Minimum charge \$5; rate \$0.05 per 100 ft. of water used up to 480,000 cu. ft. and \$0.02 per 100 cu. ft. of water used over 480,000 cu. ft.

Natick —

\$0.25 per 100 cu. ft. of water used.

Marlborough —

\$0.075 per 100 cu. ft. of water used.

Danvers —

Quarterly basis:

First 2,000 cu. ft. at \$0.18 per 100 cu. ft.

Next 3,000 cu. ft. at 0.14 per 100 cu. ft.

Next 5,000 cu. ft. at 0.10 per 100 cu. ft.

Next 90,000 cu. ft. at 0.06 per 100 cu. ft.

Over 100,000 cu. ft. at 0.03 per 100 cu. ft.

Bridgewater —

Quarterly assessment at rate of 40 percent of cost of first 1,700 cu. ft. of water plus a charge of 25 percent of cost of water consumed in excess of 1,700 cu. ft.

Cambridge —

The City Council has failed to approve City Manager recommended sewer rental charges for the last two years.

Maynard —

On motion made at the annual Town Meeting, March 14, 1949
— Voted to lay this article on table.

Report of Superintendent of Memorial Park

To the Trustees of the Soldiers' Memorial:

I. Maintenance.

Regular care of the lawns and shrubs has been a problem this year. Previously, the Welfare Department has supplied men to mow the lawns and trim the shrubs. This year there was only one man and while he was willing and did what he could he was not very able. The wet spring and summer made the care of lawns more difficult as it became necessary to rake and carry off the mowings to prevent injury to the lawns. The co-operation of Mr. Sebastynowicz of the Acme Supply Company made it possible to keep the lawns mowed regularly by loaning a power lawn mower at different times. A shrub trimmer was borrowed from the Cemetery Department to help keep up with this trimming. The co-operation of that department is appreciated. Other work which needed attention could not be done due to lack of help. The maple tree branches needed thinning and more of the shrubbery cut back or removed.

II. New Work.

If possible in 1952 most of the shrubbery should be cut back or removed and replaced with grass. Two evergreens which are causing other trees to grow unshapely, should be removed. The shrubs around the walks and monuments should be removed and small evergreens set and kept trimmed low. The Flag pole needs painting and the monument cleaned. With less shrubbery around the monument it can be kept in better condition.

I wish to express my appreciation to the many townspeople who have commented favorably on my efforts to keep the Park a beauty spot.

Respectfully submitted,

CLIFFORD F. KING,
Superintendent of Memorial Park.

Report of Library Trustees

To the Citizens of the Town of Maynard:

We herewith submit the report of the Librarian and the Trustees, for the year 1951.

We are indebted to the following Libraries for the loan of books:

The Division of Public Libraries, Boston, Boston Public Library, Brookline, Concord, Cambridge, Fall River, Lynn, Pittsfield and Watertown.

The following have donated books or magazines to the Library, for which we express our thanks.

The Rotary Club of Maynard
 The Holy Name Society
 The Middlesex Laundry
 Lovell Bus Inc.
 Mrs. Verna Nichols
 Mrs. Sarah Turner
 Mr. Aaron Heller
 Mr. John Moynihan

The Statistical Report is as follows:

| | |
|---|----------|
| Books in the Library, January 1, 1952 | 13,758 |
| Discarded | 50 |
| Lost Books | 20 |
| Borrowed | 265 |
| Bound | 85 |
| Purchased | 332 |
| Magazines | 41 |
| Daily Paper | 1 |
| Weekly Paper | 2 |
| Fines Collected | \$110.28 |
| Circulation | 27,890 |

Respectfully submitted,

OLIVE R. MORGAN,
 Librarian.

The Public Library Trustees hereby endorse the Librarian's report.

We wish to invite the public to visit and use the facilities of the Library.

We wish to thank Miss Morgan and Mrs. Lester for their cooperation during the past year.

Respectfully submitted,

WILLIS J. LESTER, Chairman,
NELLY C. MAY, Secretary,
Maynard Public Library Trustees.

Report of the Board of Public Welfare

The Annual report of the Board of Public Welfare is herewith submitted.

Despite the fact that business at our local mills is at a very low ebb, the General Relief condition remains at about the same level as in the preceding year. Many workers have found other employment, which with Unemployment Compensation and Old Age and Survivors Insurance tends to keep the number of General Relief cases at about the same level as in the past two years.

As of December 31, 1951 we are caring for seventeen cases locally, and seven cases in other cities and towns with a Maynard settlement.

Relief and hospital costs have greatly increased during the year. The cost of caring for patients in the Massachusetts General Hospital is now sixteen dollars per day, and the State Hospital and Infirmary at Tewksbury is now \$20.17 per week.

Several other General Relief cases have been opened and closed throughout the year.

DISABILITY ASSISTANCE

Under Chapter 118D of the Acts of 1951 a new category of assistance has been created by our legislature. Under this law certain persons who are totally and permanently disabled must be granted Disability Assistance if found eligible and in need. Seventy-five per cent of the costs are to be reimbursed by the State and Federal Government. Relief under this law must be dispensed by local Boards of Public Welfare.

OLD AGE ASSISTANCE

As of December 31, 1951 one hundred and nine persons were receiving Old Age Assistance in Maynard, eight cases less than a year ago.

Ten cases are in Rest and Nursing Homes at an average cost of twenty-five dollars per week for board, room and care plus clothing and \$4.00 per month for Leisure Time Activities and all medical and hospital care.

Thirteen cases are receiving Old Age Assistance in other cities and towns who have Maynard settlements. Eighteen new cases have been opened and twenty-four cases closed in

1951. Four cases have been rejected as ineligible. Our Case load consists of forty-two men and sixty-seven women.

Under Chapter 118A, Section 4, of the Acts of 1951 a so called Lien law has been enacted which provides that the Town shall take a lien on such property, as a condition of granting Old Age Assistance. The lien shall take effect on January 1, 1952. After that date, all assistance granted to the recipient must be recovered by the Town through the Board of Public Welfare (unless there is a surviving spouse) after the death of the recipient. After the death of the spouse, a claim will be made against the estate.

AID TO DEPENDENT CHILDREN

We are granting Aid to Dependent Children to five mothers with seven dependent children, one case more than in the preceding year.

The financial report of receipts and expenditures will be found in the report of the Town Accountant.

Respectfully submitted,

CHARLES P. SPURRELL,
ALTON W. SIMS,
WILLIAM J. SMITH,
Board of Public Welfare.

Report of the Board of Health

To the Board of Selectmen:

The Board of Health continued its earnest effort to continue its drive to keep this town free of disease. The many successful clinics, diphtheria, dog, school dental, vaccination, tuberculosis and also the milk inspections. The splendid co-operation of the townspeople with the Maynard Tuberculosis Christmas Seal Committee conducted a successful x-ray unit on the fight of tuberculosis against man.

These times are especially tiring and hard on the budget. There have been several changes in regards to the hospitalization of communicable diseases and also the Pre-Mature Baby Law, which compels the local Board of Health to be responsible for the hospitalization and care of an infant under 4½ pounds until it reaches five pounds, unless, the parents are financially able to do so. It should be remembered that a life is worth saving, at any cost.

In its worthy clinics conducted by the Board for the welfare of the townspeople are the following:

DIPHThERIA CLINICS

For the 20th consecutive year this town has, because of these important clinics, been free of this dreaded disease. Dr. R. E. Hooper, assisted by Miss Mary Ward, R.N., Miss Edith Foster, R.N., and Mrs. Martha Champagne, R.N. Every parent should realize and see that their infant child on reaching the age of six months should receive this protective measure if not at these free clinics, by their family physician.

VACCINATION CLINICS

A total of forty-four children were inoculated against small pox at this clinic in charge of Dr. S. M. Cremer, assisted by Misses Mary Ward, Edith Foster and Mrs. Champagne. At the age of six months the child should be inoculated.

SCHOOL DENTAL CLINICS

One of the most important factors in the health and development of a child is good teeth, and these School Dental Clinics, are and have been proven to be a vital factor in the future citizens. Drs. F. A. May and S. M. Garland were in charge of the clinics.

TUBERCULOSIS

In this important fight against a dreaded disease, the X-Ray mobile through the co-operation of all townspeople was a great

success. The Tuberculosis Seal Committee, Women's Club and several individuals who worked tirelessly are to be commended. A total of 2,391 persons were x-rayed and the Board wishes to thank all who gave their time. The Board also hospitalizes people who have been reported requiring hospitalization. We still take persons to be x-rayed at the Middlesex County Sanatorium as requested by a physician.

MILK INSPECTIONS

The duty of the Department of Milk Inspection is to visit the various dairies that distribute milk and dairy products in Maynard with samples taken each month. A careful analysis is made of the samples and a report is kept on file at the Town Hall where a copy is sent to all dairies. This Department is pleased to report that the conditions in the various dairies in Maynard and those who send their trucks here, are excellent. Several of the dairies have made improvements in both machinery and buildings during the past year at which no violations of milk laws were reported during 1951.

DOG CLINIC

A total of 346 dogs received their inoculation and were protected against rabies at the 20th annual clinic conducted by the Board of Health in charge of Dr. Stedman of Clinton assisted by Josiah Herrick, Local Inspector of Animals and also Dog Officer. It should be remembered that dogs should be inoculated annually, and that in this country nine persons died and there were a total of 7901 cases of rabies in 1951.

The Town as a whole was fortunate that with the exception of Tuberculosis communicable diseases were at a very low rate.

LIST OF COMMUNICABLE DISEASES

| | |
|----------------------|----|
| Dog Bite | 9 |
| Chicken Pox | 37 |
| Mumps | 11 |
| Scarlet Fever | 3 |
| Tuberculosis | 5 |
| Whooping Cough | 16 |

The Board wishes to thank all the townspeople, its faithful employees, and the various Town Departments for their splendid co-operation during the past year.

Yours truly,

LESTER F. COWLE,
HOWARD J. CLARK,
JOHN JOHNSTON,
Board of Health.

Annual Report of Nurse for the Year Ending Dec. 31, 1951

| | |
|----------------------------------|-------|
| Number of Patients Visited | 640 |
| Association Paid Visits | 2,446 |
| Free Nursing Visits | 1,452 |

There were three home deliveries attended by the nurses.

All other activities of the Board of Health Nursing Service are recorded in the Annual Report.

Signed,

MARY A. WARD, R. N.

Report of Cemetery Commissioners

Maynard, Mass., January 4, 1952.

To the Honorable Board of Selectmen:

The annual report of the Board of Cemetery Commissioners is herewith submitted.

During the year, fifteen Rock maple trees were planted in the new section of the cemetery and a number of evergreen shrubs transplanted.

The wall at the entrance along Great Road was removed during the winter months and was replaced by a six foot chain link fence. The grounds bordering the fence were graded and seeded.

All shrubs were thoroughly sprayed on two different occasions and the shrub beds were properly cared for when necessary.

In conclusion, we wish to thank the citizens for their cooperation during the past year.

Respectfully submitted,

GUYER W. FOWLER,
GEORGE E. WEAVING,
Cemetery Commissioners,
Maynard, Massachusetts.

Report of Superintendent of Glenwood Cemetery

Maynard, Mass., January 4, 1952.

To the Board of Cemetery Commissioners:

I herewith submit the report of the Superintendent of Glenwood Cemetery for the year 1951.

The trees and shrubs throughout the cemetery were trimmed and all shrub beds weeded and cultivated.

Weed killer was applied to all avenues and several yards of gravel was used to repair and grade avenues.

The usual work of filling and repairing sunken graves was accomplished and all catch basins throughout the cemetery were cleaned.

In conclusion, I take this opportunity to thank the Commissioners and the various departments for their help during the past year.

Respectfully submitted,

ROY E. MARSDEN,
Superintendent of Glenwood Cemetery.
Maynard, Massachusetts.

Report of the Planning Board

December 31, 1951.

During the year 1951 the Planning Board held twenty-four regular meetings and in addition held nearly the same number of sub-committee meetings.

Subdivision Control

In accordance with Section 81-L of Chapter 41 of the General Laws subdivision regulations were drawn and adopted, this is mandatory to all new type Planning Boards.

In passing upon a plan the Board is required to see that the area is safe to build upon, that proposed streets have proper widths, grades, and are properly located, The streets are required to have minimum width and depth of gravel for proper drainage. Dead end streets are required to have a circular turn-around for access of fire trucks and snow plows.

The subdivider may be required to install such utilities as are reasonable in order to provide for the health and safety of future purchasers of lots and the welfare of the Town.

Parking

As time passes on the parking situation becomes more critical. In making a survey of parking the Board found that on Thursdays, Fridays, and Saturdays traffic is heaviest in the business section and to find a parking space is a problem. Many complaints have been registered by outsiders as well as townspeople. It is very evident that Maynard is a shopping center for many of the surrounding towns as a survey made by the Regional Planning Commission shows that the volume of retail sales per capita are on a level with such communities as Framingham, Lowell, Marlboro and Waltham. The increasing number of cars coming into Maynard is justification for having a Municipal Parking area. Since the Town owns the two properties on Summer Street which are in the business district the Board's recent survey was made to construct parking lots there, bearing in mind that in the event Municipal buildings were erected on these lots, parking space would be required around them and the construction work done for the parking areas would not have to be changed.

A survey is being made of Parking Meters and their use to increase the turnover in curb parking.

Zoning

Under the protective Zoning By-Law the following permits have been granted:

| | |
|------------------------------|----|
| New dwellings | 11 |
| Garages | 16 |
| Additions to dwellings | 11 |
| Accessory buildings | 3 |

The townspeople are reminded that permits are required from the Selectmen to erect buildings, to establish business or industry or make changes in the same as described in Sections 9-1, and 9-2 of the Zoning By-Laws as follows:

SECTION 9 PERMITS

- 9-1 No building for use as a habitation, for business, for industry or accessory buildings (covering over one hundred (100) square feet of area) shall be erected, enlarged, changed in use or moved after this By-Law is adopted without a permit from the Selectmen, showing that the requirements of the district have been substantially complied with.

Said permit shall be posted conspicuously on the premises during the time of construction.

The Selectmen shall adopt reasonable rules and regulations governing method of application for and issuance of such permits.

- 9-2 No lot, building or structure shall be changed in size or use so as to violate this By-Law.

Recommended Action Under the Master Plan for 1952

Parking

That the Town lease the parking area in the rear of Peoples Theatre if possible for a minimum of five or ten years, and prepare this area with a graveled and oiled surface. To also improve the lighting of said lot.

Recreational Facilities

That ice skating areas be provided for the children in or near as many as possible of the following locations:

Coolidge School
 Wilson School
 Alumni Field (repair rink)
 Crowe Park
 Glen Haven
 High School

The fence around Alumni Field is in need of paint as the finish is wearing off, if this is not taken care of the fence will corrode and will need to be replaced.

Highway Improvements

There has been a notable increase of poison ivy along the highways and larger sums should be appropriated for its eradication.

Parker Street at the Sudbury line has been used by picnickers who leave paper and other refuse making this corner very unsightly. A container should be provided and a sign erected similar to those along the Concord Turnpike.

Miscellaneous

That all fill from Municipal excavating be placed in the area between Memorial Park and the Osbeck property whenever possible.

Under the long range program the study of Town Water mains should be continued.

Respectfully submitted,

FRANK W. JOHNSON,
ERNEST J. IANNUZZO,
ARTHUR F. CROFT,
ROWLAND W. DAWSON, Clerk,
WALTER E. CARBONE, Chairman.

Report of the Board of Appeals

To Board of Selectmen:
Maynard, Massachusetts

Gentlemen:

The following appeals and petitions have been considered during the year 1951 under the Protective Zoning By-Laws:

| | |
|---|----------|

Assessors' Report

To the Board of Selectmen:

The Annual Report of the Board of Assessors for the year ending December 31, 1951, is herewith submitted:

In accordance with the provisions of the General Laws of Massachusetts, Chapter 59, Section 29, all owners of taxable property shall each year on or before the 31st of January submit to the local Assessors a list with the valuation of their taxable property. Notices are posted, and forms may be obtained at the Assessors' office in Municipal Building.

All Male Inhabitants who are 65 years of age and over, and who wish to be exempted from payment of a poll tax, must make a request in writing on a form furnished at the office of the assessors.

Each year increasing duties are imposed by the State Department upon your Assessors, made necessary by newly created tax laws by the Legislature. Yearly work has been added to this office by the great increase in Motor Vehicle taxes known as the Excise Tax. There is a great increase in the number of Real Estate Transfers which requires a great deal of additional work in the Assessors' office. The office is open each day from 9:00 A. M. to 5:00 P. M., except Saturdays.

RECAPITULATION OF TAX RATE

| | | |
|--|--------------|--------------|
| Total appropriations to be raised by taxation | \$590,835.63 | |
| Total appropriations voted to be taken from available funds: | | |

WILLIAM STOCKWELL,
Temporary Town Collector.

Town Accountant's Report

Maynard, Massachusetts, January 9, 1952.

To the Honorable Board of Selectmen:—

Herewith is presented the report of the Accounting Department for the year ending December 31, 1951. The report is made in accordance with the requirements of the State System of Accounting.

In accordance with the provisions of Section 61, Chapter 41, of the General Laws, I hereby certify that I have verified the cash balance of the Town Treasurer as of December 31, 1951. The total cash balance December 31, 1951 was \$215,218.20.

The net debt of the Loan Accounts amounts to \$70,000.00 which is about 1.04% of the Town valuation.

The courtesy and co-operation received from the various town boards, officials and employees is gratefully appreciated.

Respectfully submitted,

JAMES V. KING,
Town Accountant.

Report of the Middlesex County Extension Service

Middlesex County maintains an Extension Service in Agriculture and Home Economics for the benefit of all towns within the County. This service is available to all citizens, especially farmers, home gardeners, homemakers, rural youth and 4-H Club boys and girls.

The work is developed by an unpaid board of trustees who maintain a staff of agents at the headquarters at 19 Everett Street, Concord. The trustees appoint a director in each town to represent them in all phases of Extension Work or in a few cases towns elect a director and make an appropriation to help defray local expenses.

In addition to farm and home visits made upon request, local meetings are held or sectional or county-wide meetings or tours are helps available to everyone. A monthly bulletin is published, timely letters mailed on spraying, fertilizing, seedling, poultry problems, information to homemakers, boys' and girls' 4-H work or general community problems.

Some of the activities that took place last year in Maynard are as follows:

Educational work with the dairymen was concentrated on programs to assist the farmers in solving their problems of raising better roughage, disease control and milk marketing.

Many requests for assistance in productive problems were received from the small orchardists and home vegetable growers.

Increased efficiency, flock health, greater breeding progress, and better marketing practices were the principal goals of the Extension Poultry Program. Efficient management practices and equipment were among the topics discussed at meetings of the Middlesex County Poultry Association, held at the Acton Town Hall on the second Monday of the month.

Milton Duclos, 119 Parker Street, is enrolled in the Middlesex Flock Health Program, through which the Extension Service is attempting to help poultrymen and turkey growers to keep their flocks healthy.

Rabbit breeders were given assistance through the Middlesex Commercial Rabbit Association, which meets monthly at the Extension Service "Schoolhouse" in Concord.

Mrs. Lauri Manning represented Maynard on the Women's Advisory Council. A school for training leaders as well as local groups taught by leaders on the Subject, "New Ideas in Food Preparation" was held in Maynard. "Understanding Ourselves and Others" — starring the "Tater Family" was enjoyed by a good size group of homemakers, and the suggestions for Christmas giving, included in the Gift Kit, were well received.

4-H Club work was very active in Maynard this year. Seventy-six girls were enrolled in foods, knitting, and clothing projects. Joanna Kangas, placed first in the state with a, "Better Ironing Methods" Demonstration, which she gave at the University of Massachusetts in Amherst. Mrs. Paul Sawyer was the Town Chairman for 4-H Club work and was extremely active in obtaining leaders and in giving other help to the program. Leaders were: Mrs. John Hagerty, Mrs. Rowland Dawson, Mrs. Alric French, Mrs. Harold Ruffead, Mrs. Edward Troisi, Mrs. Walter Larkin, Mrs. Vincent Jarmulowicz, Miss Janette Taylor, Mrs. Willard Sylvia, Mrs. Eino Eklund, and Miss Helen Arciszewski.

MILTON DUCLOS,
Town Director.

Report of Maynard School Committee

To the Citizens of Maynard :

It is with pleasure that we submit herewith the Annual Report of the School Committee for the year ending December 31, 1951.

Throughout the year the School Committee has met on the first Monday of each month for the transaction of business which properly came before it. We have made special visits to the buildings to ascertain their condition and to inspect alterations and repairs in progress. In October a thorough survey was made of all the buildings and grounds to determine the necessary proposals relative to alterations, maintenance and repairs for 1952.

By means of this report we call the following pertinent matters to the attention of the people of Maynard :

CHANGES IN PERSONNEL

Resignations

| | |
|---------------------|--|
| Mary E. Barre | Director of Guidance |
| Margaret M. Hogarty | Stenography and Typewriting |
| Mary A. Collins | Bookkeeping and Sec. Training |
| Dorothy E. Marsden | English and Latin |
| Vincent T. Wassel | P.A.D., European History and Football Coach |
| Joan Dukeshire | J. H. Music and Spelling |
| Betty G. Morton | Roosevelt — Grade Six |
| Patricia Chandler | Roosevelt — Grade One |

Appointments

| | |
|---------------------|---|
| Mary I. Queenan | Director of Guidance |
| Helen M. Riordan | Stenography and Typewriting |
| William A. Calarese | Bookkeeping and Sec. Training |
| Gerard J. Costello | Math., and Ass't. Football Coach |
| Rosamonde LaFleur | English and Latin |
| Wilfred DeRosa | P.A.D., Anc. Hist., Sen. Math., and Football Coach |
| Jane M. Ryan | J. H. Music and Spelling |
| George W. Baker | J. H. Math., Lit. and Spelling |

Transfers

| | |
|-------------------|----------------------------------|
| Delma W. Sanborn | J. H. to Roosevelt, Grade Six |
| Margaret M. Swain | Coolidge to Roosevelt, Grade One |

MAINTENANCE

Our buildings are in excellent condition, both inside and outside. 1951 saw the completion of the toilet renovation program. The boys' toilet rooms of all buildings are now equipped with modern urinals. Our classrooms are equipped with adequate lighting fixtures. The plan of painting one building on the outside each year is progressing. The Coolidge School was painted in 1950, the Roosevelt School in 1951 and the Junior and Senior High School unit will be painted in 1952.

As has been stated before, Maynard is one of the foremost municipalities in the modernization of its school buildings, although we have received no publicity about it. We extend to the people of Maynard a most cordial invitation to visit our buildings to see for themselves what progress has been made.

MAJOR REPAIRS 1951

Senior High School

Nurse's Lavatory
 Slop Sink
 Water Cooler
 Flushometers in Girls' Basement
 Repair of Roof
 Painting — Four Classrooms
 Lower Corridor
 Lower Entrance, Dressing Room and Toilet
 Repair of Dado and Hand Rail
 New Light Fixtures
 New Window Shades where needed

Junior High School

New Urinals, Flushometers
 Replacing Stair Treads

Auditorium

Repair of Marquee
 Two new Closets and Flushometers
 Painting of Interior and Showers

Roosevelt

Replacing of Boiler No. 2 and Stoker
 Urinals and Flushometers
 Re-bricking Combustion Chamber, Boiler No. 1
 Painting — Three Classrooms
 Exterior
 Partition in Principal's Office
 New Light Fixtures in Upper Corridor
 New Window Shades where needed

Coolidge School

Replacing of Radiator Valves
 Painting — Class Room and Principal's Office
 Partition in Teachers' Room
 New Ceiling
 New Glass Light Shades in Classroom
 New Window Shades where needed
 New Fence
 Engineering Services in connection with plans for New Heating System

Wilson School

Repair of Ventilators on Roof
 New Doors
 Re-wired Bells

Miscellaneous

Physical Education Department — Replaced Parallel Bars
 Superintendent's Office — New Desk
 Visual Education Department — Repair of Projector
 Re-placed Sanding Machine

PROPOSED ALTERATIONS, MAINTENANCE AND REPAIRS FOR 1952

In determining the alterations and repairs for our school buildings, the School Committee follows the so-called democratic procedure. The janitors, teachers and principals make recommendations concerning their respective buildings to the Superintendent of Schools. The Superintendent submits these recommendations along with her own to the School Committee. The Committee then carefully surveys each building and often adds items to those recommended. The final decision is then made by the Committee in the light of the recommendations and its personal survey of the buildings. Full consideration is given to making the buildings safe, clean, easy to maintain and attractive. In addition, the thread of economy runs through the whole fabric of alterations and repairs. We are happy to report that when the children are given a neat, attractive and clean building, they seem to appreciate it and cooperate very well in the general upkeep.

The items proposed for 1952 are for the most part regular maintenance items which any prudent property owner would undertake to keep his property up to par and in desirable condition.

The two major items for 1952 are the installation of a new heating system at the Coolidge School and the painting of the exterior of the Junior and Senior High Schools.

SALARIES

The School Committee, like every other committee in the country, has been confronted with the salary problem.

A study of teachers' salaries in Maynard showed existing inequalities due to particular circumstances, such as the date of appointment in Maynard, the minimum salary at the time of appointment, military service record, and the shortage of teachers in the grade or particular subject field.

Maynard salaries have been below the state-wide average, particularly in those towns with the same ability to pay. If Maynard is to attract and keep competent teachers, enable them to maintain adequate living and cultural standards, promote professional growth and give stability to the teaching staff by making it less to the advantage of our capable teachers to accept positions elsewhere, an adjustment had to be made and a workable schedule developed.

The questions "Why have a salary schedule?" and "Why not bargain with a teacher for his salary?" might be raised. In regards to these questions we make the following observations: First, if there is no salary schedule, then the teacher would have no basis for salary standards, because nothing would be outlined, orally or in writing, by which the parties concerned could be guided. The teacher would be a free agent and dependent on his own abilities for securing the best salary possible. The second observation is that professional people will not work for a salary which is not defined or guaranteed for the future. When one enters industry, he is reasonably sure of continuous service, at a stated salary with definite increases as his skill and term of service increases. To keep teachers in service, there must be a salary schedule which has a base salary that provides an adequate standard of living and which recognizes the amount of training and professional growth of the individual as well as the length of service he has given to the community.

The practice of adopting salary schedules for the administration of teachers' salaries is now wide-spread and generally accepted. The preparation, negotiation and adjustment of these schedules is the object of an expenditure of an enormous amount of time and energy by school administrators and school committees.

The School Committee spent many hours considering a salary scale for the personnel of the department. Our aim was a schedule suited to the needs of Maynard and within its ability to pay. We tried to be fair and equitable to all concerned. We were fully aware that the fundamental criterion of the ef-

fectiveness of such a schedule is its value in improving the educational growth of the school children of Maynard.

The School Committee worked with a committee representing the personnel. As a result of joint study and the development of understandings, a schedule was drawn up which will eliminate inequalities in Maynard salaries and be acceptable to those concerned as well as being within the ability of the town to pay.

Teachers' salary schedules as a rule, provide for increases in salaries for experience. These increases take place in the form of annual increments as a teacher steps along from the minimum to the maximum salary for teachers of her classification. A study of forty unclassified salary schedules from secondary and elementary schools reveals that it is standard practice to allow increased salary payments for additional college preparation, beginning in most cases with two years' training and ending with the master's degree. In the salary schedule which we formulated, salary payments fall into six primary brackets according to professional preparation.

MERIT TYPE SCHEDULES

There has been a trend toward recognition of merit in salary schedules in certain sections of the country. On the surface it may appear to have elements of perfection and justice. Supporters claim all teachers are not of equivalent worth and under a single salary type of schedule the poorest teacher may receive the same salary as the best and experience and training may not be an accurate index of the teacher's ability. Proponents of the merit rating list the following values of merit rating:

1. It is obvious that greater support for public schools should result in better education for children.
2. The essential element in good education is the quality of the relationships between pupils and teacher.
3. If the quality of the relationship between pupils and teachers is to be improved, great emphasis must be placed upon improving the teacher.
4. Within a capitalistic system which places great value on free enterprise, financial rewards are sought by all people, including teachers.
5. Putting unusual financial rewards within the reach of the superior teacher will stimulate all teachers to do better work.
6. Striving for greater rewards will produce a better quality of relationship between pupils and teacher.

7. Therefore it follows that the recognition of merit in salary schedules will produce better education.

There is so much that is true in the above points that people are led to believe the conclusion is true. As a matter of cold fact however, the conclusion is erroneous and following it would do irreparable harm to teachers' morale as well as that of children.

Authorities from systems using merit rating reluctantly acknowledge that for the most part, the extra salary under the so-called merit plan has actually been given for extra duties outside the classroom and not for actual classroom leadership.

Merit in teaching cannot be judged because of the variations in teaching environment. One must never lose sight of the fact that teachers are human beings and that they deal with other human beings of varied abilities.

The Maynard teachers have requested that merit be recognized. The School Committee feels that if the teachers wish outstanding work to be recognized by the Superintendent as worthy of special remuneration, they must also be ready to accept the Superintendent's recognition of work below the average and not worthy of additional increment. The salary schedule which has been formulated for Maynard, with its steps based on training and experience binds the School Committee in no way to grant increments annually.

The schedule which we have drawn up (and which we assume will become effective after the annual town meeting retro-active to January 1, 1952) has been designed to promote contentment among our teachers, professional improvement, improved morale, better classroom teaching, and a stronger school system. These should improve the educational growth of the school children of Maynard.

ALUMNI FIELD

During 1951 both the interior and the exterior of the Field House were painted as well as the ticket booths and the gates leading into the field. The old metal lockers, which had become inadequate, unsanitary and dangerous, were eliminated. To fulfill the purpose which these lockers once served, open wooden compartments were built. These compartments provide a seat for each boy and a space in which to hang his clothes. Air could not adequately circulate through the old metal lockers, and, consequently, when a boy placed his perspiration-soaked uniform in them, it was not thoroughly dry before he was ready to use it again. Under the new arrangement, it is only a matter of a few hours before it is dry and ready for use.

The boys who use the Field House apparently appreciate the renovations within the building and exercise care to keep it in excellent condition.

For 1952 we propose to paint the fence surrounding the field, give some attention to the stands and improve the surface of the playing field.

In keeping with its policy to permit the use of school facilities for the benefit of the children of school ages, provided there is responsible adult supervision, the School Committee voted to grant not only the use of the practice area of Alumni Field, but also to offer the use of the facilities of the Field House for Little League Baseball for the summer of 1952.

VOCATIONAL EDUCATION

At the present time, under the provisions of Chapter 70 of the General Laws, there are thirteen students from Maynard attending Vocational Day or Evening Schools. The town of Maynard is liable for the tuition of these students, but is reimbursed by the State for fifty percent of the amount expended.

By a recent change in the provisions of Chapter 74 of the General Laws, the town of Maynard is required to pay for the transportation of these students who attend such schools. The town is reimbursed by the State for fifty percent of the amount expended.

ADULT ALIEN EDUCATION

The School Committee made an effort to form Adult Alien Education Classes in the fall but the enrollment was below the number approved for the classes. The State Department wishes a minimum of twenty pupils.

At no time were there more than twelve pupils present for instruction. There are many adult aliens in Maynard but their working hours are such that they cannot attend evening classes.

CONCLUSION

We hope you are aware that your school system is continuing within its financial and physical limitations to do an excellent job in training our children. Our system provides what might be called "basic education." We do not offer any costly extra or experimental courses yet there is a reasonable amount of general enrichment, cultural and social activities in our curriculum.

In spite of its financial and physical limitations, your school system, we feel, meets the needs of the children of Maynard.

We know this from the continued reports which come to us from institutions of higher learning attended by our graduates as well as from surveys and inspections by agents of the Massachusetts Department of Education. Our system, though small, compares most favorably with any public school system in the state. With the support of the citizens of the town, it shall continue to do so.

The report of the Superintendent of Schools, which follows, in a large measure covers the activities and conduct of the School Department and deals with its accomplishments, its aims, and its purposes. We recommend this report for your consideration.

We wish to take this opportunity to express our appreciation to the Superintendent of Schools, the Principals, and the entire school personnel for making a very successful year possible.

Respectfully submitted,

JOSEPH E. BOOTHROYD, Chairman,
NOBLE E. LOOMER, JR., Secretary,
PHILIP S. MORRISON.

January 14, 1952

Report of the Superintendent of Schools

To the School Committee and Citizens of Maynard:

It is with pleasure that I submit my annual report. The object of the report is to summarize the statistics, policies and procedures for which I am responsible.

ENROLLMENT

The enrollment per teacher is conducive to good learning situations in the majority of grades. The policy that all pupils accepting transportation attend the Roosevelt School not only makes a better teacher-pupil load in all buildings, but also saves the salary of at least one teacher. An average of forty-four pupils are transported daily although there are peak loads of fifty-four.

The present grade four enrollment at the Roosevelt School indicates that an additional teacher will be necessary for grade five beginning next September.

The building enrollment as of January 7, 1952 is as follows:

| | Grade — | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | Totals |
|-------------|---------|----|-----|-----|-----|----|----|----|----|----|----|----|----|--------|
| School: | | | | | | | | | | | | | | |
| Senior High | | | | | | | | | | 75 | 78 | 65 | 57 | 275 |
| Junior High | | | | | | | | 76 | 85 | | | | | 161 |
| Roosevelt | 29 | 20 | 34 | 34 | 33 | 32 | | | | | | | | |
| | 26 | 20 | 35 | 33 | 10 | 11 | | | | | | | | 317 |
| Coolidge | 20 | 30 | 29 | 34 | 33 | 26 | | | | | | | | 172 |
| Wilson | 20 | 23 | 36 | 22 | 28 | 25 | | | | | | | | 154 |
| Totals | 95 | 93 | 134 | 123 | 104 | 94 | 76 | 85 | 75 | 78 | 65 | 57 | | 1079 |

PERSONNEL

I feel that we have been fortunate in recent appointments of personnel. The teachers working in Maynard for the first time since September seem to be making every effort to meet the needs of the Maynard pupils. A list of the personnel is given elsewhere in the report.

SUPERVISION AND INSTRUCTION

The education of our young people takes on an increasing importance precisely because the present world emergency is largely a struggle of ideas and ideals — a moral and spiritual struggle that will finally be won by educational progress not atomic bombs.

While this is nation wide in its implications, it applies to Maynard just as much as to the largest city in the country.

Adequate school training is imperative if today's children are to be mature citizens tomorrow ready to handle the problems of the times.

We can be justly proud of what we have accomplished to date in Maynard but we cannot afford to be smug.

Maynard voters are to be commended for the support they have given schools. They have supported budgets for renovations, supplies and texts. Such spending is not extravagance but sound investment for your children.

Education for our times includes thinking as well as knowing and doing. As you read this report, I hope you will recognize the underlying philosophy of the curriculum in Maynard. We are aiming to build sound ideals and useful habits. We try to develop children willing to do things that contribute to their physical, mental and spiritual welfare.

As a whole, School and Home relations in Maynard are very good. The majority of parents have a good understanding and appreciation of the teacher's job. They appreciate the efforts the teachers are making to adjust the program to the capacities of the individual children. We try to stimulate the bright, alert pupils to brilliant work, the average pupil to do his best, and we do not break the hearts of the pupils who are less able than others. The place of the architect in business is understood. As we admire a structure of any nature the first question asked is "Who is the architect?" With the answer, a conclusion — favorable or unfavorable is formed. Parents and teachers are the architects of destiny. The business of each generation is to rear another generation able to cope with the problems of the times in which they live.

The school year of 1951-52 saw the beginning of a P.T.A. Association in Maynard. I believe it is in order even as part of my own report to list the objectives of the National P.T.A.

1. To promote the welfare of children and youth in home, school, church, and community.
2. To raise the standards of home life.
3. To secure adequate laws for the care and protection of children and youth.
4. To bring into closer relation the home and the school, that parents and teachers may cooperate intelligently in the training of the child.
5. To develop between educators and the general public such united efforts as will secure for every child the

highest advantages in physical, mental, social, and spiritual education.

The P.T.A. can exert a very powerful influence as an instrument to unite the community in the interest of the school rather than being a spring board for accusations, disunion, schism, loss of valuable personnel and educational leadership. When parents and teachers will join together, children and youth can be helped to see how progress in society evolves and what the responsibility of every one is in his own society.

The Maynard Schools are conducted as democratically as is practical. Democracy in education means that the one who is affected by the program shall have a voice in it so far as his competency will permit. I hold the opinion that most every teacher intends to do the best she is able for the child, but there are times when a teacher reaches her own capacity and needs to know what her other co-workers are doing in the same field.

During this school year, the teachers of each grade have been holding a series of work conferences. They have been concerned with their own problems and the unifying of their work and not problems of administration.

In spite of the rising cost of supplies and texts, we have been able to secure a sufficient amount for the reasonable needs of every child.

Our textbooks are up to date and adequate in number. I have long felt the need for more emphasis on working with the dictionary. We have now purchased for grades four through eight new, up to date dictionaries with workbooks. Regular lessons will be planned in which the dictionary period will be just as important as the arithmetic period. In this way, I hope to build up an attitude of study whereby the child will refer to the dictionary without any hesitation.

AUDIO-VISUAL EDUCATION

The Audio-Visual Aid program for Maynard is under the direct supervision of Miss Dalton. It is a program which must, by its very nature, develop slowly. Teachers must be led to realize the value of audio-visual aids as well as taught how to use them.

The very close cooperation between teachers and the director has resulted in an excellent program. Teachers work together in the selection of the various aids. The director secures them and instructs the teachers in their use.

The following equipment is now in use in the system:

The Film Strip Projectors
One Tape Recorder
One Califone
One Opaque Projector
Two Slide Projectors
One 16mm Machine

GUIDANCE

This September brought about the realization of a long range plan of mine to bring into the elementary grades a person who would be qualified to assist pupils and teachers with special problems. It is a misunderstanding of the purpose and value of guidance to associate it entirely with high school pupils. When we began the program we began with the high school level because the need at that level was very pertinent. Now that the program is well formed in the high school, we have begun to work in the elementary grades.

We work with the underlying philosophy that to help a child there must be a careful study of the total individual personality — all factors, physical, mental, moral and social, being part of the whole. The program is under the supervision of Miss Mary I. Queenan.

High School Guidance — The guidance program in the High School has followed the system so expertly developed by previous guidance directors, with minor changes and additions. All Seniors have been interviewed at least once, to date. Many have conferred with the counselor several times, concerning problems and plans. A list of students who failed in academic or business subjects, during the first term, was provided by the principal. These students were interviewed individually. Becoming acquainted, in casual and formal situations, has been mutually beneficial to students and counselor.

A variety of tests, to be administered in January, will contribute additional data to aid students in planning future courses of action. The Juniors will be given a vocational battery of tests by the Boston University Co-operative Testing Service. The U. S. Employment Service in Marlborough will give an aptitude battery of tests to those Seniors who will be entering the labor market immediately after graduation and who have no definite job in view. On a voluntary basis, Sophomores may take the Kuder Preference Record, which indicates definite vocational interests.

Occupational and educational information has been distributed through various channels. Many career talks have been planned, some of which have already been given, to acquaint students with opportunities, requirements and duties

of the careers of interest to them. The following professional people have given talks to date:

- Col. Whitney — National Guard
- Dr. Lois Rosignold, Brandeis University — Liberal Arts Education
- Prof. Feldman, Worcester Polytechnic Institute — Engineering
- Mr. Rasetski, Babson Institute — Business Administration
- Mr. Bernard White, Boston University — Teaching
- Mr. Davis Low, Brown University — Science and Engineering

According to the Vocational Preference Poll taken in September, each student will be provided an opportunity to attend at least three of these talks by June.

In October, during one class period each day for a week, the counselor used the booklet, "Your Future Is What You Make It," as a text with the Seniors. The reading and discussion stimulated many to seek further information from the Guidance Library, which is constantly being enlarged with new college and nursing school catalogs, occupational pamphlets, charts, etc.

Seven career films have already been presented, with plans made for others. A National Guard Jamboree took place in the Auditorium, to which the older boys were invited.

Four senior girls and two post-graduates completed applications through the Guidance Office, for the Civil Service Examination for Clerk Typist, which was given in Boston on December 1. Also a senior and a post-graduate secured information and applications for the NROTC Examination, which they took in Waltham on December 8.

A group of girls, accompanied by the counselor, attended Open House at Kathleen Dell School in Brookline. This is the first of a series of field trips on the roster.

From the inventory, taken in September, of those who desire part-time employment, an index was compiled. From this index file a dozen or more students have been placed in suitable part-time jobs, some of which promise to be permanent after graduation. This placement service will become more active in the spring.

With the co-operation of the High School teachers, a review course has been planned for those who will take the College Board Examinations in the spring.

A follow-up survey was made of the members of the Class of 1951, in which information was gathered from all of the sixty-

one graduates. It is significant to note that 32.8 per cent are continuing their education, while eleven young men, or 18.0 per cent of the class, are in the armed services. The following tabulation gives the status of the Class of 1951 as of December 21, 1951.

Status of the Class of 1951

| Status | Number | Per cent |
|--|--------|----------|
| Full-time employment | 28 | 45.9 |
| Part-time employment (also attending school) | 3 | 4.9 |
| Unemployment (home reasons) | 2 | 3.3 |
| In school | 20 | 32.8 |
| In armed services | 11 | 18.0 |

The twenty students who are attending schools have chosen the following:

Types of Schools Attended by the Class of 1951

| Type of School | Number attending |
|----------------------------------|------------------|
| Colleges and University | 6 |
| Private Business School | 3 |
| Vocational or Trade School | 5 |
| Nurses Training School | 5 |
| Preparatory School | 1 |
| | — |
| | 20 |

Fields of Endeavor of those Students Continuing Education

| Field | Frequency |
|-------------------------------|-----------|
| Nursing | 5 |
| Teaching | 2 |
| Business Administration | 2 |
| Secretarial | 2 |
| Machinist | 2 |
| Engineering | 1 |
| Science | 1 |
| Stenography | 1 |
| Building Construction | 1 |
| Electrician | 1 |
| Cabinet Making | 1 |
| Airplane Mechanic | 1 |

Since guidance activities are now well under way, there will be more intensive action in the area of filing applications, arranging interviews, etc., for admission to schools for further education and training. Job placement for seniors will be important for most of the class.

Elementary Guidance — In the elementary grades, reports were obtained from teachers, concerning students who needed specialized study. From these reports, five pupils were selected for referral to the Traveling Clinic. A conference with the teachers of these pupils followed. Home visits were made by the counselor, in each instance, to obtain information for complete case histories. Parents were most co-operative in this matter. Some preliminary testing was done before the Clinic arrived on October 25.

Assistance has been given to certain physically handicapped children, by referral to specific state agencies, for possible treatment and specialized training.

In the Junior High School, the California Test of Mental Maturity was administered to all students. At a meeting of the teachers, the aims, results and interpretation of the tests were discussed. As an outcome, some revisions were made in ability grouping. The California Arithmetic Test, a diagnostic achievement test, was given to all Junior High School pupils. As a result of the comparison of mental ability with arithmetic achievement, discrepancies between the two scores indicated a need for diagnostic and remedial work, in some cases. A group was carefully chosen for this instruction, which is scheduled between 1:00 P. M. and 3:00 P.M., Tuesday through Friday. Personal data, cumulative records, test results, interviews, visits to trade school, etc., were employed in making adjustments which were found to be necessary in certain other problems of these adolescent children, in the Junior High School.

ART

There has been an effort on the part of the Art Supervisor to add more handwork to the Art program this year. Although both time and space for a workshop are limiting factors, handwork is a valuable motivating factor in development of an interest in Art.

Four high school girls are attending the Massachusetts School of Art on Saturdays.

MUSIC

A child whose education includes music will be a well balanced and happy adult. The music program is progressive in its offerings and enrichment.

It begins with rhythm training and singing of rote songs. Understandings and appreciations of music at different levels are developed. The child has an opportunity to play an instrument of his own choice and profit from participation in an organized band, chorus or choir during school hours.

A group of mothers have organized a Band Mothers' Club and are assuming the responsibility of purchasing uniforms. This is an example of the cooperation between school and home in Maynard. At the present time there are thirty members in the band and forty-three pupils taking lessons.

The Junior High Girls' Glee Club of fifty voices broadcast a fifteen minute program of Christmas music over Station WKOX.

We acknowledge the gift of a French Horn from Mrs. Ojal-eh-to and pianos from Mrs. Bertha Davis and Mrs. Adelaide Sims.

PHYSICAL EDUCATION

It is the aim and purpose of our physical education program to contribute to the individual's general education in making that individual better able to take his place in society through participation in physical activities.

To develop as much as possible a well coordinated, flexible body:

1. By running and chasing.
2. By climbing, jumping and suspension.
3. By kicking, throwing and batting.

To provide for play out of doors as much as possible and indoors when conditions necessitate.

To develop in the child a knowledge of, and desire for good health and clean living.

During the winter months and days when weather did not permit outdoor activities, classes were conducted indoors.

1. Talks on general behavior and attitudes.
2. Talks on health of the individual and how he can build and maintain good health.
 - a. These talks were ably assisted by the use of motion pictures on Dental Care and Health in general.
3. All sports are discussed in general class participation.
 - a. Our own varsity teams and boys brought up for discussion in attempts to increase school spirit.

HOUSEHOLD ARTS

The work done in the Household Arts may well be summarized by the listing of three objectives.

1. To teach girls not only how to make garments, but to select patterns and fabrics intelligently; to help purchase clothes wisely; also to assist girls in proper methods of caring for their clothing.
2. To teach girls how to buy, prepare, serve, and care for food in accordance with the family's needs and income.
3. To teach girls how to live healthy lives and also to show girls how they can be helpful in the home by giving them some lessons in home nursing, first aid, and child care.

INDUSTRIAL ARTS

The subject Industrial Arts is required by all boys in the seventh and eighth grades and elective in grades nine through twelve. The present enrollment in the course is a total of eighty-three boys in the Junior High level and a total of forty-nine in the High School level. The number of High School students enrolled in the course has increased five per cent in one year and at least twenty per cent in four years. This one item alone shows that the course is an increasingly important part of today's educational program of preparing young people for life.

For many of the Junior High School boys, Industrial Arts provides the first practical application of their other school subjects. The student finds early in the course an opportunity to apply his knowledge of arithmetic through measuring, and to apply his knowledge of English through oral and written instructions.

Industrial Arts of today does not strive solely to create skilled tradesmen although the student may later follow some trade, rather do we wish to provide him with a trial period of his skills and aptitudes.

The shop program is as flexible as can be so as to suit the many and varied needs of all students taking the course, limitations imposed only because of equipment or students capabilities.

Projects are of wood, metal, Keene Cement, or a combination of these materials selected by the student because of the need and usefulness of the article. Each student can progress just as far as he is capable without regards to the progress of the rest of the class. Class instruction is often used when information new to the entire group is offered. In almost every group of students there is usually one or two students who are at a loss as to what to make, usually for personal reasons. These students are counseled in making minor repairs for the school system or for the shop as the need arises.

DRIVER EDUCATION

Once again, through the courtesy of the Middlesex Motors of Concord, Maynard High School will be able to offer a course in Driver Education.

The class room instruction is compulsory for all Juniors. Behind the Wheel instruction is given with the consent of parents in a dual control car.

The typical driver-education course, in addition to behind-the-wheel training on the road, includes these topics: the social, economic and historical background of the traffic control problem; psycho-physical prerequisites for good driving; the construction and maintenance of the motor car; the state motor vehicle laws and traffic regulations and their relation to those of other states; causes and prevention of traffic accidents; techniques in the art of driving.

These topics include facts from the natural sciences, social studies, health, physiology, and consumer education. Obviously, then, such a course involves more than just learning how to push pedals and steer. Safety in today's complex traffic pattern calls for much more than just learning how to start, steer and stop a motor car. Driver education, in addition to teaching a number of significant safety factors and their relation to efficient driving, emphasizes the development of good attitudes in young drivers.

MISCELLANEOUS *Excerpts from Principals' Reports

Roosevelt School — "Continued enthusiasm was shown by the children of the school in their school newspaper published during the months of January to June. Miss Betty Morton, then teacher of Grade Six, supervised this activity incorporating it into the language and reading program of the school. Contributions were made by pupils throughout the school and finally edited by an editorial staff of sixth grade pupils. The newspaper, published in two editions (one for primary grades and one for upper elementary grades), was entirely planned and executed by pupils, even to the typing of the stencils and the duplication and distribution of the newspaper.

In June of last year, the cooperation of fifth grade parents and pupils provided a farewell party for pupils leaving the school for the junior-high school. Fifth grade pupils wrote and sent out invitations while the sixth graders correlated their work with their language and, working in committees, provided a class prophecy, a class will and a class speech for the occasion.

An educational trip of a historical nature was taken by all pupils of the sixth grade last June. Money for the trip was

raised through the collection and sale of newspapers. Pupils of all grades contributed old newspapers to this drive. The trip included visits to all the major historical points of interest in Boston and vicinity including the Governor's office, the House of Representatives while it was in session, Paul Revere's house, and two of the most complete museums of Boston. These and many other points of interest furnished these pupils with an understanding of many of the things they had read and studied about.

Other extra-curricular activities participated in were special programs and a special handball tournament with pupils from all grades participating. In the latter activity pupils kept the schedule and record of standings.

In all these activities every effort was made to correlate each with the regular instructional program.

The former office-nurse's room (Room 2) was converted to a combination of office and teachers' room by partitioning. By the addition of some inexpensive but functional furniture, this room has become not only a teachers' room but an excellent place for group conferences and parent-teacher conferences. It also serves as a lunchroom for teachers remaining in school for lunch.

At present the only portion of the plant needing attention is the roof on the south side of the building, which has been leaking into the inner walls during recent snow and rain.

The immediate job of public relations — that between parent and teacher — has been given primary attention. In addition, information has been furnished to parents through notices, letters and through the newspapers.

As often as necessary personal contact of parent and teacher has been encouraged where a pupil's welfare was involved. Parents have been most cooperative in all contacts. Parents have been encouraged to visit the school at any time. With inauguration of a parent-teacher association, it is expected that the link between the school and the home will become more binding — all to the benefit of the individual child.

In order to keep parents informed of any progress of their children, a form informing the parent of any attention the pupil needs is still sent home at each marking period, thus promoting better home-school relations by calling such matters to the parents' attention in adequate time for parent-teacher cooperation in this matter. Changes in school time, information regarding programs and periods of vacation are all kept before parents through short written notices. From time to time releases are sent to local newspapers."

Wilson School — "In January the pupils of Miss Murray's third grade received certificates for library books read as a result of a tour of the Public Library during National Book Week. At this time children were made acquainted with the section where books suitable for their reading ability are available. Library cards were issued to the children, many for the first time.

Certificates were issued to pupils of the sixth grade who participated in the State Library Program and fulfilled the State Requirements.

Miss Morgan our librarian, has been most cooperative and patient with our children.

In April pupils of grade three took their annual tour of the historical places in Concord, visiting the Battleground, Hill Cemetery, Old North Bridge, Orchard House and Louisa May Alcott's House. Much was gained by this field trip. Transportation was furnished by our congenial School Bus Driver in the School Bus. Several parents accompanied Miss Murray and her pupils.

In May pupils of the third grade took a field trip to Longfellow's Historical Wayside Inn in Sudbury visiting the Little Red School House, the Coach House and the Grist Mill. Transportation for this trip was furnished by six parents who chauffeured and gave the use of their cars.

In June a field trip was taken by the pupils of Miss Ledgard's fifth grade to the Childrens' Museum at Boston. Brothers and sisters from other grades who had never been to the museum were invited to go on this trip. Several parents volunteered to accompany the teacher to help with the supervising of the children. Teacher, pupils and parents agreed that the trip was well worth while. It was educational to some of the parents who admitted never having had the opportunity to visit the museum and were loud in their praises of the advantages given to their children.

We hope next year to have an opportunity to take grades one and two to the nearby Indian Museum in Harvard when they are working on their Indian Unit.

Miss Wood's sixth grade has made valuable use of the tape recorder, reflectoscope and stereograph. The tape recorder has proven to be invaluable in the teaching of English, Public Speaking, Reading and Music. By listening to the recordings of their own voices and hearing their own mistakes the children become more conscientious in making corrections.

The reflectoscope was used by them in many ways and proved to be most valuable in pointing out weaknesses in penmanship.

Original slides were made on the stereograph to illustrate sixth grade social studies, as well as paper drawings used on the reflectoscope.

These visual and audio-visual aids were used by the other grades, but not as extensively as in the sixth grade. All grades found the film and filmstrip program a valuable asset in teaching Social Studies.

We are very fortunate in having Miss Queenan, the Guidance teacher of the High School give some of her time to the elementary grades. She proved herself to be most efficient in handling problems.

Our second annual Play Day was held the first week in June. Folk dancing, Maypole Dance, Singing Games, Flag Drill, Rhythmical Gymnastics and competitive games were features of this program. A picnic lunch brought by the children and Green Spot furnished by the teachers was enjoyed after the program. Over a hundred parents and friends were present to witness the performance.

A loud speaker and record player owned by the schools jointly or by the school department would be most helpful and could be used at various times.

Our janitor keeps our building warm in spite of the inefficiency of the heating system by putting in long hours, arriving at the building early in the morning to have the building comfortable by the time the children arrive.

He also conscientiously directs traffic in front of the building at dismissal time to be sure that each child is safely across the heavily trafficked highway. Traffic lights installed at this point to be operated at dismissal time would be a safety measure."

Junior High School — "The homogeneous or ability grouping of the pupils is determined by the I.Q. and pupils' progress as evidenced by the teachers' marks. Instruction is varied to suit the different levels. There is provision for transfer from one group to another at various points. This grouping allows for extra assignments and broader applications with those children who most profit from them.

The guidance program is under the direct supervision of Miss Mary Queenan, who has administered two California tests this fall — The California Mental and the California Reasoning.

The home-room teacher and the director of guidance help the boys and girls of grade eight to select their courses for high school. Individual conferences are held when necessary.

Since assemblies are part of the educational program we try to make our assembly programing interesting to students. Our most popular types are: Musical, movies, plays based on holidays and a series of homeroom programs.

Every student in the school has come in contact with the use of audio-visual materials. The students on Miss Dalton's projection staff gain a great deal of personal satisfaction and a rich experience. The boys have an opportunity for a training which may help in selecting a vocation.

We try to be democratic and recognize that children differ in abilities and interests and should therefore be awarded accordingly. An honor roll and a perfect attendance list is published at the conclusion of each marking period. At our June assembly, honor pins were awarded to six pupils having an average of A for the entire year. Music pins were given to members of the orchestra — certificates to pupils having perfect attendance for the year — certificates to pupils having perfect teeth — letters to projectionists, varsity baseball and basketball players and winners of intramural basketball.

Pupil participation in the life of the school is surely one of the ways to teach boys and girls to become good citizens.

The eighth grade students spent a morning exploring the Science Museum in Boston. The Girls' Glee Club attended a Pops Concert in Symphony Hall. The graduating class (grade eight) had an outing at Norumbega Park."

Coolidge School — "The new heating system being contemplated for the building is badly needed to replace the obsolete equipment that we now have. This project I am sure will be beneficial to all.

During the past year it has been gratifying and encouraging to see the interest manifested by the parents by their attendance at the open house during "American Education Week" and many other seasonable programs.

The pupils were taken on several educational tours to the U. S. Post Office, Fire Department and historical points of interest in Concord, Mass."

CONCLUSION

The foregoing report of necessity has been brief. However, there are many examples of the work done by the children as well as for the children of which I wish the citizens of Maynard were aware.

If parents as well as the tax conscious public would visit schools in session and see the adequately equipped and well

maintained buildings in which their children are housed, I am sure they would observe a fine spirit and determination on the part of both personnel and children. Such a visit would give them a chance to join with me in expressing appreciation to all including children, for the part each one plays in the task of developing future citizens of Maynard.

Respectfully submitted,

MARY A. DOYLE,
Superintendent.

January 14, 1952.

Report of the High School Principal

Miss Mary A. Doyle
Superintendent of Schools
Maynard, Massachusetts

Dear Miss Doyle:

I herewith submit my report of the Maynard High School for the year 1951.

During these trying days of world upheaval with its rapid social, political and economic changes, there is bound to be confusion and doubt about existing values, institutions and practices. It is to be expected that the schools would be one of the first institutions to feel the need for re-evaluation of philosophies and objectives. Particularly is this true of the high school because it deals with a period of education that is closest to the time when the majority of students complete their formal education and take their places in this confusing social situation. If these students are to play their parts properly to further our democratic way of life, it is essential that the high school prepare them for the task.

One of the most difficult responsibilities of an educational institution is to maintain a dynamic progressive philosophy of education in this changing world. The objectives of education at all times must meet the needs of youth as those needs exist at the time of graduation.

As we all know, one of the first attempts to define the objectives of education was contained in the report of the Commission on the Reorganization of Secondary Education and known as the "Cardinal Principles of Secondary Education." These included such objectives as health, command of fundamental processes, worthy home membership, worthy use of leisure, citizenship, etc. Most schools in the Twenties and Thirties made specific references to these objectives and it was current practice to think of subjects in school valuable as they contributed to one or more of these Cardinal Principles.

The most recent re-valuation of objectives of secondary education was completed by the National Association of Secondary-School Principals in 1944 and is entitled "Education for All American Youth." This included the ten most imperative needs of youth for adjustment to life in our constantly changing democracy.

If Maynard is to continue to meet the needs of its high school graduates, it is essential that our educational philosophy and

objectives approximate those accepted by other high schools throughout the nation. These objectives for the most part have been our objectives, but they must continually be foremost in our minds and allowed to influence our educational thinking and planning as we revise the curricula and courses of study to keep our students aware of their world wide responsibilities. A listing of these objectives at this time cannot help but create a better understanding in the community of what we are trying to do for our children at the secondary level. Too often parents are influenced and confused by details and incidents of school life without realizing the basic policy and objectives of education for which we need their understanding and co-operation if we are to achieve the results which they themselves are so anxious to see.

We are all familiar to a greater or lesser degree with the objectives listed below but for clarity and unity of understanding, I ask that they be included in this report.

1. All youth need to develop saleable skills and those understandings and attitudes that make the worker an intelligent and productive participant in economic life. To this end, most youth need supervised work experience as well as education in the skills and knowledge of their occupations.

2. All youth need to develop and maintain good health and physical fitness.

3. All youth need to understand the rights and duties of the citizen of a democratic society, and to be diligent and competent in the performance of their obligations as members of the community and citizens of the state and nation.

4. All youth need to understand the significance of the family for the individual and society and the conditions conducive to successful family life.

5. All youth need to know how to purchase and use goods and services intelligently, understanding both the values received by the consumer and the economic consequences of their acts.

6. All youth need to understand the methods of science, the influence of science on human life, and the main scientific facts concerning the nature of the world and of man.

7. All youth need opportunities to develop their capacities to appreciate beauty, in literature, art, music and nature.

8. All youth need to be able to use their leisure time well and to budget it wisely, balancing activities that yield satisfactions to the individual with those that are socially useful.

9. All youth need to develop respect for other persons, to

grow in their insight into ethical values and principles, and to be able to live and work co-operatively with others.

10. All youth need to grow in their ability to think rationally, to express their thoughts clearly, and to read and listen with understanding.

The above principles do not prohibit the introduction of other objectives peculiar to the needs of Maynard children but are basic in the learning process if we are to turn out well-rounded students capable of successfully assuming positions of leadership and responsibility in the democratic society which we must maintain.

PERSONNEL CHANGES

During the year our personnel losses were heavy. Miss Barre, Director of Guidance; Mr. Wassel, Social Studies teacher and football coach; Mr. Smith, Mathematics teacher; Miss Hogarty and Miss Collins, Commercial teachers and Miss Marsden, English teacher, all left for other positions for various reasons. While we were fortunate in obtaining excellent replacements, it was still a great educational loss to the Town of Maynard. It takes time to orient new teachers to the point where they can work with 100% efficiency in carrying out their duties. They must become acquainted with our pupils, parents and community before maximum benefit can be realized.

GUIDANCE

The effectiveness of our guidance program would be increased tremendously if we were able to hold our Directors long enough for them to guide our classes from the time they entered until they left high school. In the last five years we have had four Directors. Those leaving have all been attracted by better positions in other schools. In spite of this drawback, the guidance results have been excellent. Through our testing and counseling program many students have been benefited. The percentage going to higher institutions is still above the average of the state. Follow-up studies of our graduates show most of them satisfactorily placed and proceeding normally on the path of good citizenship. This adjustment to life is more easily made when the students have had the opportunity of learning about themselves, (their strong points and limitations) through their contacts with the Guidance Department.

RECOMMENDATIONS

The reconditioning of the high school has continued during the year. Needed lighting has been installed, some rooms have been painted, desks have been resurfaced where needed, and

in general the building is in comparatively good condition. There are still a few rooms to be painted along the lower corridor but I assume that when funds are available the painting project in the high school will be continued until completed.

While more than half of the faculty left us during the year, I wish to assure you that both our regular and new members worked diligently to maintain the high standards you set for our school. I believe the results are evident in the success of our graduates.

In closing, I wish to thank you for your helpful suggestions and cooperation throughout the year.

Respectfully submitted,

ALBERT LERER,
Principal.

January 2, 1952.

Graduation Exercises

of the
Class of 1951
MAYNARD HIGH SCHOOL

GEORGE WASHINGTON AUDITORIUM
MAYNARD, MASSACHUSETTS
SUNDAY AFTERNOON, JUNE SEVENTEENTH
at three o'clock

PROGRAM
